Site ID: 154792
Site Name: SOS TOW
Violation Date: 4/17/2015
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)

Violation Description: Failure to complete and electronically submit a site map with all required content.

Violation Notes: Returned to compliance on 04/17/2015. A site map was not completed and submitted as part of the business plan to CERS. A site map shall contain a north orientation, loading areas, internal roads, adjacent streets, storm and sewer drains, access and exit points, emergency shutoffs, evacuation staging areas, hazardous material handling and storage areas, and emergency response equipment. Immediately log into the California Environmental Reporting System (CERS) at <http://cers.calepa.ca.gov/>, upload the correct or updated information, and submit to the EHD for approval. This was corrected on site.

Violation Date: 3/12/2020
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: OBSERVATION: The following hazardous waste containers were found on-site with an accumulation start date of greater than 180 days or no accumulation start date: -Two full black metal 55 gallon drums of used oil were observed along the southern fence line. Per Kenneth Sy (Driver), the drums have been there a couple years. REGULATION GUIDANCE: (a) Except as provided in subsections (c) and (d) of this section and section 66262.35, a generator may accumulate hazardous waste on-site for 90 days or less without a permit or grant of interim status, provided that: (b) The beginning of the 90 day period specified in subsections (a) and (c) of this section is determined as follows: (1) if the generator does not generate more than 100 kilograms of hazardous waste or one kilogram of acutely hazardous waste (listed in section 66261.33(e)) or one kilogram of extremely hazardous waste during any calendar month, the 90 day period begins on the date the generator has accumulated 100 kilogra

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-09-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Complete and submit a copy of the Return to Compliance Certification form to the EHD with a statement documenting the corrective actions that have been or will be taken for each violation, and any supporting paperwork, by April 8, 2016. Notes: A verbal consent to inspect, photograph and take sample was given by Sophat Sy, Owner. Conducted a closure hazardous waste inspection and observed a 5-gallon container of unknown dark liquid. Facility ceased operations of oil changes and is only towing vehicles and using the facility as car storage. The facility will remain as an active facility on the hazardous waste generator program until the corrective actions are taken and submitted to EHD. If the facility stores, handles or generates hazardous waste in the future then the facility is required to have a hazardous waste generator permit with EHD. Provided: Return to Compliance Certification form, EPA or State ID number application Waste Streams: used oil

Site ID: 409492
Site Name: AFFORDABLE AUTO REPAIR AND SMOG
Violation Date: 1/28/2020
Citation: HSC 6.5 25201.16(f) - California Health and Safety Code, Chapter 6.5, Section(s) 25201.16(f)

Violation Description: Failure to comply with the applicable requirements related to accumulation and containment standards for universal waste aerosol cans.

Violation Notes: Returned to compliance on 03/26/2020. OBSERVATION: The facility is managing universal waste (UW) aerosol can storage containers in a way that is out of compliance with this section. This facility disposed of two universal waste aerosol cans into the trash, an unauthorized point (see photo IMG 0626-7). One of the non-empty aerosol cans was missing its actuator. Mashin Mohammad, business owner, removed the two non-empty aerosol cans from the trash at the time of inspection. REGULATION GUIDANCE: (f) Any container used to accumulate or transport universal waste aerosol cans, or the contents removed from a universal waste aerosol can or processing device, unless the contents have been determined to not be hazardous waste, shall meet all of the following requirements: (1) (A) Except when waste is added or removed or as provided in subparagraph (B), the container shall be closed, structurally sound, and compatible with the contents of the universal waste aerosol can, and shall show no evidence of leakage, spillage, or San Joaquin County Environmental Health

Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)

Violation Description: Failure to label stationary hazardous waste tanks as "hazardous waste" and mark with an accumulation start date.

Violation Notes: Returned to compliance on 02/25/2020. OBSERVATION: The 200-gallon hazardous waste tank storing used oil does not have complete labeling. The tank was marked with an inaccurate accumulation start date of 2/11/2019 at the time of inspection (see photos IMG 0606-5). According to the facility's disposal records, the most recent used oil pick up was on 1/8/2020 (IMG 0635). REGULATION GUIDANCE: All hazardous waste tanks shall be marked with the words G Hazardous WasteG and the accumulation start date. CORRECTIVE ACTION: Label the hazardous waste tank with the accurate accumulation start date. Provide a corrective action statement and supporting documentation to the San Joaquin County Environmental Health Department (EHD) within 30 days.

Violation Date: 1/28/2020
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 02/25/2020. OBSERVATION: The following open hazardous waste storage containers were observed on-site on the west end of the facility: 1. A 55-gallon white poly drum storing used antifreeze, which contained an open black funnel inside of the drum's open bung hole (see photos IMG 0607-8). 2. A 55-gallon blue steel drum storing oily absorbent, oily rags, a used paper oil filter, and three drained metal oil filters (IMG 0611-2). 3. A 55-gallon black steel drum storing drained metal oil filters, at least two used paper oil filter, and drained transmission filters (IMG 0613-5). 4. A 55-gallon blue steel drum storing used paper oil filters and drained transmission filters (IMG 0616-7). 5. Two 55-gallon white poly drums, one adjacent to the other and storing used antifreeze (IMG 0618-21). REGULATION GUIDANCE: A container holding hazardous waste shall always be closed during transfer and storage, except when it is necessary to add or remove waste. CORRECTIVE ACTION: Immediately close

Citation: 22 CCR 16 66266.130 - California Code of Regulations, Title 22, Chapter 16, Section(s) 66266.130
Violation Description: Failure to properly handle, manage, label, and recycle used oil and fuel filters.
Violation Notes: Returned to compliance on 01/28/2020. Observed the following at the facility: 1) 1-55 gallon drum of drained used oil filters not stored in a closed container 2) 5 gallon container of drained used oil filters not stored in a closed container and not labeled 3) 5 drained used oil filters in a container not stored in a closed container and not labeled Used oil filters shall be drained of free-flowing oil, stored in a closed, rainproof container, labeled as G drained used oil filters, G and marked with an accumulation start date. Immediately store the drained used oil filters in a closed container, label and ensure that all used oil filters are managed in this way. Bills of lading for the recycling of used oil filters for the last three years were not found on site. A copy of each bill of lading must be kept on site for at least three years. Immediately locate a copy of all bills of lading for used oil filters for the last three years, maintain them on site, and submit copies to the EHD.

Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes: Returned to compliance on 02/25/2020. OBSERVATION: The following hazardous waste containers were found on-site without an accumulation start date: 1. A 55-gallon blue steel drum storing oily absorbent, oily rags, a used paper oil filter, and three drained metal oil filters (IMG 0611-2). 2. A 55-gallon black steel drum storing drained metal oil filters, at least two used paper oil filter, and drained transmission filters (IMG 0613-5). 3. A 55-gallon blue steel drum storing used paper oil filters and drained transmission filters (IMG 0616-7). The business operator could not provide hazardous waste disposal records for used paper oil filters for the past three years during the inspection. REGULATION GUIDANCE: (a) Except as provided in subsections (c) and (d) of this section and section 66262.35, a generator may accumulate hazardous waste on-site for 90 days or less without a permit or grant of interim status, provided that: (b) The beginning of the 90 day period specified in subsections (a) and (c) of thi

Violation Date: 1/28/2020
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes: Returned to compliance on 02/25/2020. OBSERVATIONS: Metal fines generated from rotor resurfacing were observed on and around the Accu-turn brake lathe (see photos IMG 0630-0633). According to Mashin Mohammad, business owner, in the past his brother would melt the metal fines to produce fishing anchors. Per Mashin, he is thinking about selling the brake lathe since he now rarely resurfaces rotors. REGULATION GUIDANCE: Any person who generates a waste shall determine if the waste is a hazardous waste as specified in Title 22 California Code of Regulations (CCR). There are wastes that are listed as hazardous wastes. There are wastes that exhibit one or more of the hazardous waste characteristics: toxic, corrosive, reactive or ignitable. CORRECTIVE ACTION: Immediately make a hazardous waste determination for the metal fines, and manage it according to Title 22 CCR. Use Safety Data Sheets (SDS), waste sampling and test results or other knowledge to support your hazardous waste determination. Waste testing must b

Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)

Violation Description: Failure to maintain uniform hazardous waste manifest, consolidated manifest, or bills of lading copies for three years.

Violation Notes: Returned to compliance on 01/28/2020. Copies of uniform manifests for the disposal of hazardous waste for used oil and antifreeze 2012, 2013, 2014 and 2015 were not found on site. Hazardous waste generators shall retain copies of all manifests signed off by the disposal facility and all receipts used in a consolidated manifesting procedure on site for three years and have them readily available for review. Immediately locate a copy of all manifests and receipts for the last three years, maintain them on site, and submit copies to the EHD.

Citation: 22 CCR 12 66262.40(c) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(c)
Violation Description: Failure to determine if the waste generated is a hazardous waste and to maintain analysis results for three years.
Violation Notes: Returned to compliance on 01/28/2020. Observed a 5 gallon container of saturated rags mixed with filters near the 55 gallon drum of drained used oil filters. Any person who generates a waste shall determine if the waste is a hazardous waste. Immediately make a hazardous waste determination for the 5 gallon container of saturated rags mixed with filters, and manage it according the Title 22 hazardous waste regulations. Submit a statement and supporting documentation explaining how this waste was managed.

Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)
Violation Description: Failure to dispose of hazardous waste within 180 days (or 270 if waste is transported over 200 miles) for the generator who generates less than 1000 kilogram per month, but more than 100 kilograms per month.
Violation Notes: Returned to compliance on 01/28/2020. Observed 1-55 gallon of waste antifreeze and a tank of used oil with the accumulation start date dated 12/10/14. Facilities who generate less than 1000 kg of hazardous waste per month and do not exceed 6000 kg of waste stored on site at any time may store waste on site up to 180 days. Immediately contact a licensed hazardous waste hauler to dispose of this waste under manifest and submit a copy of the manifest to the EHD.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-14-2015
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Complete and submit a copy of the Return to Compliance Certification form to the EHD with a statement documenting the corrective actions that have been or will be taken for each violation, and any supporting paperwork, by October 14, 2015. Please be aware as of January 1, 2013, all businesses are required to submit all hazardous materials information online to the California Environmental Reporting System (CERS) at <http://cers.calepa.ca.gov>. Be sure to include your hazardous waste activity in the Businesses Activities section in CERS in addition to any other relevant activities and required fields. Notes: Conducted a hazardous waste inspection. Permission granted by Jim Ibrahim. Facility was added to hazardous waste generator inventory in March 2015. There were no disposal records available for review at the time of inspection. Discussed about storage time, training, closed containers, retention of disposal records for 3 years and labeling and account balance. [Truncated]

S121782522

Violation Description: Failure to post the following information next to the telephone: (A) The name and telephone number of the emergency coordinator; (B) Location of fire extinguishers and spill control material, and, if present, fire alarm; and (C) The telephone number of the fire department, unless the facility has a direct alarm.

Violation Notes: Returned to compliance on 01/10/2020. OBSERVATION: A complete modified contingency plan was not available at the facility. REGULATION GUIDANCE: The business operator must post the following information next to telephones or in areas directly involved in the generation and accumulation of hazardous waste: the name and emergency telephone number of the emergency coordinator, the location of fire extinguishers and spill control material, and the telephone number of the fire department unless the facility has a direct alarm. CORRECTIVE ACTION: Immediately post the required information at the facility. Provide a statement to the San Joaquin County Environmental Health Department that the correction is complete.

Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.

Violation Notes: Returned to compliance on 01/10/2020. OBSERVATION: During the site walk through urethane sewage was observed hardened outside of the 250 gallon hazardous waste storage totes. REGULATION GUIDANCE: A hazardous waste generator must maintain and operate its facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment. CORRECTIVE ACTION: Immediately remove the wastes. Manage the waste according to Title 22 California Code of Regulations for hazardous waste. Submit a statement and supporting documentation to the San Joaquin County Environmental Health Department describing the storage and final disposition of the cleaned up waste.

Violation Date: 10/25/2019
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: Returned to compliance on 01/07/2020. OBSERVATION: During the site walk through six 250 gallon totes of urethane sewage stored near the back of the shop near the exit did not have an accumulation start date to demonstrate the length of time waste has been stored on site. Since there was no accumulation start date marked on the containers or recent disposal records to demonstrate storage time it is assumed waste has been on site greater than 180 days. REGULATION GUIDANCE: (a) Except as provided in subsections (c) and (d) of this section and section 66262.35, a generator may accumulate hazardous waste on-site for 90 days or less without a permit or grant of interim status, provided that: (b) The beginning of the 90 day period specified in subsections (a) and (c) of this section is determined as follows: (1) if the generator does not generate more than 100 kilograms of hazardous waste or one kilogram of acutely hazardous waste (listed in section 66261.33(e)) or one kilogram of extremely hazardous waste during any c

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Notes: Returned to compliance on 09/15/2015. A training program was on site, but was not submitted to CERS. Training programs for all employees and annual training, including refresher courses, shall include safety procedures for the event of a release or threatened release of a hazardous material, including, but not limited to, familiarity with the facility's emergency response plans and procedures. These training programs may take into consideration of each employee. Immediately prepare or update the facility's training program, log into the California Environmental Reporting System (CERS) at <http://cers.calepa.ca.gov/>, upload the correct or updated information, and submit to the EHD for approval. This was corrected on site.

Violation Division: San Joaquin County Environmental Health

Violation Source: CERS

Site ID: 50746
Site Name: MV TRANSPORTATION #9
Violation Date: 9/5/2018
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 09/05/2018. One container of used oil filters had an accumulation start date of 6/13/17 and another container of used oil filters was missing an accumulation start date. All hazardous waste containers shall be marked with the following information: - the words G Hazardous WasteG - name and address of generator - hazardous properties - physical state - composition (contents) - accumulation start date Immediately label these containers and ensure that all containers are marked with all the required information. Corrected during inspection.

Violation Division: San Joaquin County Environmental Health

Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 09/16/2015. 2,000 gallons Diesel tank , 120 gallons of Antifreeze , 120 gallons of Used Antifreeze, 470 gallons of Oil, 240 gallons of Used Oil , and 55 gallons of Automatic Exhaust Fluid (ATF) were found on site that have not been reported. Any material that meets or exceeds the reportable quantity shall be reported in the facility's business plan. Immediately log into the California Environmental Reporting System (CERS) at <http://cers.calepa.ca.gov/>, add the materials to the hazardous material inventory, and submit to the EHD for approval. This was corrected on site.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-09-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Complete and submit a copy of the Return to Compliance Certification form to the EHD with a statement documenting the corrective actions that have been or will be taken for each violation, and any supporting paperwork, within 30 days of receiving the completed inspection report. Facility does not have internal roads and this element was not addressed on the site map. Please address this by either writing G NAG for not applicable or a statement that says the element is not on site. Please correct this by the next submittal. Assisted with CERS access and update of inventory elements at the time of inspection. Starting September 1, 2018, all in-office CERS help will be provided at EHD hourly rate (\$152). To schedule an appointment, please call (209) 468-3420.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-04-2015
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: No Violations were observed during the inspection. The business has three cylinders of Acetylene, and only two of them were reported to CERS, and three cylinders of oxygen and only two of them were reported to CERS. These two cylinders were added recently to the shop. I helped the business to adjust the number in CERS. Please be aware as of January 1, 2013, all businesses are required to submit all hazardous materials information online to the California Environmental Reporting System (CERS) at <http://cers.calepa.ca.gov>. Be sure to include your hazardous material activity in the Businesses Activities section in CERS in addition to any other relevant activities and required fields.

Violations:

Site ID: 68149
Site Name: SJ CO MOTOR POOL SHOP
Violation Date: 1/11/2016
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173

Violation Description: Failure to properly close hazardous waste containers when not in active use.

Violation Notes: Returned to compliance on 01/21/2016. Observed the following: a. A open container of used oil with several drained used oil filters resting on it inside the heavy duty shop. b. A 55 gallon drum of used absorbent found open in the heavy duty shop. This was corrected on site. c. A 55 gallon drum of waste antifreeze outside in the hazardous waste storage area was found open. This was corrected on site. All hazardous waste containers shall be closed at all times except when adding or removing waste. Immediately close these containers and ensure all hazardous waste containers are closed when not adding or removing waste.

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-11-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes:

An inspection checklist was provided to the facility operator, David Myers, on the day of inspection. The EHD has written the complete report which replaces the initial checklist. Complete and submit a copy of the Return to Compliance Certification form to the EHD with a statement documenting the corrective actions that have been or will be taken for each violation, and any supporting paperwork, by February 11, 2016. Notes: A verbal consent to inspect, photograph, and sample if necessary was given by David Myers, Management Analyst. Discussed the inspection report, management of empty container, hazardous waste determination, management of drained used oil filters, and hazardous waste labeling requirements. Provided: Return to Compliance Certification form, hazardous waste labels and labeling requirements, photos and a list of free CUPA courses. Waste Streams: used oil, antifreeze, drained used oil filters, part washer solvent, metal fines, and used absorbent [Truncated]

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Violation Date: 6/29/2020
Citation: 40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.

Violation Notes: Returned to compliance on 07/02/2020. OBSERVATION: Spillage from a broken container of Scofield Dry Shake Color Hardener was observed in the facility's warehouse. The hardener had mixed with water that had spilled from a water hose, according to Art Parco, Branch Manager. Roger Schiaffino, Assistant Branch Manager, demonstrated on the

facility's computer system that the spilled Scofield Dry Shake Color Hardener is hazardous waste. Roger printed a hazardous waste label for the spilled material and stated that the spillage will be cleaned up, placed in a 5 gallon bucket, and labeled as hazardous waste.
REGULATION GUIDANCE: A hazardous waste generator must maintain and operate its facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment. CORRECTIVE ACTION: Immediately clean up the color hardener spillage. Manage the waste according to Title

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violation Date: 6/4/2014
Citation: 19 CCR 4 2729.5 - California Code of Regulations, Title 19, Chapter 4, Section(s) 2729.5
Violation Description: Failure to submit inventory reports (Activities, Owner/Operator, Hazardous Materials Descriptions and Map pages, if required. Documentation must be resubmitted (for facilities which exceed EPCRA thresholds) or re-certified (for facilities which do not exceed EPCRA thresholds) by March 1.
Violation Notes: Returned to compliance on 08/12/2014. A current Hazardous Materials Business Plan has not been submitted. The Hazardous Materials Business Plan shall be submitted by January 15th of each calendar year. The Hazardous Materials Business Plan includes the following information: Business Activities, Business Owner/Operator Identification, Hazardous Material Inventory, and Site Map. Immediately log into the California Environmental Reporting System (CERS) at <http://cers.calepa.ca.gov/>, enter the correct or updated information, and submit to the EHD for approval. This is a Class II violation.

Citation: 40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Description: Failure to ensure that all employees are thoroughly familiar with proper waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies.
Violation Notes: OBSERVATION: Based on the following violations observed at the time of inspection, the facility employees are not trained on proper hazardous waste (HW) handling or the training provided has been inadequate: - The following releases of hazardous wastes were observed on-site: 1. Three 55-gallon blue steel drums storing used oil were observed with standing used oil on top of the drum lids (see photos IMG 0527, 0530-4, 0536). 2. A 55-gallon white poly drum storing used antifreeze was observed with standing used antifreeze on top of the drum lid (IMG 0528) 3. Two used paper oil filters were found inside an open yellow funnel on top of the used antifreeze poly drum (IMG 0528-9). 4. A used paper oil filter was found inside an open yellow funnel on top of one of the used oil steel drums (IMG 0534, 0536). 5. The secondary containment for the three steel drums of used oil and the one poly drum of used antifreeze contained what appeared to standing used oil, and at least two used paper

Violation Notes: OBSERVATION: At least two spent lead acid batteries were observed on site at the time of inspection. According to Irma Ulloa, manager, the business takes its spent lead acid batteries to Auto Zone for recycling. Bills of lading for the recycling of lead acid batteries from 1/16/2017 through 1/16/2020 were not found on site. REGULATION GUIDANCE: (A) The generator shall use either the manifest or a bill of lading which fulfills the requirements of Title 13 CCR section 1161, to record the shipment of spent lead-acid storage batteries to a person who stores the batteries or who uses, reuses, recycles or reclaims the batteries or their components. (B) The generator shall retain, at the generator's place of business for at least three years, a legible copy of each manifest or bill of lading which identifies spent lead-acid storage batteries shipped to a person who stores the batteries or who uses, reuses, recycles or reclaims the batteries or their components. Violation Date: 1/11/2016
Citation: HSC 6.5 25160.2 - California Health and Safety Code, Chapter 6.5, Section(s) 25160.2
Violation Description: Failure to meet any of the following consolidated manifest requirements: 1) Legible receipts for each quantity of hazardous waste that is received from a generator, 2) The generator's information (name, address, identification number, contact person, telephone number of the generator, the signature of the generator or the generator's representative), 3) Date of the shipment, 4) The manifest number, 5) The volume or quantity of each waste stream received, 6) The name, address, and identification number of the authorized facility to which the hazardous waste will be transported, 7) The transporter's information (name, address, and identification number, the driver's signature), 8) A statement, signed by the generator, certifying that the generator has established a program to reduce the volume or quantity and toxicity of the hazardous waste to the degree economically practicable. 9) The generator shall retain each receipt for at least three years.
Violation Notes: Returned to compliance on 01/16/2020. Copies of hazardous waste disposal records for used oil and antifreeze for 2013, 2014 and 2015 were not found on site. Irma Ulloa provided 3 copies of consolidated manifests (2011, 2013, and 2015) for used oil and drained used oil filters. According to Irma Ulloa, the antifreeze has been picked up after 2011, but did not see disposal records for antifreeze. Hazardous waste generators shall retain copies of all manifests signed off by the disposal facility and all receipts used in a consolidated manifesting procedure on site for three years and have them readily available for review. Immediately locate a copy of all manifests and receipts for the last three years, maintain them on site, and submit copies to the EHD.

Violation Date: 1/16/2020
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: OBSERVATION: The following hazardous waste containers were found on-site without an accumulation start date: 1. Three 55-gallon blue steel drums storing used oil (see photos IMG 0527, 0530-1, 0534). 2. A 55-gallon white poly drum storing used antifreeze (IMG 0528). 3. Two used paper oil filters were found inside an open yellow funnel on top of the used antifreeze poly drum (IMG 0528-9). 4. A used paper oil filter was found inside an open yellow funnel on top of one of the used oil steel drums (IMG 0534, 0536). 5. A 55-gallon black steel drum storing paper and metal oil filters, labeled as Drained Used Oil Filters And Fuel Filters, which was marked with an illegible accumulation start date (IMG 0538-41). 6. A white 5-gallon bucket storing used oil (IMG 0552-3). 7. A red oil caddy was observed with its open funnel containing used oil (IMG 0554-5). 8. A white 5-gallon bucket storing used absorbent (IMG 0556). REGULATION GUIDANCE: (a) Except as provided in subsections (c)

Citation: 40 CFR 1 262.34(d)(5)(i) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(i)

Violation Description: Failure to have at least one employee either on the premises or on call (i.e., available to respond to an emergency by reaching the facility within a short period of time) with the responsibility for coordinating all emergency response measures.

Violation Notes: OBSERVATION: A complete modified contingency plan with an assigned emergency coordinator was not posted at the facility. REGULATION GUIDANCE: The emergency coordinator or his designee must respond to any emergencies that arise. The business operator must post the following information next to telephones or in areas directly involved in the generation and accumulation of hazardous waste: the name and emergency telephone number of the emergency coordinator, the location of fire extinguishers and spill control material, and the telephone number of the fire department unless the facility has a direct alarm. CORRECTIVE ACTION: Immediately post the required information at the facility. Provide a statement to the San Joaquin County Environmental Health Department that the correction is complete.

Violation Notes: date.
OBSERVATION: Hazardous waste containers were observed on-site with incomplete labeling. The following hazardous waste containers were missing the words G Hazardous WasteG , name and address of generator, hazardous properties, physical state, composition (contents), and accumulation start date. 1. Three 55-gallon blue steel drums storing used oil (see photos IMG 0527, 0530-1, 0534). 2. A 55-gallon white poly drum storing used antifreeze (IMG 0528). 3. Two used paper oil filters were found inside an open yellow funnel on top of the used antifreeze poly drum (IMG 0528-9). 4. A used paper oil filter was found inside an open yellow funnel on top of one of the used oil steel drums (IMG 0534, 0536). 5. A 55-gallon black steel drum storing paper and metal oil filters, labeled as Drained Used Oil Filters And Fuel Filters (IMG 0538-41). 6. A white 5-gallon bucket storing used oil (IMG 0552-3). 7. A red oil caddy was observed with its open funnel containing used oil (IMG 0554-5). 8. A

Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-04-2014
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Consent to perform the inspection, take photos and collect samples was given by Irma Ulloa; owner . Complete and submit a copy of the Return to Compliance Certification form to the EHD with a statement documenting the corrective actions that have been or will be taken for each violation, and any supporting paperwork, by July 4, 2014. A copy of photos taken at the time of inspection were provided to Irma Ulloa. Please be aware as of January 1, 2013, all businesses were required to submit all hazardous materials information online to the California Environmental Reporting System (CERS) at <http://cers.calepa.ca.gov>. Be sure to include your hazardous material activity in the Businesses Activities section in CERS in addition to any other relevant activities and required fields.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-16-2020
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Notes: - The amount of hazardous waste generated in the last calendar year could not be determined at the time of inspection due to a lack of disposal records. - Violations 102 and 601 were added to the inspection report. - Violation 117 was replaced with Violation 120. An inspection checklist was provided to the facility operator on the day of inspection. The EHD has written and amended the complete report on 1/22/2020 which replaces the initial checklist. Complete and submit a copy of the Return to Compliance Certification form to the EHD with a statement documenting the corrective actions that have been or will be taken for each violation, and any supporting paperwork, by 2/21/2020. Starting September 1, 2018, all in-office CERS help will be provided at EHD hourly rate (\$152). To schedule an appointment, please call

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: Returned to compliance on 01/08/2020. Overfill prevention testing was conducted on 1/23/19. This testing was required to be conducted by October 13, 2018. Ensure all future testing is conducted within required time frames.

Violation Date: 1/24/2017
Citation: 23 CCR 16 2715(c) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(c)
Violation Description: Failure to comply with one or more of the following designated operator (DO) monthly inspection requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been properly trained.
Violation Notes: Returned to compliance on 02/10/2017. The designated operator failed to check and note the correct test dates for the monitoring system certification, spill container, line leak detector and secondary containment testing on the May through December 2016 designated operator monthly inspection reports. Instead of entering 1/12/16 for the monitoring system certification, spill container and line leak detector testing, the designated operator entered 1/27/16; and instead of entering 5/28/14 for the secondary containment testing, the designated operator entered 3/25/14. The designated operator listed 1/15/15 for the line leak detector and spill container testing on the 4/22/16 designated operator monthly inspection report instead of 1/12/16 for these tests, and listed 1/15/15 for the monitoring system certification, line leak detector, and spill container testing on the 2/26/16 designated operator monthly inspection report instead of 1/12/16 for these tests. The designated operator did not address the Q1:91 PLLD [Truncated]

Violation Date: 1/12/2016
Citation: 23 CCR 16 2715 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715

Violation Description: Failure to comply with one or more of the designated operator monthly inspection requirements: failed to inspect the monthly alarm history report; attach a copy of the alarm history; failed to inspect for the presence of liquid or debris in the spill container/spill bucket and under dispenser containment; failed to inspect the under dispenser containment to ensure that monitoring equipment is placed in the proper position; failure to inspect for liquid or debris in the containment sump where an alarm occurred or for which there is no record of a service visit; or failure to check that all testing and maintenance has been completed and documented.

Violation Notes: Returned to compliance on 02/02/2016. The designated operator failed to document all the alarms from the attached alarm history on the designated operator monthly inspection report and failed to check that they were responded to appropriately. The Q2 87 electronic line leak detector alarmed on 12-25-15, 12-15-15, and 12-3-15 for a PLLD shutdown alarm. The Q2 87 electronic line leak detector alarmed for gross line fail on 12-15-15. The Q1 91 electronic line leak detector alarmed on 9-20-15 and 8-24-15. The facility and the designated operator did not document these alarms. The designated operator did not document a response to these alarms. During the monthly inspection, the designated operator shall review the alarm history for the previous month, check that each alarm was documented and responded to appropriately, and attach a copy of the alarm history with documentation taken in response to any alarms to the monthly report. Violation Date: 1/19/2018
Citation: 23 CCR 16 2715(c) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(c)

Violation Description: Failure to comply with one or more of the following designated operator (DO) monthly inspection requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(f)(2).

Violation Notes: Returned to compliance on 01/19/2018. The designated operator failed to document all the alarms from the attached alarm history on the June 2017 designated operator monthly inspection report and failed to check that they were responded to appropriately. The missing alarms include: an L8 Dispenser 3/4 sensor out alarms on May 24, 2017 . During the monthly inspection, the designated operator shall review the alarm history for the previous month, check that each alarm was documented and responded to appropriately, and attach a copy of the alarm history with documentation taken in response to any alarms to the monthly report. Ensure that designated operators performing monthly inspections at this facility are including all of the required information on the reports. The facility provided a statement during inspection. This was corrected on site.

Citation: 23 CCR 16 2715(c)(4) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(c)(4)

Violation Description: Failure to maintain a list of employees trained by the designated operator on-site or off-site at a readily available location, if approved by the UPA. For training that occurs on or after October 1, 2018, failure to maintain a copy of the "Facility Employee Training Certificate" on-site or off-site at a readily available location, if approved by the UPA.

Violation Notes: Returned to compliance on 01/08/2020. The Facility Employee Training Certificate dated 1/9/19 contained no CERS ID, no zip code, and the "initial training dates" listed for the employees were after the "date of assuming responsibility as a facility employee". All site employees must be trained prior to taking responsibility as a facility employee if after October 1, 2018, or within 30 days of hire if prior to October 1, 2018. The Facility Employee Training Certificate shall contain accurate information for all employees trained. Update the Facility Employee Training Certificate to contain the accurate information and submit a copy of the updated form to the EHD.

Violation Description: Failure of leak detection equipment to be located such that equipment is capable of detecting a leak at the earliest possible opportunity.
Violation Notes: Returned to compliance on 01/24/2017. The 91-product submersible turbine pump sump 323 sensor was not located at the lowest point of the sump and not located to detect a leak at the earliest opportunity. Monitoring equipment shall be maintained to be able to detect a leak at the earliest possible opportunity. The sensor was relocated to the lowest point of the sump by the service technician. Ensure that all monitoring equipment is maintained to detect a leak at the earliest opportunity. This was corrected on site.

Violation Division: San Joaquin County Environmental Health

Violation Source: CERS

Site ID: 93214
Site Name: ARCO STATION #826951*
Violation Date: 1/23/2019
Citation: 23 CCR 16 2716(a) through (e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(a) through (e)
Violation Description: For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.
Violation Notes: Returned to compliance on 01/08/2020. The designated operator failed to document all the alarms from the attached alarm history on the designated operator monthly inspection reports and failed to check that they were responded to appropriately. The missing alarms include:
-T3 (91) probe out alarm on 4/2/18. The monthly inspection report states "no alarms" -The L10 (UDC 7/8) sensor out alarm on 5/15/18 was documented by the designated operator as "due to liquid in 7 + 8". According to a work order on site, this alarm was caused by a contractor accidentally knocking over the position sensitive sensor.
-The Q2 (87) gross line fail on 5/9/18 was documented by the designated operator as "due to liquid in 7 + 8 UDC". This would not be a possible cause for a gross line fail of a fuel lline. During the

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-15-2015
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Consent to perform the inspection, take photos and collect samples was given by Parmjit Singh, business owner. This facility's designated operator is James Williams and others from BZ Maintenance (ICC expiration date: 6/5/2015). The service technician was Zane Nimmo (ICC expiration date: 6/25/2015), who had the following manufacturer's certifications: VR 9/26/2015, VMI 1/30/2015. No violation was observed during this inspection. Slave UST turbine is still down for the second year. Only the Master UST turbine is working and the slave tank is effective being used as a siphon tank. Monitoring System is not affected; the sensor in the slave STP sump shuts down the Master STP when tested. Completed update of CERS information with Parmjit during this inspection. Please be aware that as of January 1, 2014, facility operators are required to upload the following UST program documents into the California Environmental Reporting System (CERS): UST Monitoring Site Plan, [Truncated]

Site ID: 96244
Site Name: AUTOMEISTER
Violation Date: 3/16/2015
Citation: HSC 6.95 25508.1(a)-(e) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(e)

Violation Description: Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name.

Violation Notes: Returned to compliance on 03/16/2015. During the inspection, it was found that the business has 100 gallons of Used Antifreeze and only 15 gallons are reported and the updated information has not been submitted. Within 30 days of one the following events, business shall electronically update the information submitted to the California Environmental Reporting System (CERS): - A 100 percent or more increase in the quantity of a previously disclosed material. - Any handling of a previously undisclosed hazardous materials. - A change of business address, business ownership, or business name. Immediately log into the California Environmental Reporting System (CERS) at <http://cers.calepa.ca.gov/>, enter the correct or updated information, and submit to the EHD for approval. This was corrected on site.

Violation Division: San Joaquin County Environmental Health
Violation Program: HMRRP

Failure to complete and electronically submit a site map with all required content.

Violation Notes: Returned to compliance on 05/08/2018. The site map did not show storm and sewer drains. A site map shall contain a north orientation, loading areas, internal roads, adjacent streets, storm and sewer drains, access and exit points, emergency shutoffs, evacuation staging areas, hazardous material handling and storage areas, and emergency response equipment. Immediately log into the California Environmental Reporting System (CERS) at <http://cers.calepa.ca.gov/>, upload the correct or updated information, and submit to the EHD for approval. This was corrected on site.

Violation Division: San Joaquin County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 96244
Site Name: AUTOMEISTER
Violation Date: 5/8/2018
Citation: HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2

Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.

Violation Notes: Returned to compliance on 05/08/2018. The business plan information has not been reviewed and resubmitted in the California Environmental Reporting System (CERS) annually. The hazardous materials inventory shall be submitted by January 15 of each calendar year and may be submitted beginning November 1 of the previous year. Immediately log into the CERS at <http://cers.calepa.ca.gov/>, enter the correct or updated information, and submit to the EHD for approval. This was corrected on site.

APNS: 155-070-01, 15507001
Description: The 1.35 acre site was previously used for the refurbishing of helicopter rotor blades. The results of the Preliminary Endangerment Assessment indicate that elevated metals (primarily Lead) are present in shallow soils on the site in the vicinity of an area that appears to have received rinse water from cleaning of rotor blades. Additionally, elevated lead concentrations were detected in shallow soils on the site near the property boundaries near the rinse area. Additional investigation in 2007 indicated that lead is present above screening levels in the unpaved areas of the Site and a Removal Action Work Plan (RAW) was approved in 2008 which called for capping the unpaved areas of the Site for a remedy. The current owner is unable to fund the RAW at this time and thus it is still pending. However, a Land Use Covenant has been placed on the property to ensure safety in the interim.

RB Case Number: 391102
Local Agency: Not reported
File Location: Local Agency
Local Case Number: 830
Potential Media Affect: Aquifer used for drinking water supply
Potential Contaminants of Concern: Waste Oil / Motor / Hydraulic / Lubricating
Site History: <<<<<start Public notes>>>>> Three USTs removed Aug 25, 2000. Liquid, thick oily petroleum product present in soil under USTs and many holes in USTs and piping. Site enters LOP Oct 23, 2000. Six monitoring wells installed, MW-1 to MW-5 in August 2002, MW-6 September 2007. No remediation conducted. GW contamination very low levels. 9-11-07: First set of soil vapor probes installed onsite in prep for NFAR. 1-18-08: EHD review of soil gas investigation. Some data exceeds ESLs and EHD requires additional soil vapor investigation near apts to west. 9-12-08: EHD approves second soil vapor sample collection work plan. CUF reimbursement concerns hamper completion of soil vapor investigation for NFA in 2009. +\$80,000 reimbursement overdue. 11-19-09: Additional soil vapor probes installed onsite. 2-26-10: EHD reviews second report of soil vapor sampling investigation. 3-9-10: EHD reviews Soil Vapor report and concurs, no threat. EHD requests NFAR. June 28, 2010: Consultant submits NFAR to Geotracker. 7-15-10: EHD receives NFAR on GT. 8-17-10: EHD advises no NFAR review until missing Geotracker submittals uploaded. 10-7-10: EHD notifies consultant again Geotracker submittals must be upload in order to proceed with NFAR review. 12-1-2010: EHD accepts rationale for missing ESI and proceeds

with NFAR review. 12-15-2010: EHD sends draft Case Closure Summary up to CVRWQCB for 30day notice of intent to close site. 1-14-11: date of CVRWQCB letter of concurrence to NFA-rec'd 1-20-11. 1-21-11: EHD advises consultant to submit work plan for well destruction. Jan 27, 2011: RP submits work plan to destroy all 6 MWs. Jan 31, 2011: EHD correspondence approves work plan. Feb 16, 2011: Last of monitoring wells properly destroyed this date. still need waste tracking records in order to issue NFA letter. 3-24-2011: Well destruction report with investigation derived waste (IDW) received, reviewed and approved. Procedures begin to officially CLOSE site. March 24, 2011: official NFA letter issued- SITE CLOSED.<<<<end of public notes>>>>

Case Worker: VJF
RB Case Number: 391160
Local Agency: Not reported
File Location: Local Agency
Local Case Number: Not reported
Potential Media Affect: Aquifer used for drinking water supply, Soil
Potential Contaminants of Concern: Gasoline
Site History: December 3, 2004- One underground storage tank (UST), located in the city of Stockton right-of-way under the west sidewalk, was removed. Soil samples were collected from beneath the tank. Analytical results of the soil reported petroleum hydrocarbon impact. January 2005- The tank pit area was excavated to try and dig out the contamination; they did not, deeper soil samples more highly impacted than the shallow ones. February 19, 2008- Soil boring SB-1 was advanced within the former tank pit to 50 ft. below surface grade (bsg). Analytical results yielded 590,000 micrograms per liter (g/L) of total petroleum hydrocarbons as diesel (TPH-d) in groundwater sampled at 34 ft. bsg. TPH-d was also detected in 4 soil samples collected within SB-1 between 20-48 ft. bsg; the highest concentration being 4,500 milligrams per kilogram (mg/kg) at 29.5 ft. bsg. (Report dated 3/24/2008) November 12 and 13, 2008- CPT borings were advanced up to 100 ft. bsg. CPT-1 (4 separate borings) yielded as high as 3,600 g/L TPH-d in groundwater sampled at 61 ft. bsg and yielded as high as 3,500 mg/kg TPH-d in soil sampled at 60 ft. bsg. CPT-2 (3 separate borings) yielded 5,800 g/L TPG-d in the sole groundwater sample taken from 41 ft. bsg and yielded as high as 4,600 mg/kg TPH-d in soil sampled at 35 ft. bsg. CPT-3 (one boring) has no available chemical analytical data. (Report dated 1/5/2009)

impact. December 1988- A site investigation began with the installation of groundwater monitoring wells. Petroleum hydrocarbon impact to the groundwater was reported. August 1991-August 1996- Additional groundwater monitoring wells were installed to define the lateral extent of the plume. January 1998- A Corrective Action Plan for the site was submitted; recommendation was for remediation by natural attenuation. June 2006- The Corrective Action Plan was reviewed and additional data collection was recommended by the consultant. The site is not vertically defined. June 2008- Fieldwork began to install a deep boring and a deep well. The boring was completed, but during the well installation additional underground storage tanks were discovered beneath the sidewalk of Sutter Street at the corner with Washington Street. Ground penetrating radar was used to try and determine how many tanks were there; appears to be two. A tank removal plan and continuation of the site investigation is pending.

Potential Media Affect: Aquifer used for drinking water supply
Potential Contaminants of Concern: Gasoline
Site History: Site is located on the southwest corner of California Street and East Miner Avenue in Stockton, in the parking lot for the building at 242 Sutter Street. The location is the site of a former Chevron facility; at least two generations of tanks are documented at the site, but there are no records of the tank removals. Site investigation activities were initiated by the current property owner, Sutter Office Center, in May 2000 with the installation of geoprobe soil borings. Soil and grab groundwater samples were collected for analysis and confirmed there are petroleum hydrocarbons in the subsurface soil and groundwater. Groundwater monitoring wells were first installed in 2001; CPT borings in 2003; additional groundwater monitoring wells in 2005, 2007 and 2009; additional borings in 2007. Chevron was named a responsible party and took over the site investigation in 2006.

Potential Media Affect: Aquifer used for drinking water supply
Potential Contaminants of Concern: Gasoline
Site History: The case was closed in October 2017 as site conditions meet the State Water Board s Low-threat Underground Storage Tank Case Closure Policy (Policy). The Site operated as gas station from as early as 1922. Three USTs were removed in January 1992. The site investigation revealed that the most impacted area was the southeast corner of the property where USTs were located until they were removed in 1967. Several phases of investigation have resulted in many soil borings,

monitoring wells, vapor extraction wells, soil vapor survey wells and ozone infusion wells being installed. Chevron excavated petroleum-impacted soil from certain areas of the Site. Chevron performed ozone injection from December 2000 to April 2005 to address groundwater impacts. Chevron conducted a soil vapor survey in 2009 and concluded site conditions do not pose an unacceptable risk to human health via the indoor air pathway. Chevron evaluated residual soil concentrations and concluded screening levels established in the Policy for the direct contact and outdoor air exposure pathway were not exceeded. Based on groundwater monitoring conducted through 2012, the residual groundwater plume is defined, decreasing in concentration, expected to meet background conditions in a reasonable amount of time, and does not threaten surface water bodies or water supply wells. Chevron destroyed all remediation and monitoring wells, and removed all residual waste materials in 2017.

Comments: The CHRIS Report stated that there were not formally recorded historical or prehistoric resources within the immediate vicinity of the remediation project. There are formally recorded prehistoric and historic resources within a one mile radius of the project area.

Completed Area Name: Asbestos Operating Unit
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 07/02/2013
Comments: DTSC received a letter from the California Office of Planning and Research State Clearing house that no comments were submitted on the UP Stockton FS / RAP Mitigated Negative Declaration.

Completed Area Name: Asbestos Operating Unit
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 02/24/2016
Comments: DTSC determined Union Pacific Railroad is complying with the financial assurance regulations.

Completed Area Name: Asbestos Operating Unit
Completed Sub Area Name: Not reported
Completed Document Type: Operation & Maintenance Order/Agreement
Completed Date: 09/06/2016
Comments: DTSC and Union Pacific Rail Road enter into an agreement to maintain the existing asphalt cover over the consolidated asbestos containing material within the soil to limit human exposure.

Environmental Interest/Information System:

AIR EMISSIONS CLASSIFICATION UNKNOWN
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART)
provides California with information on hazardous waste shipments for
generators, transporters, and treatment, storage, and disposal
facilities.
RCRAInfo is a national information system that supports the Resource
Conservation and Recovery Act (RCRA) program through the tracking of
events and activities related to facilities that generate, transport,
and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA
program staff to track the notification, permit, compliance, and
corrective action activities required under RCRA.

File Location: Not reported
Potential Media Affected: Soil
Potential Contaminants of Concern: Not reported
Site History: A locomotive collision on 30 August 2003 spilled about 2,300 gallons of diesel fuel, which made its way into a drop inlet and surface water drainage that drained to Duck Creek and ultimately to the San Joaquin river and Sacramento River delta. UPRR performed emergency cleanup of the surface water and excavated about 315 cy ballast and soil. In October 2005, UPRR excavated the drop inlet, culvert, and about 209 tons of soil. Confirmation sampling continued to detect up to 400 mg/kg TPHd in the soil, but chromatographs suggested the TPH was weathered. Subsequent stormwater runoff from the replaced culvert contained 320 to 950 ug/l of TPH, but of a heavier-end fraction. Also, UPRR used Dustac, a wood pulp product for dust control that contains lignans, which come out in the petroleum hydrocarbon analyses. Staff suspect that the remaining TPH found in stormwater runoff are from the Dustac or other discharges from locomotives (dripping TPH) during yard switching operations. UPRR monitored storm water discharges from the outfalls of thirteen culverts discharging into the drainage ditch connecting to Duck Creek. All of the outfalls had 1ppm to 11 ppm TPHd, which are below the US EPA levels used to

regulate stormwater discharge from industrial facilities. On March 8, 2011, the Central Valley Regional Water Board Executive Officer signed a No Further Action letter, indicating that the cleanup from the locomotive collision diesel spill is complete.

Case Type: Cleanup Program Site
Case Worker: KC
Local Agency: Not reported
RB Case Number: Not reported
File Location: Not reported
Potential Media Affected: Not reported
Potential Contaminants of Concern: Total Petroleum Hydrocarbons (TPH)
Site History: There have been multiple releases at this facility. On 27 January 2017, approximately 1,790 gallons of diesel were released along the main line track, northwest of the Locomotive Shop. The cause of the release was not specified. Approximately 2,750 tons of diesel impacted soil was excavated and disposed offsite. On 31 March 2017, a locomotive derailed at the Del Monte spur of the Union Pacific Stockton rail yard. During 31 March thru 3 April 2017, approximately 500 cubic yards of diesel-impacted soil and ballast were excavated and disposed offsite. On 10 April 2017, an unknown quantity of diesel and motor oil range fluids were released as a result of locomotive retention tanks overflowing on six locomotives during heavy rains. Approximately 42 tons of impacted soil and ballast rock were excavated and disposed offsite. In addition, 910 gallons of diesel/water mixture was recovered and disposed offsite. On 25 January 2019, three transformers (one PCB-containing) were damaged and released oil to a surface area measuring approximately 60 feet by 15 feet.

Local Case Number: Not reported
Potential Media Affect: Aquifer used for drinking water supply
Potential Contaminants of Concern: Gasoline
Site History: May 1991- Four underground storage tanks, three product and one waste oil, were removed from the site. Soil samples for analysis were collected from beneath the tanks. Laboratory reported petroleum hydrocarbon contamination under the product tank #3 North. February 2000- Site assessment began with the installation of geoprobe soil borings; soil and grab groundwater samples were collected. May 2000 thru March 2008- Groundwater monitoring wells, geoprobe soil borings, CPT soil borings were installed both on and off site to define the plume. The site is not defined. Site remediation has been directed since 2007. Soil Vapor Extraction system began operation 9/10.

Case Worker: VJF
RB Case Number: 391194
Local Agency: Not reported
File Location: Regional Board
Local Case Number: Not reported
Potential Media Affect: Soil, Soil Vapor
Potential Contaminants of Concern: Benzene, Ethylbenzene, Gasoline, MTBE / TBA / Other Fuel Oxygenates, Other Petroleum, Toluene, Xylene
Site History: Initial investigation was performed in May 2011 to evaluate potential soil contamination and to determine if a UST was present. Excavation and subsequent soil and groundwater sampling confirmed the presence of an abandoned in place UST and that soil and groundwater had been impacted by petroleum hydrocarbons. Investigation of the nature, extent, and mobility of the release is ongoing.

- Property Description: -

Historically, the Subject Property was first developed with several commercial structures sometime between 1941 and 1957. Prior to 1941 the Subject Property was undeveloped land. Between 1957 and 1963, the structures of the Subject Property were demolished or re-distributed, and the Subject Property was redeveloped with several commercial structures. Two city directory listings identify a commercial fuel station (Mels Enco Gas Station, 2141 South Airport Way) on the Subject Property in 1965 and 1970. By 1975 all of the previously identified structures were removed, and the Subject Property was undeveloped (circa 1975 to Present). The historical use of the Subject Property as a commercial fuel station represents a recognized environmental condition (REC).

LUST:
 Name: RALPH'S SQUARE
 Address: 2122 AIRPORT WAY
 City,State,Zip: STOCKTON, CA 95206
 Lead Agency: CENTRAL VALLEY RWQCB (REGION 5S)
 Case Type: LUST Cleanup Site
 Geo Track: http://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T0607700816
 Global Id: T0607700816
 Latitude: 37.932097464
 Longitude: -121.26666069
 Status: Open - Site Assessment
 Status Date: 12/02/1997
 Case Worker: AMB
 RB Case Number: 390995
 Local Agency: Not reported
 File Location: Regional Board
 Local Case Number: Not reported
 Potential Media Affect: Aquifer used for drinking water supply
 Potential Contaminants of Concern: Tetrachloroethylene (PCE), Benzene, Ethylbenzene, Gasoline, MTBE / TBA

Site History:
 October 1997- Three underground storage tanks were removed from the site. Soil samples for analysis were collected from beneath the tanks. Laboratory results reported petroleum hydrocarbon impact to the soil. Stockpiled soil excavated during the tank removal was returned to the empty tank pit. June 2002- A site investigation was begun with the installation of soil borings and groundwater monitoring wells. Sample analyses confirmed contaminant impact to soil and groundwater. May 2007- A cone penetrometer test boring investigation was conducted. June 2007 thru April 2008- Additional groundwater monitoring wells were installed. 2010- The site remains undefined. Additional site assessment work has been approved by the lead regulatory agency, but not implemented by the responsible parties. Responsible parties are currently out of compliance with regulatory directives. May 2011- Site referred to the Regional Water Quality Control Board for oversight and enforcement.

Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 06/15/2007
Comments: Site Screening Assessment (SS) completed under DTSC grant with USEPA (PA/SI Grant). Results from SS identified historical small releases at the site, no large releases identified. County Environmental Health is overseeing groundwater remediation from fuel tank releases. USEPA recommendation is No Further Remedial Action Planned (NFRAP). Site is currently being considered for further evaluation by DTSC's Corrective Action program.

POTW: Not reported
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:

AIR EMISSIONS CLASSIFICATION UNKNOWN
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Local Agency: Not reported
File Location: Local Agency
Local Case Number: 1085
Potential Media Affect: Aquifer used for drinking water supply
Potential Contaminants of Concern: Other Solvent or Non-Petroleum Hydrocarbon
Site History: May 1995 - Four USTs and associated piping were removed from the site. June 1997 - Soil borings B-1 through B-3 were advanced on-site. September 1997 - Three soil borings (B-4 through B-6) were advanced and completed as monitoring wells (B-4/MW-1, B-5/MW-2, and B-6/MW-3). November 2002 - Cone penetration test (CPT) boring CPT-1 was advanced on-site; CPT-2 was advanced on-site without sounding; CPT-3 and CPT-4 were advanced off-site. September 2005 - MW-4 through MW-7 were installed. Additional investigation is needed to define the lateral extent of the petroleum hydrocarbon plume. An ozone injection bench-scale pilot test has been conditionally approved by the San Joaquin County Environmental Health Department. Remediation was not performed. All thirteen monitoring wells were destroyed in May and June 2013.

 Lead Agency Case Number: Not reported
 Latitude: 37.953685723
 Longitude: -121.28924656
 Case Type: Cleanup Program Site
 Case Worker: KC
 Local Agency: Not reported
 RB Case Number: 2050519
 File Location: Regional Board
 Potential Media Affected: Aquifer used for drinking water supply, Other Groundwater (uses other than drinking water)
 Potential Contaminants of Concern: Polynuclear aromatic hydrocarbons (PAHs), Total Petroleum Hydrocarbons (TPH)
 Site History: On July 16, 2014, a previously unknown UST and the presence of stained soil in a separate area were discovered during demolition and excavation of the existing buildings the site. An additional UST was discovered on July 29, 2014. Both USTs were removed under permit with SJEHD. The property will be the site of the new Stockton Courthouse.

Status Date: 02/04/2005
Case Worker: VJF
RB Case Number: 390862
Local Agency: Not reported
File Location: Local Agency
Local Case Number: Not reported
Potential Media Affect: Aquifer used for drinking water supply
Potential Contaminants of Concern: Gasoline
Site History: June 1994 - Two soil borings (B1 and B2) were advanced adjacent to the two USTs. November 1994 - There was an unauthorized release and gasoline was discovered during a subsurface investigation. August 1996 - Two USTs were removed. February 2001 - Three soil borings (G1 through G3) were advanced at the site. July 2002 - Four monitoring wells (MW-1 through MW-4) were installed. March 2004 - Three soil borings (G4 through G6) were advanced. November 2004 - Soil borings SB-4 and SB-5 were advanced. December 2004 - Soil borings SB-5A, SB-5B, SB-2 and SB-3 were advanced. February 2005 - Soil borings SB-6 and SB-7 were advanced and monitoring wells MW-1 through MW-4 were destroyed. Additional site investigation is needed.

Click Here:

Environmental Interest/Information System:

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Status: Open - Site Assessment
 Status Date: 02/12/2008
 Case Worker: VJF
 RB Case Number: 391173
 Local Agency: Not reported
 File Location: Local Agency
 Local Case Number: Not reported
 Potential Media Affect: Aquifer used for drinking water supply, Soil, Soil Vapor
 Potential Contaminants of Concern: Gasoline
 Site History: January 2008- One underground storage tank was removed from beneath the sidewalk (City of Stockton right-of-way) near the corner of Minor Street and Hunter. Soil samples were collected; laboratory analytical results reported petroleum hydrocarbon impact to the samples. June 2008- A site investigation began with the installation of four geoprobe soil borings; soil and grab groundwater samples were collected; laboratory analytical results confirmed the petroleum hydrocarbon impact to both soil and groundwater. July through August 2010- Five monitoring wells were installed (MW-1A, MW-1B, MW-2B, MW-3B, MW-4B). December 2013 through January 2014- In-Situ Chemical Oxidation (ISCO) pilot study was conducted.

Completed Info:

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 05/14/2002
Comments: PEA -- A Preliminary Endangerment Assessment (PEA) was completed for the site after approximately 30 tons of contaminated soil had been removed by the property owner. The PEA looked at the hazard and risk posed by the current site conditions as compared to background concentrations for metals, cyanide, volatile and semi-volatile organic compounds. It found that the risk/hazard posed was acceptable for DTSC to grant no further action status. The scope of the PEA did not address lead-based paint or asbestos containing building materials on site which will be addressed by the city through the building occupancy requirements.

Environmental Interest/Information System:

California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

(1998).

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Plan
Completed Date: 03/31/1998
Comments: RAP -- DTSC HAS APPROVED THE FINAL RAP. THE FINAL RAP OUTLINES THE CONCEPTUAL PROCESS FOR REMEDIATION OF SOIL AND GROUNDWATER CONTAMINATION. THE SELECTED REMEDY INVOLVES EXCAVATION OF SOIL TO MEET THE NON-DETECT GOAL AT THE SITE, OF GROUNDWATER IN ZONES A,B, AND C TO ENSURE THAT NATURAL BIODEGRADATION OF COPC'S CONTINUES, AND MAINTAINING CONTROLS TO LIMIT EXPOSURE. SOIL IS TO BE EXCAVATED FROM THREE FORMER MGP STRUCTURE AREAS TO 25 FEET, 24 FEET, AND 8 FEET, RESPECT- IVELY, AS WELL AS EXCAVATION OF SOIL FROM SIX OTHER AREAS ADJACENT TO AREAS OF HIGH COPC CONCENTRATION.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 09/18/2000
Comments: RMDL - The Department approved the completion report which documents completion of remedial activities and identifies the ongoing operation and maintenance activities and land use restrictions that will be required for the subject site. The soil remedy included excavation and off site disposal of 24,020 tons of material contaminated primarily with polycyclic aromatic hydro carbons and to a lesser extent petroleum hydrocarbons. Ongoing maintenance of an asphalt cap will include periodic inspection and repair. Groundwater will continue to be monitored for evidence of intrinsic bioremediation and for contaminant concentration reduc- tion.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation / Feasibility Study
Completed Date: 06/18/1997
Comments: RIFS -- Approval of the feasibility study completed to address PAH impacts to soil and groundwater. Based on the Risk Assess- ment, cleanup of soil is driven primarily by impacts to groundwater and not by exposure to human health. The recommended alternative includes excavacation and removal of targeted soil intervals identified by modeling soils data and intrinsic remediation of a groundwater contaminant plume. The selected alternative includes institutional controls, asphalt batching of hazardous waste contaminated soil or Class II landfill disposal if not hazardous waste, and continued monitoring of groundwater for contaminants and intrinsic remediation parameters. This alternative includes an enhancement component consisting of introducing oxygen releasing compounds to the watertable and a contingency measure to provide control of the plume if plume expansion is detected.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 08/17/2010
Comments: DTSC approved the 2010 Groundwater Report. The 2010 groundwater results support the conclusion that the groundwater plume is slowly decreasing through natural attenuation, except for acenaphthene. groundwater concentration does not appear to be decreasing. As noted in the Report on page 13, MW-26R has shown a slight increase in acenaphthene while MR-23R, which is located up-gradient from MW-26R, has shown a decrease in acenaphthene. Both wells have historically been above the groundwater cleanup goal for acenaphthene, which is 20 micrograms per liter listed in the RAP. The acenaphthene groundwater concentration in the up-gradient wells MW-20 and -23R appear to be decreasing while the concentration in well -26R appears to be stagnated or increasing. Since the RAP was approved, new wells have been installed down-gradient to monitor the expanding groundwater plume. The RAP predicted that the groundwater plume would continue to degrade within its original boundaries. In 2006, PG&E installed an additional monitoring well (MW-27) down-gradient to monitor the acenaphthene plume in MW-23 and -26R. This well (MW-27) is located approximately 0.1 miles down-gradient from MW-26R and has never detected acenaphthene. In the next groundwater report, PG&E should assess site conditions relative to the remedial action objectives listed in the RAP (e.g., containment, volume reduction, etc), and discuss what, if any, adjustments may be necessary to achieve the required goals.

Comments: DTSC received the 2012 Annual Ground Water Monitoring Report (Report) dated December 2012 for the Pacific Gas and Electric Company (PG&E) former Manufactured Gas Plant located at 535 Center Street, Stockton, California. The Report was submitted pursuant to the requirements of the PG&E Stockton Operation and Maintenance (O&M) Agreement. The report presents the analytical results for groundwater samples collected in March and September 2012 at the site. The report describes the field sampling activities and analytical results for the annual sampling of 24 monitoring wells and semiannual sampling of nine monitoring wells based on the groundwater monitoring program and sampling frequency decision tree submitted in the O&M Plan and revised in 2004.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Plan
Completed Date: 03/31/1998
Comments: RAP -- DTSC HAS APPROVED THE FINAL RAP. THE FINAL RAP OUTLINES THE CONCEPTUAL PROCESS FOR REMEDIATION OF SOIL AND GROUNDWATER CONTAMINATION. THE SELECTED REMEDY INVOLVES EXCAVATION OF SOIL TO MEET THE NON-DETECT GOAL AT THE SITE, OF GROUNDWATER IN ZONES A,B, AND C TO ENSURE THAT NATURAL BIODEGRADATION OF COPC'S CONTINUES, AND MAINTAINING CONTROLS TO LIMIT EXPOSURE. SOIL IS TO BE EXCAVATED FROM THREE FORMER MGP STRUCTURE AREAS TO 25 FEET, 24 FEET, AND 8 FEET, RESPECT- IVELY, AS WELL AS EXCAVATION OF SOIL FROM SIX OTHER AREAS ADJACENT TO AREAS OF HIGH COPC CONCENTRATION.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 09/18/2000
Comments: RMDL - The Department approved the completion report which documents completion of remedial activities and identifies the ongoing operation and maintenance activities and land use restrictions that will be required for the subject site. The soil remedy included excavation and off site disposal of 24,020 tons of material contaminated primarily with polycyclic aromatic hydro carbons and to a lesser extent petroleum hydrocarbons. Ongoing maintenance of an asphalt cap will includ periodic inspection and repair. Groundwater will continue to be monitored for evidence of intrinsic bioremediation and for contaminant concentration reduc- tion.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation / Feasibility Study
Completed Date: 06/18/1997
Comments: RIFS -- Approval of the feasibility study completed to address PAH impacts to soil and groundwater. Based on the Risk Assess- ment, cleanup of soil is driven primarily by impacts to groundwater and not by exposure to human health. The recommended alternative includes excavacation and removal of targeted soil intervals identified by modeling soils data and intrinsic remediation of a groundwater contaminant plume. The selected alternative includes institutional controls, asphalt batching of hazardous waste contaminated soil or Class II landfill disposal if not hazardous waste, and continued monitoring of groundwater for contaminants and intrinsic remediation parameters. This alternative includes an enhancement component consisting of introducing oxygen releasing compounds to the watertable and a contingency measure to provide control of the plume if plume expansion is detected.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operations and Maintenance Report
Completed Date: 08/17/2010
Comments: DTSC approved the 2010 Groundwater Report. The 2010 groundwater results support the conclusion that the groundwater plume is slowly decreasing through natural attenuation, except for acenaphthene. groundwater concentration does not appear to be decreasing. As noted in the Report on page 13, MW-26R has shown a slight increase in acenaphthene while MR-23R, which is located up-gradient from MW-26R, has shown a decrease in acenaphthene. Both wells have historically been above the groundwater cleanup goal for acenaphthene, which is 20 micrograms per liter listed in the RAP. The acenaphthene groundwater concentration in the up-gradient wells MW-20 and -23R appear to be decreasing while the concentration in well -26R appears to be stagnated or increasing. Since the RAP was approved, new wells have been installed down-gradient to monitor the expanding groundwater plume. The RAP predicted that the groundwater plume would continue to degrade within its original boundaries. In 2006, PG&E installed an additional monitoring well (MW-27) down-gradient to monitor the acenaphthene plume in MW-23 and -26R. This well (MW-27) is located approximately 0.1 miles down-gradient from MW-26R and has never detected acenaphthene. In the next groundwater report, PG&E should assess site conditions relative to the remedial action objectives listed in the RAP (e.g., containment, volume reduction, etc), and discuss what, if any, adjustments may be necessary to achieve the required goals.

FINDS:

Registry ID: 110009534673

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Potential Media Affect: Aquifer used for drinking water supply
 Potential Contaminants of Concern: Gasoline
 Site History: July 1997 groundwater contamination containing MtBE was noted at a non-operating Shell Station site located down-gradient from the ARCO station. February 1999 three 12,000 gallon underground storage tanks removed, contamination was noted under the tanks. The site investigation began after this with the installation of four groundwater monitoring wells. Between June 2000 and May 2004 additional groundwater monitoring wells, both shallow and deep, were installed. The site is defined; the problem area is around the

MW-4/MW-8M/MW-8D/MW-12 cluster of wells located near the former dispenser island area. The EHD has requested interim remediation of these wells to lower contaminant concentrations. Quarterly batch extractions began in third quarter 2008. The EHD sent notification to the Regional Water Quality Control Board on 6/10/10 of their intent to close the site. In preparation for closure, destruction of all groundwater monitoring wells began on 10/18/10.

Status: Completed - Case Closed
Status Date: 09/24/2010
Case Worker: Not reported
RB Case Number: 390135
Local Agency: Not reported
File Location: Local Agency
Local Case Number: 1018
Potential Media Affect: Aquifer used for drinking water supply
Potential Contaminants of Concern: Gasoline
Site History: February 1989- Four underground storage tanks were removed from the site. Soil samples for analysis were collected after removal of a cement slab that was under the tanks. Laboratory reported petroleum hydrocarbon impact to the samples. A waste oil tank was removed from a different area of the site in March 1989; minor diesel impact to the soil beneath the waste oil tank did not require further investigation of that area. Between 1987-1996, 25 groundwater monitoring wells were installed at the site to investigate the verticle and lateral extent of the the petroleum hydrocarbon impact to soil and groundwater at the site. The wells were installed in different phases of work, as the groundwater elevation has fluctuated greatly rendering the first set of wells unable to provide groundwater to sample. December 2005- Remediation of the site was initiated with the start up of a soil vapor extraction/air sparging system. The consultant estimates that the SVE system has treated greater than 27,000 pounds of volatile organic compounds since start up; current daily average is approximately 4 pounds a day. The air sparge component of the system was placed in operation in June 2006. A rebound test of the system was conducted in 2007; no increase in the extracted vapor concentrations was reported following re-starting the system. May 2009- The consultant has shut down the system and is preparing for site closure. March 2010- Notification was sent to the RWQCB of the EHD's intent to close the site. August 2010- All site wells were destroyed. September 2010- No Further Action letter sent to Responsible Pary.

 Latitude: 37.962488005
 Longitude: -121.2650796
 Status: Open - Verification Monitoring
 Status Date: 04/16/2020
 Case Worker: VJF
 RB Case Number: 391066
 Local Agency: Not reported
 File Location: Local Agency
 Local Case Number: Not reported
 Potential Media Affect: Aquifer used for drinking water supply
 Potential Contaminants of Concern: MTBE / TBA / Other Fuel Oxygenates, Gasoline
 Site History: December 1998- Two underground storage tanks, piping and dispenser islands removed from the site. Soil samples for analysis were collected; laboratory reported petroleum hydrocarbon contamination in the soil beneath the tanks. February 2000- A site investigation began with the installation of soil borings and collection of soil and grab groundwater samples; analysis confirmed the contamination. July 2003 thru January 2008- Nineteen groundwater monitoring wells and four vapor extraction remediation wells were installed both on and offsite to define the verticle and lateral extent of the contaminant plume and to conduct remedial feasibility tests. October 2008- A soil vapor extraction pilot test was conducted. Results were favorable that SVE would be an effective remedial alternative to address the remaining soil contamination onsite; installation of a permanent SVE system is

pending. Additionally, soil and grab groundwater samples were collected to conduct a laboratory bench scale test for evaluation of ozone infusion as a remediation alternative to address the groundwater contamination. Results of the bench scale test indicated a potential for byproduct formation of Chrom (VI). A limited ozone infusion pilot test onsite is also pending.

Completed Info:

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: * Discovery
Completed Date: 03/28/1991
Comments: Facility Identified: Department of Fish & Game (DFG) responded to a complaint that an acid and waste oil spill release had occurred. The complaint was received by the local health department on November 27, 1990. DFG inspection conducted. There is a canal which receives all drainage from parking lots and deposits to Duck Creek. Oil/grease observed on walls of canal. Liquid was being pumped from a vault at the head of canal onto an open field. Samples all show petroleum hydrocarbons. DFG is the lead.

File Location: Local Agency
Local Case Number: 19093
Potential Media Affect: Aquifer used for drinking water supply
Potential Contaminants of Concern: Gasoline
Site History: April 1987- two gasoline USTs were removed; September 1989- two diesel USTs were removed; February 1996-one diesel UST was removed. 1987-MW-1,2, and 3 were installed; January 1988-MW-4 and 5 were installed; February 1990- MW-6 and 7 were installed; September 1990 - MW-8 was installed; March 1994 -MW-9, 10, 11, 12, and 13 were installed; September 1994 - piezometers PZ-1 and PZ-2, and air sparge well SP-1 were installed; June 1995-air sparge wells SP-2 through SP-6 were installed; June 2000-VW-1 was installed; March 2002-air sparge well SP-A was installed. March 1994-soil evaluated for total heterotrophic plate count. December 1996- a natural biodegradation study was performed and the report of findings indicated that naturally occurring biodegradation was occurring in the groundwater. May 1999- CPT investigation occurred involving CPT-1, 2, and 3. April 2001- initiated an air sparging and soil venting remediation system. December 2002- remediation was stopped. June 2004, a subsurface investigation took place involving seven borings CPT-A through CPT-G. November 2006, a subsurface investigation involving the advancement of seventeen soil borings (H1 through H16 and H7A) was conducted.

Comments: FACILITY IDENTIFIED FROM ERRIS.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 05/26/1993
Comments: PEA required medium priority due to the fact limited information can be found concerning the site. Old information indicates a release of dibromochloropropane (DBCP) and ethylene dibromide into rinsewater ponds. Currently no agency is active at the site. Further investigation is needed to clarify problem at the site if there is one.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

laboratory results reported petroleum hydrocarbon contamination in the soil. July 1997- A site investigation began with the advancement of six soil borings. Petroleum hydrocarbon impact to the soil was confirmed. April 2000- A grab groundwater sample was collected from a soil boring. Laboratory analytical results reported petroleum hydrocarbon impact to the groundwater. November 2001-June 2007- Groundwater monitoring wells and additional soil borings were installed to define the vertical and lateral extent of the plume. Feasibility of remedial alternatives is being evaluated.

Completed Date: 12/28/1987
Comments: A complaint was forwarded to DTSC from the San Joaquin County Health Department on 10/26/87. The site screening was conducted as a follow-up to the complaint. No further action was recommended at the site. AVENT Technologies bought the site in 1982. When the company moved in 1984, soil contamination was found and a 40 feet by 40 feet area of soil was cleaned up.

Lead Agency: CENTRAL VALLEY RWQCB (REGION 5S)
Case Type: LUST Cleanup Site
Geo Track: http://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T0607700508
Global Id: T0607700508
Latitude: 37.93795371
Longitude: -121.2936061
Status: Open - Remediation
Status Date: 02/26/2013
Case Worker: AMB
RB Case Number: 390657
Local Agency: Not reported
File Location: Regional Board
Local Case Number: Not reported
Potential Media Affect: Aquifer used for drinking water supply
Potential Contaminants of Concern: Benzene, Ethylbenzene, Gasoline, MTBE / TBA / Other Fuel Oxygenates, Toluene, Xylene
Site History: All workplans, monitoring reports, and associated remedial reports are submitted to ARCO site as CPA combined reports by ARCO, 441 W. Charter Way for Former Texaco, 440 W. Charter Way; Columbo/Toscana, 1444 S. Lincoln St.; and Chevron, 508 W. Charter Way. See 441 W. Charter Way for electronic copy. This site operated as a retail gasoline station until 1995. The underground storage tanks were removed in 1996, petroleum contamination was noted in the soil beneath the tanks. A site investigation began in July 1991; groundwater monitoring wells and soil vapor extraction wells were installed through 2006. SVE remediation was conducted from January 1997 through February 1998; estimate was that 1,600 gallons of petroleum hydrocarbons were removed. During 2005 nearly all groundwater and remediation wells were destroyed to allow for redevelopment of the site, and reinstalled in different locations. Additional air sparging wells were also installed. Soil vapor extraction/air sparging remediation was started in October 2006; in March 2009 pulse operation began, two weeks on two weeks off.

City,State,Zip: STOCKTON, CA 95206
Lead Agency: CENTRAL VALLEY RWQCB (REGION 5S)
Case Type: LUST Cleanup Site
Geo Track: http://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T0607700195
Global Id: T0607700195
Latitude: 37.937317488
Longitude: -121.29351036
Status: Open - Remediation
Status Date: 02/13/2013
Case Worker: AMB
RB Case Number: 390268
Local Agency: Not reported
File Location: Regional Board
Local Case Number: Not reported
Potential Media Affect: Aquifer used for drinking water supply
Potential Contaminants of Concern: Benzene, Ethylbenzene, Gasoline, MTBE / TBA / Other Fuel Oxygenates, Toluene, Xylene

Site History:
All workplans, monitoring reports, and associated remedial reports are submitted to ARCO site as CPA combined reports by ARCO, 441 W. Charter Way for Former Texaco, 440 W. Charter Way; Columbo/Toscana, 1444 S. Lincoln St.; and Chevron, 508 W. Charter Way. See 441 W. Charter Way for electronic copy. October 1988- Soil contaminated with petroleum hydrocarbons was discovered during dispenser replacement activities. Minor overexcavation was performed. May 1989-May 1990- Soil borings and groundwater monitoring wells were installed. April 1992- Soil vapor extraction wells were installed and a vapor extraction pilot test was performed. September 1993- Additional groundwater monitoring wells were installed. June 1999- Four underground storage tanks were removed from the site. Nov 2000, Nov 2001+ Sept 2004- Cone penetrometer test borings were installed. August 2002- Deep groundwater monitoring wells were installed. 3/4/2010- Case transferred to Regional Board for commingled plume account. October 2005- Additional deep groundwater monitoring wells were installed. October 2007- Additional shallow and deep groundwater monitoring wells were installed. The site is still not defined; a work plan for additional investigation was approved for implementation by the EHD on March 24, 2009. Shell is trying to get offsite access.

Case Type: LUST Cleanup Site
Geo Track: http://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T0607700029
Global Id: T0607700029
Latitude: 37.9565269
Longitude: -121.2977805
Status: Open - Verification Monitoring
Status Date: 10/16/2018
Case Worker: VJF
RB Case Number: 390041
Local Agency: Not reported
File Location: Local Agency
Local Case Number: Not reported
Potential Media Affect: Aquifer used for drinking water supply
Potential Contaminants of Concern: Gasoline
Site History: The site is currently owned by the City of Stockton; it is located on West Fremont Street near the area of the Waterfront Hotel, Stockton Arena and Stockton Ballpark. September 1986- One underground storage tank was removed, petroleum hydrocarbon contamination was noted in the soil beneath the tank. October 1986- A site investigation began with the installation of soil borings and groundwater monitoring wells. Some overexcavation of the tank pit area was done. January + July 1987- Additional overexcavations were conducted, final depth of tank pit area 22 feet bsg. January 1991-February 2002- additional borings, groundwater monitoring wells and remediation wells were installed. Site work was halted for the City redevelopment project, and should resume.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 07/29/2020	Source: EPA
Date Data Arrived at EDR: 08/03/2020	Telephone: N/A
Date Made Active in Reports: 08/25/2020	Last EDR Contact: 10/01/2020
Number of Days to Update: 22	Next Scheduled EDR Contact: 01/11/2021
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/29/2020	Source: EPA
Date Data Arrived at EDR: 08/03/2020	Telephone: N/A
Date Made Active in Reports: 08/25/2020	Last EDR Contact: 10/02/2020
Number of Days to Update: 22	Next Scheduled EDR Contact: 01/11/2021
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 07/29/2020

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 07/29/2020	Source: EPA
Date Data Arrived at EDR: 08/03/2020	Telephone: 800-424-9346

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/15/2020	Source: Environmental Protection Agency

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/15/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/22/2020	Telephone: (415) 495-8895

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 06/15/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/22/2020	Telephone: (415) 495-8895
Date Made Active in Reports: 09/18/2020	Last EDR Contact: 09/22/2020
Number of Days to Update: 88	Next Scheduled EDR Contact: 01/04/2021
	Data Release Frequency: Quarterly

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 06/01/2020	Source: Environmental Protection Agency

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

SPILLS 90: SPILLS90 data from FirstSearch

Spills 90 includes those spill and release records available exclusively from FirstSearch databases. Typically, they may include chemical, oil and/or hazardous substance spills recorded after 1990. Duplicate records that are already included in EDR incident and release records are not included in Spills 90.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013

Next Scheduled EDR Contact: 11/16/2020
Data Release Frequency: Quarterly

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 05/12/2020	Source: Department of Energy & Environmental Protection
Date Data Arrived at EDR: 05/12/2020	Telephone: 860-424-3375

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 916-657-4041

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Version Date:	2012
East Map:	5640422 STOCKTON EAST, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

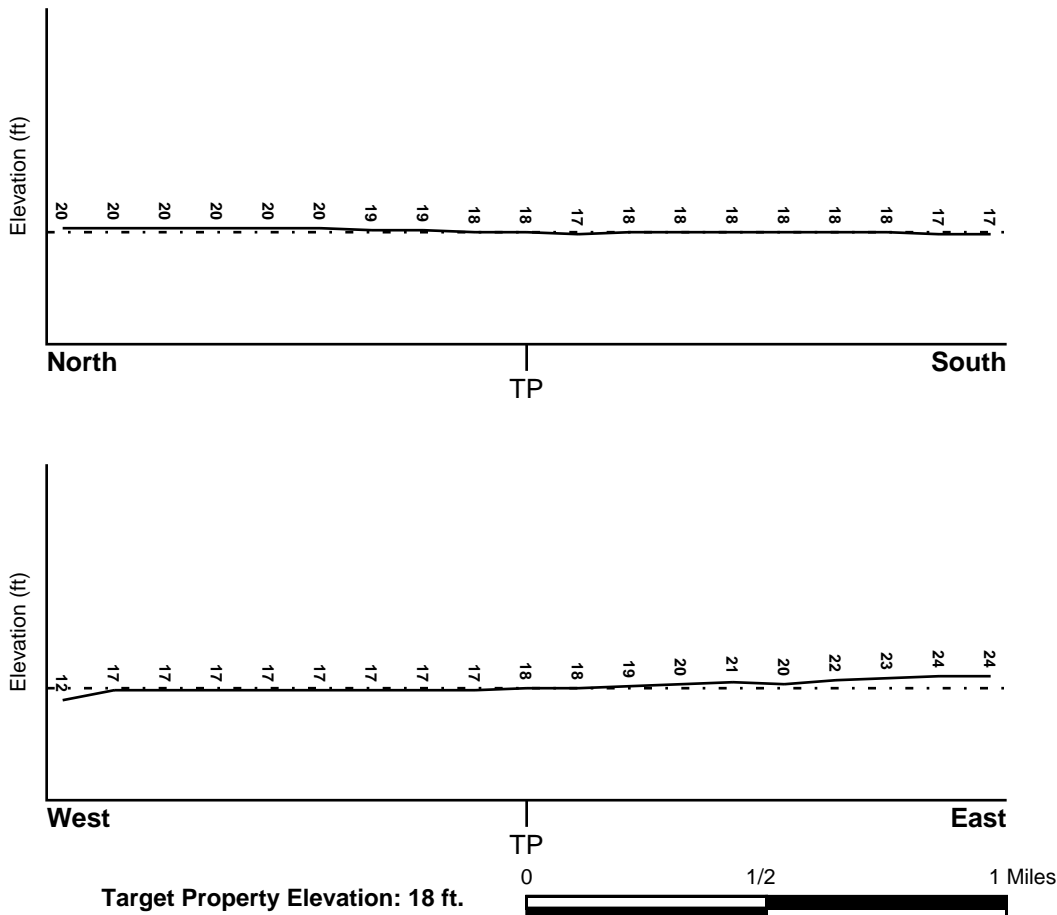

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06077C0460F	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
06077C0470F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
STOCKTON WEST	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: YELLOWLARK

Soil Surface Texture: gravelly loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 107 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	gravelly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0 Min: 0	Max: Min:
2	7 inches	38 inches	gravelly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0 Min: 0	Max: Min:
3	38 inches	46 inches	very gravelly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0 Min: 0	Max: Min:
4	46 inches	53 inches	gravelly clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0 Min: 0	Max: Min:

6	59 inches	61 inches	cemented	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0 Min: 0	Max: Min:

Soil Map ID: 2

Soil Component Name: JACKTONE

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 152 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	22 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 0.01 Min: 0	Max: Min:

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558

Radon Database for California

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Appendix K: Air Quality Conformity Supporting Documents

This page is intentionally blank.

This appendix includes the following supporting documents identified in Section 3.13, *Air Quality*, of this EA:

- K.1 Applicable Federal and State Criteria Air Pollutants
- K.2 Air Quality Modeling Results
- K.3 Final Record of Non-Applicability

This page is intentionally blank.

K.1 Applicable Federal and State Criteria Air Pollutant Standards

Table K-1: Federal and State Criteria Air Pollutant Standards, Effects, and Sources

Pollutant	Averaging Time	State Standard ⁸	Federal Standard ⁹	SJVAB Attainment Status
Ozone (O ₃) ²	1 hour	0.09 parts per million (ppm)	---	Federal: No Federal Standard (1-hour), Nonattainment/ Extreme (8-hour) State: Nonattainment/ Severe (1-hour), Nonattainment (8-hour)
	8 hours	0.070 ppm	0.070 ppm ⁴ (4th highest in 3 years)	
Carbon Monoxide (CO)	1 hour	20 ppm	35 ppm	Federal: Attainment/ Unclassified State: Attainment/ Unclassified
	8 hours	9.0 ppm ¹	9 ppm	
	8 hours (Lake Tahoe)	6 ppm	---	
Respirable Particulate Matter (PM ₁₀) ²	24 hours	50 µg/m ³	150 µg/m ³	Federal: Maintenance State: Nonattainment
	Annual	20 µg/m ³	--- ² (expected number of days above standard < or equal to 1)	
Fine Particulate Matter (PM _{2.5}) ²	24 hours	---	35 µg/m ³	Federal: Nonattainment State: Nonattainment
	Annual	12 µg/m ³	12.0 µg/m ³	
	Secondary Standard (annual)	---	15 µg/m ³ (98th percentile over 3 years)	
Nitrogen Dioxide (NO ₂)	1 hour	0.18 ppm	100 ppb ⁶ (98th percentile over 3 years)	Federal: Attainment/ Unclassified State: Attainment
	Annual	0.030 ppm	0.053 ppm	
Sulfur Dioxide (SO ₂)	1 hour	0.25 ppm	75 ppb ⁷ (99th percentile over 3 years)	Federal: Attainment/ Unclassified State: Attainment
	3 hours	---	0.5 ppm ⁹	
	24 hours	0.04 ppm	0.14 ppm	
	Annual Arithmetic Mean	---	0.03 ppm	

Pollutant	Averaging Time	State Standard ⁸	Federal Standard ⁹	SJVAB Attainment Status
Lead (Pb) ³	Monthly Calendar Quarter Rolling 3-month average	1.5 µg/m ³ --- ---	--- 1.5 µg/m ³ 0.15 µg/m ³ ¹⁰	Federal: No Designation/ Classification State: Attainment
Sulfates	24 hours	25 µg/m ³	---	Federal: No Federal Standard State: Attainment
Hydrogen Sulfide	1 hour	0.03 ppm	---	Federal: No Federal Standard State: Unclassified
Visibility Reducing Particles	8 hours	Visibility of 10 miles or more (Tahoe: 30 miles) at relative humidity less than 70 percent	---	Federal: No Federal Standard State: Unclassified
Vinyl Chloride ³	24 hours	0.01 ppm	---	Federal: No Federal Standard State: Attainment

¹ Rounding to an integer value is not allowed for the state 8-hour CO standard. Violation occurs at or above 9.05 ppm.

² Annual PM₁₀ NAAQS revoked October 2006; was 50 µg/m³. 24-hour PM_{2.5} NAAQS tightened October 2006; was 65 µg/m³. Annual PM_{2.5} NAAQS tightened from 15 µg/m³ to 12 µg/m³ December 2012, and secondary standard set at 15 µg/m³.

³ CARB has identified vinyl chloride and the particulate matter fraction of DPM as TACs. DPM is part of PM₁₀ and, in larger proportion, PM_{2.5}. Both CARB and the EPA have identified Pb and various organic compounds that are precursors to O₃ and PM_{2.5} as TACs. There are no exposure criteria for substantial health effects because of TACs, and control requirements may apply at ambient concentrations below any criteria levels specified above for these pollutants or the general categories of pollutants to which they belong.

⁴ Prior to June 2005, the 1-hour NAAQS was 0.12 ppm. Emission budgets for 1-hour O₃ are still in use in some areas where 8-hour O₃ emission budgets have not been developed, such as the San Francisco Bay Area. On October 1, 2015, the national 8-hour O₃ primary and secondary standards were lowered from 0.075 to 0.070 ppm.

⁵ The 0.08 ppm 1997 O₃ standard is revoked FOR CONFORMITY PURPOSES ONLY when area designations for the 2008 0.75 ppm standard become effective for conformity use (July 20, 2013). Conformity requirements apply for all NAAQS, including revoked NAAQS, until emission budgets for newer NAAQS are found adequate, SIP amendments for the newer NAAQS are approved with an emission budget, EPA specifically revokes conformity requirements for an older standard, or the area becomes attainment/unclassified. SIP-approved emission budgets remain in force indefinitely unless explicitly replaced or eliminated by a subsequent approved SIP amendment. During the "Interim" period prior to availability of emission budgets, conformity tests may include some combination of build versus no build, build versus baseline, or compliance with prior emission budgets for the same pollutant.

⁶ Final 1-hour NO₂ NAAQS published in the Federal Register on February 9, 2010, effective March 9, 2010. Initial area designation for California (2012) was attainment/unclassifiable throughout. Project-level hot-spot analysis requirements do not currently exist. Near-road monitoring starting in 2013 may cause redesignation to nonattainment in some areas after 2016.

⁷ The EPA finalized a 1-hour SO₂ standard of 75 ppb in June 2010. Nonattainment areas have not yet been designated as of September 2012.

⁸ California standards for O₃, carbon monoxide (except 8-hour Lake Tahoe), SO₂ (1 and 24 hour), NO₂, and particulate matter (PM₁₀, PM_{2.5}, and visibility reducing particles), are values that are not to be exceeded. All others are not to be equaled or exceeded. CAAQS are listed in the Table of Standards in Section 70200 of Title 17 of the California Code of Regulations.

⁹ National standards (other than O₃, particulate matter, and those based on annual arithmetic mean) are not to be exceeded more than once a year. The O₃ standard is attained when the fourth highest 8-hour concentration measured at each site in a year, averaged over 3 years, is equal to or less than the standard. For PM₁₀, the 24-hour standard is attained when the expected number of days per calendar year with a 24-hour average concentration above 150 µg/m³ is equal to or less than one. For PM_{2.5}, the 24-hour standard is attained when 98 percent of the daily concentrations, averaged over 3 years, are equal to or less than the standard. Contact the EPA for further clarification and current national policies.

¹⁰ Lead NAAQS are not considered in Transportation Conformity analysis.

µg/m³= micrograms per cubic meter; CAAQS = California Ambient Air Quality Standards; CO= carbon monoxide; DPM = diesel particulate matter; FCAA = Federal Clean Air Act; NAAQS = National Ambient Air Quality Standards; NO₂ = nitrogen dioxide; NO_x = oxides of nitrogen; O₃ = ozone; Pb = lead; PM_{2.5} = particles of 2.5 micrometers and smaller; PM₁₀ = particles of 10 micrometers and smaller; ppb = parts per billion; ppm = parts per million; ROG = reactive organic gas; SJVAB = San Joaquin Valley Air Basin; SIP = state implementation plan; SO₂ = sulfur dioxide; SO_x = sulfur oxides; TAC = toxic air contaminant

Stockton Diamond Grade Separation Project

San Joaquin Regional Rail Commission

Record of Non-Applicability

Prepared by:

U.S. Department of Transportation

Federal Railroad Administration

The Federal Railroad Administration has prepared this Record of Non-Applicability, consistent with Section 176(c) of the Federal Clean Air Act, 42 U.S.C. 7401-7671 et seq., and its implementing regulations, 40 CFR Part 93 (“General Conformity Rule”). Specifically, this Record of Non-Applicability documents FRA’s finding that a general conformity determination is not required for the proposed action because the total of direct and indirect emissions is below the *de minimis* emissions levels for criteria pollutants.

Record of Non-Applicability (RONA) for Clean Air Act Conformity, San Joaquin County, California

Consistent with the Clean Air Act (40 U.S.C. 7401 – 7671 et seq.) and the General Conformity Rule (40 CFR Part 93), federal agencies must work with state, tribal and local governments in a nonattainment or maintenance area to ensure that federal actions conform to the air quality plans established in the applicable state or tribal implementation plan. The federal agency is responsible for determining whether a federal action conforms to the applicable implementation plan before the action is taken. However, federal actions may be exempt from conformity determinations if they do not exceed designated *de minimis* levels for criteria pollutants.

The Federal Railroad Administration (FRA) evaluated conformity for the Proposed Action (the Stockton Diamond Grade Separation Project [Project]) and determined a general conformity determination is not required as the total direct and indirect emissions of the Proposed Action as below the *de minimis* thresholds for criteria pollutants within the San Joaquin Valley Air Basin (SJVAB). This Record of Non-Applicability (RONA) documents FRA's evaluation.¹ This Record of Non-Applicability (RONA) document's FRA evaluation, because the analysis used for the Final Environmental Assessment/Finding of No Significant Impact (EA/FONSI) also generated the information necessary for the General Conformity Determination, specific analysis may be incorporated herein by reference.

Proposed Action

The San Joaquin Regional Rail Commission (SJRRRC), the project sponsor of the Proposed Action proposes to replace the existing at-grade intersection of the BNSF Railway (BNSF) Stockton Subdivision and Union Pacific Railroad (UP) Fresno Subdivision, with a grade-separated structure (flyover bridge) that would elevate the UP main tracks over the BNSF main tracks.

Applicability Evaluation

The Proposed Action is located in San Joaquin County and may potentially affect the San Joaquin Valley Air Basin (SJVAB) by construction and operation. In 2019, SJRRRC conducted a Benefit-Cost Analysis (BCA) for the Stockton Diamond Grade Separation Project (HDR 2019).² Where appropriate, the BCA was used to support air quality emissions and benefits analyzed in this RONA.

¹ The environmental review, consultation, and other actions required by applicable federal environmental laws for the Proposed Action are being or have been carried out by the State of California pursuant to 23 United States Code (USC) 327 and a Memorandum of Understanding dated July 23, 2019 (MOU), executed by FRA and the State of California. Although CHSRA is the lead NEPA agency for the environmental review, consistent with 23 U.S.C. 327 and the MOU, FRA retains its obligations to make general conformity determinations under the Clean Air Act. No comments were received on the Draft EA Chapter 3.13 Air Quality.

² Both the Proposed Action and the 2019 design, evaluated in the BCA, include the same grade separation of the existing at-grade crossing of the BNSF and UP freight rail lines. In contrast to the 2019 design, the Proposed Action would result in fewer road crossings and will therefore likely result in fewer emissions. In addition, the BCA analyzed the same reduction in train delays as the Proposed Action.

De minimis levels (in tons/year) for criteria pollutants within the SJVAB are listed in Table 1.

Table 1: General Conformity *de minimis* levels for the San Joaquin Valley Air Basin

Pollutant	Area Designation	De minimis Level (tons/year)
Oxides of Nitrogen (NO _x)*	Extreme Nonattainment – Ozone	10
Volatile Organic Compounds (VOC)*	Extreme Nonattainment – Ozone	10
Coarse Particulate Matter (PM ₁₀)	Maintenance	100
Fine Particulate Matter (PM _{2.5})	Nonattainment	100

* Both NO_x and VOC are ozone precursors.

Short-term Criteria Air Emissions

The Proposed Action would generate a short-term release of criteria air emissions from the operation of construction equipment, soil hauling and delivery trucks to and from the construction site, and construction worker’s vehicles commuting during construction activities. Additionally, particulate matter emissions would result from the movement of soil and wind-blown dust from disturbed surfaces during construction.

These short-term construction emissions generated as a result of the Proposed Action were estimated using the California Emissions Estimator Model (CalEEMod) version 2020.4.0. CalEEMod is a computer model developed by the California Air Pollution Officers Association (CAPCOA) with the input of several air quality management and pollution control districts; the model estimates anticipated emission burdens associated with land development projects in California. CalEEMod has separate databases for specific counties and air districts. The SJVAB database was used for the purposes of construction emissions analysis for the Proposed Action.

In preparing the National Environmental Policy Act (NEPA) analysis for the Proposed Action, CHSRA quantitatively analyzed and included in the emissions modeling three design options for the Proposed Action: soil embankment, precast concrete panel system with lightweight cellular concrete fill, and viaduct bridge structure. Any of the three design options in the Proposed Action will likely result in fewer construction-period air quality impacts than the 2019 design, as a result of the design changes, which reduce the amount of construction undertaken. A summary of emission sources from all three design options are provided, below.

Soil Embankment Option

Table 2 summarizes the construction equipment type, the quantity of equipment, hours of operation, horsepower, and load factor for each construction activity under the soil embankment option for the Proposed Action.

Wheel Loader	1	8	475	0.37
Asphalt Paver	1	8	130	0.42
Roller Compactor	1	8	131	0.43

The annual construction emissions from the viaduct bridge structure option of the Proposed Action are shown in Table 7.

Table 7: Annual Construction Emissions – Viaduct Bridge Structure Option (tons/year)

Year	NO _x	VOC	PM ₁₀	PM _{2.5}
2023	1.29	0.22	0.17	0.06
2024	2.51	0.47	0.34	0.13
2025	2.01	0.43	0.31	0.12
2026	0.81	0.18	0.10	0.04
Peak Emissions	2.51	0.47	0.34	0.13
de minimis Criteria	10	10	100	100

As shown in Tables 3, 5, and 7, annual construction emissions generated by the three design options for the Proposed Action are well below the SJVAB general conformity *de minimis* levels. Therefore, although the proposed Action will generate short-term construction emissions, these emissions would be well below the *de minimis* levels for the SJVAB.

Long-term Air Emissions

Table 8 summarizes the total long-term emissions reduction and the average annual emissions reduction for the Proposed Action.

Table 8: Operational Emissions (tons)

Emissions Source	NO _x	VOC	PM	SO ₂	CO ₂
Train Idling	-40.53	-1.55	-0.66	-2.15	-11,677.7
Vehicle Idling (BNSF Crossings)	-7.75	-1.44	-0.69	-0.38	-53,678.8
Vehicle Idling (UP Crossings)	-6.18	-1.06	-0.46	-0.22	-31,233.40
Total (30 Years)	-54.46	-4.06	-1.82	-2.75	-96,589.5
Average Year	-1.82	-0.14	-0.06	-0.09	-3,219.7

As shown in Table 8, the Proposed Action will result in a long-term decrease in criteria pollutant emissions when compared to the No Action Alternative as described in the Final EA/FONSI. The Proposed Action will improve regional passenger and freight rail efficiency and travel reliability by reducing conflicting train movements and improve air quality through the reduction of criteria pollutant emissions caused by trains and vehicles that sit idling due to congestion and delays. The improved freight mobility will reduce the total daily occupancy of the roadway crossings by approximately 30 percent in 2045. In addition, the reduction in crossing occupancy will improve on-road traffic flow and reduce vehicle idling, resulting in a reduction in overall emissions within the Project Study Area

The BCA calculated the 30-year reduction in train idling and on-road vehicle idling emissions associated with the 2019 design and the elimination of the existing at-grade crossings. As the design changes from the 2019 design and Proposed Action would generally not affect the long-term emissions assumptions, the emission reductions associated with the 2019 design were assumed for the Proposed Action. Based on these assumptions, and the reduced impact on local roads, the Proposed Action will reduce overall emissions within the SJVAB during the operation period.

Conclusion

Based on the findings above, FRA concludes that implementation of the Proposed Action would not result in exceedances of the *de minimis* thresholds for applicable criteria pollutants. Since the total direct and indirect emissions of the Project Action are below the *de minimis* thresholds for criteria pollutants within the SJVAB FRA concludes a general conformity determination is not required.

M.3 United States Fish and Wildlife Service (USFWS) Information for Planning and Consultation (IPac) Resource List

This page is intentionally blank.

IPaC resource list

This report is an automatically generated list of species and other resources such as critical habitat (collectively referred to as *trust resources*) under the U.S. Fish and Wildlife Service's (USFWS) jurisdiction that are known or expected to be on or near the project area referenced below. The list may also include trust resources that occur outside of the project area, but that could potentially be directly or indirectly affected by activities in the project area. However, determining the likelihood and extent of effects a project may have on trust resources typically requires gathering additional site-specific (e.g., vegetation/species surveys) and project-specific (e.g., magnitude and timing of proposed activities) information.

Below is a summary of the project information you provided and contact information for the USFWS office(s) with jurisdiction in the defined project area. Please read the introduction to each section that follows (Endangered Species, Migratory Birds, USFWS Facilities, and NWI Wetlands) for additional information applicable to the trust resources addressed in that section.

Location

San Joaquin County, California

Local office

Sacramento Fish And Wildlife Office

☎ (916) 414-6600

📠 (916) 414-6713

Federal Building
2800 Cottage Way, Room W-2605
Sacramento, CA 95825-1846

Endangered species

This resource list is for informational purposes only and does not constitute an analysis of project level impacts.

The primary information used to generate this list is the known or expected range of each species. Additional areas of influence (AOI) for species are also considered. An AOI includes areas outside of the species range if the species could be indirectly affected by activities in that area (e.g., placing a dam upstream of a fish population, even if that fish does not occur at the dam site, may indirectly impact the species by reducing or eliminating water flow downstream). Because species can move, and site conditions can change, the species on this list are not guaranteed to be found on or near the project area. To fully determine any potential effects to species, additional site-specific and project-specific information is often required.

Section 7 of the Endangered Species Act **requires** Federal agencies to "request of the Secretary information whether any species which is listed or proposed to be listed may be present in the area of such proposed action" for any project that is conducted, permitted, funded, or licensed by any Federal agency. A letter from the local office and a species list which fulfills this requirement can **only** be obtained by requesting an official species list from either the Regulatory Review section in IPaC (see directions below) or from the local field office directly.

For project evaluations that require USFWS concurrence/review, please return to the IPaC website and request an official species list by doing the following:

1. Draw the project location and click CONTINUE.
2. Click DEFINE PROJECT.
3. Log in (if directed to do so).
4. Provide a name and description for your project.
5. Click REQUEST SPECIES LIST.

Listed species¹ and their critical habitats are managed by the [Ecological Services Program](#) of the U.S. Fish and Wildlife Service (USFWS) and the fisheries division of the National Oceanic and Atmospheric Administration (NOAA Fisheries²).

Species and critical habitats under the sole responsibility of NOAA Fisheries are **not** shown on this list. Please contact [NOAA Fisheries](#) for [species under their jurisdiction](#).

1. Species listed under the [Endangered Species Act](#) are threatened or endangered; IPaC also shows species that are candidates, or proposed, for listing. See the [listing status page](#) for more information.
2. [NOAA Fisheries](#), also known as the National Marine Fisheries Service (NMFS), is an office of the National Oceanic and Atmospheric Administration within the Department of Commerce.

The following species are potentially affected by activities in this location:

Mammals

NAME

STATUS

Riparian Brush Rabbit *Sylvilagus bachmani riparius* Endangered
 No critical habitat has been designated for this species.
<https://ecos.fws.gov/ecp/species/6189>

Reptiles

NAME	STATUS
Giant Garter Snake <i>Thamnophis gigas</i> No critical habitat has been designated for this species. https://ecos.fws.gov/ecp/species/4482	Threatened

Amphibians

NAME	STATUS
California Red-legged Frog <i>Rana draytonii</i> There is final critical habitat for this species. Your location is outside the critical habitat. https://ecos.fws.gov/ecp/species/2891	Threatened
California Tiger Salamander <i>Ambystoma californiense</i> There is final critical habitat for this species. Your location is outside the critical habitat. https://ecos.fws.gov/ecp/species/2076	Threatened

Fishes

NAME	STATUS
Delta Smelt <i>Hypomesus transpacificus</i> There is final critical habitat for this species. Your location is outside the critical habitat. https://ecos.fws.gov/ecp/species/321	Threatened

Insects

NAME	STATUS
Valley Elderberry Longhorn Beetle <i>Desmocerus californicus dimorphus</i> There is final critical habitat for this species. Your location is outside the critical habitat. https://ecos.fws.gov/ecp/species/7850	Threatened

Crustaceans

NAME	STATUS
------	--------

Vernal Pool Fairy Shrimp *Branchinecta lynchi* Threatened
 There is **final** critical habitat for this species. Your location is outside the critical habitat.
<https://ecos.fws.gov/ecp/species/498>

Vernal Pool Tadpole Shrimp *Lepidurus packardii* Endangered
 There is **final** critical habitat for this species. Your location is outside the critical habitat.
<https://ecos.fws.gov/ecp/species/2246>

Flowering Plants

NAME	STATUS
Palmate-bracted Bird's Beak <i>Cordylanthus palmatus</i> No critical habitat has been designated for this species. https://ecos.fws.gov/ecp/species/1616	Endangered

Critical habitats

Potential effects to critical habitat(s) in this location must be analyzed along with the endangered species themselves.

THERE ARE NO CRITICAL HABITATS AT THIS LOCATION.

Migratory birds

Certain birds are protected under the Migratory Bird Treaty Act¹ and the Bald and Golden Eagle Protection Act².

Any person or organization who plans or conducts activities that may result in impacts to migratory birds, eagles, and their habitats should follow appropriate regulations and consider implementing appropriate conservation measures, as described [below](#).

1. The [Migratory Birds Treaty Act](#) of 1918.
2. The [Bald and Golden Eagle Protection Act](#) of 1940.

Additional information can be found using the following links:

- Birds of Conservation Concern <http://www.fws.gov/birds/management/managed-species/birds-of-conservation-concern.php>
- Measures for avoiding and minimizing impacts to birds <http://www.fws.gov/birds/management/project-assessment-tools-and-guidance/conservation-measures.php>
- Nationwide conservation measures for birds <http://www.fws.gov/migratorybirds/pdf/management/nationwidestandardconservationmeasures.pdf>

The birds listed below are birds of particular concern either because they occur on the [USFWS Birds of Conservation Concern](#) (BCC) list or warrant special attention in your project location. To learn more about the levels of concern for birds on your list and how this list is generated, see the [FAQ below](#). This is not a list of every bird you may find in this location, nor a guarantee that every bird on this list will be found in your project area. To see exact locations of where birders and the general public have sighted birds in and around your project area, visit the [E-bird data mapping tool](#) (Tip: enter your location, desired date range and a species on your list). For projects that occur off the Atlantic Coast, additional maps and models detailing the relative occurrence and abundance of bird species on your list are available. Links to additional information about Atlantic Coast birds, and other important information about your migratory bird list, including how to properly interpret and use your migratory bird report, can be found [below](#).

For guidance on when to schedule activities or implement avoidance and minimization measures to reduce impacts to migratory birds on your list, click on the PROBABILITY OF PRESENCE SUMMARY at the top of your list to see when these birds are most likely to be present and breeding in your project area.

NAME

BREEDING SEASON (IF A BREEDING SEASON IS INDICATED FOR A BIRD ON YOUR LIST, THE BIRD MAY BREED IN YOUR PROJECT AREA SOMETIME WITHIN THE TIMEFRAME SPECIFIED, WHICH IS A VERY LIBERAL ESTIMATE OF THE DATES INSIDE WHICH THE BIRD BREEDS ACROSS ITS ENTIRE RANGE. "BREEDS ELSEWHERE" INDICATES THAT THE BIRD DOES NOT LIKELY BREED IN YOUR PROJECT AREA.)

Burrowing Owl *Athene cunicularia*

This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA

<https://ecos.fws.gov/ecp/species/9737>

Breeds Mar 15 to Aug 31

Common Yellowthroat *Geothlypis trichas sinuosa*

This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA

<https://ecos.fws.gov/ecp/species/2084>

Breeds May 20 to Jul 31

Lawrence's Goldfinch *Carduelis lawrencei*

This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.

<https://ecos.fws.gov/ecp/species/9464>

Breeds Mar 20 to Sep 20

<p>Long-billed Curlew <i>Numenius americanus</i></p> <p>This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.</p> <p>https://ecos.fws.gov/ecp/species/5511</p>	Breeds elsewhere
<p>Nuttall's Woodpecker <i>Picoides nuttallii</i></p> <p>This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA</p> <p>https://ecos.fws.gov/ecp/species/9410</p>	Breeds Apr 1 to Jul 20
<p>Oak Titmouse <i>Baeolophus inornatus</i></p> <p>This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.</p> <p>https://ecos.fws.gov/ecp/species/9656</p>	Breeds Mar 15 to Jul 15
<p>Song Sparrow <i>Melospiza melodia</i></p> <p>This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA</p>	Breeds Feb 20 to Sep 5
<p>Spotted Towhee <i>Pipilo maculatus clementae</i></p> <p>This is a Bird of Conservation Concern (BCC) only in particular Bird Conservation Regions (BCRs) in the continental USA</p> <p>https://ecos.fws.gov/ecp/species/4243</p>	Breeds Apr 15 to Jul 20
<p>Wrentit <i>Chamaea fasciata</i></p> <p>This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.</p>	Breeds Mar 15 to Aug 10
<p>Yellow-billed Magpie <i>Pica nuttalli</i></p> <p>This is a Bird of Conservation Concern (BCC) throughout its range in the continental USA and Alaska.</p> <p>https://ecos.fws.gov/ecp/species/9726</p>	Breeds Apr 1 to Jul 31

Probability of Presence Summary

The graphs below provide our best understanding of when birds of concern are most likely to be present in your project area. This information can be used to tailor and schedule your project activities to avoid or minimize impacts to birds. Please make sure you read and understand the FAQ "Proper Interpretation and Use of Your Migratory Bird Report" before using or attempting to interpret this report.

Probability of Presence (■)

Each green bar represents the bird's relative probability of presence in the 10km grid cell(s) your project overlaps during a particular week of the year. (A year is represented as 12 4-week months.) A taller bar indicates a higher probability of species presence. The survey effort (see below) can be used to establish a level of confidence in the presence score. One can have higher confidence in the presence score if the corresponding survey effort is also high.

How is the probability of presence score calculated? The calculation is done in three steps:

1. The probability of presence for each week is calculated as the number of survey events in the week where the species was detected divided by the total number of survey events for that week. For example, if in week 12 there were 20 survey events and the Spotted Towhee was found in 5 of them, the probability of presence of the Spotted Towhee in week 12 is 0.25.
2. To properly present the pattern of presence across the year, the relative probability of presence is calculated. This is the probability of presence divided by the maximum probability of presence across all weeks. For example, imagine the probability of presence in week 20 for the Spotted Towhee is 0.05, and that the probability of presence at week 12 (0.25) is the maximum of any week of the year. The relative probability of presence on week 12 is $0.25/0.25 = 1$; at week 20 it is $0.05/0.25 = 0.2$.
3. The relative probability of presence calculated in the previous step undergoes a statistical conversion so that all possible values fall between 0 and 10, inclusive. This is the probability of presence score.

To see a bar's probability of presence score, simply hover your mouse cursor over the bar.

Breeding Season (■)

Yellow bars denote a very liberal estimate of the time-frame inside which the bird breeds across its entire range. If there are no yellow bars shown for a bird, it does not breed in your project area.

Survey Effort (|)

Vertical black lines superimposed on probability of presence bars indicate the number of surveys performed for that species in the 10km grid cell(s) your project area overlaps. The number of surveys is expressed as a range, for example, 33 to 64 surveys.

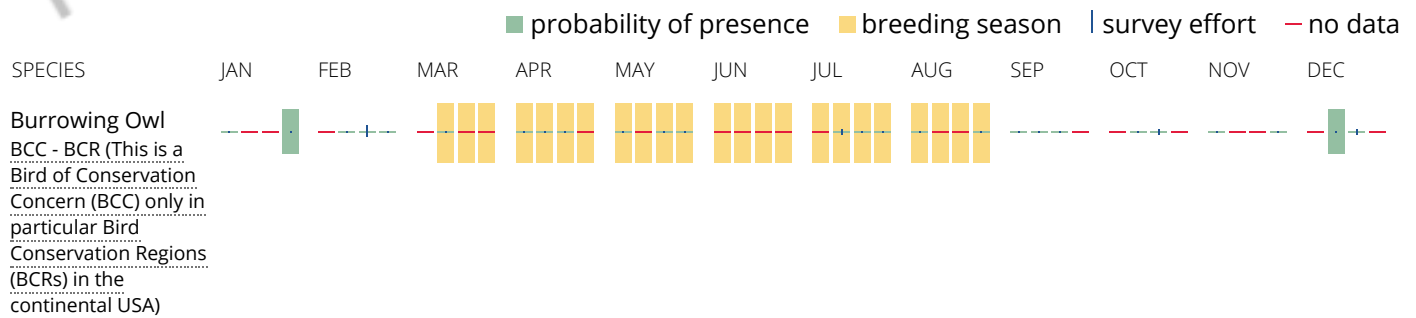

To see a bar's survey effort range, simply hover your mouse cursor over the bar.

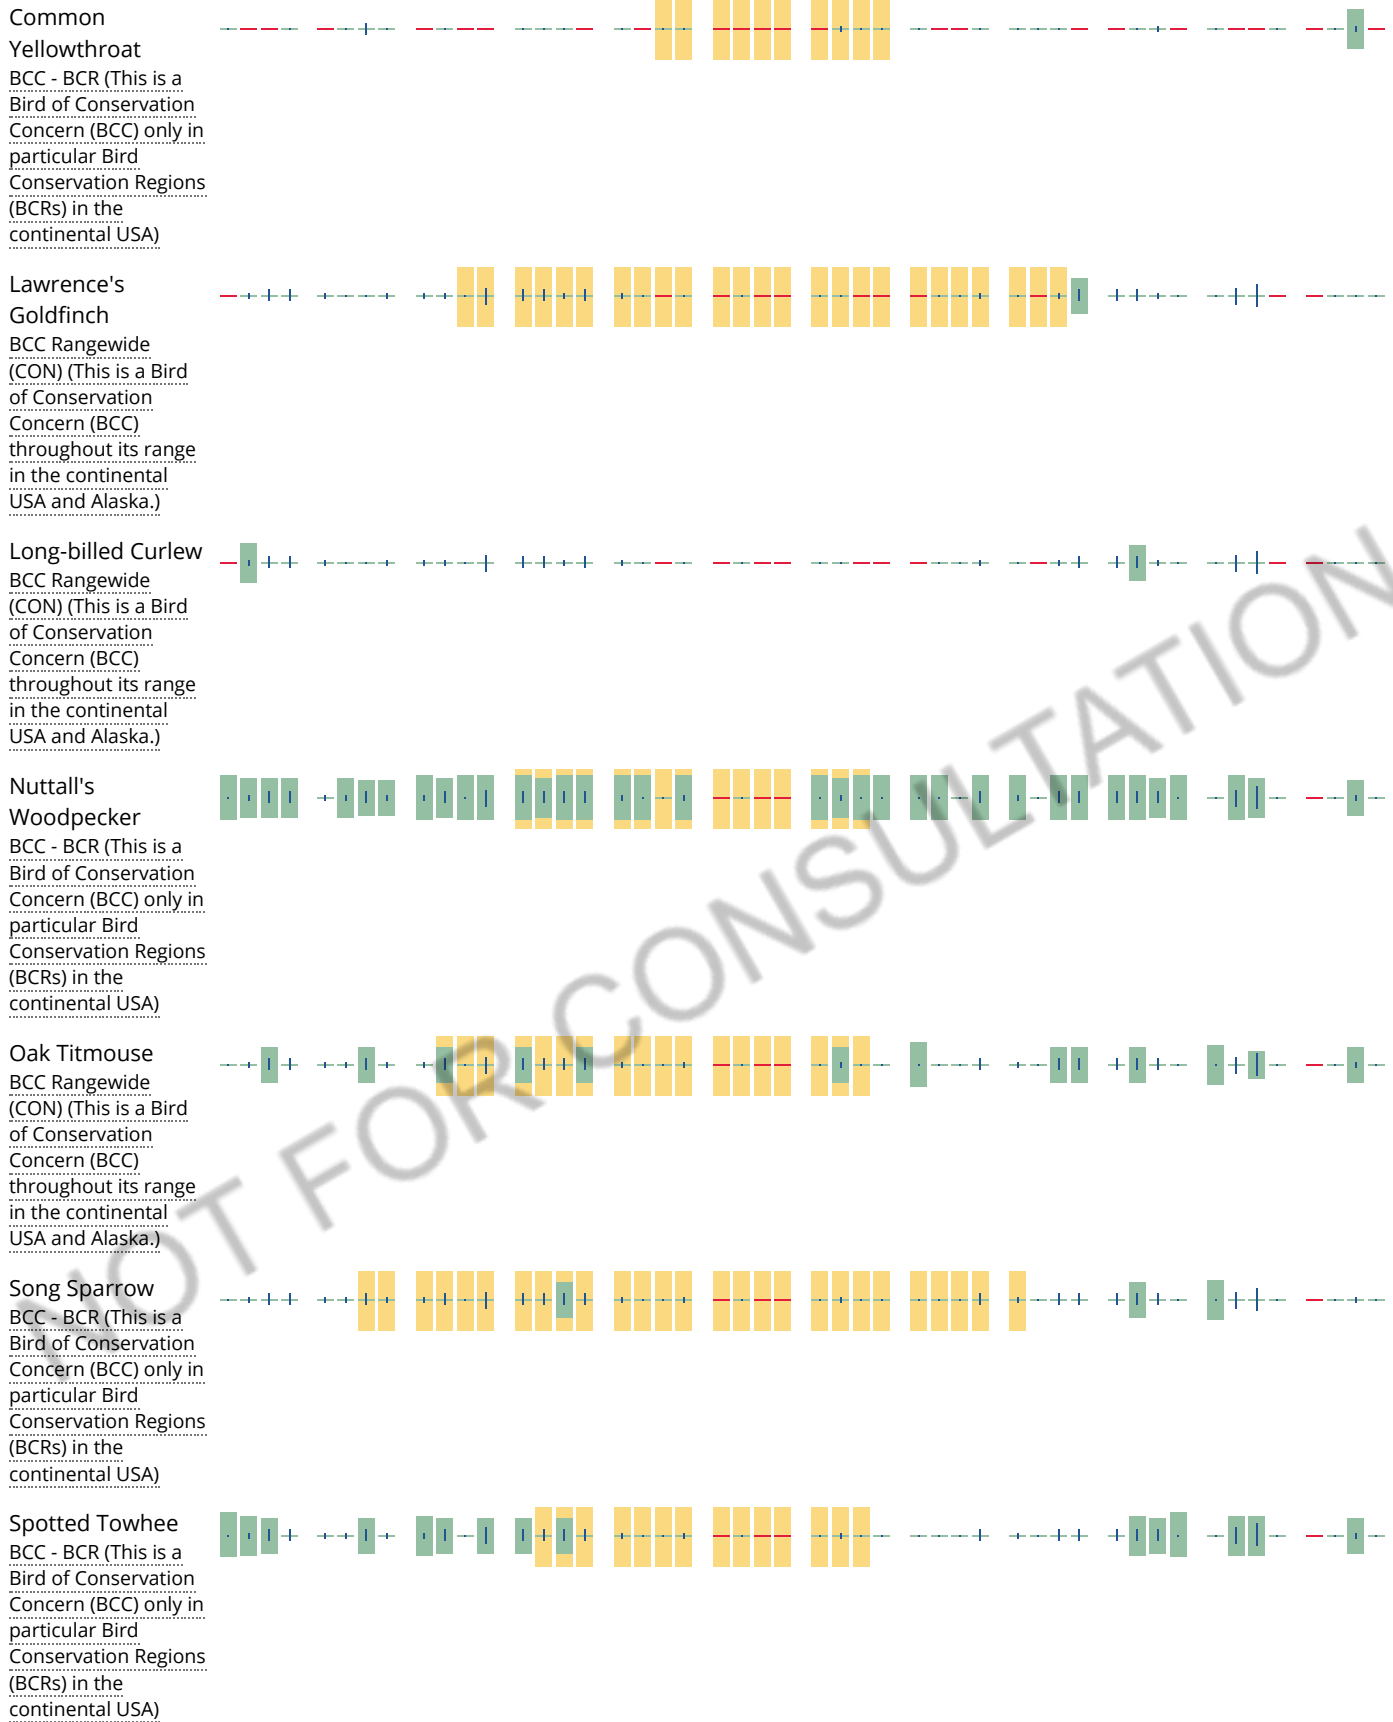

No Data (-)

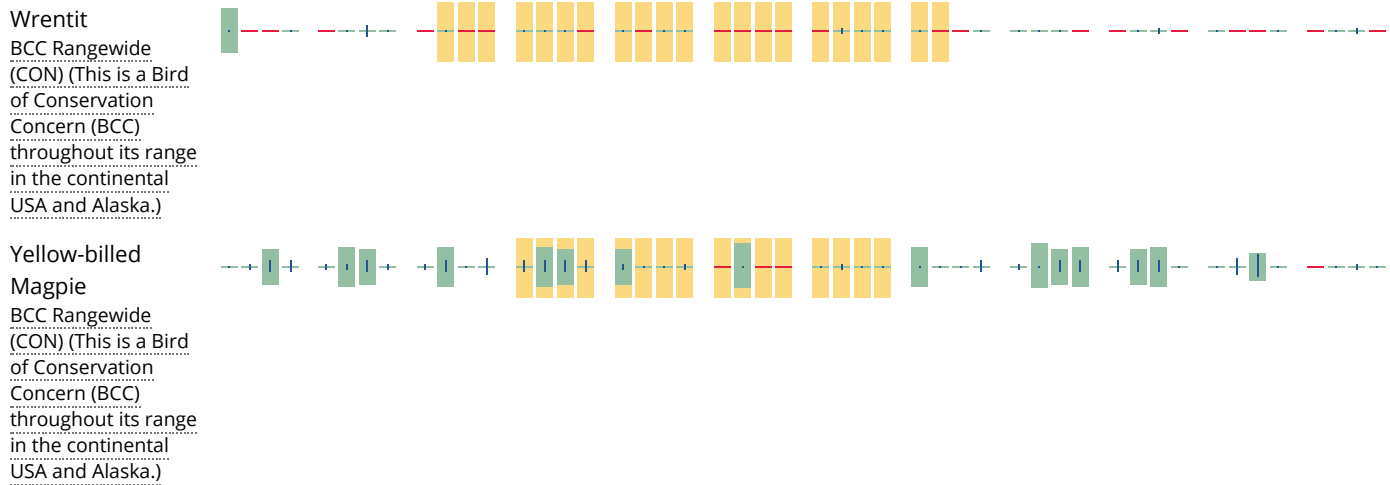

A week is marked as having no data if there were no survey events for that week.

Survey Timeframe

Surveys from only the last 10 years are used in order to ensure delivery of currently relevant information. The exception to this is areas off the Atlantic coast, where bird returns are based on all years of available data, since data in these areas is currently much more sparse.

Tell me more about conservation measures I can implement to avoid or minimize impacts to migratory birds.

[Nationwide Conservation Measures](#) describes measures that can help avoid and minimize impacts to all birds at any location year round. Implementation of these measures is particularly important when birds are most likely to occur in the project area. When birds may be breeding in the area, identifying the locations of any active nests and avoiding their destruction is a very helpful impact minimization measure. To see when birds are most likely to occur and be breeding in your project area, view the Probability of Presence Summary. [Additional measures](#) and/or [permits](#) may be advisable depending on the type of activity you are conducting and the type of infrastructure or bird species present on your project site.

What does IPaC use to generate the migratory birds potentially occurring in my specified location?

The Migratory Bird Resource List is comprised of USFWS [Birds of Conservation Concern \(BCC\)](#) and other species that may warrant special attention in your project location.

The migratory bird list generated for your project is derived from data provided by the [Avian Knowledge Network \(AKN\)](#). The AKN data is based on a growing collection of [survey, banding, and citizen science datasets](#) and is queried and filtered to return a list of those birds reported as occurring in the 10km grid cell(s) which your project intersects, and that have been identified as warranting special attention because they are a BCC species in that area, an eagle ([Eagle Act](#) requirements may apply), or a species that has a particular vulnerability to offshore activities or development.

Again, the Migratory Bird Resource list includes only a subset of birds that may occur in your project area. It is not representative of all birds that may occur in your project area. To get a list of all birds potentially present in your project area, please visit the [AKN Phenology Tool](#).

What does IPaC use to generate the probability of presence graphs for the migratory birds potentially occurring in my specified location?

The probability of presence graphs associated with your migratory bird list are based on data provided by the [Avian Knowledge Network \(AKN\)](#). This data is derived from a growing collection of [survey, banding, and citizen science datasets](#).

Probability of presence data is continuously being updated as new and better information becomes available. To learn more about how the probability of presence graphs are produced and how to interpret them, go the Probability of Presence Summary and then click on the "Tell me about these graphs" link.

How do I know if a bird is breeding, wintering, migrating or present year-round in my project area?

To see what part of a particular bird's range your project area falls within (i.e. breeding, wintering, migrating or year-round), you may refer to the following resources: [The Cornell Lab of Ornithology All About Birds Bird Guide](#), or (if you are unsuccessful in locating the bird of interest there), the [Cornell Lab of Ornithology Neotropical Birds guide](#). If a bird on your migratory bird species list has a breeding season associated with it, if that bird does occur in your project area, there may be nests present at some point within the timeframe specified. If "Breeds elsewhere" is indicated, then the bird likely does not breed in your project area.

What are the levels of concern for migratory birds?

Migratory birds delivered through IPaC fall into the following distinct categories of concern:

1. "BCC Rangewide" birds are [Birds of Conservation Concern](#) (BCC) that are of concern throughout their range anywhere within the USA (including Hawaii, the Pacific Islands, Puerto Rico, and the Virgin Islands);
2. "BCC - BCR" birds are BCCs that are of concern only in particular Bird Conservation Regions (BCRs) in the continental USA; and
3. "Non-BCC - Vulnerable" birds are not BCC species in your project area, but appear on your list either because of the [Eagle Act](#) requirements (for eagles) or (for non-eagles) potential susceptibilities in offshore areas from certain types of development or activities (e.g. offshore energy development or longline fishing).

Although it is important to try to avoid and minimize impacts to all birds, efforts should be made, in particular, to avoid and minimize impacts to the birds on this list, especially eagles and BCC species of rangewide concern. For more information on conservation measures you can implement to help avoid and minimize migratory bird impacts and requirements for eagles, please see the FAQs for these topics.

Details about birds that are potentially affected by offshore projects

For additional details about the relative occurrence and abundance of both individual bird species and groups of bird species within your project area off the Atlantic Coast, please visit the [Northeast Ocean Data Portal](#). The Portal also offers data and information about other taxa besides birds that may be helpful to you in your project review. Alternately, you may download the bird model results files underlying the portal maps through the [NOAA NCCOS Integrative Statistical Modeling and Predictive Mapping of Marine Bird Distributions and Abundance on the Atlantic Outer Continental Shelf](#) project webpage.

Bird tracking data can also provide additional details about occurrence and habitat use throughout the year, including migration. Models relying on survey data may not include this information. For additional information on marine bird tracking data, see the [Diving Bird Study](#) and the [nanotag studies](#) or contact [Caleb Spiegel](#) or [Pam Loring](#).

What if I have eagles on my list?

If your project has the potential to disturb or kill eagles, you may need to [obtain a permit](#) to avoid violating the Eagle Act should such impacts occur.

Proper Interpretation and Use of Your Migratory Bird Report

The migratory bird list generated is not a list of all birds in your project area, only a subset of birds of priority concern. To learn more about how your list is generated, and see options for identifying what other birds may be in your project area, please see the FAQ "What does IPaC use to generate the migratory birds potentially occurring in my specified location". Please be aware this report provides the "probability of presence" of birds within the 10 km grid cell(s) that overlap your project; not your exact project footprint. On the graphs provided, please also look carefully at the survey effort (indicated by the black vertical bar) and for the existence of the "no data" indicator (a red horizontal bar). A high survey effort is the key component. If the survey effort is high, then the probability of presence score can be viewed as more dependable. In contrast, a low survey effort bar or no data bar means a lack of data and, therefore, a lack of certainty about presence of the species. This list is not perfect; it is simply a starting point for identifying what birds of concern have the potential to be in your project area, when they might be there, and if they might be breeding (which means nests might be present). The list helps you know what to look for to

confirm presence, and helps guide you in knowing when to implement conservation measures to avoid or minimize potential impacts from your project activities, should presence be confirmed. To learn more about conservation measures, visit the FAQ "Tell me about conservation measures I can implement to avoid or minimize impacts to migratory birds" at the bottom of your migratory bird trust resources page.

Facilities

National Wildlife Refuge lands

Any activity proposed on lands managed by the [National Wildlife Refuge](#) system must undergo a 'Compatibility Determination' conducted by the Refuge. Please contact the individual Refuges to discuss any questions or concerns.

THERE ARE NO REFUGE LANDS AT THIS LOCATION.

Fish hatcheries

THERE ARE NO FISH HATCHERIES AT THIS LOCATION.

Wetlands in the National Wetlands Inventory

Impacts to [NWI wetlands](#) and other aquatic habitats may be subject to regulation under Section 404 of the Clean Water Act, or other State/Federal statutes.

For more information please contact the Regulatory Program of the local [U.S. Army Corps of Engineers District](#).

Please note that the NWI data being shown may be out of date. We are currently working to update our NWI data set. We recommend you verify these results with a site visit to determine the actual extent of wetlands on site.

This location overlaps the following wetlands:

FRESHWATER EMERGENT WETLAND

[PEM1A](#)

RIVERINE

[R5UBFx](#)

A full description for each wetland code can be found at the [National Wetlands Inventory website](#)

Data limitations

The Service's objective of mapping wetlands and deepwater habitats is to produce reconnaissance level information on the location, type and size of these resources. The maps are prepared from the analysis of high altitude imagery. Wetlands are identified based on vegetation, visible hydrology and geography. A margin of error is inherent in the use of imagery; thus, detailed on-the-ground inspection of any particular site may result in revision of the wetland boundaries or classification established through image analysis.

The accuracy of image interpretation depends on the quality of the imagery, the experience of the image analysts, the amount and quality of the collateral data and the amount of ground truth verification work conducted. Metadata should be consulted to determine the date of the source imagery used and any mapping problems.

Wetlands or other mapped features may have changed since the date of the imagery or field work. There may be occasional differences in polygon boundaries or classifications between the information depicted on the map and the actual conditions on site.

Data exclusions

Certain wetland habitats are excluded from the National mapping program because of the limitations of aerial imagery as the primary data source used to detect wetlands. These habitats include seagrasses or submerged aquatic vegetation that are found in the intertidal and subtidal zones of estuaries and nearshore coastal waters. Some deepwater reef communities (coral or tubercid worm reefs) have also been excluded from the inventory. These habitats, because of their depth, go undetected by aerial imagery.

Data precautions

Federal, state, and local regulatory agencies with jurisdiction over wetlands may define and describe wetlands in a different manner than that used in this inventory. There is no attempt, in either the design or products of this inventory, to define the limits of proprietary jurisdiction of any Federal, state, or local government or to establish the geographical scope of the regulatory programs of government agencies. Persons intending to engage in activities involving modifications within or adjacent to wetland areas should seek the advice of appropriate federal, state, or local agencies concerning specified agency regulatory programs and proprietary jurisdictions that may affect such activities.

M.5 Special Status Plants and Wildlife Tables

This page is intentionally blank.

Special Status Plants

Scientific Name	Common Name	Federal	State	CRPR	Habitat Characteristics	Potential for Occurrence	Rationale
<i>Astragalus tener</i> var. <i>tener</i>	alkali milk-vetch	None	None	1B.2	Alkaline soils in playas, adobe clay grassland, and vernal pools. Elevation: 0–195 feet. Blooming period: March–June	N	Suitable habitat not present in the BSA.
<i>Atriplex cordulata</i> var. <i>cordulata</i>	heartscale	None	None	1B.2	Saline or alkaline soils in chenopod scrub, meadows, seeps, and sandy grassland. Elevation: 0–1,837 feet. Blooming period: April–October	N	Suitable habitat not present in the BSA.
<i>Blepharizonia plumosa</i>	big tarplant	None	None	1B.1	Usually clay soils in grassland. Elevation: 95–1,655 feet. Blooming period: July–October	N	Suitable habitat not present in the BSA.
<i>Brasenia schreberi</i>	watershield	None	None	2B.3	Freshwater marshes and swamps. Elevation: 95–7,220 feet. Blooming period: June–September	N	Suitable habitat not present in the BSA.
<i>Chloropyron palmatum</i>	palmate-bracted bird's-beak	FE	SE	1B.1	Alkaline soils in chenopod scrub and grassland. Elevation: 15–510 feet. Blooming period: May–October	N	Suitable habitat not present in the BSA.
<i>Extriplex joaquiniana</i>	San Joaquin spearscale	None	None	1B.2	Alkaline soils in chenopod scrub, meadows, seeps, playas, and grassland. Elevation: 0–2,740 feet. Blooming period: April–October (synonym of <i>Atriplex joaquiniana</i>)	N	Suitable habitat not present in the BSA.
<i>Hibiscus lasiocarpus</i> var. <i>occidentalis</i>	woolly rose-mallow	None	None	1B.2	Often in riprap on sides of levees in freshwater marshes and swamps. Elevation: 0–395 feet. Blooming period: June–September	N	Suitable habitat not present in the BSA.
<i>Lathyrus jepsonii</i> var. <i>jepsonii</i>	Delta tule pea	None	None	1B.2	Freshwater and brackish marshes and swamps. Elevation: 0–16 feet. Blooming period: May–September	N	Suitable habitat not present in the BSA.
<i>Sagittaria sanfordii</i>	Sanford's arrowhead	None	None	1B.2	Fresh water marshes and swamps that are typically shallow. Elevation: 0–2,132 feet. Blooming period: May–October	N	Suitable habitat not present in the BSA.
<i>Symphyotrichum lentum</i>	Suisun Marsh aster	None	None	1B.2	Brackish and freshwater marshes and swamps. Elevation: 0–9 feet. Blooming period: (April)May–November (synonym of <i>Aster chilensis</i> var. <i>lentus</i> and <i>A. lentus</i>)	N	Suitable habitat not present in the BSA.
<i>Trifolium hydrophilum</i>	saline clover	None	None	1B.2	Marshes, swamps, vernal pools, and grassland with mesic or alkaline soils. Elevation: 0–985 feet. Blooming period: April–June	N	Suitable habitat not present in the BSA.

Table Notes:

4 Plants of limited distribution - watch list

CRPR Threat Code Extension

None Plants lacking any threat information

.1 Seriously threatened in California (over 80% of occurrences threatened; high degree and immediacy of threat)

.2 Moderately threatened in California (20–80% of occurrences threatened; moderate degree and immediacy of threat)

.3 Not very threatened in California (<20% of occurrences threatened; low degree and immediacy of threat or no current threats known)

Special Status Wildlife

Scientific Name	Common Name	Federal	State	Habitat Characteristics	Potential for Occurrence	Rationale	Source
Invertebrates							
<i>Branchinecta lynchi</i>	vernal pool fairy shrimp	FT	None	Endemic to the grasslands of the Central Valley and the Central and South Coast Range mountains of California, and the Agate Desert of southern Oregon. Found only in cool water vernal pools and vernal pool-like habitats; does not occur in riverine, marine, or other permanent bodies of water (USFWS 2007).	N	Vernal pool habitat not present within the BSA.	USFWS. 2007. Vernal Pool Fairy Shrimp (<i>Branchinecta lynchi</i>) 5-Year Review: Summary and Evaluation. USFWS; Sacramento, CA.
<i>Desmocerus californicus dimorphus</i>	valley elderberry longhorn beetle	FT	None	Dependent on host plant, elderberry (<i>Sambucus</i> spp.), which most commonly grows in riparian woodlands, but also in some upland habitats such as oak savannas and annual grasslands. Current presumed range in Central Valley extends from Shasta County south to Fresno County, including the valley floor and lower foothills up to about 500 feet in elevation (USFWS 2017).	N	No elderberry shrubs were documented during visual surveys conducted on November 24, 2020.	USFWS. 2017. Framework for Assessing Impacts to the Valley Elderberry Longhorn Beetle (<i>Desmocerus californicus dimorphus</i>). USFWS; Sacramento, CA.
<i>Lepidurus packardii</i>	vernal pool tadpole shrimp	FE	None	Found only in ephemeral freshwater habitats, including alkaline pools, clay flats, vernal lakes, vernal pools, vernal swales, and other seasonal wetlands. Patchily distributed across the Central Valley from Shasta County south to Tulare County with isolated occurrences in the East Bay Area (USFWS 2007).	N	Vernal pool habitat not present within the BSA.	USFWS. 2007. Vernal Pool Tadpole Shrimp (<i>Lepidurus packardii</i>) 5-Year Review: Summary and Evaluation. USFWS; Sacramento, CA.
Fish							
<i>Acipenser medirostris</i>	green sturgeon (southern DPS)	FT	SSC	Spawning occurs primarily in the Sacramento River, but those that spawn in the Feather and Yuba Rivers are also part of the southern DPS. Oceanic waters, bays, and estuaries during non-spawning season. Enters San Francisco Bay late winter through early spring, and spawn occurs from April through early July. Spawn in cool sections of river mainstems in deep pools containing small to medium-sized gravel, cobble, or boulder substrate (NMFS 2015).	N	Hydrology of Slough is completely dependent on intermittent stormwater runoff. Water is only present for short periods of time and there is no consistent connection to other fish bearing water bodies.	NMFS. 2015. Southern Distinct Population Segment of the North American Green Sturgeon (<i>Acipenser medirostris</i>) 5-Year Review: Summary and Evaluation. NMFS; Long Beach, CA.
<i>Acipenser transmontanus</i>	white sturgeon	None	SSC	Salt water from Ensenada to Alaska. Spawn in large river systems along the west coast. Currently, self-sustaining populations only occur in the Sacramento, Columbia, and Fraser Rivers. Spawn in large, deep pools (Moyle 2002).	N	Hydrology of Slough is completely dependent on intermittent stormwater runoff. Water is only present for short periods of time and there is no consistent connection to other fish bearing water bodies.	NMFS. 2015. Southern Distinct Population Segment of the North American Green Sturgeon (<i>Acipenser medirostris</i>) 5-Year Review: Summary and Evaluation. NMFS; Long Beach, CA.
<i>Entosphenus tridentatus</i>	Pacific lamprey	None	SSC	Cold, clear water for spawning and incubation. Peak spawning appears to be closely tied to water temperatures that are suitable for early development, but can occur at temperatures above 72°F. Adults use gravel areas to build nests, while ammocoetes need soft sediments in which to burrow during rearing. Nests are generally associated with cover, including gravel and cobble substrates, vegetation and woody debris. Ammocoetes burrow into larger substrates as they grow. Ammocoetes also need detritus that produces algae for food and habitats with slow or moderately slow water velocities, such as low gradient riffles, pool tailouts and lateral scour pools (CDFW 2015).	N	Hydrology of Slough is completely dependent on intermittent stormwater runoff. Water is only present for short periods of time and there is no consistent connection to other fish bearing water bodies.	CDFW. 2015. Fish Species of Special Concern Accounts, 3rd Edition. Available online: https://www.wildlife.ca.gov/Conservation/SSC/Fishes
<i>Hypomesus transpacificus</i>	delta smelt	FT	SE	Endemic to open waters of San Francisco Bay and Sacramento-San Joaquin River Delta. Distribution includes San Pablo Bay up through Suisun Bay, upstream through the delta to the Sacramento River below Isleton, and the San Joaquin River below Mossdale. Spawning has not been observed in the wild, but is thought to take place in sloughs and shallow edge-water channels in the upper delta and in Montezuma Slough near Suisun Bay. (USFWS 2010).	N	Hydrology of Slough is completely dependent on intermittent stormwater runoff. Water is only present for short periods of time and there is no consistent connection to other fish bearing water bodies.	USFWS. 2010. Endangered and Threatened Wildlife and Plants: 12-Month Finding on a Petition to Reclassify the Delta Smelt from Threatened to Endangered throughout its Range. USFWS; Sacramento CA.
<i>Lampetra ayresii</i>	river lamprey	None	SSC	Occurs in the Sacramento-San Joaquin River systems, although it likely occurs elsewhere. Small lampreys that spend most of their lives in freshwater, with about 3 to 4 months in salt water. Adults migrate into freshwater for spawning in autumn (Moyle 2002).	N	The section of Mormon Slough that occurs within the Project area does not hold water year round; therefore does not provide suitable habitat for special-status fish.	Moyle, P. B. 2002. Inland fishes of California. Revised and expanded. University of California Press, Berkeley. xv + 502 pp. Moyle, P. B., R. m. Yoshiyama, J. E. Williams, and E. D. Wikramanayake. 1995. Fish species of special concern in California. Second Edition
<i>Lavinia exilicauda exilicauda</i>	Sacramento hitch	None	SSC	Has a scattered distribution within the Central Valley, from the Tulare Lake Basin to Shasta Reservoir (Moyle 2002).	N	Hydrology of Slough is completely dependent on intermittent stormwater runoff. Water is only present for short periods of time and there is no consistent connection to other fish bearing water bodies.	Moyle, P. B. 2002. Inland fishes of California. Revised and expanded. University of California Press, Berkeley. xv + 502 pp. Moyle, P. B., R. m. Yoshiyama, J. E. Williams, and E. D. Wikramanayake. 1995. Fish species of special concern in California. Second Edition

Scientific Name	Common Name	Federal	State	Habitat Characteristics	Potential for Occurrence	Rationale	Source
<i>Oncorhynchus mykiss irideus</i> (pop. 11)	steelhead (central valley DPS)	FT	None	Includes naturally spawned anadromous steelhead originating below natural and manmade impassable barriers from the Sacramento and San Joaquin Rivers and their tributaries; excludes such fish originating from San Francisco and San Pablo Bays and their tributaries. This DPS does include steelhead from two artificial propagation programs: Coleman National Fish Hatchery Program and Feather River Fish Hatchery Program. Spawning habitat includes gravel-bottomed, fast-flowing, well-oxygenated rivers and streams. Non-spawning habitat includes estuarine and marine waters (NOAA 2019).	N	Hydrology of Slough is completely dependent on intermittent stormwater runoff. Water is only present for short periods of time and there is no consistent connection to other fish bearing water bodies.	NOAA. 2019. NOAA Fisheries, West Coast Region, Protected Species Accounts. Available online: https://archive.fisheries.noaa.gov/wc/r/protected_species/salmon_steelhead/salmon_and_steelhead_listings/salmon_and_steelhead_listings/california_central_valley/california_central_valley_steelhead.html
<i>Oncorhynchus tshawytscha</i> (pop. 6)	chinook salmon (Central Valley spring-run ESU)	FT	ST	Currently found in the Sacramento-San Joaquin River Delta, the Sacramento River and its tributaries, including American, Yuba and Feather Rivers, and Mill, Deer, and Butte Creeks. The numbers of adults are dependent on pool depth and volume, amount of cover, and proximity to gravel. Water temperatures greater than 80°F are lethal to adults (NMFS 2016).	N	Hydrology of Slough is completely dependent on intermittent stormwater runoff. Water is only present for short periods of time and there is no consistent connection to other fish bearing water bodies.	NMFS. 2016. 5-Year Review: Summary and Evaluation of Central Valley Spring-run Chinook Salmon ESU. NMFS; Long Beach, CA.
<i>Oncorhynchus tshawytscha</i> (pop. 13)	chinook salmon (Central Valley fall / late fall-run ESU)	None	SSC	Currently found primarily in the Sacramento River, where most spawning and rearing of juveniles takes place in the reach between Red Bluff Diversion Dam and Redding's Keswick Dam. The specific habitat requirements of late fall-run chinook salmon have not been determined but they are presumably similar to other Central Valley chinook salmon runs. It is believed that optimal conditions fall within the range of physical and chemical characteristics of the unimpaired Sacramento River above Shasta Dam (CDFW 2015).	N	The section of Mormon Slough that occurs within the Project area does not hold water year round; therefore does not provide suitable habitat for special-status fish.	CDFW. 2015. Fish Species of Special Concern Accounts, 3rd Edition. Available online: https://www.wildlife.ca.gov/Conservation/SSC/Fishes
<i>Oncorhynchus tshawytscha</i> (pop. 30)	chinook salmon (upper Klamath and Trinity Rivers ESU)	None	SCE	Found in all major tributaries above the confluence of the Klamath and Trinity Rivers and raised in hatcheries below Iron Gate and Lewiston Dams. Enter the Klamath Estuary for only a short period prior to spawning. Unfavorable temperatures may exist in the Klamath Estuary and lower river during summer and chronic exposure of migrating adults to temperatures of even 62 to 68°F is detrimental (CDFW 2015).	N	Hydrology of Slough is completely dependent on intermittent stormwater runoff. Water is only present for short periods of time and there is no consistent connection to other fish bearing water bodies.	CDFW. 2015. Fish Species of Special Concern Accounts, 3rd Edition. Available online: https://www.wildlife.ca.gov/Conservation/SSC/Fishes
<i>Pogonichthys macrolepidotus</i>	Sacramento splittail	None	SSC	The Sacramento splittail is endemic to California's Central Valley. Splittail are now largely confined to the Delta, Suisun Bay, Suisun Marsh, Napa River, Petaluma River, and other parts of the San Francisco Estuary, while spawning on upstream floodplains and channel edges. The species is adapted for estuarine and are tolerant of a wide range of salinities and temperatures. Splittail require a rising hydrograph for upstream migration and flooded vegetation for spawning and rearing areas. Flooded areas need to be at least 1 m deep with deeper, more open, areas as refuges from predation (CDFW 2020).	N	Hydrology of Slough is completely dependent on intermittent stormwater runoff. Water is only present for short periods of time and there is no consistent connection to other fish bearing water bodies.	CDFW. 2020. California Wildlife Habitat Relationships System Life History Accounts and Range Maps. Available online: https://www.wildlife.ca.gov/Data/CWHR/Life-History-and-Range . CDFW Biogeographic Data Branch; Sacramento, CA
<i>Spirinchus thaleichthys</i>	longfin smelt	FCT	ST	Considered pelagic and anadromous, though anadromy in this species is poorly understood, and certain populations are not anadromous, completing their life cycle in freshwater lakes and streams (USFWS 2012).	N	Hydrology of Slough is completely dependent on intermittent stormwater runoff. Water is only present for short periods of time and there is no consistent connection to other fish bearing water bodies.	USFWS. 2012. Endangered and Threatened Wildlife and Plants; 12-month Finding on a Petition to List the San Francisco Bay-Delta Population of the Longfin Smelt as Endangered or Threatened
Amphibians							
<i>Ambystoma californiense</i>	California tiger salamander	FT	ST	Breeds in fish-free ephemeral ponds which form in winter and dry in summer. Some also breed in slow streams and semi-permanent waters, including cattle ponds. Spends most of the year underground in small mammal burrows, especially those of California ground squirrel (<i>Otospermophilus beecheyi</i>). Typical habitat associations include grassland, oak savanna, edges of mixed woodland, and lower elevation coniferous forest (Nafis 2020).	N	Suitable habitat not present within the BSA. The section of Mormon Slough that bisects the BSA does not provide adequate aquatic habitat and is dry the majority of the year. The closest known occurrence is documented roughly 2 miles northwest of the BSA near Victory Park, but is outdated (1923) and presumed extirpated.	Nafis, Gary. 2020. California Herps: A Guide to Reptiles and Amphibians of California. Available online: http://www.californiaherps.com/
<i>Rana draytonii</i>	California red-legged frog	FT	SSC	Ponds and streams in humid forests, woodlands, grasslands, coastal scrub, and streambanks with plant cover in lowlands or foothills. Breeding habitat includes permanent or ephemeral water sources; lakes, ponds, reservoirs, slow streams, marshes, bogs, and swamps. Ephemeral wetland habitats require animal burrows or other moist refuges for estivation when the wetlands are dry. Occurs from sea level to 5,000 feet in elevation. Occurs along the Coast Ranges from Mendocino County south to northern Baja California, and inland across the northernmost reaches of the Sacramento Valley and locally south through portions of the Sierra Nevada foothills as far south as northern Tulare County (Nafis 2020).	N	Suitable habitat not present within the BSA	Nafis, Gary. 2020. California Herps: A Guide to Reptiles and Amphibians of California. Available online: http://www.californiaherps.com/

Scientific Name	Common Name	Federal	State	Habitat Characteristics	Potential for Occurrence	Rationale	Source
<i>Spea hammondi</i>	western spadefoot	None	SSC	Generally found in grasslands, oak woodlands, coastal sage scrub, and chaparral in washes, floodplains, alluvial fans, playas, and alkali flats. Natural and artificial water bodies are used for breeding. Specifically, vernal pools used by this species have an average ponding duration of 81 days, and successful recruitment occurs in ponds that last on average 21 days longer than larval development time. Pool temperature requirements are from 48 to 90oF. Pools with invasive species, such as crayfish (<i>Pacifasticus</i> spp.), or bullfrogs (<i>Lithobates catesbeianus</i>) often, but not always, exclude this species. (Thomson et al. 2016).	N	Suitable habitat not present within the BSA	Thomson, Robert C., Wright, Amber N., and Shaffer H. Bradley. 2016. California Amphibian and Reptile Species of Special Concern. University of California Press Berkeley, CA.
Reptiles							
<i>Emys marmorata</i>	western pond turtle	None	SSC	Ranges throughout California except for Inyo and Mono Counties. Generally occurs in various water bodies including permanent and ephemeral systems either natural or artificial. Upland habitat that is at least moderately undisturbed is required for nesting and overwintering, in soils that are loose enough for excavation (Thomson et al. 2016).	N	Hydrology of the Slough is completely dependent on intermittent stormwater runoff. Water is only present for short periods of time and is dry a majority of the year. Additionally, suitable upland habitat is not present in the BSA. The upland habitat along the edges of the Slough is highly disturbed, urbanized, and inhabited by a large homeless population.	Thomson, Robert C., Wright, Amber N., and Shaffer H. Bradley. 2016. California Amphibian and Reptile Species of Special Concern. University of California Press Berkeley, CA.
<i>Phrynosoma blainvillii</i>	coast horned lizard	None	SSC	Known to occur in open areas of sandy soil and low vegetation in valleys, foothills and semiarid mountains. Furthermore, grasslands, coniferous forests, woodlands, and chaparral, with patches of loose soil in open habitat. Frequently found in sandy washes with scattered shrubs and along dirt roads, and frequently found near ant hills. Ranges up onto the Kern Plateau east of the crest of the Sierra Nevada.	N	All known occurrences are documented in the foothills surrounding the Central Valley (with the exception of one near Merced). The highly urban/industrial conditions of the BSA and surrounding areas make movement of individuals into the City center very unlikely. Additionally, soils appear to be mainly loam/clay, which is not ideal.	Thomson, Robert C., Wright, Amber N., and Shaffer H. Bradley. 2016. California Amphibian and Reptile Species of Special Concern. University of California Press Berkeley, CA.
<i>Thamnophis gigas</i>	giant garter snake	FT	ST	Marshes, sloughs, ponds, small lakes, low gradient streams, irrigation and drainage canals, rice fields and their associated uplands. Upland habitat should have burrows or other soil crevices suitable for snakes to reside during their dormancy period (November- mid March). Formerly ranged in the Central Valley from Butte County to Buena Vista Lake in Kern County, but now thought to be absent south of Fresno and in Stanislaus County (USFWS 2012).	N	Suitable habitat not present within the BSA. Hydrology of the Slough is completely dependent on intermittent stormwater runoff. Water is only present for short periods of time and is dry a majority of the year. The closest known occurrences are documented near the Calaveras River to the east and the Port of Stockton to the west. Additionally, the upland habitat along the edges of the Slough is highly disturbed, urbanized, and inhabited by a large homeless population and does not provide suitable habitat.	USFWS. 2012. Giant Garter Snake (<i>Thamnophis gigas</i>) 5-Year Review: Summary and Evaluation. USFWS; Sacramento, CA.
Birds							
<i>Agelaius tricolor</i>	tricolored blackbird	None	ST, SSC	Mostly a year-round resident in California. Common locally throughout Central Valley and in coastal districts from Sonoma County south. Breeds locally in northeastern California. In winter, becomes more widespread along the central coast and San Francisco Bay area, and can be found in portions of the Colorado Desert (Hamilton 2004). Preferred nesting habitat includes cattails (<i>Typha</i> spp.), bulrushes (<i>Schoenoplectus</i> spp.), Himalayan blackberry (<i>Rubus armeniacus</i>), and agricultural silage. Dense vegetation is preferred but heavily lodged cattails not burned in recent years may preclude settlement. Need access to open water. Strips of emergent vegetation along canals are avoided as nest sites unless they are about 30 feet or more wide but in some ponds, especially where associated with Himalayan blackberries and deep water, settlement may be in narrower fetches of cattails. (CDFW 2020).	N	Suitable habitat not present within the BSA	Hamilton, W. J. 2004. Tricolored Blackbird (<i>Agelaius tricolor</i>). In The Riparian Bird Conservation Plan: a strategy for reversing the decline of riparian-associated birds in California. California Partners in Flight. CDFW. 2020. CDFW Biogeographic Data Branch; Sacramento, CA

Scientific Name	Common Name	Federal	State	Habitat Characteristics	Potential for Occurrence	Rationale	Source
<i>Asio flammeus</i>	short-eared owl	None	SSC	Found in open, treeless areas with elevated sites for perches, and dense vegetation for roosting and nesting. Associated with perennial grasslands, prairies, dunes, meadows, irrigated lands, and saline and fresh emergent wetlands. Breeds in coastal areas in Del Norte and Humboldt Counties, San Francisco Bay Delta, northeastern Modoc plateau, east Sierras from Lake Tahoe to Inyo County and San Joaquin Valley. Winters in the Central Valley, western Sierra Nevada foothills and along the coastline (CDFW 2020).	N	Suitable habitat not present within the BSA.	CDFW. 2020. California Wildlife Habitat Relationships System Life History Accounts and Range Maps. Available online: https://www.wildlife.ca.gov/Data/CWHR/Life-History-and-Range . CDFW Biogeographic Data Branch; Sacramento, CA
<i>Athene cunicularia</i>	burrowing owl	None	SSC	Resident in much of the state in open, dry grasslands and various desert habitats. Requires open areas with mammal burrows; especially those of California ground squirrel (<i>Otospermophilus beecheyi</i>) Inhabits rolling hills, grasslands, fallow fields, sparsely vegetated desert scrub, vacant lots and other open human disturbed lands such as airports and golf courses. Absent from northwest coast and elevations above 5,500 feet (CDFW 2020).	Y	Suitable habitat may be present in the BSA.	CDFW. 2020. California Wildlife Habitat Relationships System Life History Accounts and Range Maps. Available online: https://www.wildlife.ca.gov/Data/CWHR/Life-History-and-Range . CDFW Biogeographic Data Branch; Sacramento, CA
<i>Buteo swainsoni</i>	Swainson's hawk	None	ST	Nests in oak savanna and cottonwood riparian areas adjacent to foraging habitat of grasslands, agricultural fields, and pastures where they often follow farm equipment to gather killed and maimed rodents. Increasingly also nests in sparse stands of gum trees (<i>Eucalyptus</i> spp.) and Australian pines (<i>Casuarina equisetifolia</i>) and often forage along roadsides and grassy highway medians. Breeding resident in the Central Valley, Klamath Basin, Northeastern Plateau, and in juniper-sagebrush flats of Lassen County. Limited breeding reported from Lanfair Valley, Owens Valley, Fish Lake Valley, and Antelope Valley. Winters primarily in Argentina, with most birds absent from California October through February, though a few overwinter in the Sacramento-San Joaquin River Delta. Prolific migrant through southern California in spring and fall, with large mixed-age groups of birds frequently observed kettling high overhead on thermals or foraging together on freshly cut agricultural fields (CDFW 2020).	Y	Suitable habitat may be present in the BSA.	CDFW. 2020. California Wildlife Habitat Relationships System Life History Accounts and Range Maps. Available online: https://www.wildlife.ca.gov/Data/CWHR/Life-History-and-Range . CDFW Biogeographic Data Branch; Sacramento, CA
<i>Charadrius montanus</i>	mountain plover	None	SSC	Does not nest in California. Present in the state November through March in open grasslands and plowed fields with no or very short vegetation. Found in flocks mostly on the west side of the Central Valley from Colusa County south to Kern County, Carrizo Plain, Antelope Valley, Imperial Valley, and western Riverside County. Single individuals are rarely found on beaches or offshore islands (CDFW 2020).	N	Suitable habitat not present within the BSA.	CDFW. 2020. California Wildlife Habitat Relationships System Life History Accounts and Range Maps. Available online: https://www.wildlife.ca.gov/Data/CWHR/Life-History-and-Range . CDFW Biogeographic Data Branch; Sacramento, CA
<i>Elanus leucurus</i>	white-tailed kite	None	FP	Fairly common resident of the Central Valley, coast, and Coast Range Mountains. Nests in oak savanna, oak and willow riparian, and other open areas with scattered trees near foraging habitat. Forages in open grasslands, meadows, farmlands, and emergent wetlands. Often seen hover foraging over roadsides or grassy highway medians (CDFW 2020).	Y	Suitable habitat may be present within the BSA.	CDFW. 2020. California Wildlife Habitat Relationships System Life History Accounts and Range Maps. Available online: https://www.wildlife.ca.gov/Data/CWHR/Life-History-and-Range . CDFW Biogeographic Data Branch; Sacramento, CA
<i>Icteria virens</i>	yellow-breasted chat	None	SSC	Nests in early-successional riparian habitats with a well-developed shrub layer and an open canopy. Restricted to narrow borders of streams, creeks, sloughs, and rivers. Often nest in dense thickets of blackberry (<i>Rubus</i> spp.) and willow (<i>Salix</i> spp.) (Shuford and Gardali 2008).	N	Suitable habitat not present within the BSA.	Shuford, W. D., and Gardali, T., editors. 2008. California Bird Species of Special Concern: A Ranked Assessment of Species, Subspecies, and Distinct Populations of Birds of Immediate Conservation Concern in California. Studies of Western Birds 1. Western Field Ornithologists, Camarillo, California, and California Department of Fish and Game, Sacramento.
<i>Melospiza melodia</i>	song sparrow (Modesto population)	None	SSC	Often found in emergent freshwater marshes dominated by bulrushes (<i>Scirpus</i> spp.), cattails (<i>Typha</i> spp.), and willow (<i>Salix</i> spp.). Also nests in riparian forests of valley oak (<i>Quercus lobata</i>) with a sufficient understory of blackberry (<i>Rubus</i> spp.), along vegetated irrigation canals and levees, and in recently planted valley oak restoration sites. Found throughout the Sacramento Valley, from the delta north to Chico (Shuford and Gardali 2008).	N	Suitable habitat not present within the BSA.	Shuford, W. D., and Gardali, T., editors. 2008. California Bird Species of Special Concern: A Ranked Assessment of Species, Subspecies, and Distinct Populations of Birds of Immediate Conservation Concern in California. Studies of Western Birds 1. Western Field Ornithologists, Camarillo, California, and California Department of Fish and Game, Sacramento.

Scientific Name	Common Name	Federal	State	Habitat Characteristics	Potential for Occurrence	Rationale	Source
<i>Progne subis</i>	purple martin	None	SSC	Present in California from mid-March through late September. Requires concentrations of nesting cavities, relatively open air space above accessible nest sites, and relatively abundant aerial insect prey. In the coastal mountains, Cascade Range, and Sierra Nevada foothills, inhabits open forests, woodlands, and riparian areas. Extirpated as a breeder from most of the Central Valley except the Sacramento area where it has taken to nesting in hollow-box bridges. In southern California, now only a rare and local breeder on the coast and in interior mountain ranges, with few breeding localities. Absent from higher desert regions except as a rare migrant (Shuford and Gardali 2008).	N	Suitable habitat not present within the BSA.	Shuford, W. D., and Gardali, T., editors. 2008. California Bird Species of Special Concern: A Ranked Assessment of Species, Subspecies, and Distinct Populations of Birds of Immediate Conservation Concern in California. Studies of Western Birds 1. Western Field Ornithologists, Camarillo, California, and California Department of Fish and Game, Sacramento.
<i>Setophaga petechia</i>	yellow warbler	None	SSC	Usually found in riparian deciduous habitats in summer: cottonwoods (<i>Populus</i> spp.), willows (<i>Salix</i> spp.), alders (<i>Alnus</i> spp.), and other small trees and shrubs typical of low, open-canopy riparian woodland. Also breeds in montane shrubbery in open coniferous forests (CDFW 2020).	N	Suitable habitat not present within the BSA.	CDFW. 2020. California Wildlife Habitat Relationships System Life History Accounts and Range Maps. Available online: https://www.wildlife.ca.gov/Data/CWHR/Life-History-and-Range . CDFW Biogeographic Data Branch; Sacramento, CA
<i>Vireo bellii pusillus</i>	least Bell's vireo	FE	SE	Once occupied much of the Central Valley, but has disappeared from most its former range, and is now restricted to southern California from southern Inyo and Monterey Counties south through the South Coast and Inland Empire regions. Obligate riparian breeder, favoring cottonwood (<i>Populus</i> spp.), willow (<i>Salix</i> spp.), and oak (<i>Quercus</i> spp.) woodlands, and mule fat (<i>Baccharis salicifolia</i>) scrub along watercourses (USFWS 2006).	N	Suitable habitat not present within the BSA.	USFWS. 2006. Least Bell's Vireo (<i>Vireo bellii pusillus</i>) 5-Year Review: Summary and Evaluation. USFWS; Carlsbad, CA.
Birds							
<i>Sylvilagus bachmani riparius</i>	Riparian brush rabbit	FE	SE	Found only at Caswell Memorial State Park on the Stanislaus River, San Joaquin County. Occur in relatively small areas of shrub/herbaceous edge, and in early successional stages of many habitats. Prefer dense brush cover of thickets, vines, brambles, or dense riparian habitat (CDFW 2020).	N	Suitable habitat not present within the BSA.	CDFW. 2020. California Wildlife Habitat Relationships System Life History Accounts and Range Maps. Available online: https://www.wildlife.ca.gov/Data/CWHR/Life-History-and-Range . Appendix N National Marine Fisheries Service Concurrence Letter

This page is intentionally left blank.

N.1 National Marine Fisheries Service Concurrence Need

The Endangered Species Act (ESA) of 1973 provides protective measures from unlawful take for federally listed endangered or threatened species and their habitats. The ESA defines “take” to mean “harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct.” In 50 CFR Part 222, harm is further defined as an act that actually kills or injures fish or wildlife. ESA Section 7(a)(1) requires federal agencies to use their authority to further the conservation of listed species. ESA Section 7(a)(2) requires consultation with U.S. Fish and Wildlife Service (USFWS) or the National Marine Fisheries Service (NMFS) if a federal agency undertakes, funds, permits, or authorizes any action that may affect endangered or threatened species or designated critical habitat (referred to as a federal nexus).

NMFS designated the Mormon Slough as critical habitat for Central Valley steelhead in 2000 (NMFS 2014), including the portion of the Mormon Slough within the Biological Study Area (BSA) for the Project. Essential fish habitat (EFH) for Chinook salmon also occurs in the portion of the Mormon Slough within the BSA. In addition, there is critical habitat for green sturgeon and EFH for groundfish downstream of the BSA. While none of these species are present within the BSA at this time, preservation of fish passage and important habitat characteristics would be important to future restoration efforts of the Mormon Slough as fish habitat.

NMFS issued a “not likely to adversely affect” determination for the Project on May 17, 2021, with regard to Central Valley steelhead and its critical habitat and the southern distinct population segment of North American green sturgeon and its critical habitat. NMFS also determined that the Project would have “no adverse effect” on EFH for chinook salmon or groundfish.

Re: Endangered Species Act Section 7(a)(2) Concurrence Letter and Magnuson-Stevens Fishery Conservation and Management Act Essential Fish Habitat Response for the Stockton Diamond Grade Separation Project

Dear Mr. Stanich:

On February 25, 2021, NOAA's National Marine Fisheries Service (NMFS) received your request for a written concurrence that the Proposed Action, the Stockton Diamond Grade Separation Project, carried out by the San Joaquin Regional Rail Commission (SJRRC) and the California High Speed Rail Authority (Authority) under U.S. Code (U.S.C.) Title 23 Section 327 and a Memorandum of Understanding (MOU) between the Federal Rail Administration (FRA) and the State of California, is not likely to adversely affect species listed as threatened or endangered or critical habitats designated under the Endangered Species Act (ESA). NMFS recognizes that the MOU, effective July 23, 2019, designates the Authority as the federal lead agency for review of this Project under the National Environmental Policy Act (NEPA) and other federal environmental laws. Specifically, 3.2.1 of the MOU assigns the FRA's responsibilities under the ESA of 1973 (16 U.S.C. 661 – 667d) and the Magnuson-Stevens Fishery Conservation and Management Act (MSA) of 1976, as amended (16 U.S.C. 1801–1891d) for both formal and informal consultations, for projects included in the scope of the MOU. The Proposed Action is a component of the *ACEforward* program of projects, which is included in the MOU, therefore the Proposed Action is included in the scope of the MOU. NMFS received sufficient information on the Stockton Diamond Grade Separation Project to initiate the consultation on April 22, 2021. This response to your request was prepared by NMFS pursuant to section 7(a)(2) of the ESA and implementing regulations at 50 CFR 402. Thank you also for your request for consultation pursuant to the essential fish habitat (EFH) provisions in Section 305(b) of the MSA (16 U.S.C. 1855(b)) for this action.

This letter underwent pre-dissemination review using standards for utility, integrity, and objectivity in compliance with applicable guidelines issued under the Data Quality Act (section 515 of the Treasury and General Government Appropriations Act for Fiscal Year 2001, Public Law 106-554). The document will be available within two weeks at the Environmental Consultation Organizer [<https://eco.fisheries.noaa.gov>]. A complete record of this consultation is on file at NMFS California Central Valley Office in Sacramento, CA.

Consultation History

On October 20, 2020, HDR Inc. staff, on behalf of SJRRC, requested technical assistance via email from NMFS regarding the section of Mormon Slough between the Stockton Diversion Canal and Lake McLeod and whether the section should be considered fish habitat. NMFS confirmed that Mormon Slough did contain Central Valley (CCV) steelhead designated critical habitat and could potentially host individuals depending on the stream section in question.

On February 25, 2021, the Authority requested a letter of concurrence from NMFS regarding the Stockton Diamond Grade Separate Project. The request letter included an appendix with a project description, a list of potentially affected resources, and an effects analysis (Authority et al. 2021).

On March 1, 2021, NMFS requested a GPS project location and identification of the lead action agency. The Authority responded with clarification on March 3, 2021.

On March 4, 2021, NMFS requested additional information about the flyover designs considered and also requested confirmation on the number of railroad crossings proposed to be modified in the action. NMFS also confirmed that the section of Mormon Slough directly involved with the project, though highly degraded and hydrologically isolated, is still designated critical habitat for CCV steelhead (70 FR 52488, 9/2/2005).

On March 8, 2021, HDR Inc. staff shared the Hydrologic and Hydraulic Analysis and Design Memorandum with NMFS (Yim et al. 2021).

On March 17, 2021, a virtual coordination meeting was held between NMFS, Authority, HDR Inc., and SJRRC staff. NMFS explained the requirements of ESA Section 7 consultations and scenarios in which incidental take or adverse habitat effects could occur. Potential railway flyover designs were discussed. NMFS shared our Guidelines for Salmonid Passage at Stream Crossings (NMFS 2019) via email.

On April 22, 2021, the Authority and SJRRC submitted revised flyover design options and other requested information in an updated request letter (Authority 2021) via email. After review of this document, NMFS initiated the consultation.

Proposed Action

The SJRRC proposes to construct a grade separation of two principal railroad lines in Stockton, California. At the present time, the Burlington Northern and Santa Fe Railway (BNSF) Stockton Subdivision and the Union Pacific Railroad (UPRR) Fresno Subdivision consist of two main tracks each and they intersect each other at a level, at-grade crossing known as the Stockton Diamond inside the urbanized street grid of the City of Stockton. This rail intersection is located just south of Downtown Stockton near South Aurora Street and East Scotts Avenue and is considered the busiest at-grade railway junction in California as trains wait to cross this rail intersection. The at-grade crossing results in significant congestion and delays to services that moves people and freight throughout the California Central Valley as well as freight out to the

broader national network. The current, at-grade configuration of the track also results in significant delays to passenger and freight trains in the area, including those serving the Port of Stockton, as well as other rail lines in the area.

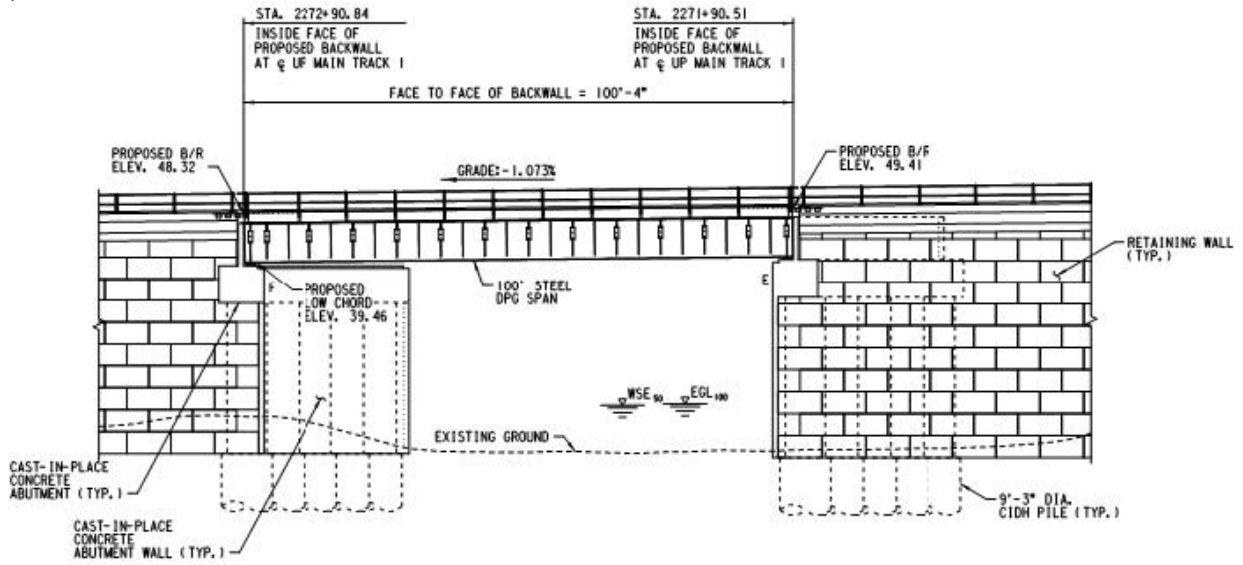

The proposed action is to replace the existing at-grade intersection of the BNSF Stockton Subdivision and UPRR Fresno Subdivision with a grade-separation structure that will elevate the UPRR main tracks above the BNSF main tracks, enabling through trains proceeding on the main tracks of each railroad to advance through the intersection without waiting on through trains on the main tracks of the other railroad. The UPRR flyover alignment is proposed to be shifted east of the existing Fresno Subdivision tracks so that construction of the new flyover would minimize impacts on existing rail operations. Construction of the Proposed Action would require either a clear span flyover bridge, a bridge with in-channel piers, or a multi-cell box culvert to span the Mormon Slough and associated floodplain. Existing drainage structures along Mormon Slough would remain in place after construction of the proposed slough bridge. Further, pipe culverts under the existing UPRR main tracks immediately downstream (west) of the flyover alignment would be left in place to support the remaining at grade connection track to BNSF. Drainage structures for passing flows beneath the new railroad flyover will either be open bottom box culverts or a bridge.

The SJRRC has committed to using a crossing type for the flyover spanning Mormon Slough that will retain a natural substrate stream channel bottom. This crossing would require a structure over Mormon Slough and would either be 1) a 100-foot-long, single-span bridge option would be skewed 15 degrees to the main tracks and provide a clear distance of approximately 89 feet between abutment walls, where the Mormon Slough channel would flow freely, 2) a four-cell, cast-in-place concrete, open bottom box culvert on pile foundations option would have four 12-foot-wide by 10-foot-tall cells with the walls of the culvert having driven-pile foundations, or 3) a precast concrete arch culvert option would consist of a single-cell arch structure on spread footings or pile foundations. The arch option would span 40 to 50 feet across the channel and have a rise of 10 to 15 feet (Figure 1). The commitment to keeping a natural stream channel bottom will be incorporated into the Final Environmental Impact Report and Environmental Assessment with the presented flyover design options for the project when the project is presented for public comment. In addition, SJRRC has committed to avoiding the use of riprap to armor the channel at this location. These measures are intended to ensure the project does not impair the quality of the channel for fish passage and that it does not further reduce the channel's suitability for restoration and use by relevant species in the future.

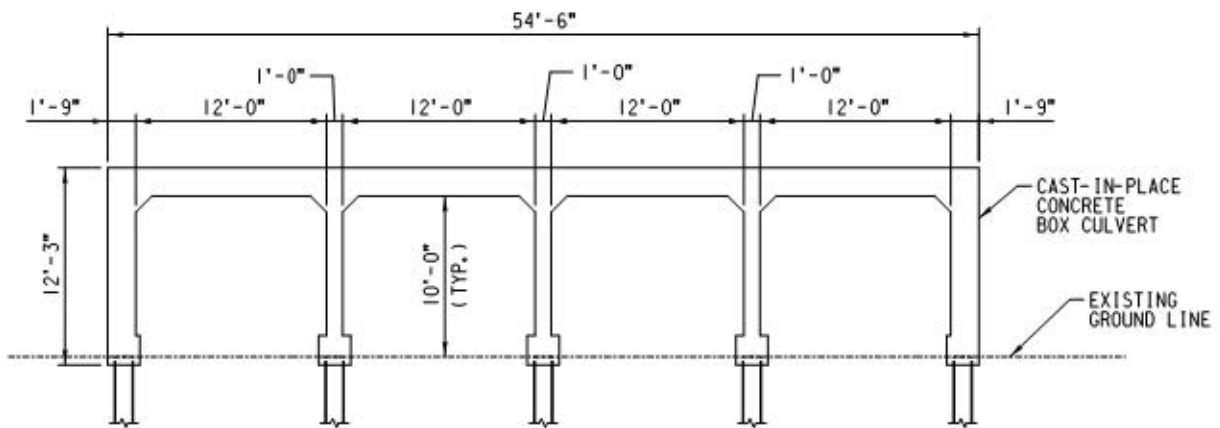

In addition to any permit conditions required under the Clean Water Act Section 402 construction general permit, which the contractor would obtain, the SJRRC has adopted the following avoidance and minimization measures that apply to all activities within 150 feet of aquatic resources to avoid contributing sediment or contamination to Mormon Slough:

- Prior to initiation of project-related activities, construction best management practices (BMPs) shall be employed on site to prevent erosion or runoff of loose soil and dust. Methods shall include the use of appropriate measures to intercept and capture sediment prior to entering aquatic resources, as well as erosion control measures along the perimeter of disturbance areas to prevent the displacement of fill material.

1)

2)

3)

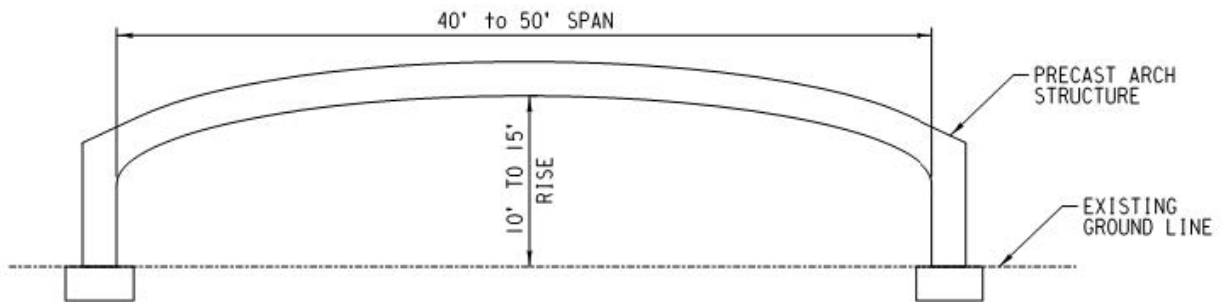

Figure 1. Stockton Diamond Grade Separation Flyover Designs Considered. 1) a single-span bridge, 2) a four-cell open bottom box culvert, and 3) a precast arch culvert, with estimated height-width measurements in feet.

- All BMPs shall be in place prior to initiation of project-related activities and shall remain until activities are completed. All erosion control methods will be maintained until all onsite soils are stabilized.
- The work areas will be reduced to the smallest practicable footprint throughout the duration of Proposed Action activities. Prior to any ground-disturbing activity, the project proponent will establish staging areas for construction equipment in areas that minimize impacts on sensitive biological resources, including aquatic resources. Staging areas (including any temporary material storage areas) would be located in areas that would be occupied by permanent facilities, where practicable. Equipment staging areas would be identified on final project construction plans. The project proponent would flag and mark access routes to restrict vehicle traffic within the project footprint to established roads, construction areas and other designated areas.
- All exposed and/or disturbed areas resulting from project-related activities shall be returned to their original contour and grade, and restored using locally native grass and forb seeds, plugs, or a mix of these methods. Areas shall be seeded with species appropriate to their topographical and hydrological character. Seeded areas shall be covered with broadcast straw and/or jute netted, where appropriate.
- All vehicle traffic associated with project-related activities shall be confined to established roads, staging areas, and parking areas. Vehicle speeds shall not exceed 15 miles per hour on access roads with no posted speed limit to avoid collisions with special-status species or habitats. Additionally, maintenance or refueling of vehicles or equipment must occur in designated areas and/or a secondary containment, located away from aquatic resources.
- During ground-disturbing activities, the project proponent may temporarily store excavated materials produced by construction activities in areas at or near construction sites within the project footprint. Where practicable, the project proponent will return excavated soil to its original location to be used as backfill. Any excavated waste materials unsuitable for treatment and reuse would be disposed at an off-site location, in conformance with applicable state and federal laws. Stockpiled, disassembled, and hazardous construction material should be stored at least 100 feet from aquatic resources, where possible.

Action Area

The proposed action is in the Lower Calaveras-Mormon Slough 8th Field Hydrologic Unit 18040004 in Stockton, California. The new railroad flyover will cross the middle of Mormon Slough at approximately Latitude 37.945186/Longitude -121.274638. Existing railroad bridges and culverts currently cross Mormon Slough upstream and downstream of the new crossing location but these structures are not proposed to be changed or modified as part of this action (Figure 2). Because Mormon Slough is currently hydrologically disconnected from both the San Joaquin River Delta downstream and the Calaveras River upstream due to human modifications of these waterways and creation of the Stockton Diverting Canal, it is not anticipated that sediment mobilization or water quality degradation to other critical habitat downstream will be

Figure 2. Proposed project area map for the new flyover structure path (green lines) and the existing railways supporting UPRR Fresno Subdivision service (purple lines) and BNSF Stockton Subdivision service (blue lines) over Mormon Slough in Stockton, California.

measurable or travel beyond BMP catchments or treatments to negatively affect waterways downstream; therefore the action area for this project is limited to the immediate construction footprint and the extent of the new grade separation and flyover structure. We considered, under the ESA whether or not the proposed action would cause any other activities and determined that it would not would cause additional consequences.

Background and Action Agency’s Effects Determination

The Authority identified that the following NMFS trust resources occur in the Stockton West USGS quadrangle and potentially in the action area for the proposed action:

- CCV steelhead, *Oncorhynchus mykiss*, (listed threatened, 71 FR 834, 1/5/2006) and its critical habitat (70 FR 52488, 9/2/2005);
- southern Distinct Population Segment (sDPS) of North American green sturgeon, *Acipenser medirostris*, (listed threatened, 71 FR 17757, 4/7/2006) and its critical habitat (74 FR 52300, 10/9/2009);
- Essential fish habitat (EFH) for chinook salmon (*Oncorhynchus tshawytscha*), and
- EFH for groundfish.

The species range and critical habitat for CCV steelhead does coincide with the reach of Mormon Slough that occurs in the action area but neither the accepted range nor critical habitat for green sturgeon overlap with the action area as defined by Figure 2. The reach of Mormon Slough that crosses the action area is also mapped as EFH for Chinook salmon but the mapped extent of EFH for groundfish does not coincide with the action area.

The portion of Mormon Slough the new railway flyover will cross is downstream of the split between the Old Calaveras River channel and Mormon Slough/Stockton Diverting Canal. In the past, Mormon Slough flowed southwest from its split from the Calaveras River to the harbor/Delta as a distributary but this lower slough channel was closed off by a levee constructed by the U.S. Army Corps of Engineers in the creation of the Stockton Diverting Canal/Calaveras River reroute decision (Stockton East Water District and FISHBIO 2019). The Stockton Diverting Canal was completed in 1911 and the associated flow rerouting decision provides 12,500 cubic-feet-per-second of flood control capacity around the City of Stockton but has isolated the portion of lower Mormon Slough within the Action Area and prevents it from receiving Calaveras River flows. Therefore at present, while this portion of Mormon Slough intermittently collects stormwater discharges from its urban sub-basin, it is usually completely dry. In fact, two low-flow road crossings currently intersect and cross the channel/floodplain in this flow-isolated section and, just before the channel’s connection with McLeod Lake/Delta water, a road on an earthen berm prevents San Joaquin River/Delta water from encroaching back into Mormon Slough as well. Since the channel bottom consists of compacted clay, sand, and silt without much gravel or vegetation and is normally dry, the channel also hosts several homeless camps in the channel and floodplain, evident in both aerial imagery and recent site photos provided by the Authority (Authority et al. 2021).

In the future, local agencies and/or nonprofits have indicated this part of Mormon Slough may be used as part of flood control planning in the long-term and/or may rehabilitate the area to provide

bicycle/pedestrian routes (Yim et al. 2021). Considering the potential for restoration of flows to be returned to this portion of Mormon Slough, the channel may become accessible to anadromous fishes and become available for their migration and rearing purposes in the far future. It is anticipated restoration of flows will occur in the far future, after construction of the proposed flyover is complete and grade separation is achieved.

The Authority has determined that the proposed action may affect but is not likely to adversely affect CCV steelhead or its critical habitat, nor sDPS green sturgeon or its critical habitat. The Authority has also determined that the proposed action will have no adverse effect on EFH for Chinook salmon or groundfish. These determinations were reached because the section of Mormon Slough crossed the proposed flyover is hydrologically isolated and disconnected from downstream waters that may actually harbor these species and neither individuals of the species nor functional EFH is present in the action area as the waterway is typically completely dry without any water flow to or from anadromous waterways.

ENDANGERED SPECIES ACT

Effects of the Action

Under the ESA, “effects of the action” are all consequences to listed species or critical habitat that are caused by the proposed action, including the consequences of other activities that are caused by the proposed action. A consequence is caused by the proposed action if it would not occur but for the proposed action and it is reasonably certain to occur. Effects of the action may occur later in time and may include consequences occurring outside the immediate area involved in the action (50 CFR 402.02). In our analysis, which describes the effects of the proposed action, we considered 50 CFR 402.17(a) and (b). When evaluating whether the proposed action is not likely to adversely affect listed species or critical habitat, NMFS considers whether the effects are expected to be completely beneficial, insignificant, or discountable. Completely beneficial effects are contemporaneous positive effects without any adverse effects to the species or critical habitat. Insignificant effects relate to the size of the impact and should never reach the scale where take occurs. Effects are considered discountable if they are extremely unlikely to occur.

The potential effects of the proposed action include:

- Further impediment to volitional fish passage through Mormon Slough
- Further degradation of critical habitat available in Mormon Slough

Because this section of Mormon Slough is completely isolated both upstream and downstream from waters used by CCV steelhead and sDPS green sturgeon, it is impossible for an individual from either population to access the action area of this project. Only during an extreme or historic flood event (>100-year event) would the levee system around the Stockton Diverting Canal be at real risk of being overtopped and allow river or Delta water to enter this section of the Mormon Slough channel because of current levees and other flow control modifications. The probability of such an event occurring during the proposed construction timeline would be so low it would be considered discountable. Without a reasonable ability for fish to access or use

the section of Mormon Slough involved in the construction of the flyover, there is no chance for individuals to be exposed to direct adverse effects normally associated with the construction process and incidental take of listed species is not expected to occur.

While the action area does not contain designated sDPS green sturgeon critical habitat (though Lake McLeod, downstream, is sDPS green sturgeon designated critical habitat), this section of Mormon Slough is still CCV steelhead designated critical habitat, despite its current state. Though the channel and floodplain cannot currently support any steelhead life history needs, it is important that the proposed action does not preclude the restoration or reestablishment of such functions in the future. The Primary Constituent Elements essential to the species that could be restored in this section of Mormon Slough are: 1) freshwater migration corridors for both adult and juvenile steelhead that are free of obstruction and excessive predation, and 2) freshwater rearing sites with sufficient water quantity and connectivity to support juvenile forage, growth, and development (NMFS 2014).

Several existing railway crossings over Mormon Slough in the action area utilize drainage structures that would not meet NMFS fish passage criteria for bridges and culverts and would be considered passage impediments if flows were restored. However, the proposed action only proposes the construction of a new flyover to achieve grade separation and does not include plans to modify any of these existing structures, or any other drainage structure, in the action area. Railroad tracks may be realigned on top of these existing crossings but there will be no changes or maintenance to the base structures in the channel/floodplain and therefore the proposed action does not present an opportunity to improve fish passage conditions through existing structures. Through coordination with the Authority and SJRRC, the three options for the flyover design now meet NMFS fish passage criteria (NMFS 2019) and will retain a natural streambed bottom regardless of which structure is ultimately selected. These designs ensure fish passage will be viable when and if blockages up and downstream are modified to restore stream flow to this section of Mormon Slough. Since the revised designs will not obstruct anadromous fish passage and do not preclude the restoration of flow to Mormon Slough, the proposed project will not adversely affect the ability of CCV steelhead critical habitat in this section to serve as a freshwater migration corridor.

Also through coordination, the Authority and SJRRC have purposefully excluded the use of riprap to armor the channel at this location. The placement of riprap, or other hard bank armoring practices, without sufficiently addressing the adverse impacts of these tactics would further degrade the rearing habitat available to the species, if flows and access were restored in the future. Riprap reduces the shoreline margin habitat and physically occupies space that could otherwise be occupied by riparian/floodplain vegetation or host macroinvertebrate prey habitat, which are essential components of a functioning stream ecosystem that supports salmonid rearing. Juvenile salmonid mortality from both native and non-native fish predators is also a factor in their populations' successful recovery in the CCV (NMFS 2014). Large piscivorous predators that utilize ambush techniques are attracted to hard surfaces with hiding spots for ambush, like stretches of riprap and artificial structures (Munsch et al. 2017). Without escapement cover like submerged vegetation or margin habitat available in the immediate vicinity, there would be a low chance of survival for targeted juveniles. Because the project design now specifically excludes the use of riprap, if in the future this section of Mormon Slough is restored and rearing juvenile steelhead become able to use the area, the proposed project will

not further reduce the ability of CCV steelhead critical habitat to provide freshwater rearing or floodplain connectivity in the action area beyond its baseline condition.

Conclusion

Based on this analysis, NMFS concurs with the Authority that the proposed action is not likely to adversely affect the subject listed species and designated critical habitats.

Reinitiation of Consultation

Reinitiation of consultation is required and shall be requested by the Authority, the SJRRC, or by NMFS, where discretionary Federal involvement or control over the action has been retained or is authorized by law and (1) the proposed action causes take; (2) new information reveals effects of the action that may affect listed species or critical habitat in a manner or to an extent not previously considered; (3) the identified action is subsequently modified in a manner that causes an effect to the listed species or critical habitat that was not considered in the written concurrence (specifically a design change wherein the proposed flyover design is modified to one that may affect the ability of the waterway to provide unimpeded fish passage or that alters the streambed bottom, or if water flow and volitional fish access to this section of Mormon Slough is restored before construction is complete); or (4) a new species is listed or critical habitat designated that may be affected by the identified action (50 CFR 402.16). This concludes the ESA consultation.

Section 7(a)(1) of the ESA directs Federal agencies to utilize their authorities to further the purposes of the ESA by carrying out conservation programs for the benefit of threatened and endangered species. The Authority also has the same responsibilities, and informal consultation offers action agencies an opportunity to address their conservation responsibilities under section 7(a)(1), as a designated federal representative. As such, NMFS recommends that the Authority, and other railway agencies such as the SJRRC, support future flood planning decisions and conservation efforts that involve the reconnection of this section of Mormon Slough to Calaveras River and the San Joaquin River Delta, the restoration of flows, the restoration of fish passage, and habitat rehabilitation/revegetation efforts that support the life history needs and recovery of ESA-listed fishes. NMFS also recommends that the Authority and SJRRC systematically and strategically replace or retrofit existing railroad crossings, drainage structures, and associated culverts that do not currently meet NMFS fish passage criteria so that these structures enable fish passage where appropriate, and work with other railway owners and partners to do the same whenever possible.

MAGNUSON-STEVENSON FISHERY CONSERVATION AND MANAGEMENT ACT

Section 305(b) of the MSA directs Federal agencies to consult with NMFS on all actions or proposed actions that may adversely affect EFH. Under the MSA, this consultation is intended to promote the conservation of EFH as necessary to support sustainable fisheries and the managed species' contribution to a healthy ecosystem. For the purposes of the MSA, EFH means "those waters and substrate necessary to fish for spawning, breeding, feeding, or growth to maturity", and includes the associated physical, chemical, and biological properties that are used by fish (50 CFR 600.10). Adverse effect means any impact that reduces quality or quantity of EFH, and may include direct or indirect physical, chemical, or biological alteration of the waters or substrate

and loss of (or injury to) benthic organisms, prey species and their habitat, and other ecosystem components, if such modifications reduce the quality or quantity of EFH. Adverse effects may result from actions occurring within EFH or outside of it and may include direct, indirect, site-specific or habitat-wide impacts, including individual, cumulative, or synergistic consequences of actions (50 CFR 600.810). Section 305(b) of the MSA also requires NMFS to recommend measures that can be taken by the action agency to conserve EFH. Such recommendations may include measures to avoid, minimize, mitigate, or otherwise offset the adverse effects of the action on EFH (50 CFR 600.905(b)).

NMFS concurs with the Authority's determination that the proposed action would not adversely affect Pacific Coast Salmon EFH because, as established in the Background and Action Agency's Effect Determination section, Chinook salmon are also currently unable to access this section of Mormon Slough. In its present, isolated state, this slough section is also unable to provide water, substrate, prey, or any other ecosystem constituent to Pacific Coast Salmon EFH in accessible waters downstream of the action area. The proposed action under consideration had no influence on the existing rerouting decisions that lead to Mormon Slough becoming isolated *and* building a new railroad flyover is not expected to prevent the area from serving as Pacific Coast Salmon EFH if water flow and fish passage are restored in the future. NMFS has no EFH conservation recommendations to offer the Authority or SJRRC to minimize project impacts on Pacific Coast Salmon EFH beyond those suggested above or what has already been incorporated as project modifications during the ESA consultation. However, the Authority must reinstate MSA consultation with NMFS if the proposed action is substantially revised in a way that may adversely affect EFH in the future, or if new information becomes available that affects the basis for NMFS' EFH conservation recommendations (50 CFR 600.920(1)). This concludes the MSA consultation.

Please direct questions regarding this letter to Katie Schmidt, Fish Biologist, at (916) 930-3685 or katherine.schmidt@noaa.gov.

Sincerely,

Erin Strange
San Joaquin River Basin Branch Chief

NOTICE OF AVAILABILITY OF A DRAFT ENVIRONMENTAL ASSESSMENT

**Stockton Diamond Grade
Separation**

PUBLIC REVIEW PERIOD: March 28, 2022 – April 27, 2022

The San Joaquin Regional Rail Commission (SJRR) in coordination with the California High-Speed Rail Authority (CHSRA), announces the availability of the Draft Environmental Assessment (EA) for the Stockton Diamond Grade Separation Project (Project). The Draft EA has been prepared and is being made available pursuant to the National Environmental Policy Act (NEPA).

The environmental review, consultation, and other actions required by applicable federal environmental laws for this project are being or have been carried out by the State of California pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated July 23, 2019, and executed by the Federal Railroad Administration and the State of California (MOU). Under that MOU, the Authority is the project's lead agency under NEPA. Prior to the MOU, the FRA was the federal lead agency. SJRR, the Altamont Corridor Express (ACE) commuter rail service owner-operator, is the project sponsor and joint lead agency under NEPA.

A. Project Description and Location

The Stockton Diamond Grade Separation Project (proposed Project) is a critical passenger and freight mobility project that would construct a grade separation of the Burlington North Santa Fe (BNSF) Railway (BNSF) and Union Pacific Railroad (UP) rail lines at the Stockton Diamond rail intersection located just south of Downtown Stockton near South Aurora Street and East Scotts Avenue in the City of Stockton in San Joaquin County, California. The area of impacts studied in the Draft EA is bounded by Robert J. Cabral Station to the north; the UP Stockton Yard to the south, located approximately at East Fourth Street; South Pilgrim Street to the east; and South Grant Street to the west.

The proposed Project would construct a grade separation of the BNSF and UP rail lines to reduce rail congestion and allow passenger and freight rail traffic to flow uninterrupted through the crossing. Currently, the BNSF Stockton Subdivision and the UP Fresno Subdivision consist of two main tracks each, and they intersect each other at a level, at-grade crossing known as the Stockton Diamond. This rail intersection is the busiest at-grade railway junction in California. The at-grade crossing experiences substantial congestion and delays service for people and freight throughout the Central Valley—and for freight on the broader national network. The current, at-grade configuration of the tracks results in critical delays to passenger and freight trains in the area, including those serving the Port of Stockton. Train congestion also causes vehicle delays at roadway-rail crossings and creates potential motor vehicle, rail, bicycle, and pedestrian conflicts.

Stockton Diamond Grade Separation
Notice of Availability of a Draft Environmental Assessment
March 28, 2022
Page 2 of 3

The current ACE and San Joaquins intercity passenger rail services are constrained by the Stockton Diamond Interlock at-grade crossing, which can reduce reliability and on-time performance for both passenger and freight rail service. The grade separation would help improve the operational performance for SJRRC and the San Joaquin Joint Powers Authority (the agency responsible for managing the Amtrak San Joaquins intercity passenger rail service), as they provide service between the Central Valley, Sacramento, and San Francisco Bay Area. Transit in San Joaquin County is also important to the region and includes a system of bus rapid transit, intercity and interregional bus transit services, ACE commuter rail service, and San Joaquins intercity rail service.

The reduction in rail congestion with the implementation of this Project would reduce delays for passenger and freight rail providers, improve freight mobility and reduce travel times for motor vehicle, bicyclist, and pedestrian traffic. It also would reduce locomotive and automobile idling and air emissions.

The proposed Project's public benefits would extend to motorists, pedestrians, rail passengers, freight shippers, and residents throughout the region. Additional benefits would include reduced fuel consumption, lower freight rail transportation costs, and improved travel times and reliability.

B. Potential Environmental Impacts

As described and explained in the Draft EA, the proposed Project would result in overall beneficial effect on long-term air quality, traffic and transportation, and visual quality and aesthetics in the Project Study Area.

The proposed Project would not result in adverse effects on any resource evaluated in the Draft EA, after incorporation of Best Management Practices (BMP) and mitigation.

The proposed Project would not result in adverse effects with mitigation on the following resources evaluated in the Draft EA: Land Use and Planning, Hazardous Waste and Materials, Noise and Ground-borne Vibration, and Biological Resources.

C. Public Review Period

A 30-day public and agency review period is scheduled from March 28, 2022 to April 27, 2022. Comments may be made on comment cards provided at the open house identified below or submitted in writing by regular mail or email. Please note that you do not need to attend one of the open houses to comment on the Draft EA. Please send written comments to:

Email:
info@stocktondiamond.com

Mail:
c/o Public Outreach
2379 Gateway Oaks Drive, Suite 200
Sacramento, California 95833

Comments on the Draft EA must be received on or before the end of the review period, which is April 27, 2022.

March 28, 2022
Page 3 of 3

D. Public Open House

On behalf of the Authority, SJRRC will hold an Open House to receive comments on the Draft EA. Written comments may be made on comment cards that will be provided at the Open House scheduled from 4:30 pm to 6:00 pm on April 6, 2022, at Stribley Community Center, located at 1760 East Sonora Street, Stockton, California 95205.

The Open House will be an opportunity for the public to learn more about the proposed Project, interact with Project team members, ask questions and submit formal comments on the Draft EA during the Project's 30-day public comment period.

If unable to attend the Open House, videos of the meeting presentations will be posted to the Project website at <https://www.stocktondiamond.com/> the day after the meeting and available for review until 5:00 p.m. on April 27, 2022.

E. Availability of Draft Environmental Assessment

In addition to posting the electronic version of the Draft EA on the SJRRC website at <https://www.stocktondiamond.com/>, Printed copies of the Draft EA and electronic copies of the associated technical report included in the appendices are available for review at the following locations during hours the facilities are open (open days/hours may be reduced for compliance with coronavirus public health and safety directives):

- 345 N. El Dorado St., Stockton, CA 95202 (City of Stockton Community Development Office)
- 555 E Weber Avenue, Stockton, CA 95202-2804 (San Joaquin Council of Governments)
- 605 N. El Dorado St, Stockton, CA 95202-1907 (Cesar Chavez Central Library)
- 502 W. Benjamin Holt Dr, Stockton, CA 95207 (Margaret K. Troke Branch Library)
- 2324 Pock Ln, Stockton, CA 95205-7821 (Maya Angelou Branch Library)
- 1760 E Sonora St, Stockton, CA 95205 (Stribley Micro Library)
- 2370 E Main St, Stockton, CA 95205 (Fair Oaks Branch Library)
- 1453 W. French Camp Rd, Stockton, CA 95206 (Weston Ranch Branch Library)
- 5758 Lorraine Ave., Stockton, CA 95210 (Arnold Rue Micro Library)
- 734 Houston Ave., Stockton, CA 95206 (Van Buskirk Micro Library)

Printed copies of the Draft EA and electronic copies of the associated appendices are also available for review during business hours at the Authority's Headquarters at 770 L Street, Suite 620 MS-1, Sacramento, CA 95814, and the SJRRC's office at 949 E. Channel St. Stockton, CA 95202. You may also request a copy of the Draft EA and associated appendices by calling (209) 235-0133 or emailing info@StocktonDiamond.com.

Now Accepting Comments on Draft Environmental Assessment

Comment period to run from March 28 to April 27, 2022

The California High-Speed Rail Authority (CHSRA), the National Environmental Policy Act (NEPA) Lead Agency, is issuing this Notice of Availability of a Draft Environmental Assessment and bilingual public open house for the Stockton Diamond Grade Separation Project. The public comment period of 30 days will begin on March 28 and end at 5 p.m. on April 27, 2022.

Comments may be submitted by way of:

- stocktondiamond.com
- info@stocktondiamond.com
- 209-235-0133
- c/o Stockton Diamond Project, 2379 Gateway Oaks Drive, Suite 200, Sacramento, CA 95833
- At the public open house (listed right)

Join the Project Team at Our Public Open House

Wednesday, April 6, 2022
4:30 to 6:00 p.m.
Stribley Community Center
(1760 E Sonora St., Stockton)

At the Public Open House, members of the community are invited to drop in, anytime between 4:30 to 6:00 p.m. Project members will be available to answer questions and provide information on findings from the environmental review process, including the proposed concept for the rail intersection and proposed improvements for surrounding streets. Refreshments will be provided.

COVID-19 protocol: Everyone in attendance will be asked to wear a mask and practice social distancing.

Spanish translation will be available on site at the meeting.

The Draft EA is also available for review online at stocktondiamond.com and at repository locations listed below:

- City of Stockton Community Development Office, 345 N. El Dorado St., Stockton, CA 95202
- San Joaquin Council of Governments, 555 E Weber Avenue, Stockton, CA 95202-2804

The environmental review, consultation, and other actions required by applicable federal environmental laws for this project are being or have been carried out by the State of California pursuant to 23 U.S.C. 327 and a Memorandum of Understanding dated July 23, 2019, and executed by the Federal Railroad Administration and the State of California.

Ketanji Brown Jackson: quién es la primera mujer negra en llegar a la Corte Suprema de EE.UU.

La jueza de 51 años fue confirmada este jueves por el Senado de EE.UU. para ocupar un puesto en el máximo tribunal del país. ¿Quién es Ketanji Brown Jackson?

Ketanji Brown Jackson hizo historia este jueves.

Con 53 votos a favor, la jurista de 51 años se convirtió en la primera mujer afroestadounidense en ser nombrada jueza de la Corte Suprema de Estados Unidos.

Los demócratas y tres republicanos del Senado votaron a favor de su nombramiento luego de que el pasado febrero el presidente de EE.UU., Joe Biden, la nominara para reemplazar al juez Stephen Breyer, quien anunció su retiro.

"En esta votación, los 'sí' son 53, los 'no' 47. Y esta nominación es confirmada", dijo la vicepresidenta de EE.UU., Kamala Harris, quien asumió su función de presidenta del Senado en la sesión.

La mayoría demócrata aplaudió y ovacionó el resultado. Chuck Schumer, el líder de la mayoría, lo calificó como un "día jubiloso" para Estados Unidos.

La senadora por Alaska Lisa Murkowski, una de los tres republicanos que votaron a favor de la jueza Jackson, dijo que su decisión era, en parte, una señal de "rechazo a la corrosiva politización" en torno a los procesos de confirmación.

La nueva magistrada "aportará a la Corte Suprema una experiencia en

tribunales que pocos pueden equiparar dado su historial en litigios", añadió Murkowski.

En 233 años de historia de la Corte Suprema, es la tercera persona de la comunidad negra en sentarse en el máximo tribunal del país, después de los jueces Thurgood Marshall (fallecido en 1993) y Clarence Thomas (actualmente en el cargo).

Con la llegada de Jackson, la composición de la Corte Suprema -clave en muchas decisiones del país- quedará con una representación de seis jueces conservadores y tres progresistas, incluida Jackson entre estos últimos.

El origen de Ketanji Brown Jackson Al nominarla para la Corte Suprema, el presidente Biden dijo que Jackson es "una de las mentes legales más brillantes de la nación". Su trayectoria es amplia.

Nacida en Washington DC en 1970, creció en Miami en los años en los que aún había efectos de la segregación racial en el sureste del país. Ketanji Brown Jackson Getty Images

"Mis padres me enseñaron que, a pesar de las muchas barreras que tuviera que enfrentar al crecer, si trabajaba duro y creía en mí misma y en Estados Unidos, podría hacer cualquier cosa o

ser cualquier cosa que yo quisiera ser", dice Jackson.

"Fue mi padre quien me inició en este camino. Cuando yo era niña, lo vi estudiar y se convirtió en mi primer ejemplo profesional".

En la escuela secundaria fue campeona de debate y presidenta de su clase.

Jackson posee dos títulos de la Universidad de Harvard, institución a la que ingresó con solo otros tres compañeros afroestadounidenses.

"En esos primeros momentos en los que te preguntas si perteneces, ella fue el anda. Luego se aseguró de que todos lo fuéramos. Ella es la que se convirtió en el cimiento de todos nosotros", dice

su excompañera Lisa Fairfax.

En esa época conoció a su esposo, Patrick Jackson, que era estudiante de medicina de Columbia y proviene de una familia blanca de Boston. Su carrera

Jackson actualmente forma parte del influyente Tribunal de Apelaciones de EE.UU. para el circuito de DC.

Previamente estuvo en la defensa pública, lo que la convierte en la primera jueza de la Corte Suprema en haber sido abogada pública ante los tribunales.

En 2012, el entonces presidente Barack Obama nominó a Jackson como

STOCKTON DIAMOND

¿Qué es el Proyecto?

En este momento los rieles de dos importantes ferrocarriles se cruzan a-ras-de-suelo en la ciudad de Stockton en un nudo ferroviario que se conoce como 'Stockton Diamond'. Esta intersección de ferrovías —ubicada justo al sur del centro de Stockton, cerca de la calle Aurora Sur y la avenida Scotts Este— es el embudo ferroviario más transitado y congestionado de California. El Proyecto propuesto separaría las principales ferrovías de los ferrocarriles BNSF y Union Pacific (UP), elevando la vía principal de UP sobre la del BNSF, lo que beneficiará la calidad del aire y la seguridad de la circulación. Este Proyecto también permitiría viajes en tren de pasajeros más rápidos y en horario, como asimismo la expansión de los servicios que vinculan a los viajeros a sus reuniones de amigos y familiares, a su empleo y a destinos clave en todo el norte de California.

El análisis medioambiental, la consulta, y otras acciones requeridas por las leyes ambientales federales aplicables para este proyecto, están siendo o han sido preparados por el Estado de California en conformidad con la sección 23 del capítulo 327 del Código de los EEUU (U.S.C.) y un Entendimiento Preliminar (MOU) firmado el 23 de julio de 2019 y ejecutado por la Administración Ferroviaria Federal y el Estado de California.

El Informe Preliminar de la Evaluación Medioambiental está Ya Abierto a Comentarios

El período abierto a comentarios será del 28 de marzo al 27 de abril de 2022

La Jurisdicción del Tren-Bala de California (CHSRA) — la agencia líder para conformar con el Decreto Nacional de Política Medioambiental (NEPA)— emite este Aviso de Disponibilidad del Informe Preliminar de Evaluación Medioambiental sobre el Proyecto Proyecto del Cruce Duo-Nivel del nudo ferroviario 'Stockton Diamond'. El período de 30 días abierto a comentarios sobre el Informe Preliminar de la EA estará vigente hasta el 27 de abril de 2022.

La información sobre el proyecto, el informe preliminar de EA completo, la Notificación de Disponibilidad oficial —al igual que recursos adicionales relacionados

El Informe Preliminar de la EA está disponible para su lectura en las dependencias enumeradas a continuación:

- Of. de Desarrollo Comunitario - Ayuntamiento de Stockton, Calle El Dorado Norte #345, Stockton, CA 95202
- Consejo de Gobiernos de San Joaquín, Av. Weber Este #555, Stockton, CA 95202-2804

SWG MEETING #3 SUMMARY

On Wednesday, March 2, 2022, the San Joaquin Regional Rail Commission (SJRRRC) and HDR held the third SWG meeting for the Stockton Diamond Grade Separation Project. The meeting was hosted in a hybrid format with both a virtual and an in-person option. In-person attendees met at the Rail Maintenance Facility (1020 E. Alpine Ave., Stockton, CA 95204). HDR invited targeted stakeholders via email, followed by reminder emails.

The purpose of the meeting was to share project updates, obtain informed input, and ask the SWG to help promote the upcoming engagement opportunities during the Draft EA public comment period.

The meeting format was as follows:

- 11:30 a.m. – 12:45 p.m. – Meeting Presentation & Discussion
- 12:45 – 1:30 p.m. – Rail Maintenance Facility

After a brief safety moment by SJRRRC's Bryan Schmidt, SJRRRC's Stacey Mortensen opened the meeting by providing an overview of the project as well as information about the SJJRC's Valley Rail plans, statewide connectivity, and educational and workforce opportunities available at the rail maintenance facilities.

HDR's Mike Higgins then shared a project update detailing how the project will reduce delays in congestion between North/South and East/Westbound trains with impacts to key community connections. Higgins addressed the issues of proposed street closures and maintaining key city streets multimodal access. He spoke about how the project will help to improve crossings within the project area (from E. Weber Avenue at the north end to Charter Way (Martin Luther King Jr. Blvd.) at the south end. Higgins also stressed the street improvements that will be incorporated into the project including sidewalks, trees, and gutters. HDR's Cathy LaFata then went through the environmental process and spoke about the environmental improvements with the grade separation.

The schedule for Stockton Diamond Grade Separation project started two years ago addressing the alternatives with the California Environmental Quality Act (CEQA) process. Now, the project is working through the National Environmental Policy Act (NEPA) process, which is being led by California High Speed Rail Authority (CHSRA). The public circulation of the NEPA Draft Environmental Assessment will be available this spring. The project team is also working on design information addressing the relocation of impacted properties. The project has an estimated construction start date of June 2023.

QUESTIONS/COMMENTS

The questions/comments are listed below in no particular order.

- **What would it take to get the underpass extended to Union?**
More funding would be needed. Other significant constraints must be dealt with. For example, the trains to the Port of Stockton must go to the yard first. Sometimes those trains are two miles long. The Stockton Wye will give access to Port bound trains. This would benefit from that improvement instead of backtracking through the yard. We estimate 4000 cars per day at Hazelton.
- **When is the public meeting?**
It is scheduled for the first week of April. We are still working with CHSRA since they are the NEPA lead. **UPDATE: Public meeting to be held on April 6 from 4:30-6 p.m. at the Stribley Community Center.**

- **How many trees will need to be planted to minimize noise impacts? Is this one-time insulation for windows/doors? What other natural barriers are being considered?**

The fly-over will shift existing track alignment. The Noise analysis concluded impacts to several residences, which will be mitigated by installing insulated windows and doors. This will be done consistent with U.S. Housing and Urban Development standards.

- **Can you define the vegetation barriers? Can you add more lights as part of the aesthetic options? Can new construction materials with less environmental impact be incorporated into the design? How is greenhouse emissions reduction being measured?**

Aesthetics, lighting, and environmentally focused features need to be balanced with railroad approvals, as the railroad would ultimately own the structure(s). The project team is looking for opportunities to get more creative where there are opportunities for it. The focus is on maintenance and longevity. The project team is also looking for ways to have more options such as lighting. Landscaping is also a big consideration for the project outside of the railroad right-of-way. It was discussed to investigate grant funding opportunities for Union Street improvements as well as art and local contributions to this landscaped area.

- **Will windows degrade? Is this a one-time improvement or will this be re-assessed? A one-time fix is not good enough.**

Higgins stated that he was not familiar with the rules related to longevity. As new residents move in, disclosures will take place. Noise mitigation will be installed consistent with U.S. Housing and Urban Development standards.

LaFata shared that CEQA is complete and NEPA is currently in progress. The project is looking at all vulnerable communities including low-income, minority, and transient populations living in and around the project area.

- **Will you be able to share the presentation?**

Yes, HDR will send notes and presentation slides to the entire SWG.

- **Construction Outreach Comment**

Espe Vielma (Café Coop) shared that her team are doing door-to-door canvassing and can assist with sharing information about our public meeting. Espe also suggested we do text alerts through the schools to inform the residents, and a social media blitz for neighborhood residents regarding street closures.

Project Status and Overview

Busiest, most congested rail bottleneck in CA

- Two rail lines **intersect at-grade** in Stockton at the **Stockton Diamond** located just south of downtown.
- **Critical** transportation **hub** for freight from Port of Stockton to national network and for passenger service between affordable housing and jobs.
- Significant rail **congestion** and service **delays** which impact **frequency**, **reliability** and **expansion** potential
- Local **multi-modal delays** at rail crossings

Reduce passenger and freight rail delays, and associated congestion

Maintain key community connections

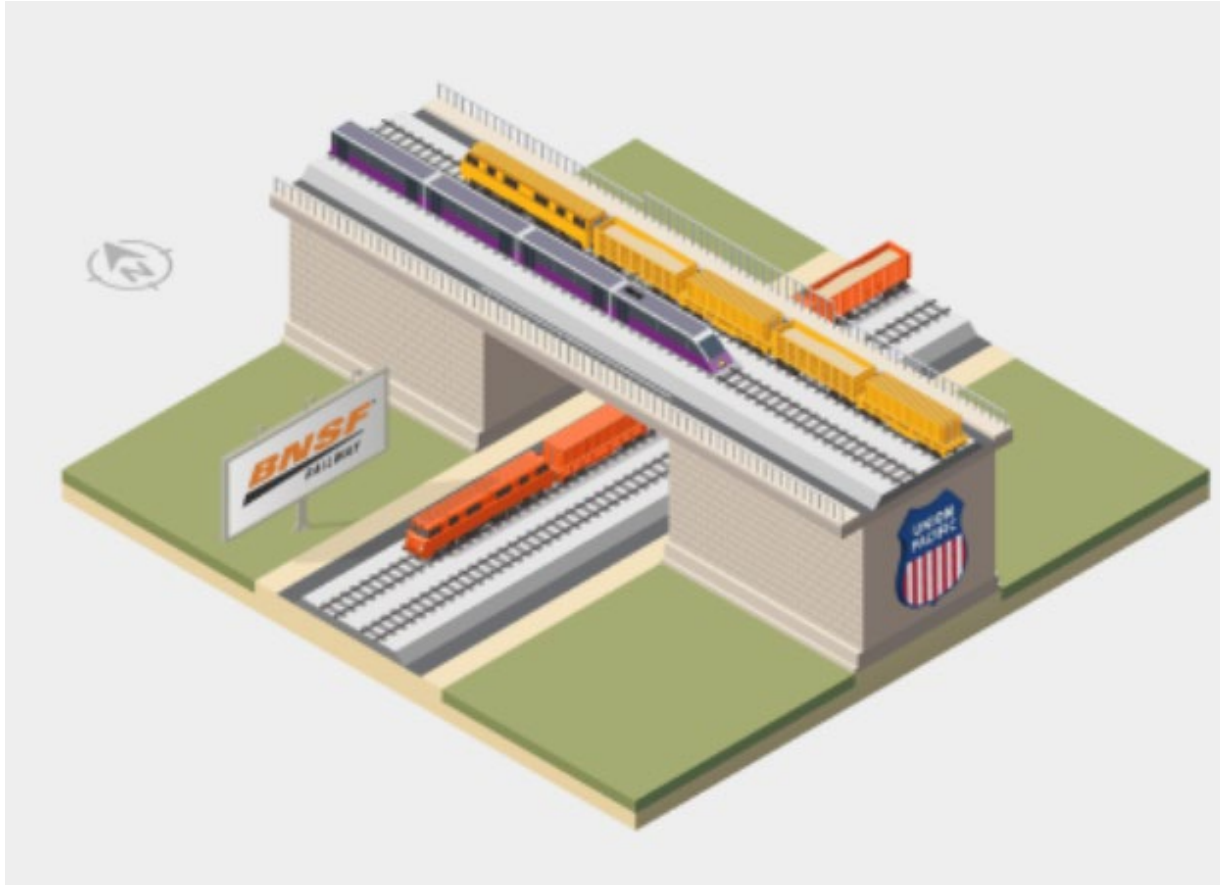

Improve multimodal access

Provide local and regional environmental and economic benefits

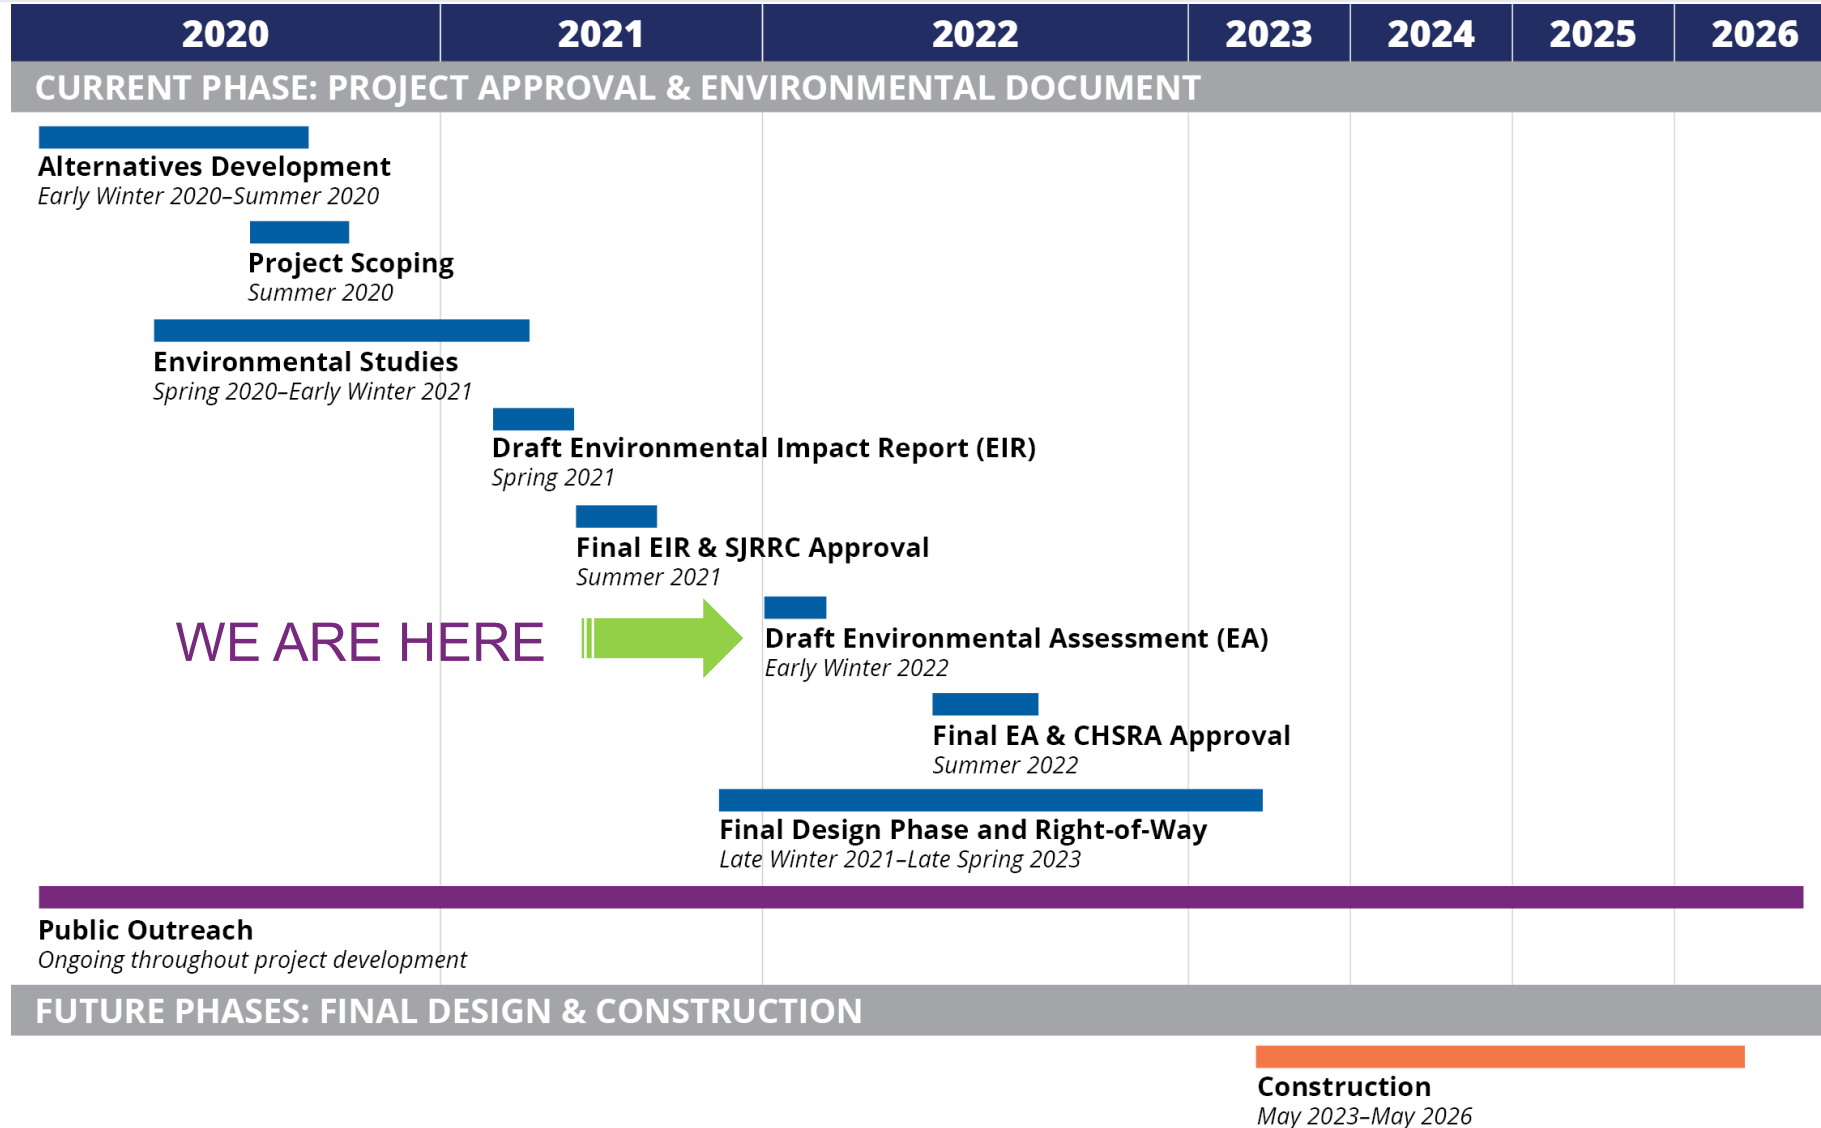

Address safety by closures and enhancements at key roadway-rail grade crossings

- Grade separation with flyover bridge
 - Uninterrupted rail flow through crossing
- Identification of feasible concepts
 - Partner and stakeholder coordination
- Grade separation concept reviewed for potential environmental effects
 - Identification of Best Management Practices (BMP) and mitigation measures

Unlocking freight & passenger rail mobility in Northern CA

Project Schedule

Alternative 1 (No-Build Alternative)

Alternative 2 (Proposed Project)

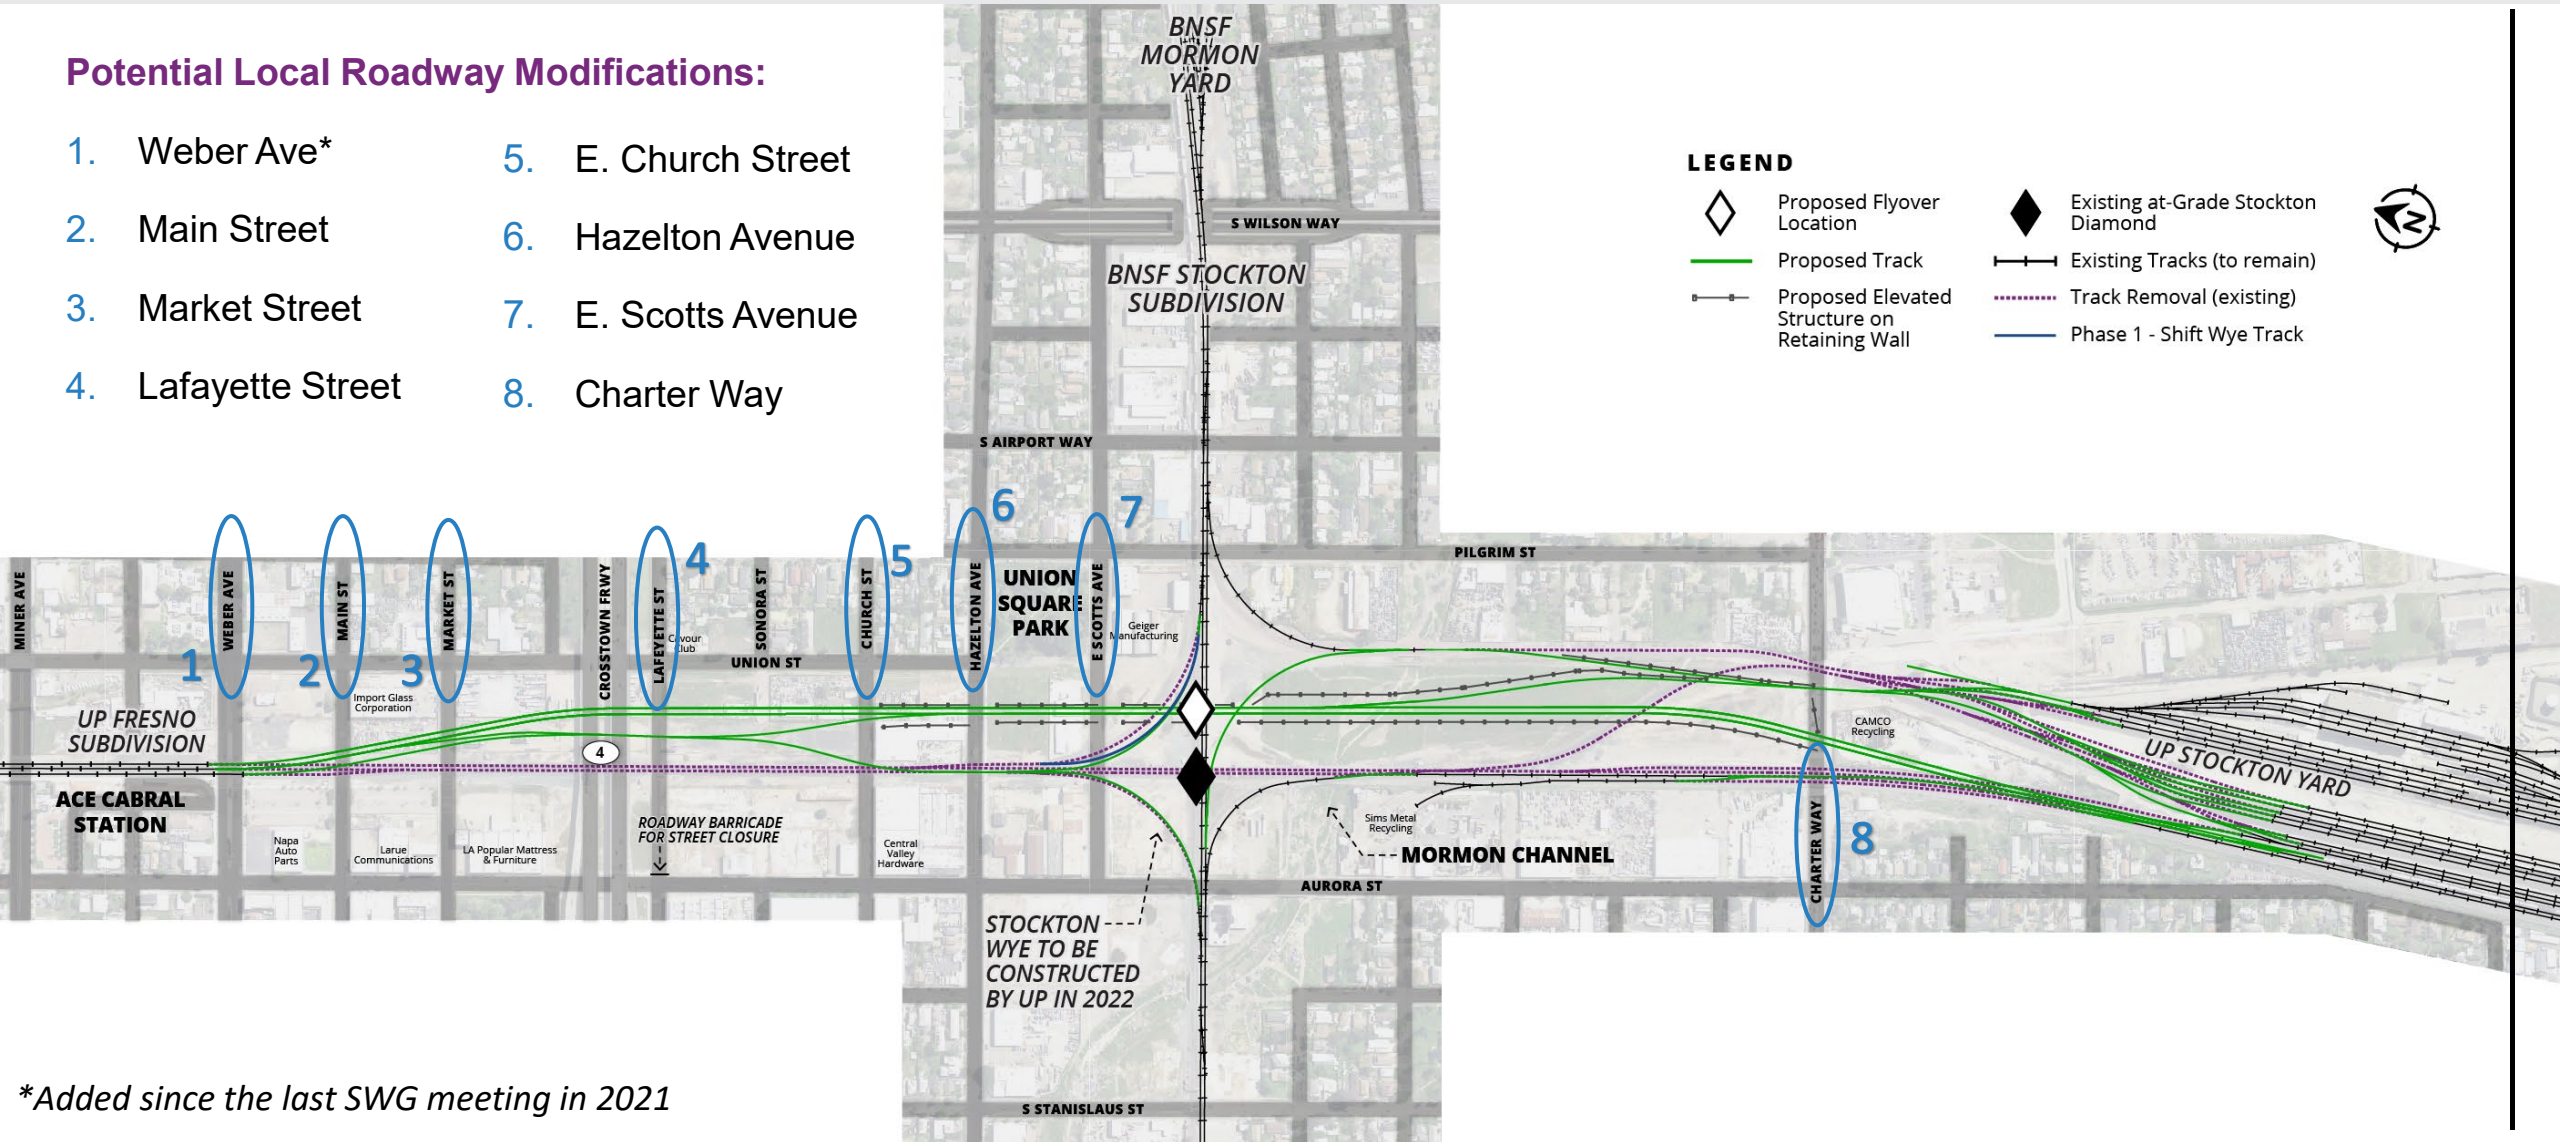

Proposed Project Condition

Proposed Flyover Bridge Location & Local Road Crossings

Potential Local Roadway Modifications:

- | | |
|---------------------|---------------------|
| 1. Weber Ave* | 5. E. Church Street |
| 2. Main Street | 6. Hazelton Avenue |
| 3. Market Street | 7. E. Scotts Avenue |
| 4. Lafayette Street | 8. Charter Way |

Structure Design Options – Earthen Embankment

Structure design can influence visual aesthetics, access & public safety

Structure Design Options – Retaining Wall

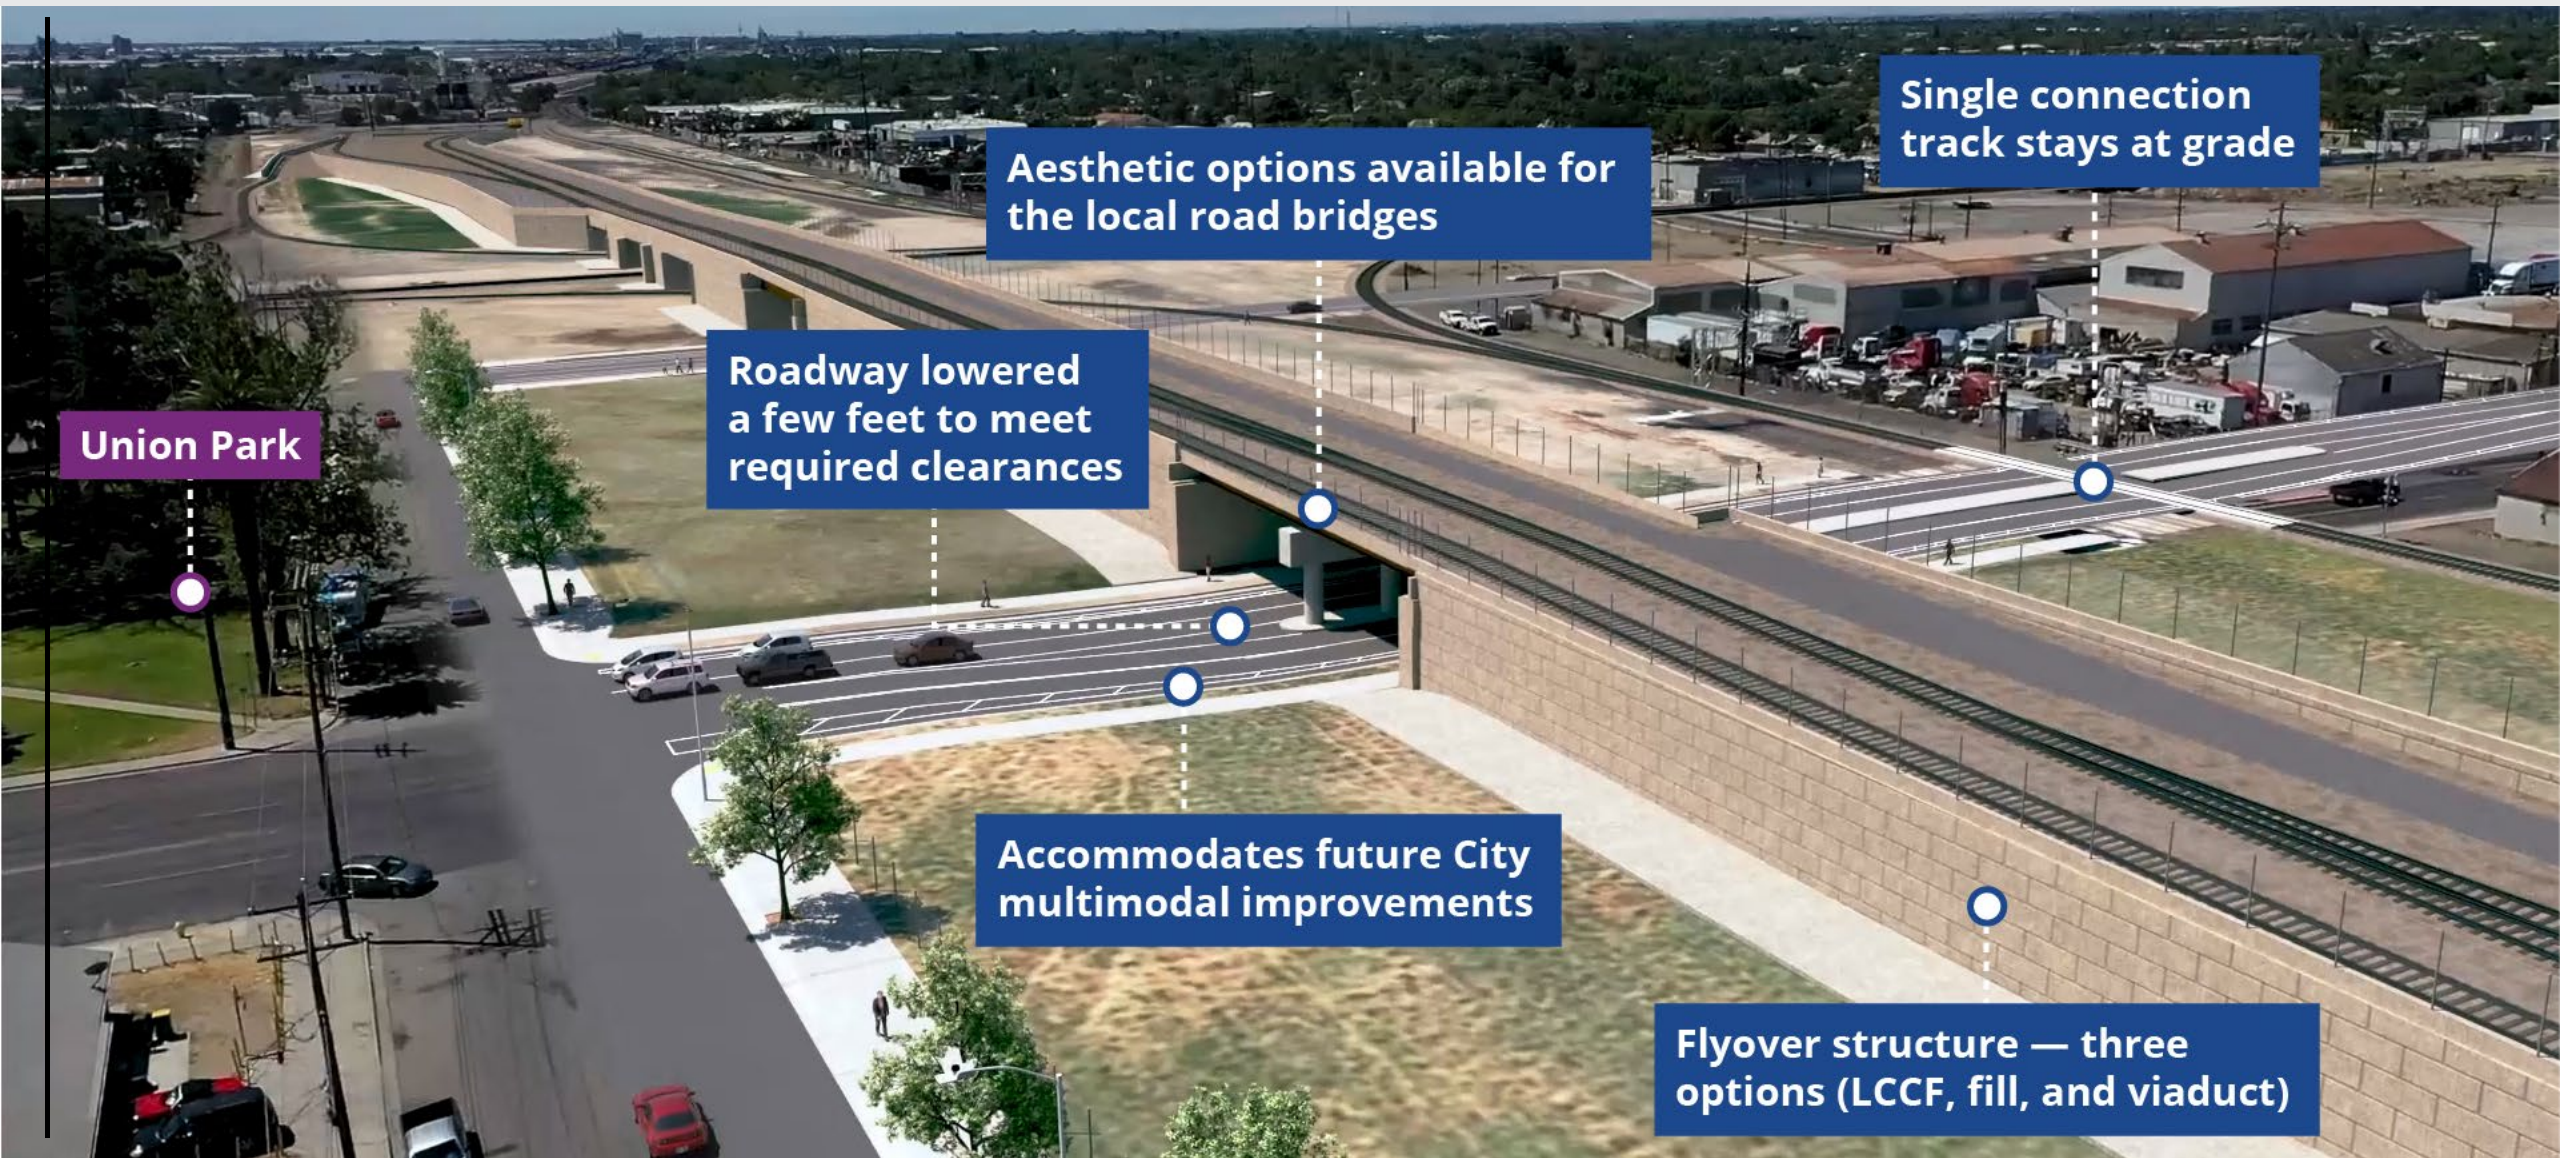

Structure Design Options – Viaduct

Existing Union St. Corridor, Looking South at Hazelton Ave

Proposed Union St. Corridor, Looking South at Hazelton Ave

Union Park

Aesthetic options available for the local road bridges

Roadway lowered a few feet to meet required clearances

Accommodates future City multimodal improvements

Single connection track stays at grade

Flyover structure — three options (LCCF, fill, and viaduct)

Existing East Hazelton Ave. Crossing Looking West

Proposed East Hazelton Ave. Crossing

View From Existing Union & Church St. Intersection

Proposed Union & Church St. View

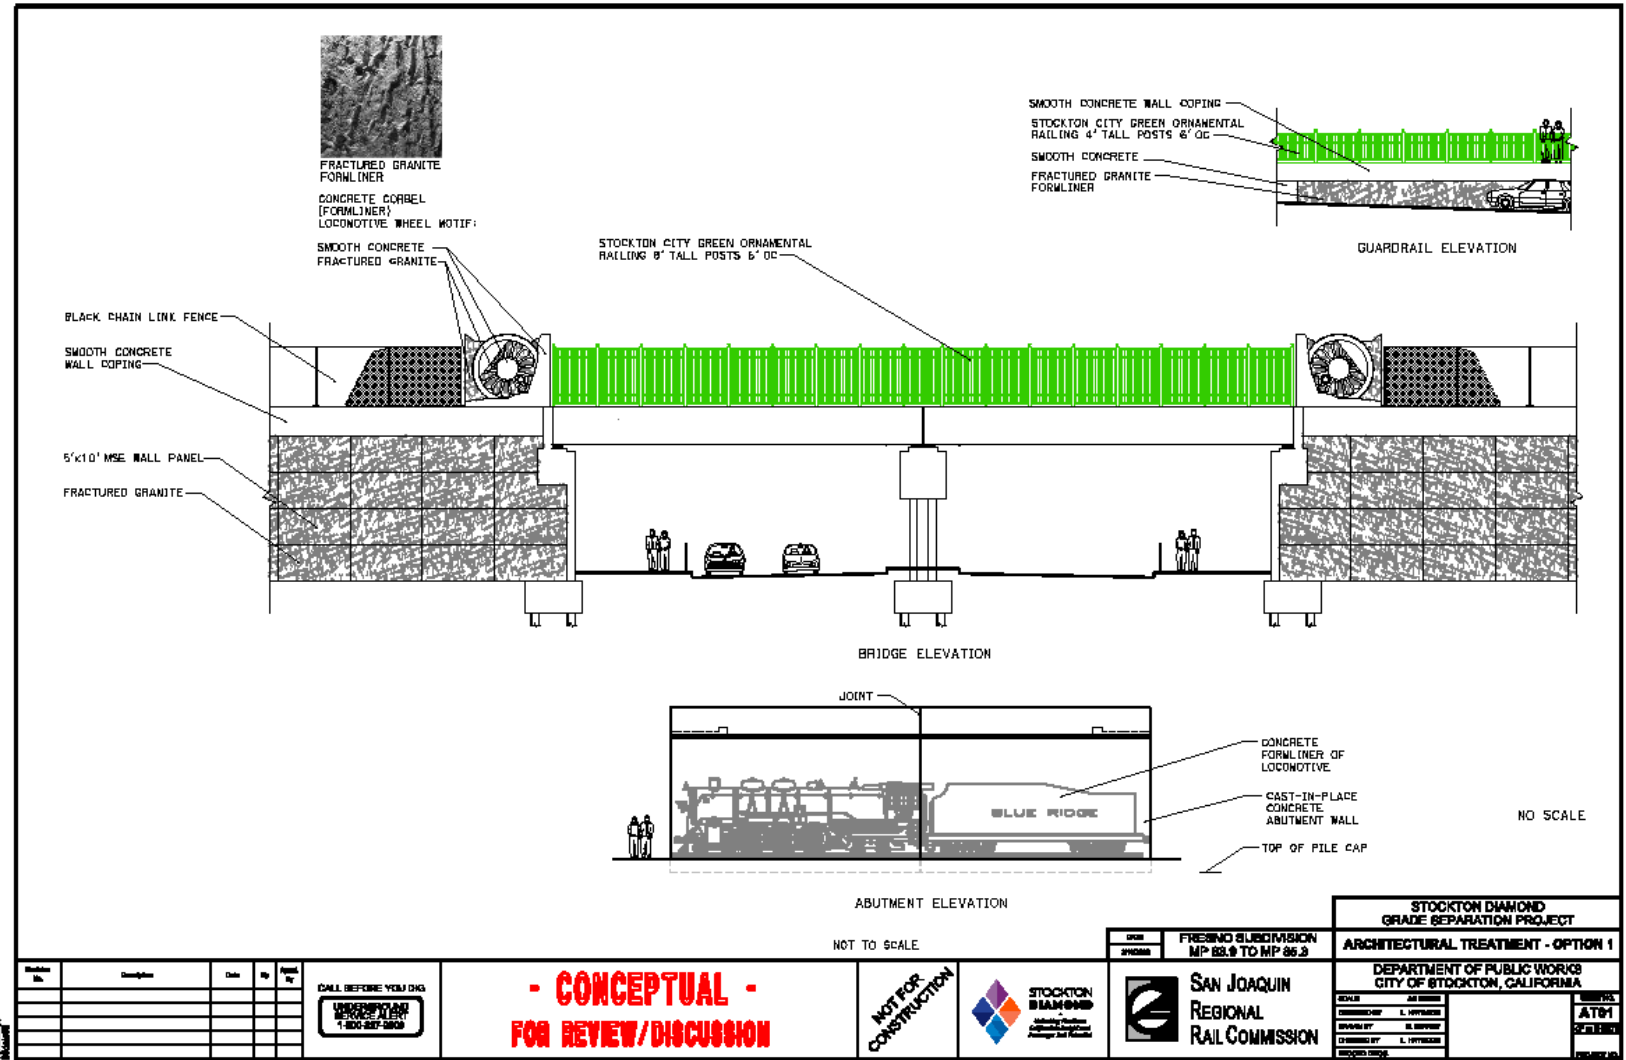

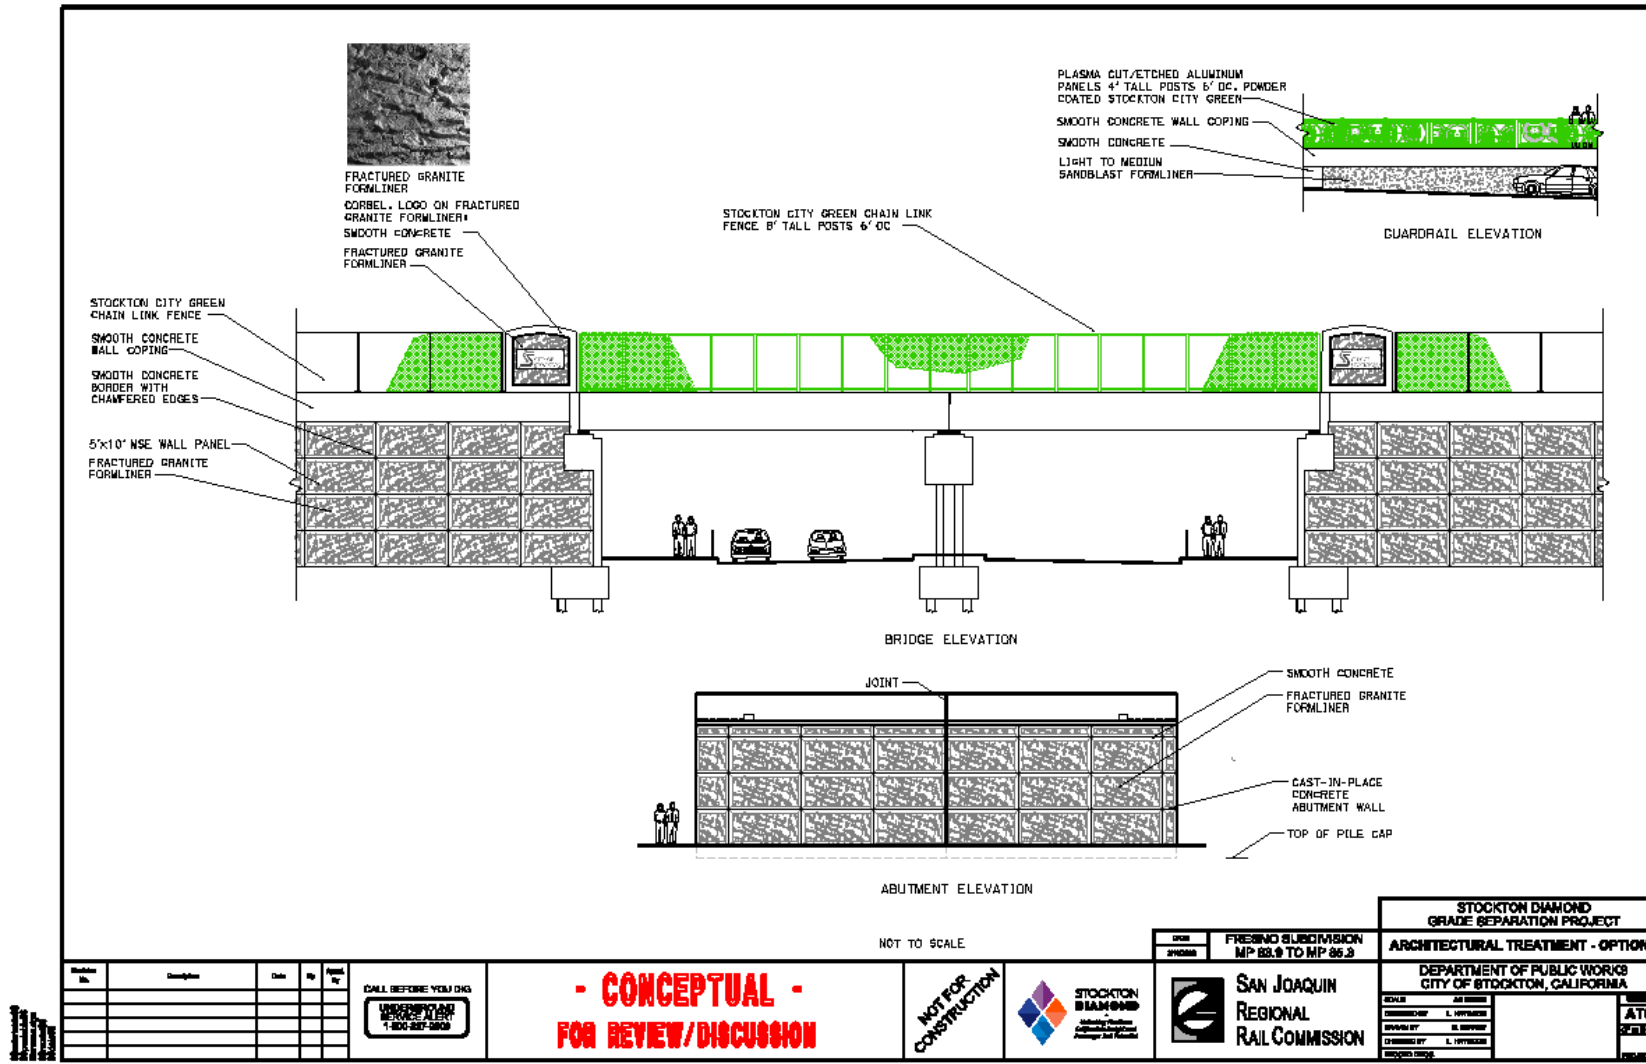

Local Road Bridge Aesthetic Options

Aesthetics Option 1 - Locomotive Theme

Aesthetic treatments can be added to the corbels, bridge railing and abutment wall.

Aesthetics Option 2 - Granite Theme

Draft EA Public Review & Comment Period: March 28 – April 27, 2022

Resources Analyzed in Draft EA

Land Use & Planning

Community Effects
and Growth

Air Quality

Noise & Vibration

Visual Quality
& Aesthetics

Parks &
Recreation

Biological
Resources

Hydrology, Floodplain
& Water Quality

Cultural
Resources

Hazardous Waste
& Materials

Traffic &
Transportation

Geology
& Soils

Relocation & Real
Property Acquisition

Utilities & Emergency
Services

Paleontology

Cumulative Effects

- Would result in **overall beneficial effect** on long-term air quality, traffic and transportation, and visual quality and aesthetics in the Project Study Area
- Would not result in **adverse effects** on any resource evaluated in Draft EA, after incorporation of Best Management Practices (BMP) and mitigation
- Would not result in **adverse effects** with mitigation:

Biological Resources

Land Use & Planning

Relocations & Real Property Acquisition

Noise & Ground-borne Vibration

- Potential short-term adverse effects on traffic & transportation during construction minimized with BMPs
- Substantial improvement in AM & PM peak hour delay Future Year (2045) at E. Hazelton & E. Scotts Ave UP crossing
- Low current traffic volumes along E. Lafayette & E. Church Street, and future traffic diverted to other nearby streets after these permanent roadway closures (as assumed by the EA)
 - Evaluations are underway to determine whether to close Scotts Ave instead of Lafayette
- Beneficial long-term effect on existing transit routes by eliminating train delays currently at at-grade crossing

Key issues raised during Scoping

- Potential adverse effects from noise & ground-borne vibration during construction:
 - **Minimized** with BMPs consisting of noise and vibration control plans
- Potential adverse effects on 12 residences with severe noise effects
 - **Mitigated** through sound insulation improvements consistent with U.S. Department of Housing & Urban Development thresholds

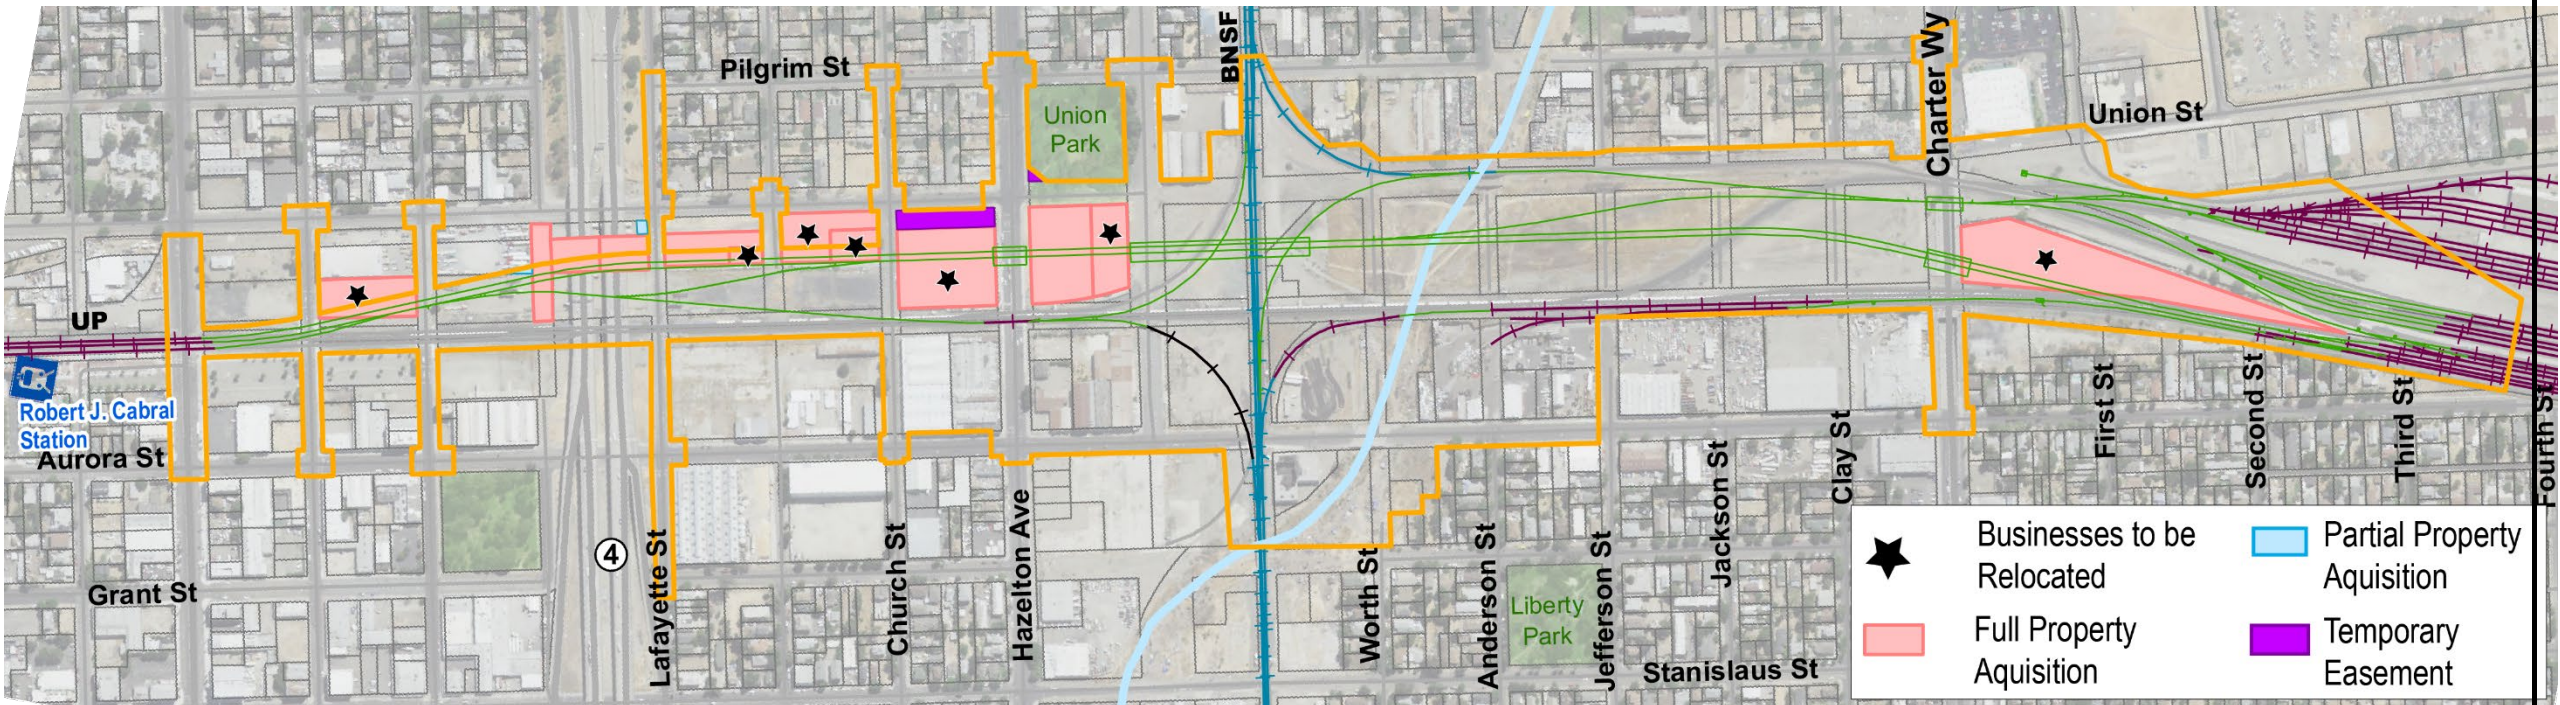

Key issues raised during Scoping

- **No effects** on residential properties
- Conversion of 10.87 acres of **Industrial Use to Transportation Use**, requiring an amendment to City of Stockton General Plan
- Seven active auto/truck-related **businesses to be relocated** and vacant property
- Two **temporary construction easements** required for proposed Project (vacant parcel and Union Park)
- **No potential short-term or long-term adverse effects** on transient populations in Mormon Slough
- **No disproportionate impacts** to minority and low-income populations (environmental justice) in Project Study Area

Key issues raised during Scoping

Temporary Construction Easements (TCEs) & Property Acquisition Map

- Project would provide a benefit in long-term visual quality & aesthetics by removing views of railroad corridor currently degrading visual quality of area
- Construction of flyover structure would enhance design coherence of proposed Project corridor by eliminating (or screening from view) industrial land uses

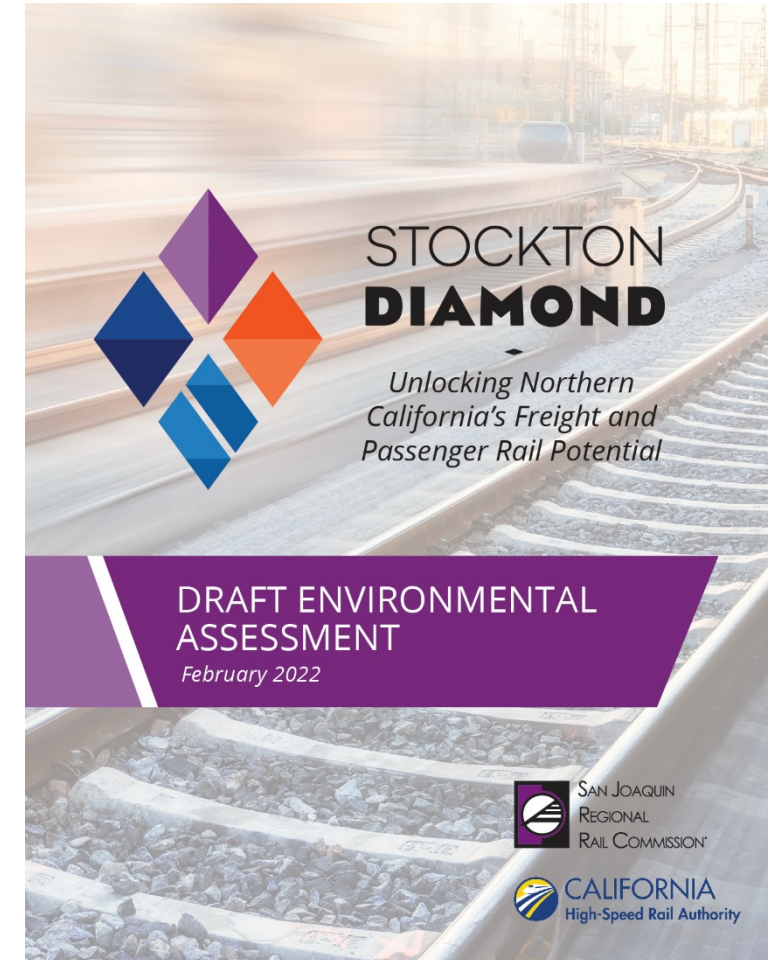

Public Engagement Opportunities

Coming this Spring: Draft EA for Review & Comment

- Draft EA Comment Period: March 28 – April 27, 2022
- Draft EA PDF will be available on the project website: stocktondiamond.com/resources
- Hardcopies available at 11 Stockton locations during normal working hours & Bilingual posters and comment cards available at 31 Stockton locations during normal working hours
- Two in-person engagement opportunities
 - Neighborhood Meet & Greet (El Concilio, April 5, 4:30pm – 6:00 pm)
 - Public Open House (Stribley Community Center, April 6, 4:30pm – 6:00pm)

Appendix Q: Response to Comments

This page is intentionally left blank.

Pursuant to 23 CFR 771.119(d), an EA must be made publicly available for a 30-day public review period. A public NOA of the Draft EA for the Stockton Diamond Grade Separation Project (Project) was published as a display ad in the Stockton Record newspaper on March 28, 2022, and in the Latino Times newspaper, April 2022 edition.

The Draft EA was circulated for public review for a period of 30 days, from March 28, 2022, to April 27, 2022. Copies of the Draft EA were distributed to federal, state, local agencies, regional agencies, elected officials, and utility providers affected on March 28, 2022. Additionally, the NOA was distributed to various public agencies, stakeholders, interested parties, and property owners affected by the Project. Hardcopies of the Draft EA were made available for public review at the following locations.

- 345 North El Dorado Street, Stockton, CA 95202 (City of Stockton Community Development Office)
- 555 East Weber Avenue, Stockton, CA 95202-2804 (San Joaquin Council of Governments)
- 605 North El Dorado Street, Stockton, CA 95202-1907 (Cesar Chavez Central Library)
- 502 West Benjamin Holt Drive, Stockton, CA 95207 (Margaret K. Troke Branch Library)
- 2324 Pock Lane, Stockton, CA 95205-7821 (Maya Angelou Branch Library)
- 1760 East Sonora Street, Stockton, CA 95205 (Stribley Micro Library)
- 2370 East Main Street, Stockton, CA 95205 (Fair Oaks Branch Library)
- 1453 West French Camp Road, Stockton, CA 95206 (Weston Ranch Branch Library)
- 5758 Lorraine Avenue, Stockton, CA 95210 (Arnold Rue Micro Library)
- 734 Houston Avenue, Stockton, CA 95206 (Van Buskirk Micro Library)
- 770 L Street, Suite 620, Sacramento, CA 95814 (California High Speed Rail Authority [CHSRA] Headquarters)
- 949 East Channel Street, Stockton, CA 95202 (San Joaquin Regional Rail Commission [SJRR] Office)

The Draft EA was available electronically on the Project website (StocktonDiamond.com). A copy of the distribution list for the Draft EA is provided in Appendix O of this document.

Q.1 Index of Comments Received

Error! Reference source not found. indexes the agencies, groups, and persons who commented on the EA during the public review period from March 28, 2022, through April 27, 2022. Comments received by these groups or individuals have been organized into the follow categories: State Agencies, Regional Agencies, Local Agencies, and Public Comments. No comments were received from federal agencies during the public review period. A total of 22 comment letters were received during the public review period on the Draft EA, resulting in a total of 137 comments.

Each commenter has been assigned a code corresponding to the categories described above as well as a number code. Number codes are associated with the comment or comments made by each commenter within each letter/comment submitted. For example, Comment S-1-1 refers to the

first comment in the letter from Caltrans, District 10. Note that in some cases, responses to comments refer the reader to a response to a different comment or to a section of the Final EA.

Table Q-1. Comment Letters Received During Public Comment Period

Sacramento, California 95833

To whom it may concern:

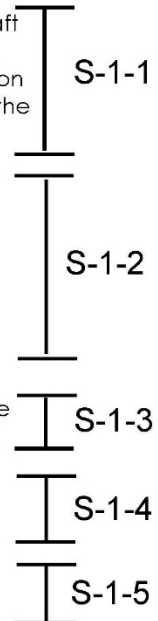

The California Department of Transportation appreciates the opportunity to review the Draft Environmental Assessment for the proposed Stockton Diamond Grade Separation Project. SJRRC proposes to replace an at-grade crossing of the Union Pacific Railroad and Burlington Northern Santa Fe Railway rail lines with a railroad grade separation. The Department has the following comments:

- Caltrans looks forward to working with the SJRRC cooperatively on this project. Caltrans supports the consideration of complete streets, enhanced lighting, and safety equipment to improve visibility and safety.
- Caltrans encourages the continuation of pedestrian and bike access along the corridor and surrounding area if normal pedestrian and bike paths are closed off during construction.
- The SJRRC must coordinate with Caltrans on a Traffic Management Plan during the construction phase of the project for any planned closures around State Route 4.
- An Encroachment Permit will be required for work (if any) done within the Department's right of way or any work requiring special oversized equipment.

If you have any questions or would like to discuss our comments in more detail, please contact Nicholas Fung at (209) 986-1552 or myself at (209) 483-2582.

Sincerely,

TOM DUMAS
Chief, Office of Metropolitan Planning

"Provide a safe and reliable transportation network that serves all people and respects the environment"

S-1-1

Caltrans District 10 has provided comments on the Draft EA and provides a brief summary of the Project description.

This comment has been acknowledged and has been documented as part of the public record. No revisions to the EA were made in response to this comment.

S-1-2

Caltrans states that they look forward to working with SJRRC cooperatively on the Project, and that Caltrans supports the consideration of complete streets, enhanced, lighting, and safety equipment to improve visibility and safety. In addition, Caltrans states that they encourage the continuation of pedestrian and bike access along the corridor and surrounding area if existing paths are closed during construction.

SJRRC appreciates Caltrans' cooperation on this Project and plans to incorporate complete streets elements that have been developed in close coordination with the CPUC Diagnostic Team. These multimodal improvements, identified in Chapter 1, *Project Description*, of the EA, would include curb, gutter, sidewalk and stormwater drainage improvements at affected roadway crossings; updated rail crossing warning devices; accommodations for planned bicycle and pedestrian facilities; and improved lighting (where necessary).

Additionally, as identified in Section 3.7, *Traffic, Transportation, Pedestrian, and Bicycle Facilities*, in the EA, a transportation management plan (Transportation Management Plan) incorporated as part of BMP TRA-7 (Transportation Management Plan) in Section 3.7, *Traffic, Transportation, Pedestrian, and Bicycle Facilities*, will be prepared and provided to Caltrans during final design. The Transportation Management Plan (TMP) will communicate impacts (if any) resulting from the planned temporary road closures, which may affect pedestrian and bicycle access. Additionally, temporary closures during construction, and proposed detour routes for pedestrians and bicycles, will be included as part of the TMP. The final TMP will be prepared/confirmed by the contractor and will highlight any substantial changes from the design team assumptions. Therefore, no revisions to the EA were made in response to this comment.

S-1-3

Caltrans requests that SJJRC coordinates the TMP with Caltrans during the construction phase, for any planned closures around State Route 4 (SR 4).

SJRRC will coordinate directly with Caltrans to address any potential effects associated with the local road closures (both temporary and permanent) around SR 4, that may affect operations along SR 4.

East Lafayette Street, between South Aurora Street and South Union Street, is proposed to be permanently closed under Alternative 2, the Preferred Alternative. As discussed in Section 3.7, *Traffic, Transportation, Pedestrian, and Bicycle Facilities*, long-term traffic and circulation

redistributions as a result of permanent road closures would be further addressed with the incorporation of BMP TRA-8 (CPUC GO 88B Diagnostic Review Process), which requires SJRRC to ensure that all Project road closures will be formalized as part of CPUC GO 88B diagnostic review process. The CPUC GO 88B diagnostic review process will include the evaluation of circulation for all modes of travel in coordination with the City of Stockton (City), CPUC, UP, and Caltrans, as well as evaluating potential permanent effects related to access for pedestrians, bicycles, automobiles, and trucks. With the incorporation of BMP TRA-8 (CPUC GO 88B Diagnostic Review Process), potential impacts (if any) resulting from the planned permanent road closures around SR 4 would be addressed in full.

Additionally, temporary closures during construction, and proposed detour routes, will be included with the incorporation of BMP TRA-7 (Transportation Management Plan). The final TMP will be prepared/confirmed by the contractor and will highlight any substantial changes from the design team assumptions. Therefore, no revisions to the EA were made in response to this comment.

S-1-4

Caltrans states that an encroachment permit will be required for work done within Caltrans ROW.

SJRRC acknowledges that an encroachment permit will be required within Caltrans ROW, or if any special oversized equipment will be required during construction. Currently, construction work will be required adjacent to and under SR 4. The requirement for an encroachment permit to be obtained through Caltrans has been included in Table 1.6-1, *Required Permits, Reviews, and Approvals*, in Chapter 1, *Project Description*, of the EA.

S-1-5

Caltrans states that they are available to address any questions that may arise from their comment letter and provides contact information to do so.

This comment has been acknowledged and has been documented as part of the public record. No revisions to the EA were made in response to this comment.

Q.3 Comments from Regional Agencies

This page is intentionally blank.

Q.3.1 R-1. SAN JOAQUIN REGIONAL TRANSIT DISTRICT

SAN JOAQUIN REGIONAL TRANSIT DISTRICT

P.O. Box 201010 • Stockton, CA 95201 • (209) 943-1111 • (209) 948-8516 Fax • sjRTD.com

April 25, 2022

R-1

Ms. Stacey Mortensen
Executive Director San Joaquin Regional Rail Commission
949 East Channel St.
Stockton, CA 95202

RE: Stockton Diamond Grade Separation Project Draft Environmental Assessment (DEA)

Dear Ms. Mortensen:

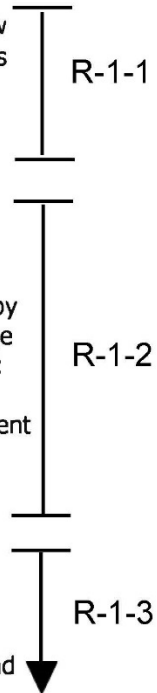

The San Joaquin Regional Transit District (RTD) appreciates the opportunity to review and comment on the Stockton Diamond Grade Separation Project DEA. RTD supports the Diamond Grade Separation Project, and we believe this project will improve the transportation system in the Stockton area and will also provide environmental and economic benefits. RTD offers the following comments:

1. DEA, pages 3.7-9, Transit and 3.7-13, Existing Traffic Delays at Rail Crossings

On page 3.7-9, there is a section pertaining to public transit service and it mentions that traffic and transportation in the resource study area (RSA) is primarily provided by RTD. This section also notes that there are 12 transit routes within the RSA. On page 3.7-13, there is another statement that under the proposed project, short-term traffic delays at rail crossings would occur during construction and that the project plans to incorporate a Construction Transportation Plan (CTP) and a Transportation Management Plan (TMP). It is requested that the preparation of the CTP and TMP include the consultation and collaboration with RTD regarding the protection and minimizing impacts to transit services during construction.

2. DEA, page 3.7-13, Table 3.7-6, Project Best Management Practices

Best Manage Practices number TRA-7 states that "During final design, SJRRC, in coordination with CHSRA, will ensure that a Project TMP will be drafted, approved, and

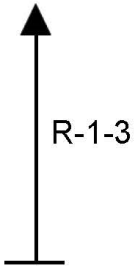

CHIEF EXECUTIVE OFFICER: Alex Clifford
BOARD OF DIRECTORS: CHAIR Michael P. Restuccia • VICE CHAIR Gary S. Giovanetti
Joni Bauer • Balwinder T. Singh • Les J. Fong

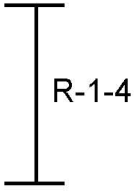

filed with the City of Stockton Engineering and Transportation Department, or other agency with jurisdiction over the road, prior to any road closures. SJRRRC, in coordination with CHSRA, will also collaborate regularly with the San Joaquin Regional Transit Department during final design to coordinate elements of the TMP. The plan would include alternative routing plans and methods and details for early public outreach.” For clarification, it is believed the reference to the San Joaquin Regional Transit Department is meant to say the Regional Transit District. If this is correct, Department should be changed to District. Including RTD in the TMP is appreciated.

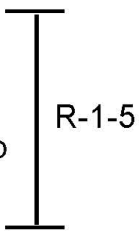

3. DEA, page 3.7-13, Traffic Delays at Rail Crossings

During the project construction, freight and passenger rail trains might move through the construction area with less throughput thereby causing trains to back up down the line on both lines. This could result in downstream/upstream congestion (slow and/or stopped trains) at the at-grade crossings and would potentially delay transit vehicles. This will need to be addressed in the CTP and TMP.

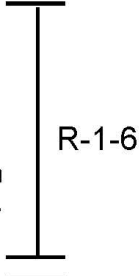

4. DEA, page 3.7-14, Road Closures

There is a statement indicating roads that would require temporary closures during construction. It is requested that RTD obtains advance notification to minimize the impacts to riders and transit services during construction. Informing and involving RTD early in the TMP and CTP process will assist with minimizing impacts to riders and transit service during construction.

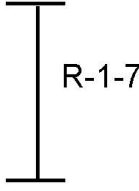

5. DEA, page 3.7-15, Transit

Page 3.7-15 explains that during construction of two new bridges across Charter Way, temporary adverse effects related to traffic circulation and access would occur due to traffic control needs and limited closures under and through the underpass. However, the proposed Project plans to incorporate a TMP which would require coordination with the City and RTD to minimize effects to RTD transit service along Charter Way (MLK Jr. Boulevard). Please know I appreciate the inclusion of RTD in the TMP.

6. RTD’s System Redesign Study

I would also like to share that RTD is going through a System Redesign Study and expects results in spring/summer 2022. This study may change the make-up of our route network. Routes that we mention now may be different in number or routing based on the findings and recommendations of the study.

Thank you for the opportunity to review and comment on the DEIR.

If you have any questions and or need additional information, please contact Ken
Baxter at kbaxter@sjRTD.com.

R-1-8

Sincerely,

Alex Clifford
Chief Executive Officer

R-1-1

The San Joaquin RTD states that they have reviewed the Draft EA and have comments on the Draft EA. RTD also states that they believe the Project will be beneficial to the transportation system within the Stockton area, as well as provide environmental and economic benefits.

This comment has been acknowledged and has been documented as part of the public record. No revisions to the EA were made in response to this comment.

R-1-2

RTD refers to specific pages in the Draft EA referring to the CTP identified as BMP TRA-2, and the TMP identified as BMP TRA-7, and requests that SJRRC consult and collaborate with RTD on these two plans to minimize impacts to RTD transit services during construction.

SJRRC will coordinate with RTD on the development of the CTP and TMP to ensure that any short-term delays during construction that affect RTD facilities will be avoided or minimized. Coordination and collaboration with RTD during final design in development of the CTP and TMP has been added to BMP TRA-2 (Construction Transportation Plan) and BMP TRA-7 (Transportation Management Plan) in Table 3.7-6, in Section 3.7, *Traffic, Transportation, Pedestrian, and Bicycle Facilities*, in the Final EA. Therefore, no revisions to the EA were made in response to this comment.

R-1-3

RTD requests a correction to their organization's name in BMP TRA-7 (Transportation Management Plan).

The correct name for the San Joaquin Regional Transit District has been incorporated in BMP TRA-7 (Transportation Management Plan), as requested.

R-1-4

RTD refers to the discussion of traffic delays at rail crossings in the Draft EA and asks that if, during project construction, freight and passenger rail trains might move through the construction area with less throughput, resulting in downstream and upstream congestion at the at-grade crossings, RTD transit vehicles may be delayed. As such, RTD requests that these impacts be addressed in the CTP and TMP.

The CTP and TMP will address potential downstream and upstream congestion through coordination with RTD, as identified in BMP TRA-2 (Construction Transportation Plan) and BMP TRA-7 (Transportation Management Plan), respectively.

Additionally, with the exception of limited curfews (i.e. train stoppage times) to make new connections to existing track, the majority of new construction is offset from the existing alignment. This will minimize delays to freight and passenger trains during construction. Construction phasing and associated curfews will be coordinated with UP, BNSF, CCTC, SJRRC and Amtrak to minimize

train delays and associated backup. Therefore, no revisions to the EA were made in response to this comment

R-1-5

RTD refers to the discussion of road closures in the Draft EA and requests that RTD obtain advance notification regarding temporary closures, in order to minimize impacts to riders and transit services during construction activities.

The CTP and TMP identified in BMP TRA-2 (Construction Transportation Plan) and BMP TRA-7 (Transportation Management Plan), respectively, will require coordination and collaboration with RTD on services temporarily affected during construction and will minimize impacts to riders and transit service due to construction. Therefore, no revisions to the EA were made in response to this comment.

R-1-6

RTD refers to the discussion of transit in the Draft EA and understands that with the incorporation of BMP TRA-7 (Transportation Management Plan), effects to RTD transit will be minimized along East Charter Way (MLK Jr. Boulevard).

RTD's appreciation of inclusion TMP is acknowledged and has been documented as part of the public record. No revisions to the EA were made in response to this comment.

R-1-7

RTD states that they are going through a System Redesign Study and expects results in Spring/Summer of 2022.

SJRRC appreciates RTD sharing the status of this study and asks that any changes to the make-up of the RTD route network based on this study should be relayed to SJRRC during final design, to ensure that these elements are captured through the final design phase. No revisions to the EA were made in response to this comment.

R-1-8

RTD states that they are available to address any questions that may arise from their comment letter and provides contact information to do so.

This comment has been acknowledged and has been documented as part of the public record. No revisions to the EA were made in response to this comment.

Q.4 Comments from Local Agencies

This page is intentionally blank.

Q.4.1 L-1. CITY OF STOCKTON

L-1

CITY OF STOCKTON

PUBLIC WORKS DEPARTMENT
22 E Weber Avenue □ Stockton, CA 95202 □ (209) 937-8411
www.stocktonca.gov

April 27, 2022	
Stacey Mortensen 949 E. Channel Street Stockton, CA 95202	
Environmental Assessment (EA) NEPA document comments	
This letter provides the City of Stockton's review of the Environmental Assessment for the Stockton Diamond Grade Separation Project. Comments from each department are noted below.	
DEPARTMENT COMMENTS	
Community Development Department	
<u>EA Item Specific Comments</u>	
1. Page 3.1-7 MM LU-1- how can the project indicate it is in compliance with local regulations and policy if the measure is to have the city amend the General Plan to accommodate the project?	L-1-1
2. Page 3.2-11 and 13 – The plan simply states the project will create plan to address homelessness and perform outreach as part of that plan. Address effect on homeless encampments in Mormon Slough. This is shown as a Best Practice instead of a Mitigation Measure.	L-1-2
3. Page 3.3-7 MMRLC-1-2 Have the tenants to be relocated contact as part of this effort to inform them of the measure?	L-1-3
4. Page 3.4-7 Has the city approved the construction easement at Union Park? What if the project cannot and what are the impacts to the park having equipment storage onsite?	L-1-4
5. Page 3.7-1 Section 3.7- not sure if NEPA requires adherence to state law, but VMT is not mentioned at all. Even the EIR mentioned it but said it was exempt for some reason.	L-1-5
6. Page 3.8-21 BMP AES-1 the report says there are no lighting impacts, but also says a lighting plan is needed. What if the lighting plan indicates there are impacts? Also, the section states there are no impact from raising a rail line to about 20-feet above grade in an area that does not have elevated rail lines. How is that not an impact?	L-1-6
7. Page 3.9-15 BMPs- BMPs are not as enforceable as measures. The city has requirements but cannot enforce anything beyond the city's requirement. The BMPs that go beyond city regulation would rely on the app to self-certify for BMPs that go beyond city requirements.	L-1-7
8. Page 3.14-22 MM NV-1- the measure only indicates improvement to interior noise by improving residential homes. What if the homes do not wish to have you improve their homes? What about exterior noise levels beyond ambient in their yards? You are increasing the ambient levels so you cannot just say the new levels will be within ambient.	L-1-8

<p>9. Page 3.16-10- not sure how the project does not result in a significant and/or cumulative impact based on the road closures, noise, and mobility impacts. Elaboration needed.</p>	L-1-9
<p><u>General Concerns</u></p>	
<p>10. Connectivity- I understand the project is meant to ease auto and Rail congestion, but staff is concerned the project may further bi-sec those areas of south Stockton by separating the lines and adding an above-grade crossing. More should be done to show how the communities will travel in, and around, the project area. Both while under construction and at full buildout. This can include a circulation diagram showing ped, bike, auto, and rail circulation at various stages of the project. The project touches on this due to phasing but does not show how they will not be impacted.</p>	L-1-10
<p>11. It would be helpful to have the BMP/MM shown next to the proposed impact. They are shown in the overall table, but only referenced in the applicable section.</p>	L-1-11
<p>12. The alternatives need to be flushed out a bit more. They are very broad and do not provide detail.</p>	L-1-12
<p>13. The plan does not seem to consider the City's GPEIR. While we do not have standards for everything, their EIR and EA claim consistency with the GP without stating consistency with analysis or including BMPs and MMRPs that require General Plan amendments.</p>	L-1-13
<p>14. The description says BMP will help avoid without the need of mitigation but many of the impacts state less than significant only with the inclusion of a BMP. why not include them as measures if they are there to mitigate impacts.</p>	L-1-14
<p>15. What is the legal enforceability of the BMPs? Mitigation must be carried out with agency approval, but will BMP be reviewed similarly or solely by the Lead/enforcing agency? Will this compliance be measured and public as the project progresses?</p>	L-1-15
<p>16. During construction, the project may cause short-term impacts related to air quality, noise, and traffic in surrounding neighborhoods. Please identify mitigation measures to minimize potential impacts and protect sensitive receptors or special populations located within proximity to the project construction sites.</p>	L-1-16
<p><u>Possible Project Improvements</u></p>	
<p>17. On/Off-site improvements for:</p> <ul style="list-style-type: none"> a. ROW- streets with sidewalks and landscaping b. Infrastructure: stormwater, utilities, etc. c. lighting and landscaping (CPTED) d. drainage channel improvements (Mormon slough water bodies) e. intersection and adjacent complete streets improvements 	L-1-17
<p>18. Additional Connectivity</p> <ul style="list-style-type: none"> a. Class 1 bike paths b. Passive green space corridors for areas adjacent to the site. For others maybe IOD or easement for future bikes and trails. c. Enhanced security features for all d. Wayfinding for new trails. e. Consider working with the City of Stockton to partially realign and construct a portion of the proposed Airport Way Separated Bikeway as designated in the Bicycle Master Plan. A realignment could take advantage of the open space created by the Diamond Grade Separation Project and provide north/south connectivity between South Stockton and Downtown, a key priority of Stockton's adopted Bicycle Master Plan. The Airport Way corridor is a high-injury collision area that sees heavy vehicular volumes and high speeds. Realigning a portion of the proposed Airport Way bicycle route to align with the proposed Diamond Grade Separation Project could provide an opportunity for a protected bicycle path that would greatly benefit the surrounding community which has been disproportionately burdened by multiple sources of pollution, safety concerns, and lack of green space. 	L-1-18 L-1-19

<p>f. Consider coordinating with the City of Stockton on future neighborhood plans to incorporate TOD concepts that encourage intensifying and inter-mixing land uses (residential, office, retail, and entertainment) around the ACE station, integrating public amenities (open spaces and landscaping), and improving the quality of walking and bicycling as alternatives to automobile travel. City of Stockton 2040 Envision Stockton General Plan Actions LU-2.2B and CH-2.2B suggest the formation of a TOD overlay zone around the Robert J. Cabral ACE Station.</p>	<p>L-1-20</p>
<p>19. Remediation</p> <p>a. Sites/drainage improvements as part of drainage master plan for project.</p> <p>b. Tree and green beautification program that include greening of remnant urban land and reuse of obsolete or underutilized parcels. City of Stockton 2040 Envision Stockton General Plan Action CH-1.1A suggests planting and maintenance of appropriate shade trees along all City streets to reduce heat exposure, prioritizing areas of the city with significantly less tree canopy and providing a buffer between the travel way and bicycle and pedestrian facilities, and provide other amenities like well-marked crosswalks, bulb-outs, and pedestrian-scale street lighting.</p>	<p>L-1-21</p>
<p>20. EJ-Equity-</p> <p>a. Identify and implement environmental justice policies concerning the development of the project. Issues of environmental justice impact low-income populations, minority individuals and populations, and low-mobility populations, and may include but are not limited to, concerns related to human health and safety, economic development, society and culture, accessibility, and the natural environment. Low-income populations may be faced with restricted mobility and limited access to goods and services. Enhanced mobility would increase accessibility and access to goods and services. Please consult with local non-profits and neighborhood groups to determine best practices.</p>	<p>L-1-22</p>
<p>b. It mentions outreach but does include a summary of outreach with property owners or their response when shown there will be an impact. Considering many measures rely on their acceptance (relocation, noise improvements) this should be discussed further.</p>	<p>L-1-23</p>
<p>Economic Development Department</p>	
<p>1. Final EIR Pg 3.10-6 states "SJRRRC will coordinate with the City and UP to determine appropriate property ownership and establish agreements...to avoid the potential for large open space areas to become voids in the Downtown area fabric." This coordination must also include the right of way for the existing track that will be relocated.</p>	<p>L-1-24</p>
<p>2. SJRRRC must coordinate with the City and UP as part of a comprehensive evaluation for all parcel remnants resulting from this project. Evaluations should involve potential reuse that includes, but is not limited to, art installations, carbon sequestration, or green infrastructure, and should be conducted in a manner to maximize economic, social, and environmental benefits to the surrounding community.</p>	<p>L-1-25</p>
<p>3. The pandemic has impacted businesses throughout the City, resulting in many business closures and relocations. SJRRRC must coordinate closely with the City and other partners on ongoing business displacement efforts to ensure the impacted businesses are relocated within the City.</p>	<p>L-1-26</p>
<p>4. Final EIR Pg. 3.10-6 references BMP LU-1 as the mitigation measure related to business displacement, but the correct measure appears to be MM LU-3. In addition, pg. 3.10-10 appears to also have these measures reversed.</p>	<p>L-1-27</p>

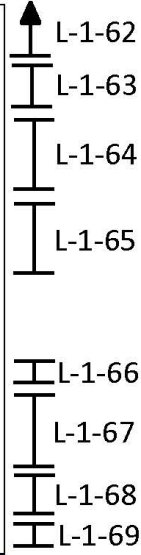

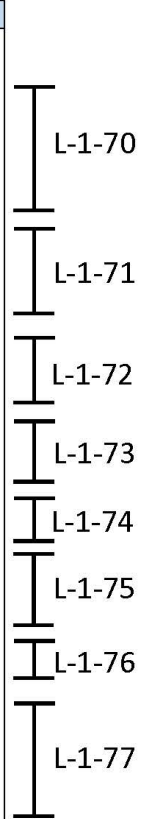

5. Whenever possible, local hire provisions should be incorporated during project construction.	I L-1-28
Public Works Department – Traffic	
1. Appendix F Traffic Report: Table 5-3 Intersection 8 typo on Stanislaus(?)	I L-1-29
2. Appendix F Traffic Report: Table 6-1 Intersection 16: 231 seconds is not LOS C. Impact is LOS A to F.	I L-1-30
3. Appendix F Traffic Report: It was assumed in the traffic report that 70 to 89 percent of traffic on East Lafayette Street will be rerouted to East Hazelton Avenue. 11 to 30 percent will be rerouted to East Market Street or East Main Street. Provide quantitative and qualitative discussion how this affects flow on Hazelton with the at grade crossing. Include discussions of affected school busses and other hazard transport that are required to stop.	I L-1-31
4. Draft EA Pg 2-32: Temporary impacts during construction for hauling in material. This should be identified in the staging plan for construction. Trucks haul routes may be identified needing to go through residential areas.	I L-1-32
5. Draft EA Pg 2-34: Under “Project Access” include truck material/equipment haul routes for import borrow.	I L-1-33
6. Draft EA Pg 2-35: Under “Construction Schedule” There shall be no truck hauling (fill) on City Streets during peak hours.	I L-1-34
7. Draft EA Pg 2-36: Table 2.2-3, does this account for the 90-day settlement period for embankment?	I L-1-35
8. Draft EA Pg 3.2-13: Table 3.2-2: BMP Com-1, reference to “Mormon Slough” should be “Project Study Area”	I L-1-36
9. Draft EA Pg 3.2-14: Under “Short Term Effects” Include a reassessment of the campsites prior to construction to confirm camps have not encroached within PSA.	I L-1-37
10. Draft EA Pg 3.5-10: Under “Transient Populations” Expand the “Mormon Slough” into Project Study Area.	I L-1-38
11. Draft EA Pg 3.6-10: Under “Emergency Services” rerouting of traffic to Hazelton Avenue will still experience the same delays due to an at grade crossing at UPRR. Provide qualitative discussion as to why this would not be an impact.	I L-1-39
12. Draft EA Pg 3.7-12: Table 3.7-6 BMP TRA-2- All haul routes upon City streets subject to Public Works approval.	I L-1-40
13. Draft EA Pg 3.7-14: Under “Road Closures” All transportation plans are subject to City Public Works' approval. This includes but not limited to lane closures (full and partial), lane shifts, parking removal (temporary), detours, vehicle/bike/ped restricted access, hours of operation, pedestrian escort, routing of affected school buses, postal deliveries, garbage pickup, and emergency response access through and onto site.	I L-1-41
14. Draft EA Pg 3.7-16: Under “Truck Traffic” Any night work hours on Stanislaus will be limited due to truck route hour limitation.	I L-1-42
15. Draft EA Pg 3.7-14: Under “Road Closures” Appendix F- Traffic Report seems inconsistent with "assumptions" in the technical analysis. Closure of Lafayette will reroute traffic elsewhere such as Hazelton Ave.	I L-1-43
16. Draft EA Pg 3.7-16: Truck Traffic: East Lafayette Street is designated as a truck route. An exhibit shows this on page F-30 (Traffic Report), figure 4-5. See comment below from page 3.7-19.	I L-1-44
17. Draft EA Pg 3.7-16: Road Closures: The report states that “East Lafayette Street would be closed due to the multiple at-grade rail crossings of the at-grade main tracks and wye connection tracks (that is, four crossings within two blocks).” Having multiple track crossings	I L-1-45

<p>over a short distance a significant concern if East Lafayette is kept open, are any ways to mitigate any concerns regarding these multiple crossings.</p> <p>18. Draft EA Pg 3.7-17: Reference to last paragraph under “Road Closures” This needed to further discussions regarding assumptions contained in the technical appendix and final design. See previous comments on the LOS at Lafayette/Aurora and Lafayette/Airport. Impacts should be identified so it can be mitigated through a Mitigation Monitoring Plan. There are several plans mentioned including Construction, Transportation, Road Closure, and Bike/Pedestrian connectivity plan during construction.</p> <p>19. Draft EA Pg 3.7-18: The report states that there are no adverse impacts on bicycle access through the area. If cyclists need to detour as much as 0.4 miles around the closure of East Lafayette Street, provide qualitative statement as to whether this is an impact.</p> <p>20. Draft EA Pg 3.7-19: The Truck Traffic section for long term effects in the project condition states that truck routes on arterial streets within the City would not be used during the operation of the proposed project. However, there is no discussion in the report regarding the closure of East Lafayette Street (a City-designated truck route) and how that specifically impacts truck traffic.</p>	
<p>Public Works Department – CIP Plans</p> <ol style="list-style-type: none"> 1. Project needs to support the implementation of Quiet Zone from MLK Boulevard to Harding Way. Project proponents shall contribute to fund the construction of needed improvements to implement the Quiet Zone. Also, project proponents need to support the City’s nomination for Section 190 Grade Separation Program for the affected existing at-grade crossings. 2. Reconstruct all affected curbs, gutters, sidewalks, handicap ramps and other facilities. 3. Rehabilitate streets that will be damaged during construction. 4. Install raised median curbs and landscaping where appropriate within the project limits. 5. Reconstruct/upgrade/rehabilitate all affected dry and wet utilities. 6. Provide Traffic Control/Detour plans during construction. 7. Existing traffic signals, streetlights, markings and striping need to be brought up to current standards. 8. Fencing/barrier needs to be incorporated in the project to prevent homeless people from camping at the project site. 9. Construct cul-de-sac at the end of streets that will be closed. 10. Architectural treatment on the bridges must be incorporated. 11. Responsibility for maintaining the improvements must be clearly defined. 12. Install infrastructure (conduit) that can be used by the City to install fiber optic cables for interconnectivity of City traffic signals, cameras, etc... 13. The proposed structure on Mormon Slough should allow sufficient width for the construction of a future bicycle and pedestrian Class I path 14. The City has prior rights within the project corridor as the City was established before any existing railroad which appeared sometime around the mid 1860’s. The project proponent should provide railroad property rights within the corridor and relative to any new acquisitions needed from the City. 15. On Hazelton Avenue, full grade separation of roadway from all tracks is required. This is required for traffic circulation and emergency response. All crossings within the existing corridor from Weber Avenue to Dr. MLK Blvd are blocked by trains simultaneously. The overall project will reduce the number of available crossings in this segment. 16. On MLK Blvd, the project design and construction should be completed such that any future work on MLK Blvd. will not require any coordination with the railroad. To that end, the track that is proposed to remain on the existing westerly structure should be removed and placed 	

<p>on one of the new structures being constructed. All existing grade separation structures including bridges, retaining walls, pump stations, etc... should be demolished.</p> <ol style="list-style-type: none"> On MLK Blvd, sidewalks should be reconstructed to meet current ADA requirements for width and grade. Items 12, 14, 15, 16 at minimum should be done in accordance with General Plan Action item LU-6.3C: "Coordinate, to the extent possible, upgrades and repairs to roadways with utility needs, infrastructure upgrades, and bicycle and pedestrian improvements. In accordance with General Plan policy LU-3.3 Maintain or expand the amount of public park and open space area available in each neighborhood, SJRRC should create and maintain a green belt adjacent to project with open space, landscaping, and bike/ped trails. <p>Right-of-Way</p> <ol style="list-style-type: none"> Show existing and proposed rights of way including temporary construction easements. Provide a spreadsheet along with a map for right of way easement acquisitions showing property owner, address, APN, area of take either full or partial, and what is going to happen to any remnant parcels. Any Record of Survey/Corner Record needs to be recorded at San Joaquin County Recorder's office. Survey monuments need to be restored as necessary. 	
<p>Fire Department</p> <ol style="list-style-type: none"> The underpass at MLK BLVD is very narrow and we've had several documented minor vehicle accidents in that underpass. The accidents involved clipping mirrors with tractor-trailer vehicles moving in the same direction. MLK should be at regular grade without any tracks crossing it either at grade or overhead. MLK should have the existing subways removed and MLK widened making it easier for traffic to go through. Hazleton Ave at the crossing has slowed or delayed our emergency response to the east side by crews coming from Station 2 at 110. West Sonora Street. This project should remove all at-grade tracks to allow emergency response vehicles free flowing east west access without train interference. The closure of Lafayette Street will delay responses to the east side of the track from 110 W. Sonora Street. We can overcome this by using the East bound Crosstown Freeway and the use of Hazleton Avenue, assuming there will not be an at-grade crossing on Hazleton. We would like to see access to the RR right of way from Church and/or Lafayette from both the east and west sides. This allows us access to the numerous incidents that occur along the tracks. Streets that will be acknowledged with dead-end cul-de-sacs shall meet City standards for cul-de-sac and turnaround radius design for fire apparatus If any dead-end streets or roads that are being modified for this project require fire access gates, then it would be preferred the gates be automated and functional with the use of our radio frequency (Click to enter feature) Additional fire hydrants may be required for this project pending street closures and new infrastructure obstructions that may affect existing fire hydrant locations Locations along the grade separation areas of the proposed rail project will need to be evaluated for ladder truck positioning. Areas of concern will require fire access roads installed parallel with the rail. Access roads installed for ladder positioning shall be now less than 16 feet in width (if ladder truck use only) or 26 feet in width if we need the road to accommodate both a ladder truck and a fire engine 	

<p>9. The project will require placement of access staircases in strategic areas along the grade separation.</p>	<p>I L-1-78</p>
<p>10. Fueling of equipment during construction – Please note that the Fire Department will require a permit for any above ground storage tank storing fuel more than 60 gallons.</p>	<p>I L-1-79</p>
<p>Municipal Utilities</p>	
<p>1. One Page 3.6-3, The description of the Water utilities includes a list of pipes on different streets and lists whether they will be replaced or protected in place. The same should be done for the Wastewater and Stormwater sections.</p>	<p>I L-1-80</p>
<p>2. On Page 3.6-3, in the WATER section, there is a reference in the second paragraph that states “Utilities requiring relocation will remain in the City easement area”. This should be changed to Cal Water easement as this paragraph is discussing Cal Water facilities.</p>	<p>I L-1-81</p>
<p>3. Just below table 3.10-4: Treatment BMPs, there is a reference to the preparation of a “Drainage Report.” Please modify this to “Stormwater Quality Control Plan.” BMP HYD-5 should also be updated.</p>	<p>I L-1-82</p>
<p>Police Department</p>	
<p>1. The proposed closing of Lafayette St at-grade is a major concern for police emergency response time. When there is a train, emergency services would not be able to travel east to west on Lafayette, Hazelton, or Church. This will add critical response time to emergency situations.</p>	<p>I L-1-83</p>
<p>2. The closure of Lafayette and Church will add to heavier traffic congestion on the Crosstown Fwy and Hazelton Av, causing more frequent traffic related incidents. East and west traffic flows must be a high priority for this project.</p>	<p>I L-1-84</p>
<p>3. We would like to see Hazelton Av be free flowing for traffic as it is a heavily traveled roadway in this part of the city. When there is a train, traffic will be backed up impacting the traffic flow of several cross streets.</p>	<p>I L-1-85</p>
<p>4. With any street closures, there is a high concern of homeless encampments forming at the dead end of streets. This will cause a high increase of police response type of calls and a rise of citizen complaints.</p>	<p>I L-1-86</p>
<p>5. MLK east and west traffic flow and safety must be a high priority for this project.</p>	<p>I L-1-87</p>

This page is intentionally blank.

L-1-1

The City asks how the Project is in compliance with local regulations and policies if there is a measure to amend the City's General Plan.

As stated in Section 3.1, *Land Use and Planning*, the Project would permanently convert several industrial parcels (all are zoned General Industrial) to a transportation use, equating to 10.87 acres which equates to 0.37 percent, less than 1 percent of the City's industrial zoned land use. However, these are considered minor changes to existing land use designations in the City of Stockton. Further, the EA states that the Project is compliance with local regulations and policies after the implementation of MM LU-1 (General Plan Amendment) and not before. Therefore, no revisions to the EA were made in response to this comment.

L-1-2

The City states requests the Outreach and Engagement Plan to address homelessness in the Mormon Slough and effects on homeless encampments in the Slough be addressed and should be shown as a mitigation measure.

As discussed in Section 3.2, *Community Effects and Growth*, in the EA, even though transient populations are not currently located within the UP ROW of the Mormon Slough where construction activities would occur, they occupy areas outside the UP ROW adjacent to the Mormon Slough. In the event these transient populations trespass and occupy areas within the UP ROW, they would be temporarily relocated with the incorporation of BMP COM-1 (Outreach and Engagement Plan). Implementation of the Outreach and Engagement Plan will also assist in long-term relocation efforts for any transients that trespass in UP ROW. It is shown as a Best Practice Measure, which means it is incorporated as part of the Project. Additionally, it is enforced in Table R-1 in Appendix R, *Environmental Commitment Record*. Therefore, no revisions to the EA were made in response to this comment.

L-1-3

The City asks if tenants that will be relocated have been contacted and informed that their relocation would be subject to MM RLC-1 (Relocation Assistance) and MM RLC-2 (Property Ownership and Agreement Efforts).

Notices and mailers were made available for the Project during the 45-day public review of the Draft EIR and the 30-day public review of the Draft EA for the Project. Tenants did receive notification that their properties would be relocated as part of the Project.

The mitigation measures (MM RLC-1 and MM RLC-2), identified in the EA, and previously included in the EIR, were both made available for review by the public; and thus, would have also been made available to these tenants. Additional follow-up with owners and tenants of these businesses will occur during final design, when the ROW acquisition process for the Project will begin. Therefore, no revisions to the EA were made in response to this comment.

L-1-4

The City asks if the construction easement at Union Park has been approved and what SJRRC will do if the construction easement cannot be obtained at the park, in addition to what impacts may occur with the storage of equipment on-site at the park.

An encroachment permit will be obtained through the City during final design. The Project would only require the temporary storage of equipment on-site at Union Park, and this area (approximately 0.03-acre, or 1,316 square feet) would be restored to its existing condition, if not better, after the completion of construction. SJRRC has been involved in discussions with the City regarding this temporary easement and encroachment permit and will continue discussion with the City regarding this issue, during final design. In the event this temporary easement cannot be obtained and an encroachment permit will not be granted by the City, no equipment will be stored at this site during construction activities.

In regard to Union Park as a Section 4(f) resource, the TCE required at Union Park would be considered a temporary occupancy exception of use of the park property, consistent with 23 CFR 774.13(d). On April 9, 2021, SJRRC and CHSRA sent the City of Stockton, the OWJ over the property, a letter requesting concurrence with the preliminary determination that the TCE at Union Park would be considered a temporary occupancy exception of use of the park property and not result in a Section 4(f) use of Union Park. The concurrence letter from the City of Stockton was received on September 9, 2021. The City of Stockton's written concurrence has been used by CHSRA in its preliminary determination of temporary occupancy exception of Section 4(f) use for Union Park. For a detailed discussion of all potential Section 4(f) and 6(f) resources, refer to the *Final Section 4(f) and Section 6(f) Evaluation* in Appendix D of this Final EA. Therefore, no revisions to the EA were made in response to this comment.

L-1-5

The City references Section 3.7, *Traffic and Transportation/Pedestrian and Bicycle Facilities*, in the Draft EA and asks if NEPA requires adherence to state law. Additionally, the City states that VMT is not mentioned in the EA, even though the Project EIR included a discussion of VMT, but the Project was screened out.

VMT is a metric used to evaluate impacts under Senate Bill 743 codified in PRC Section 21099 for CEQA, and subsequently included in Section 15064.3 of the CEQA Guidelines in 2018. Under the NEPA, the traffic studies were conducted consistent with Caltrans' Guide for the Preparation of Traffic Impact Studies (Caltrans 2022), using the methods outline in the Highway Capacity Manual (Transportation Research Board 2010). In these guidance manuals, LOS is used as the appropriate metric to evaluate traffic effects within the Project Study Area for a NEPA document. Therefore, no revisions to the EA were made in response to this comment.

L-1-6

The City states that Section 3.8, *Visual Quality and Aesthetics*, in the Draft EA indicates that there are no lighting impacts, but BMP AES-1 (Lighting Plan) is incorporated, and what would happen if the lighting plan would indicate that there were impacts.

Several references in Section 3.8, *Visual Quality and Aesthetics*, in the Draft EA indicate that there would be effects associated with the additional lighting that would be necessary during construction, as well as during operation for the new flyover structure. In order to address these lighting effects associated with the new flyover structure, the Project will incorporate BMP AES-1 (Lighting Plan), in Section 3.8, *Visual Quality and Aesthetics*, of the EA, which will address light pollution and glare as well as guide the temporary and permanent lighting fixture selection to comply with the City's Municipal Code and general plan. With the incorporation of BMP AES-1 (Lighting Plan), temporary and permanent lighting fixtures specifically selected for the Project will help minimize glare on adjacent properties and into the night sky. In addition, BMP AES-1 (Lighting Plan) will ensure that the light beam is controlled and not directed across a property line or upward into the sky and any lighting will be shielded with non-glare hoods or reflectors and focused within the Project ROW. Therefore, with the incorporation of BMP AES-1 (Lighting Plan) potential temporary or permanent effects on lighting will be minimized, and no direct or indirect adverse effects on visual quality and aesthetics are anticipated under the Project.

Further, the City asks how there would be no visual impacts from raising a rail line to approximately 20-feet above grade in an area that does not have elevated rail lines.

As stated under the *Long-term Effects* discussion under Section 3.8, *Visual Quality and Aesthetics*, the construction of the flyover structure would enhance the design coherence of the Project corridor by eliminating, or screening from view, industrial land uses, such as salvage yards, that are usually considered by residential neighbors to be undesirable. Thus, the Project would have a long-term beneficial effect. Therefore, no revisions to the EA were made in response to this comment.

L-1-7

The City states that BMPs are not as enforceable as measures and that the BMPs that go beyond City regulation would rely on the applicant to self-certify these BMPs are incorporated.

A BMP in the EA is defined as a Best Management Practice that would be incorporated as part of the Project. Additionally, it is enforced in Table R-1 in Appendix R, *Environmental Commitment Record*. Therefore, no revisions to the EA were made in response to this comment.

L-1-8

The City states that MM NV-1, identified in Section 3.14, *Noise and Ground-borne Vibration*, of the Draft EA only indicates interior noise abatement at residential homes, and asks what if a resident refuses these improvements in their home. The City further asks about exterior noise levels beyond ambient levels in yards of residential homes, and states that by increasing ambient noise levels SJRRC cannot state that new noise levels will be within ambient range.

In response to the City's comment regarding interior noise abatement at the 12 residential homes, due to engineering and operational limitations of the Project, including the multiple levels of the proposed tracks, track turnouts and clearance issues, path mitigation measures such as noise barriers would not be a feasible option for noise mitigation. Therefore, only interior noise abatement measures were proposed to address the significant noise impacts at 12 residential locations in the Project Study Area. In the unlikely event that homeowners do not wish to receive the interior noise abatement improvements to their residences at no cost to them, SJRRC will respect their decision and ask that their request to forego noise abatement be documented in writing.

In response to the City's comment on the increase of exterior ambient noise levels, Section 3.14, *Noise and Ground-borne Vibration*, in the EA, indicates that a noise impact is exceedance of a regulatory threshold. It is possible for project-related noise to increase but not have an impact; in other words, there can be allowable increases in noise. FTA guidance does allow transit projects to increase outdoor noise levels, and it is possible for that increase to not reach levels at which moderate or severe noise impacts occur. Noise analyses performed in accordance with FTA guidance generally follow this process: determine existing non-transit outdoor noise levels; determine the thresholds for moderate and severe noise impacts that correspond to the existing outdoor non-transit noise level; calculate future project-related (transit) noise and compare that to the thresholds for moderate and severe noise impacts; determine if either type of noise impact is projected to occur. On that basis, it is possible for transit projects to cause or contribute to an overall increase in outdoor noise levels that still remains below moderate and severe noise impact thresholds. Just because a project may increase overall ambient noise levels doesn't automatically make it a noise impact.

In response to the City's comment on why yards of residential homes were not analyzed for noise impacts, the overall goal of the noise analysis methodology is to try to manage transit noise so it does not interfere with sleep (presumed to occur indoors). If moderate or severe noise impacts are projected to occur at parcels where overnight sleep occurs, the first step is usually to reduce outdoor noise levels and this incorporates the inherent assumption that when outdoor noise levels are reduced at a noise-sensitive receiver, indoor noise levels will also be reduced. If it is not possible to reduce outdoor noise levels at the noise-sensitive receiver, FTA guidance instructs analysts to consider receiver-based treatments that will reduce indoor noise levels so the project-related noise does not interfere with sleep indoors.

As discussed at the beginning of this response, engineering and operational limitations of the Project, including the multiple levels of the proposed tracks, track turnouts and clearance issues, path mitigation make measures such as noise barriers an infeasible option for noise mitigation. Therefore, only noise within residential homes were evaluated for the noise and ground-borne vibration analysis, and not exterior noise levels in yards.

Therefore, no revisions to the EA were made in response to this comment.

L-1-9

The City has requested further elaboration as to why the project would not result in adverse or cumulatively adverse effects to mobility, noise, and road closures as a result of the Project.

In response to the City's comment regarding road closure and mobility impacts, under the No Project Condition, East Hazelton Avenue would remain an at-grade crossing, with three at-grade tracks. Mainline and connecting freight and passenger train traffic is estimated to almost double in the Project's analysis timeframe. With the Project, at East Hazelton Avenue, the two main rail lines would be grade separated, leaving only a single at-grade track crossing. Estimated future train volumes at this single East Hazelton Avenue at-grade connection track are projected to be substantially lower than existing daily peak hour train volumes crossing East Hazelton Avenue today, thereby reducing wait times for school buses, hazardous transport trucks, and emergency vehicles along this route.

Further, as stated in Section 3.7, *Traffic, Transportation, Pedestrian, and Bicycle Facilities*, in the EA, Figures 6-1 through 6-4 in Appendix F, *Traffic Study*, show the AM and PM peak hour traffic redistribution due to permanent closure of East Lafayette Street. Figure 6-5 in Appendix F, *Traffic Study*, shows the AM and PM peak hour traffic redistribution based on the closure of East Church Street. As shown on Figures 6-1 through 6-5, current traffic volumes on East Lafayette Street and East Church Street are considered low, and the vehicles that would normally use these streets would be diverted to other nearby streets after Project completion.

The Project Future Year (2045) traffic volumes were analyzed based on the redistribution of the No Action Future Year (2045) traffic volumes for East Lafayette Street and East Church Street to adjacent roadways. Based on that analysis, all intersections affected by the Future Year (2045) traffic redistribution of East Lafayette Street and East Church Street would operate at an acceptable LOS after traffic is redistributed.

Additionally, long-term traffic and circulation redistributions as a result of permanent road closures would be further addressed with the incorporation of BMP TRA-8 (Road Closure Formalization Process), identified in Table 3.7 6, which requires SJRRC and the City to formalize all road closures as part of CPUC GO 88B diagnostic review process during final design. The CPUC GO 88B diagnostic review process will include the evaluation of circulation for all modes of travel in coordination with the City, CPUC, and UP, including pedestrians, bicycles, automobiles, and trucks. With the incorporation of BMP TRA-8 (GO 88B Diagnostic Review Process), no direct or indirect, long-term, adverse effects related to permanent road closures would occur within the traffic and transportation RSA under the Project because these effects would be addressed as part of this review process that occur during final design. With the incorporation of BMP TRA-8 (GO 88B Diagnostic Review Process), no long-term adverse effects to road closures and mobility in the Project Study Area would occur.

In response to the City's comment regarding noise impacts, Section 3.14, *Noise and Ground-borne Vibration*, of the EA identified twelve single-family homes located between East Jefferson Street and East Clay Street, and between the railroad corridor and South Pilgrim Street, that would experience

severe noise impacts and require noise mitigation. With the implementation of Measure MM NV-1 (Reductions for Noise Impacts), requiring that sound insulation improvements be installed at the 12 residential homes that would be exposed to severe noise impacts, the interior noise levels at these residences would be mitigated. Therefore, with the implementation of Measure MM NV-1 (Reductions for Severe Noise Impacts), no direct or indirect adverse long-term impacts on sensitive noise receptors from operational noise would occur, as these severe noise impacts would be fully mitigated under the proposed Project.

In response to the City's comment regarding the cumulative effects related to road closures, mobility, and noise, as discussed in Section 3.16, *Cumulative Effects*, of the EA, Cumulative Projects that were considered in the cumulative effects study were projects that were current and reasonably foreseeable planned or programmed future projects. Based on the cumulative analysis in the EA, no other current and reasonably foreseeable planned or programmed future projects identified within the Cumulative Effects RSA would also require road closures or affect mobility in the cumulative study area. Further, there would be no overlap in noise receptors or impacts within the Project Study Area. Although, the implementation of similar types of required minimization and mitigation measures for CEQA and NEPA compliance may still yield minimal cumulative contributions of noise effects in the cumulative study area when considering the contributions of the four cumulative projects, these minimal cumulative effects from these other projects would not result in adverse cumulative noise effects in combination with the Project. As such, the Project would not result in cumulatively adverse effects related to road closures, mobility, or noise.

Therefore, no revisions to the EA were made in response to this comment.

L-1-10

The City states that they understand the Project is meant to ease auto and rail congestion in the Project Study Area; however, City staff are concerned that the Project may further bisect areas south of Stockton by constructing this grade separation. Therefore, the City states that more explanation should be included in the EA on how communities will travel in and around the Project Study Area during construction and operation of the Project, specifically related to pedestrian, bicycles, automobiles, and rail access.

As discussed in 3.7, *Traffic, Transportation, Pedestrian, and Bicycle Facilities*, during construction, existing pedestrian access may be affected within the Project Study Area. However, the Project will incorporate BMP TRA-4 (Maintenance of Pedestrian Access), which requires that SJRRC prepare a CTP that will address maintenance of pedestrian access during the construction period. With the incorporation of BMP TRA-4 (Maintenance of Pedestrian Access), no direct or indirect short-term adverse effects on existing pedestrian routes would occur during construction of the Project. Further, as discussed in the same section in the EA, although bicyclists may use the existing roadways for access, there are no existing dedicated bicycle facilities in the Project Study Area. Since existing, non-dedicated bicycle access within the traffic and transportation RSA may be affected during construction, the proposed Project will incorporate BMP TRA-5 (Maintenance of Bicycle Access), which requires SJRRC to prepare a specific CTP that will address maintenance of bicycle access

during the construction period. With the incorporation of BMP TRA-5 (Maintenance of Bicycle Access), no direct or indirect short-term adverse effects on existing bicycle access would occur during the construction of the proposed Project. With the incorporation of these two BMPs, potential impacts to access and circulation for bicycles and pedestrians in the surrounding communities during construction of the Project would be minimized.

Additionally, as discussed in Section 3.7, *Traffic, Transportation, Pedestrian, and Bicycle Facilities*, in the EA, the Project proposes to grade separate the UP Fresno Subdivision tracks above East Scotts Avenue and East Hazelton Avenue. The average auto delay for the No Action Future Year (2045) condition compared to the Project Future Year (2045) condition shows a substantial improvement in terms of reduced delay at East Hazelton Avenue/UP crossing and East Scotts Avenue/UP crossing. Table 6-5 and Table 6-6 in Appendix F, *Traffic Study*, of the EA reference the AM and PM peak hour delay per auto at East Hazelton Avenue/UP crossing and East Scotts Avenue for the Project Future Year (2045) condition, No Action Future Year (2045), and Existing Year (2019) conditions. Therefore, during operation of the Project, no direct or indirect long-term adverse effects on existing bicycle and pedestrian access would occur. During final design, a Crossing Consolidation study will be prepared, which will address further details regarding multimodal circulation at various stages of the Project. At this time, no phasing is proposed for the Project; and thus, no evaluation of phasing has been evaluated. Therefore, no revisions to the EA were made in response to this comment.

L-1-11

The City states that it would be helpful to have the BMP or MM shown next to the proposed impact and not just referenced in the applicable section.

Each BMP and MM measure has a brief summary after its first reference under Environmental Consequences section of each environmental resource section. To meet requirements under NEPA and in interest of brevity, it was determined that a BMP table in each section would assist in keeping the effects discussion of each environmental resource topic, succinct and effective. Therefore, no revisions to the EA were made in response to this comment.

L-1-12

The City states that the alternatives need to be flushed out more and that they are very broad and do not provide detail.

As discussed in Chapter 2, *Alternatives*, SJJRC worked closely with stakeholders, including the City, to evaluate a broader range of alternatives during the prior Project stage. As a result of the alternatives development process, multiple alternatives were eliminated, in coordination with the City, from further consideration prior to the Project team carrying Alternative 2 (Project) forward for evaluation in EA.

The alternatives development process identified four design concepts that were evaluated to meet five key criteria as part of the alternatives screening process. These design options included

Concept 1 (UP flyover with BNSF at grade), Concept 2 (BNSF flyover with UP at grade), Concept 3 (UP flyover with BNSF in trench), and Concept 4 (BNSF flyover with UP in trench), and were evaluated by the five criteria, below:

- Ability to meet the Project's purpose and need
- Acceptance by the host railroads, UP and BNSF
- Minimization of local road crossing impacts
- Avoidance and minimization of environmental impacts associated with the concept
- Minimization of property acquisitions and displacements of residences and businesses

SJRRC is the Project proponent, however SJRRC does not own the affected ROW and serves as a tenant on the host railroad's tracks. The host railroads own the railroad ROW and tracks/railroad infrastructure, and any improvements would need to meet their design standards and undergo their review processes; therefore, through substantial coordination and an iterative review process, freight railroad concurrence with the potential design concepts was a critical screening criterion.

The host railroads clarified early in the concept development process that a trench section (Concepts 3 and 4) was not acceptable and would not be approved because of technical feasibility concerns associated with high groundwater, additional maintenance, and other technical engineering challenges associated with a trench. Groundwater elevations in the Project Study Area are estimated at 20 to 25 feet below ground surface, which is the approximate depth required to depress one railroad below another in order to achieve the required vertical clearances. As a result, Concepts 3 and 4 were rejected from further consideration by UP and BNSF; and only Concept 1 (UP flyover with BNSF at grade) and Concept 2 (BNSF flyover with UP at grade) were carried forward for further evaluation.

Concept 1 and four variations of Concept 2 were refined to try to best meet the Project's purpose and need, obtain acceptance by the railroads, minimize local road crossing impacts, and further avoid or reduce the potential impacts identified in the environmental constraints analysis. Ultimately a Concept 1 variation, identified as Alternative 1A, which is identified as Alternative 2 in this Final EA, was selected by SJRRC and the Authority as the Project. Alternative 2, meets the purpose and need of the Project, and complete detailed discussion of the elements of this alternative is provided in Chapter 1, *Project Description*, of the EA. Therefore, no revisions to the EA were made in response to this comment.

L-1-13

The City states that the Project does not seem to consider the elements of the City's General Plan EIR.

The Project EIR and Draft EA included all applicable goals and policies from the City's General Plan and the City's General Plan EIR. Only one Mitigation Measure requires an amendment of the City's General Plan, which is related to the conversion of land use from full property acquisitions. Please

refer to the response to Comment L-1-1, above. Therefore, no revisions to the EA were made in response to this comment.

L-1-14

The City states that the description of a BMP indicates that impacts will be avoided without the need of mitigation, but many of the impacts state less than significant with the inclusion of the BMP. The City suggested to include the BMPs as measures if they are intended to mitigate impacts.

BMPs are incorporated as part of the Project to potentially avoid and/or minimize potential effects, so that no adverse effects would occur, and mitigation measures to mitigate potentially adverse effects of the proposed Action in accordance with NEPA regulations (40 CFR Section 1508.20). Therefore, no revisions to the EA were made in response to this comment.

L-1-15

The City asks about the legal enforceability of the BMPs identified in the EA. BMPs are project features that are incorporated into the Project. To implement the Project, these BMPs must be incorporated. Additionally, all BMPs are included in Table R-1 in Appendix R, *Environmental Commitment Record*. Therefore, no revisions to the EA were made in response to this comment.

L-1-16

The City states that during construction, the Project may cause short-term impacts related to air quality, noise, and traffic in surrounding neighborhoods, and to identify the appropriate mitigation measures to minimize these potential impacts so that sensitive receptors are protected or special populations located within the proximity to the Project construction areas are protected.

No mitigation measures, or MMs, are applicable to Project short-term effects on air quality, noise, or traffic. Rather, the Project incorporated BMPs to avoid or minimize potential effects so that no short-term adverse effects from these three resources would result during construction activities.

Specifically, in response to the City's comment regarding short-term effects on air quality that would affect EJ populations, under the *Short-term Effects* discussion in Section 3.5, *Environmental Justice*, although the Project would result in adverse air quality effects during construction, with the incorporation of BMP AQ-1 (Compliance with EPA Tier 4 Exhaust Emission Standards), BMP AQ-2 (Fugitive Dust Control Plan), and BMP AQ-3 (Compliance with Stockton Community Emissions Reduction Program), identified in Table 3.13 2 in Section 3.13, *Air Quality*, these short-term effects would be minimized; and therefore, the Project would not result in direct or indirect short-term adverse effects on the community, which is predominately comprised of EJ populations. The Project's location is fixed, and although the Project's minimal short-term burdens related to the air quality during construction activities would be experienced by the local minority communities and low-income communities within the EJ RSA, it would not outweigh the overall long-term benefits such as local congestion, improved air quality, and improved safety, to the community as a result of the Project. As a result, no disproportionately high and adverse effects on EJ populations would occur in the Project Study Area as it relates to short-term air quality.

Specifically, in response to the City's comment regarding short-term effects from noise and ground-borne vibration that would affect EJ populations, under Section 3.14, *Noise and Ground-borne Vibration*, in the Draft EA, the potential for noise effects would be greatest during structures work at locations where pile driving is required for bridge construction. However, with the incorporation of BMP NV-1 (Noise Control Plan) and BMP NV-2 (Vibration Control Plan) temporary construction-related noise and ground-borne vibration on nearby noise and ground-borne vibration sensitive land uses would be minimized. Thus, the Project would not result in direct or indirect short-term adverse effects on sensitive receptors or the community, which is predominately comprised of EJ populations. The Project's location is fixed, and although the Project's minimal short-term burdens related to the noise and ground-borne vibration during construction activities would be experienced by the local minority communities and low-income communities within the EJ RSA, it would not outweigh the overall long-term benefits such as local congestion, improved air quality, and improved safety, to the community as a result of the Project. As such, no disproportionately high and adverse effects on EJ populations would occur in the Project Study Area as it relates to short-term noise and ground-borne vibration.

In response to the City's comment regarding short-term adverse effects on mobility and access, as discussed in Section 3.7, *Traffic and Transportation/Pedestrian and Bicycle Facilities*, in the Draft EA, short-term effects on vehicular, pedestrian, and bicycle mobility and circulation would affect the community, which is primarily comprised of EJ populations. Although there would be short-term effects related to pedestrian, bicycle, and vehicle access during construction activities, these short-term effects would be minimized with the incorporation of BMP TRA-4 (Maintenance of Pedestrian Access), BMP TRA-5 (Maintenance of Bicycle Access), and BMP TRA-7 (Transportation Management Plan).

Further, the Project's location is fixed as it would separate the existing at-grade crossing of the UP and BNSF tracks to address the needs and current deficiencies of the existing at-grade Stockton Diamond crossing. Therefore, the location of the Project cannot be located in another other location to address this specific deficiency on the existing rail facility. Additionally, although the Project's minimal short-term burdens on mobility and access would be experienced by the local minority communities and low-income communities within the EJ RSA, it would not outweigh the overall long-term benefits to the community such as local congestion, improved air quality, and improved safety, as a result of the Project. Therefore, no direct short-term effects on residents would occur within the community effects and growth study area, which is primarily comprised of EJ populations and no disproportionately high and adverse effects on EJ populations would occur in the RSA as it relates to traffic and transportation. Thus, no revisions to the EA were made in response to this comment.

L-1-17

The City suggests a list of on and off-site improvements. This comment is general in nature, and specific locations are not provided in the comment. However, existing improvements identified in the suggested list provided by the City in their comment have already been considered with coordination

from the City, and included in the Project. For exact locations of these improvements, please refer to Chapter 1, *Project Description*, in the Final EA.

Further, Project related improvements to streets and sidewalks and intersection and adjacent complete streets improvements are identified in Section 3.7, *Traffic and Transportation/Pedestrian and Bicycle Facilities*, in the EA. Improvements from lighting and landscaping are identified in Section 3.8, *Visual Quality and Aesthetics*, in the EA. Potential improvements to stormwater and drainage channel improvements in the Mormon Slough, are identified in Section 3.10, *Hydrology, Floodplain, and Water Quality*, in the EA, and any planned utilities improvements are identified in Section 3.6, *Utilities and Emergency Services*, in the EA. Therefore, no revisions to the EA were made in response to this comment.

SJRRC will continue to coordinate with the City's Department of Public Works, as regular representatives at PDT Meetings during the final design phase.

L-1-18

The City provides a list of suggested additional connectivity improvements. This comment is general in nature, and specific locations are not provided in the comment.

Additional connectivity included as part of the Project has been identified in Chapter 1, *Project Description*, and Section 3.7, *Traffic and Transportation/Pedestrian and Bicycle Facilities*, of the EA. None of the Project activities would preclude City-led improvements for future Class 1 bicycle paths, passive green space corridors, enhanced security features for the community, and wayfinding for new trails. Therefore, no revisions to the EA were made in response to this comment.

L-1-19

The City asks for the partial realignment and construction of a portion of the proposed South Airport Way Separated Bikeway, as designated in the Bicycle Master Plan.

The South Airport Way separated bikeway, as currently shown in the City's Bicycle Master Plan (adopted December 2017), proposes a future separated bikeway between East Hazelton Avenue and Eight Mile Road (a distance of approximately 8.5 miles). South Airport Way is outside of the Stockton Diamond Project Study Area and to date, the Stockton Diamond Project team has not received detailed plans or engineering drawings for the proposed bikeway project. Realigning a short section of the 8.5-mile bikeway, to include it within the Stockton Diamond Project footprint, would require out of direction travel for bicyclists, would be counter to the objective of creating an efficient non-motorized route, and would also be counter to other City comments received regarding impacts to existing and proposed bicycle facilities. Therefore, no revisions to the EA were made in response to this comment.

SJRRC will continue discussion of the City's requests in subsequent PDT meetings and throughout the Project's final design phase.

L-1-20

The City suggests that SJRRC coordinate with them on future neighborhood plans to incorporate transportation-oriented development (TOD) concepts that encourage intensifying and intermixing land uses around the ACE station and integrating public amenities, such as open spaces and landscaping, and improving the quality of walking and bicycling as alternatives to automobile travel. The City refers to Actions LU-2.2B and CH-2.2B in the City's General Plan, which suggest the formation of a TOD overlay zone around the ACE Station.

The Project is limited to a grade separation of an existing rail facility and therefore, incorporation of TOD is outside of the scope of the Project. The City's suggested TOD concepts that encourage the intensifying and intermixing of land uses would not be precluded by the implementation of the Project. Further, SJRRC supports TOD in the Cabral Station area and in downtown Stockton as separate projects in the area and will continue to partner with the City to support the City's desire to incorporate more TOD in their area. Therefore, no revisions to the EA were made in response to this comment.

L-1-21

The City suggests drainage improvements as part of the drainage master plan and tree and green beautification programs that include greening of remnant urban land use and reuse of obsolete or underutilized parcels. The City also refers to Action CH-1.1A in the City's General Plan, which suggests planting and maintenance of appropriate shade trees along City streets to reduce heat exposure and provide for other amenities like well-marked crosswalks, bulb-outs, and pedestrian-scale street lighting.

Drainage facilities and related considerations will be developed in coordination with the City and the railroads during final design of the Project. City of Stockton's General Plan Action CH-1.1A has been added to Section 3.2, *Community Effects and Growth*, of the Final EA. The Project plans to incorporate street tree planting, as identified in BMP AES-3, in Table 3.8-1, in Section 3.8, *Visual Quality and Aesthetics*, in the Final EA. BMP AES-3 (Street Tree Planting) requires that SJRRC to ensure coordination with the City of Stockton on the incorporation of trees along the west side of South Union Street for the viaduct and retaining wall design options. The incorporation of trees would improve the visual quality of the proposed flyover structure. SJRRC will coordinate with the City of Stockton and UP on the locations and types of plantings along the street to provide the visual screening of the viaduct or retaining wall structures.

Additionally, Project extends sidewalk improvements to South Union Street on East Weber Avenue, East Main Street, East Market Street, and East Scotts Avenue. The at-grade rail crossings and sidewalk improvements will be constructed to ADA standards and will be designed to current CPUC, City, and UP Railroad standards. Improvements will also include required lighting and multimodal warning devices and will be coordinated with the City, CPUC, and UP. Therefore, the Project is consistent with this general plan policy. Thus, no revisions to the EA were made in response to this comment.

L-1-22

The City suggests that SJRRC identify and implement environmental justice policies concerning the development of the Project and take into account that low-income populations may be faced with restricted mobility and limited access to goods and services, and that enhancing mobility would increase accessibility and access to these goods and services. The City also suggested that SJRRC consult with local non-profits and neighborhood groups to determine best practices.

Environmental justice policies applicable to the Project found in the City's General Plan have been identified in Section 3.5, *Environmental Justice*, in the Final EA. Additionally, the Project's consistency with these applicable policies and actions from the City's General Plan is provided in Appendix B, *Applicable Federal, State, and Local Plans, Policies, and Regulations*, in the Final EA.

As discussed in Section 3.5, *Environmental Justice*, the Project's goal is to improve regional passenger travel efficiency by reducing conflicting train movements in the Project Study Area. Additionally, the Project would provide an overall beneficial effect on the community, specifically, EJ populations, that would include improvements to transportation access to employment, recreational, shopping, educational, and community resources; safety enhancement at roadway-rail grade crossings; as well as improvement in air quality through the reduction of idling trains and vehicles. By providing these improvements to the predominantly EJ communities in the Project Study Area, the Project will assist in improving conditions for historically disenfranchised populations.

Please refer to the extensive targeted stakeholder outreach conducted as part of the Project EIR under Stakeholder Outreach, in Section 3.5, *Environmental Justice*, and the similar comprehensive targeted public outreach efforts detailed in Chapter 4, *Public Input and Agency Coordination*, as part of the EA. During the EIR and EA efforts, the Project team made extensive efforts to reach EJ communities, as part of the Project's Communications Plan. Therefore, no revisions to the EA were made in response to this comment.

However, the Project team understands that EJ populations should be continually represented throughout Project phases and will continue to conduct targeted outreach efforts during final design and construction phases.

L-1-23

The City requests that public outreach efforts be discussed further since property owners would be impacted by the Project, and many measures rely on their acceptance, such as relocation and interior noise improvements.

As discussed extensively under Stakeholder Outreach, in Section 3.5, *Environmental Justice*, and in Chapter 4, *Public Input and Agency Coordination*, of the EA, notices and mailers were made available for the Project during the 45-day public review of the Draft EIR and the 30-day public review of the Draft EA for the Project. Additionally, property owners, as well as tenants, did receive separate notification that their properties would be affected by full or partial acquisitions, or TCEs as

part of the Project, by the Project team through the course of the environmental document clearance process.

Additional follow-up with owners and tenants of these businesses which will be relocated, will occur during final design when the ROW process for the Project will commence. Additionally, these notices and mailers distributed during the public review of the Draft EIR and Draft EA were also distributed to owners and/or tenants at the 12 residential properties affected by severe noise impacts. Additional coordination with these property owners will occur during final design, when businesses that will be relocated will be contacted as part of the ROW acquisition process, and owner and/or tenants of the 12 residential properties will be contacted to assess the types of noise abatement strategies for their specific structures. Therefore, no revisions to the EA were made in response to this comment.

During final design, SJRRC will initiate direct coordination with affected property owners and occupants of businesses that may be relocated as a result of the Project, and property owners and occupants of the 12 residences that will experience severe long-term noise effects as a result of the Project. With these coordination efforts during final design, SJRRC will ensure that BMPs are properly incorporated, and MM measures are properly implemented as part of the Project to effectively mitigate noise impacts to these residences. Therefore, no revisions to the EA were made in response to this comment.

L-1-24

The City references a page in the Final EIR approved in June 2021, regarding how SJRRC will coordinate with the City and UP to determine appropriate property ownership and establish agreements to avoid the potential of large open space areas to become voids in the Stockton Downtown area. The City states that this coordination must also include the ROW for the existing track that will be relocated as part of the Project.

This page number and portion of the comment refers to the EIR prepared for the Project, not the Draft EA of which these comments were submitted. Further, as identified in Measure MM RLC-2 (Property Ownership and Agreement Coordination Efforts) in Section 3.3, *Relocations and Real Property Acquisition*, in the EA, SJRRC will ensure coordination with the City and UP to determine appropriate property ownership and establish agreements prior to the ROW acquisition process which may include SJRRC and/or railroad company ownership and maintenance of the properties within the railroad corridor with either SJRRC or private ownership of adjacent remnant parcels. Public Utility easements would be necessary for this option. Therefore, no revisions to the EA were made in response to this comment.

L-1-25

The City asks that there be comprehensive evaluation of all parcel remnants resulting from the Project, and that evaluations should include potential reuse that would maximize economic, social, and environmental benefits to the surrounding community.

As discussed in Section 3.3, *Relocations and Real Property Acquisition*, of the EA, remnant portions of existing parcels may result from the permanent acquisition of existing parcels as part of the Project, which may result in indirect long-term moderate adverse effects in the absence of mitigation. These direct effects on real property from remnant properties would be mitigated through the implementation of Measure MM RLC-2 (Property Ownership and Agreement Coordination Efforts), which would require SJRRC to coordinate with the City of Stockton and UP to determine appropriate property ownership and establish agreements prior to the ROW acquisition process for these parcel remnants. Implementation of Measure MM RLC-2 (Property Ownership and Agreement Coordination Efforts) would help avoid the potential of moderate adverse effects from large open space areas becoming voids in the Downtown area fabric. Therefore, no revisions to the EA were made in response to this comment.

SJRRC will continue to coordinate with the City regarding further reuse options during future PDT meetings.

L-1-26

The City states that the pandemic has impacted businesses throughout the City, resulting in many business closures and relocations, and that SJRRC must coordinate closely with the City and other partners on ongoing business displacement efforts to ensure that impacted businesses are relocated within the City.

The feedback regarding businesses being impacted by the pandemic is appreciated. As referenced in Measures MM RLC-2, (Property Ownership and Agreement Coordination Efforts), SJRRC will continue to coordinate closely with the City and other partners on ongoing business displacement efforts to ensure the impacted businesses are relocated at other available properties located in the City. Therefore, no revisions to the EA were made in response to this comment.

L-1-27

The City references a page in the approved Final EIR that identified a mitigation measure with the same text of what is now shown in BMP LU-1 of the Draft EA.

At the discretion of CHSRA as the NEPA lead agency, BMP LU-1 (General Plan Amendment) in the Final EIR for the Project was converted to a mitigation measure during development of the EA for the Project. The remainder of this comment refers to measures that may have been reversed on page 3.10-10 in the EIR. This page number and portion of the comment refers to the EIR prepared for the Project, not the Draft EA of which these comments were submitted. Therefore, no further response is required as the comment does not refer to the Draft EA.

L-1-28

The City states that whenever possible, local hire provisions should be incorporated during Project construction.

The federal funding restrictions prohibit the use of the Local Employment Ordinance (Stockton Municipal Code [SMC] section 3.68.095), the Local Business Preference Ordinance (SMC Section 3.68.090), or any other local hiring preferences. Therefore, no revisions to the EA were made in response to this comment.

L-1-29

The City states that there is a typo in Table 5-3 of the *Traffic Report* in Appendix F of the Draft EA.

This correction is noted and the typo for Intersection 8 was fixed in Table 5-3, in Appendix F, *Traffic Report*, in the Final EA. Table 5-3 now states East Lafayette Street and South Stanislaus Street.

L-1-30

The City states that the LOS at Intersection 16, in Table 6-1, of Appendix F, *Traffic Report* is incorrect.

The delay in seconds for Intersection 16 in Table 6-1, of the *Traffic Report* in Appendix F, has been corrected to 31.1, which falls under LOS C, in the Final EA.

L-1-31

The City asks that a quantitative and qualitative discussion be incorporated into the *Traffic Report*, that discusses the effects of school buses and other hazardous waste transport that are required to stop at East Lafayette Street and East Hazelton Avenue.

Under the No Project Condition, East Lafayette Street and East Hazelton Avenue would remain at-grade crossings, with East Lafayette Street having two at-grade tracks, and East Hazelton Avenue with three at-grade tracks. Mainline and connecting freight and passenger train traffic is estimated to almost double in the Project's analysis timeframe.

As discussed in Chapter 1, *Project Description*, of the EA, with the Project, at East Hazelton Avenue, the two main rail lines would be grade separated, leaving only a single at-grade track crossing. Estimated future train volumes at this single East Hazelton Avenue at-grade connection track are projected to be substantially lower than existing train volumes crossing East Lafayette Street and East Hazelton Avenue today at daily peak hour, thereby reducing wait times for school buses, hazardous transport trucks, and emergency vehicles along this route.

For East Main Street and East Market Street, the existing rail crossings would be shifted east of their current locations with the Project. Therefore, there would be a minimal change in delay (approximately 1 second or less) for school busses or hazardous transport vehicles between the Future Year (2045) No Project Condition and the Future Year (2045) Project Condition. Please refer to Table 16 in Appendix F, *Traffic Study*, of the EA, which shows the AM peak hour delay at East Main Street increasing from 29.6 seconds to 29.8 seconds, and delay at East Market Street increasing by one second from 28.4 to 29.4. The PM peak hour estimates similar delay changes.

Therefore, no revisions to the EA were made in response to this comment.

L-1-32

The City states that a staging plan that identifies truck haul routes should be identified if they were to utilize roads through residential areas. A staging plan for haul routes will be established as part of final design, which will determine, with certainty at that time, whether or not truck haul routes will traverse through residential areas.

City designated Truck Route Designations operating in the traffic and transportation RSA are shown in Figure 4-5 in Appendix F, *Traffic Study*, of the EA, and Surface Transportation Assistance Act (STAA) Truck Route Designations in the traffic and transportation RSA are shown in Figure 4-6 in Appendix F, *Traffic Study*, of the EA. Due to increased truck traffic along these specific corridors during construction, and the wear and tear on these roads, the Project will incorporate BMP TRA 1 (Protection of Public Roadways During Construction), identified in Table 3.7 6, in Section 3.7, *Traffic, Transportation, Pedestrian, and Bicycle Facilities*, of the EA, which requires SJRRC to restore these truck routes to their previous condition after construction of the Project is complete. With the incorporation of BMP TRA-1, no direct or indirect short-term adverse effects related to truck traffic during construction would occur under the Project.

Additionally, BMP TRA-2 (Construction Transportation Plan) and BMP TRA-7 (Transportation Management Plan), identified in Section 3.7, *Traffic, Transportation, Pedestrian, and Bicycle Facilities*, of the EA both stipulate that SJRRC will work with the City to establish appropriate limitations on truck traffic for each route proposed for use during construction. BMP TRA-2 (Construction Transportation Plan) states that the CTP will be prepared in close consultation with the local jurisdiction having authority over the site, keeping in mind that all truck haul traffic be limited to truck haul routes already identified by the City. The City's approval of the Project haul routes will be coordinated and obtained during final design. Therefore, no revisions to the EA were made in response to this comment.

L-1-33

The City requests that truck material and equipment haul routes be included in the EA.

City designated Truck Route Designations operating in the traffic and transportation RSA are shown in Figure 4-5 in Appendix F, *Traffic Study*, of the EA, and STAA Truck Route Designations in the traffic and transportation RSA are shown in Figure 4-6 in Appendix F, *Traffic Study*, of the EA.

Additionally, BMP TRA-2 (Construction Transportation Plan) and BMP TRA-7 (Transportation Management Plan), identified in Section 3.7, *Traffic, Transportation, Pedestrian, and Bicycle Facilities*, of the EA both stipulate that SJRRC will work with the City to establish appropriate limitations on truck traffic for each route proposed for use during construction. BMP TRA-2 (Construction Transportation Plan) states that the CTP will be prepared in close consultation with the local jurisdiction having authority over the site, keeping in mind that all truck haul traffic be limited to truck haul routes already identified by the City. The City's approval of the Project's haul routes will be coordinated and obtained during final design. A staging plan for haul routes will be established as part of final design and will require the City's review and approval prior to construction. This staging

plan will include truck material/equipment haul routes for import and borrow. Therefore, no revisions to the EA were made in response to this comment.

L-1-34

The City states that no truck hauling of fill is permitted on City streets during peak hours.

These types of restrictions will be captured as part of BMP TRA-2 (Construction Transportation Plan) and BMP TRA-7 (Transportation Management Plan), in Section 3.7, *Traffic, Transportation, Pedestrian, and Bicycle Facilities*, of the EA. Both BMPs stipulate that SJRRC will work with the City to establish appropriate limitations on truck traffic for each route proposed for use during construction. Therefore, no revisions to the EA were made in response to this comment.

L-1-35

The City asks if the EA accounts for the 90-day settlement period for the embankment design option.

If the embankment option is chosen, the required settlement period will be established by geotechnical engineer for the Project based on the final design of the soil embankment and existing subsurface conditions. The specified number of days identified by the geotechnical engineer during final design will then be incorporated into the anticipated construction schedule, represented in Table 2.2-3, in Chapter 2, *Alternatives*, of the EA. Therefore, no revisions to the EA were made in response to this comment.

L-1-36

The City states that the reference to “Mormon Slough” should be changed to “Project Study Area.”

BMP COM-1 (Outreach and Engagement Plan) is included to provide a targeted proactive response for temporary and permanent relocation assistance for transient populations affected by the Project that - based on Project research and site visits - are living outside the existing UP ROW, and only in the area of the Mormon Slough. Therefore, no change to the language of BMP COM-1 in the EA has been made in response to this comment.

L-1-37

The City requests that a discussion be included regarding a reassessment of the campsites prior to construction to confirm camps have not encroached into the construction areas.

Leading up to construction, the Project construction limits will be secured, and any campsites present at this time that encroach on the property acquired for the Project will be required to relocate. The Outreach and Engagement Plan (BMP COM-1) will identify the construction areas within the railroad ROW and the final construction schedule, including types of construction activities. This information will be disseminated to affected entities, community groups, and the stakeholder working group prior to the start of construction. Therefore, no revisions to the EA were made in response to this comment.

L-1-38

The City requests that the discussion of transient populations be expanded beyond just the area of the Mormon Slough.

As stated in response to comment L-1-36, based on Project research and site visits, transients that will require relocation assistance are only present in the area of the Mormon Slough. Therefore, no change to the referenced text has been made in response to this comment in the EA.

L-1-39

The City states that rerouting traffic to East Hazelton Avenue will still experience the same delays due to an at grade crossing at the UP track, and for a qualitative discussion as to why this would not be an impact to be included.

As described in Section 3.7, *Traffic, Transportation, Pedestrian, and Bicycle Facilities*, of the EA, under the No Project Condition, East Lafayette Street and East Hazelton Avenue would remain at-grade crossings, with East Lafayette Street having two at-grade tracks, and East Hazelton Avenue with three at-grade tracks. Mainline and connecting freight and passenger train traffic is estimated to almost double in the Project's analysis timeframe. With the Project, the East Lafayette Street crossings would remain at-grade. At East Hazelton Avenue, the two main rail lines would be grade separated, leaving only a single at-grade track crossing. Estimated future train volumes at this single East Hazelton Avenue at-grade connection track are projected to be substantially lower during daily peak hour than existing train volumes crossing East Lafayette Street and East Hazelton Avenue today, thereby reducing wait times for emergency vehicles along this route. Therefore, no revisions to the EA were made in response to this comment.

L-1-40

The City states that all haul routes on City streets will be subject to their approval.

BMP TRA-2 (Construction Transportation Plan) states that the CTP will be prepared in close consultation with the local jurisdiction having authority over the site. Further, a staging plan for haul routes will be established as part of final design and will require the City's review and approval prior to construction. Therefore, no revisions to the EA were made in response to this comment.

L-1-41

The City states that all transportation plans are subject to their approval, which includes, but is not limited to lane closures, lane shifts, parking removal, detours, vehicle/bicycle/pedestrian restricted access, hours of operation, pedestrian escort, routing of affected school buses, postal deliveries, garbage pick-up and emergency response access through and onto the site.

Under the Road Closures subsection under the Short-term Effects discussion in Section 3.7, *Traffic, Transportation, Pedestrian, and Bicycle Facilities*, in the EA, it states that BMP TRA-2 and BMP TRA-7 (Transportation Management Plan) will be coordinate with the jurisdictions with oversight. Therefore, any potential temporary lane closures (full or partial), lane shifts, parking remove

(temporary), detours, vehicle/bike/pedestrian access, hours of operation for affected businesses, potential need for a pedestrian escort, routing of affected school buses, postal deliveries, and garbage pick-up, as well as emergency response access through and onto the site will be addressed with the City during final design. Therefore, no revisions to the EA were made in response to this comment.

L-1-42

The City states that any night work hours on East Stanislaus Street will be limited due to truck route hour limitations.

At this time, no night work hours will occur on Stanislaus as a part of the Project. However, in the event this changes during final design, the City's information will be incorporated into the final truck haul routes for the Project. Therefore, no revisions to the EA were made in response to this comment.

L-1-43

The city states that the *Traffic Report* in Appendix F of the Draft EA seems inconsistent with the assumptions in the technical analysis, and that closure of East Lafayette Street will reroute traffic elsewhere such as East Hazelton Avenue.

Page 3.7-14, in Section 3.7, *Traffic, Transportation, Pedestrian, and Bicycle Facilities*, of the EA, references short-term effects of road closures. East Lafayette Street is proposed as a permanent closure; therefore, East Lafayette Street is not referenced in this specific section. As such, no revisions to the EA were made in response to this comment.

L-1-44

The City states that East Lafayette Street is designated as a truck route.

With completion of the Project, and proposed closure of East Lafayette Street, truck traffic would utilize other routes, to include East Market Street to the north and East Hazelton Avenue to the south. The exact routes for truck traffic, or the number of trucks that will be redistributed on other local truck routes will be coordinated with the City and will be evaluated and finalized as part of final design, with the City's approval. Truck routes that will be utilized to accommodate the redistribution of traffic due to the permanent closure of East Lafayette Street will only occur on routes already designated as truck routes by the City. Therefore, no revisions to the EA were made in response to this comment.

L-1-45

The City states their concern that multiple at-grade rail crossings over a short distance is a concern and if there are any ways to mitigate this concern.

As stated in Section 3.7, *Traffic, Transportation, Pedestrian, and Bicycle Facilities*, of the EA, there would be no long-term adverse effects to traffic operations related to the proposed roadway closures

with the incorporation of BMP TRA-8 (Road Closure Formalization Process) BMP TRA-8 (Road Closure Formalization Process) which requires SJRRC and the City, to formalize all road closures as part of CPUC GO 88B diagnostic review process during final design. The CPUC GO 88B diagnostic review process will include the evaluation of circulation for all modes of travel in coordination with the City, CPUC, and UP, during final design. Roadway crossing modifications will be handled by the Project diagnostic team, consisting of members from the City, SJRRC, UP, and CPUC. Final recommendations for East Lafayette Street will be formalized as part of this CPUC Diagnostic process. Therefore, no revisions to the EA were made in response to this comment.

L-1-46

The City states that further discussions are needed regarding assumptions contained in the technical appendix to address permanent road closure impacts, specifically related to LOS at East Lafayette Street and South Aurora Street, and at East Lafayette Street and South Airport Way, and that impacts should be mitigated.

Previous comments on the LOS at East Lafayette Street at South Aurora Street and East Lafayette Street at South Aurora Street were not found in the City's comment letter submitted during the public review period.

Under the Intersection LOS discussion under Long-term Effects in Section 3.7, *Traffic, Transportation, Pedestrian, and Bicycle Facilities*, of the EA, the intersections of East Lafayette Street and South Airport Way, and East Lafayette Street and South Aurora Street, would experience improvements in LOS because of the closure of the East Lafayette Street at-grade crossing of the UP tracks. Therefore, no direct or indirect effects on intersection LOS would occur under the Project, and no BMPs or mitigation measures are required. Therefore, no revisions to the EA were made in response to this comment.

L-1-47

The City questions that if cyclists need to detour as much as 0.4-mile around the closure of East Lafayette Street, how there are no adverse effects on bicycle access within the Project Study Area, and that there should be a qualitative analysis included in the EA to determine if this should be an effect.

The EA analyzed whether cyclist detours would constitute an impact. As stated under the *Long-term Effects* discussion under Section 3.7, *Traffic, Transportation, Pedestrian, and Bicycle Facilities*, in the EA, the maximum out-of-direction travel for bicyclists would be approximately 0.3 to 0.4 mile. This is the worst-case scenario for rerouting of bicycle routes in the area. Additionally, improvements to the at-grade crossings include new curbs, gutter and sidewalk extensions, and new rail crossing panels, which would improve conditions for bicycles. Additional features, such as lighting and signage, will be determined during the final design phase.

As shown in Table 6-6 in Appendix F, *Traffic Report*, of the EA, which shows the average individual vehicle delay. At the East Hazelton Avenue/UP crossing, vehicle delay was reduced by 5.7 seconds

when comparing Future Year (2045) with Project to Future Year (2045) without Project. Additionally, at the East Scotts Avenue/UP crossing, vehicle delay was reduced 10.4 seconds when comparing Future Year (2045) with Project to Future Year (2045) without Project. The reduced auto delays on East Hazelton Avenue and East Scotts Avenue are due to reduction in train volumes, with the implementation of the Project, combined with the grade separation and at-grade configuration. Therefore, the grade separations of the main rail lines at East Scotts Avenue and East Hazelton Avenue will reduce bicycle delays at these crossings and improve safety by substantially reducing the number of potential train-bicycle conflicts. Therefore, no adverse effects to cyclists would occur as a result of the Project, and no revisions to the EA were made in response to this comment.

L-1-48

The City states that the Draft EA indicates that truck routes on arterial streets within the City would not be used during the operation of the Project. However, there is no discussion in the Draft EA or the *Traffic Report*, in Appendix F of the Draft EA that discusses the closure of East Lafayette Street, which is currently designated as a City designated truck route.

With completion of the Project, and proposed closure of East Lafayette Street, truck traffic would utilize other routes, to include East Market Street to the north and East Hazelton Avenue to the south. The exact routes for truck traffic, or the number of trucks that will be redistributed on other local truck routes will be coordinated with the City and will be evaluated and finalized as part of final design, with the City's approval.

As discussed in Appendix F, *Traffic Study*, of the EA, estimated future train volumes during peak hour at the single East Hazelton Avenue connection track are projected to be substantially lower than existing train volumes crossing East Hazelton Avenue today. The estimated trains crossing East Hazelton Avenue at-grade during daily peak hour would be reduced from five trains under Existing Year (2019) conditions (comprised of two freight trains and three passenger trains) to three trains under the Future Year (2045) with Project condition (comprised of 1 freight train and 2 passenger trains); thereby reducing train volumes at-grade during the peak hour at the East Hazelton Avenue crossing by approximately 40 percent in the Future Year (2045). This reduction in train volume as a result of the Project would result in a reduction of wait times for vehicles along this route, which would also apply to wait times related to truck haul traffic within the City.

Additionally, City designated Truck Route Designations operating in the traffic and transportation RSA are shown in Figure 4-5 in Appendix F, *Traffic Study*, of the EA, and STAA Truck Route Designations in the traffic and transportation RSA are shown in Figure 4-6 in Appendix F, *Traffic Study*, of the EA. With completion of the Project, and proposed closure of East Lafayette Street, truck traffic would utilize other routes, to include East Market Street to the north and East Hazelton Avenue to the south. The exact routes for truck traffic, or the number of trucks that will be redistributed on other local truck routes will be coordinated with the City and will be evaluated and finalized as part of final design, with the City's approval. Truck routes that will be utilized to accommodate the redistribution of traffic due to the permanent closure of East Lafayette Street will only occur on routes already designated as truck routes by the City.

Therefore, no revisions to the EA were made in response to this comment.

L-1-49

The City states that the Project needs to support the implementation of a Quiet Zone from East Charter Way (MLK Boulevard) to Harding Way, and that project proponents must contribute to fund the construction of needed improvements to implement the Quiet Zone and support the City's nomination for Section 190 Grade Separation Program for the affected existing at-grade crossings.

The requested Quiet Zone limits are outside of the Project Study Area. However, SJRRC will coordinate with the City on a cooperative agreement to implement quiet zone improvements, independent of the Project. Therefore, no revisions to the EA were made in response to this comment.

L-1-50

The City states that all affected curbs, gutters, sidewalks, handicap ramps and other facilities must be reconstructed, and that streets damaged by construction must be rehabilitated.

In response to the City's requests that all affected curbs, gutters, and sidewalks, handicap ramps and other facilities must be reconstructed, as referenced in Chapter 1, *Project Description*, of the EA, the City facilities directly impacted by the Project, and within the Project Study Area, will be reconstructed and restored to its existing condition, or better. In addition, the Project proposes to reconstruct existing and/or construct new curb, gutter, sidewalk, and handicap ramps east to South Union Street at several crossings.

In response to the City's concerns about streets that will be damaged by construction, as referenced in Section 3.7, *Traffic, Transportation, Pedestrian, and Bicycle Facilities*, in the EA, the Project will incorporate BMP TRA-1 (Protection of Public Roadways during Construction), which will ensure that the contractor will provide a photographic survey documenting the condition of the public roadways along truck routes providing access to the Project site to restore such routes utilized by the Project during construction to their previous condition.

Additionally, the specifics of all street and roadway reconstruction and rehabilitation efforts will be coordinated with the City as part of the final design process. Therefore, no revisions to the EA were made in response to this comment.

L-1-51

The City requests that raised median curbs and landscaping be incorporated where appropriate within the Project Study Area.

Raised medians and landscaping will be constructed as referenced in Chapter 1, *Project Description*, of the Final EA. In order to confirm specific locations and features that the City has requested, the Project team will coordinate with the City to review and provide comments on the final design refinements during the final design phase. Therefore, no revisions to the EA were made in response to this comment.

L-1-52

The City requests that all affected dry and wet utilities be reconstructed, upgraded, or rehabilitated.

Protection and relocation of existing and proposed utilities, which may be impacted by the proposed railroad corridor grade separation will be evaluated in detail during the final design phase of the Project. Empty sleeves and/or conduits will be provided in areas where future utility access may be restricted, as specified in BMP UTL-3 (Utility Avoidance Coordination) in Section 3.6, *Utilities and Emergency Services*, in the EA. The Project team will continue coordination with the City to accommodate upsized utilities directly impacted within the Project Study Area. Therefore, no revisions to the EA were made in response to this comment.

L-1-53

The City requests that traffic control and detour plans for construction be provided.

BMP TRA-7 (Transportation Management Plan) in Section 3.7, *Traffic, Transportation, Pedestrian, and Bicycle Facilities*, in the EA indicates that the TMP will be closely coordinated with affected jurisdictions, during the development of the plan during final design, which would include the City. Therefore, no revisions to the EA were made in response to this comment.

L-1-54

The City states that existing traffic signals, streetlights, markings, and striping affected will need to be brought up to current standards.

There are no traffic signals currently affected by the Project. However, in the event that any traffic signals are affected, SJRRC will make sure to coordinate with the City on the proposed improvements that may be necessary within the Project Study Area. Any markings and striping affected by the Project will be brought up to current standards as required by the Project and referenced in Chapter 1, *Project Description*, of the EA. Therefore, no revisions to the EA were made in response to this comment.

L-1-55

The City states that fencing or barriers need to be incorporated to prevent homeless people from camping at the Project site.

In response to this comment, security fencing would be implemented prior to any construction activities at the Mormon Slough.

The City also requests that cul-de-sac at the end of streets be closed.

No cul-de-sacs are proposed for street closures at this time. However, this request can be further discussed during final design of the Project.

As planned, one City street, East Church Street, will be closed off and converted to a "T" intersection with curb and gutter, sidewalk and barrier railing. At the other end, the proposed East Church Street

closure would be closure of an existing private driveway on the west side, between UP tracks and South Aurora Street, for which curb, gutter, sidewalk and new driveway entrance is proposed at the South Aurora Street connection to be consistent with the City standards. Additionally, Crime Prevention Through Environmental Design (CPTED) principles are being incorporated to allow for appropriate sight lines, visual character and wayfinding. SJRRC will continue to coordinate with the City regarding these closures through the incorporation of the BMP TRA-8 (Road Closure Formalization Process), in Section 3.7, *Traffic, Transportation, Pedestrian, and Bicycle Facilities*, in the EA, which requires a Road Closure Formalization Process. BMP TRA-8, (Road Closure Formalization Process) requires that SJRRC will ensure that all Project road closures will be formalized as part of CPUC GO 88B diagnostic review process during final design. Therefore, no revisions to the EA were made in response to this comment.

L-1-56

The City requests that architectural treatments be incorporated on bridges.

The Project would consider potential aesthetic treatments dependent on the type of flyover structure and local road bridges selected during final design. The City's suggestions are acknowledged by the Project team, with the understanding that UP has the ultimate approval on structure type and features of those structures, including any aesthetic or features proposed as part of the retaining wall design option, if selected during final design.

Additionally, BMP AES-2 (Coordinate Design Elements to Reduce Visual Impacts), in *Section 3.8, Visual Quality and Aesthetics*, of the EA will require SJRRC to ensure that all infrastructure within the corridor owned by UP and all materials and aesthetic features will be reviewed and approved by UP. The detail design of the elements in the Project corridor and the selection of the flyover's specific materials and forms will be rigorously coordinated to reduce visual effects and enhance existing visual quality. BMP AES-2 (Coordinate Design Elements to Reduce Visual Impacts) also states that for retaining wall options, this would include but not be limited to the wall type (cast-in-place, mechanically stabilized earth, or other types), the materials used in wall construction (concrete, block, stone, or metal), and the architectural treatment of its façade (dimensions, jointing, colors, textures). Therefore, no revisions to the EA were made in response to this comment.

L-1-57

The City states that the responsibility for maintaining the improvements must be clearly defined.

Ownership and maintenance of project components will be the subject of formal Construction & Maintenance agreements among and between the SJRRC, the City and each railroad (UP and BNSF) that are standard and will be required during final design. These agreements will formalize maintenance responsibilities of the Project stakeholders. Therefore, no revisions to the EA were made in response to this comment.

L-1-58

The City requests that SJRRC install infrastructure, like conduits, that can be used by the City to install fiber optic cables for interconnectivity of traffic signals and cameras.

As part of the final design phase, SJRRC plans to coordinate with the City and UP on the installation of conduits at the affected roadway crossings and evaluate the potential to accommodate future City fiber optic cables, if feasible. Therefore, no revisions to the EA were made in response to this comment.

L-1-59

The City requests that the proposed structure over the Mormon Slough should allow sufficient width for the construction of a future bicycle and pedestrian Class I path.

The request for the accommodation of a future Class I path on the flyover structure is noted. Any modification of the proposed flyover structures would require additional coordination and approvals from UP and BNSF during final design. Therefore, no revisions to the EA were made in response to this comment.

L-1-60

The City states that they have prior rights within the project corridor, as the City was established before any existing railroad and that SJRRC should provide railroad property rights within the corridor and relative to any new acquisitions needed from the City. Therefore, no revisions to the EA were made in response to this comment.

Based on the right-of-way analysis conducted in support of the Project and identified in Chapter 1, *Project Description* and Section 3.3, *Relocations and Real Property Acquisition*, of the Draft EA, the areas identified under railroad property ownership have been confirmed by the railroads. Any discussion of prior rights in these areas can be further discussed during ongoing PDT meetings for the Project. As a result, no changes to the EA were made in response to this comment. Therefore, no revisions to the EA were made in response to this comment.

L-1-61

The City states that a full grade separation of East Hazelton Avenue from all tracks is required for traffic circulation and emergency response, as the Project will reduce the number of available crossings within this segment.

Implementation of the Project would include the grade separation of two main rail lines at East Hazelton Avenue, leaving only a single at-grade track crossing. Estimated future train volumes at this single East Hazelton Avenue at-grade connection track are projected to be substantially lower than existing train volumes crossing East Hazelton Avenue today during daily peak hour, thereby reducing wait times for vehicles, trucks, and emergency vehicles along this route. Based on traffic counts collected in August 2021, average daily traffic on East Lafayette Street was 1,929 vehicles.

With the Project, this would divert approximately 1,350 to 1,715 vehicles per day to East Hazelton Avenue, providing an overall benefit, reducing freight congestion in the area.

Therefore, the Project would not require a full grade separation of East Hazelton Avenue, as suggested by the City, as the proposed improvements under Alternative 2 would meet the Project purpose and need and take in consideration that to fully grade separate East Hazelton Avenue would require a large amount of ROW from private property owners.

SJRRC supports the City if they wish to move forward with the full grade separation of East Hazelton Avenue, as a separate, stand-alone project, independent of the Project evaluated in the EA. Therefore, no revisions to the EA were made in response to this comment.

L-1-62

The City requests that project design and construction along East Charter Way (MLK Boulevard) should be completed such that any future work on that roadway will not require any coordination with the railroad, and the track that is proposed to remain on the westerly structure should be removed and placed on one of the new structures being construction.

Future proposed improvements on MLK Blvd would require coordination with and possibly additional agreements with UP and would not be able to be avoided due to the fact that roadwork would be conducted within their existing ROW. Completely removing existing underpass structures and reconstructing the existing roadway section through the entire Project Study Area of the grade separation (South Pilgrim Street to South Aurora Street) is likely to result in additional ROW impacts outside of the Project Study Area and is not integral for the implementation of the Project. SJRRC will continue to coordinate with the City during final design, to address infrastructure improvements that are independent of the Project. Therefore, no revisions to the EA were made in response to this comment.

L-1-63

The City requests that sidewalks be reconstructed to meet current ADA requirements on MLK Boulevard.

MLK Boulevard, or East Charter Way, would not be permanently affected by the Project. Thus, no permanent improvements to MLK Boulevard are proposed as part of the Project. Therefore, no revisions to the EA were made in response to this comment.

L-1-64

The City states that at minimum, Items 12, 14, 15, and 16, upgrades and repairs to roadways with utility needs, infrastructure upgrades, and bicycle and pedestrian improvements should be done in accordance with the City's General Plan.

Items 12, 14, 15, and 16 refer to fiber conduit installation, railroad property rights, full East Hazelton Avenue grade separation, and MLK Boulevard underpass reconstruction, respectively. Please refer to response to comments for L-1-58 that addresses fiber conduit installation, L-1-60 that addresses

railroad property rights, L-1-61 that addresses the City's proposal of a full grade separation at East Hazelton Avenue, and L-1-62 that addresses the City's proposed MLK Boulevard underpass reconstruction.

Additionally, the Project team has met regularly with the City over the entire course of the Project, and has actively engaged with the City in monthly PDT meetings over the course of the last 24 months in order to coordinate on the Project development, consideration of key features, solicit input on design decisions, and disclose potential impacts throughout the preparation of the EIR and EA. The Project team will continue to coordinate regularly with the City as the final design progresses, and via the City's formal review of the design plans as a component of the City's encroachment permit process during final design. Therefore, no revisions to the EA were made in response to this comment.

L-1-65

The City states that in accordance with the City's General Plan Policy LU-3.3, the amount of public park and open space area should be maintained or expanded in each neighborhood, and that SJRRC should create and maintain a green belt adjacent to the Project with open space, landscaping, and bicycle and pedestrian trails.

The Project will grade separate an existing transportation facility and would not be responsible for expanding the amount of public park or open space within the Project Study Area. Further, as discussed in Section 3.2 in the EA, *Community Effects and Growth*, the Project would not induce growth that would indirectly lead to the need for additional recreational resources, such as additional parks. The Project would not have any long-term effects on recreational resources within and adjacent to the Project Study Area. Therefore, the Project would not affect any current or planned recreational or open space resources within the Project Study Area. Therefore, no revisions to the EA were made in response to this comment.

L-1-66

The City asks that existing and proposed ROW, including TCEs are shown in the EA.

TCEs are shown in Figure 3.3-1, and full and partial acquisitions are shown in Figure 3.3-2, in Section 3.3, *Relocations and Real Property Acquisition*, of the Draft EA. Parcel boundaries are also shown in these figures to distinguish property ROW in the Project Study Area. Therefore, no revisions to the EA were made in response to this comment.

L-1-67

The City asks that a spreadsheet along with a map for ROW easement acquisitions showing the property owner, address, assessor's parcel number (APN), area of acquisition (either full or partial), and information regarding what will happen to any remnant parcels be provided.

Please refer to response to Comment L-1-66. Please refer to Tables 3.3-1 and 3.3-2 in the EA, identifying TCEs and full and partial acquisitions, respectively. Each table provides a reference to the

location of the property on corresponding figures (Figures 3.3-1 and 3.3-2), the APN, type of affect, acreage of the property that will be affected by the Project, occupant type, and zoned land use. Therefore, no revisions to the EA were made in response to this comment.

L-1-68

The City states that any Record of Survey or Corner Records would need to be recorded at the San Joaquin Recorder's Office.

Per standard requirements during final design, all Records of Survey will be recorded at the San Joaquin County Recorder's office. Therefore, no revisions to the EA were made in response to this comment.

L-1-69

The City states that survey monuments need to be restored, as necessary.

As a standard requirement, all survey monuments affected by the Project will be restored, as part of the Project. Therefore, no revisions to the EA were made in response to this comment.

L-1-70

The City states that the underpass at MLK Boulevard is very narrow and several documented minor vehicle accidents have occurred at that location. Therefore, the City suggests that MLK should be at regular grade, without any tracks crossing it either at grade or overhead. In addition, the City requests that the existing subways should be removed at MLK Boulevard and the road should be widened.

Creating a new at-grade crossing with four or more active railroad tracks will not be deemed feasible by the railroads. Completely removing existing underpass structures and reconstructing the existing roadway section through the entire limits of the grade separation (South Pilgrim Street to South Aurora Street) is likely to result in additional real estate impacts outside of the Project Study Area identified for the Project. It is not necessary for the purpose of the scope of the Project. SJRRC will continue to coordinate with the City during final design, to address infrastructure improvements that are independent of the proposed project. Therefore, no revisions to the EA were made in response to this comment.

L-1-71

The City states that there would be slowed or delayed emergency response to the east side of East Hazelton Avenue from Fire Station 2, located at 110. West Sonora Street. Therefore, the City is suggests that the Project should remove all at-grade tracks to allow emergency response vehicles to have free flowing east/west directional access without train interference.

As discussed in Appendix F, *Traffic Study*, of the EA, after implementation of the Project, delay times to traffic on East Hazelton Avenue are expected to decrease in the Build Year (2025) and in the Future Year (2045) substantially compared to the No-Build Condition. This is because all of the

through trains will use the two main line tracks that will be grade separated from East Hazelton Avenue and only connecting trains transferring between the UP corridor and BNSF corridor will need to use the one remaining at-grade track. Since the estimated future train volumes during daily peak hour at this single East Hazelton Avenue at-grade connection track are projected to be substantially lower than existing train volumes crossing East Hazelton Avenue today, wait times for emergency vehicles along this route would also thereby be reduced. Therefore, there is no need to grade separate all at-grade tracks within the Project Study Area, and no revisions to the EA were made in response to this comment.

L-1-72

The City states that the closure of East Lafayette Street will delay emergency vehicle responses to the east side of the tracks and suggests this could be overcome by using the eastbound Crosstown Freeway and East Hazelton Avenue, assuming that there is no at-grade crossing at East Hazelton Avenue.

As discussed in Appendix F, *Traffic Study*, of the EA, after implementation of the Project, delay times to traffic on East Hazelton Avenue are expected to decrease in the Build Year (2025) and in the Future Year (2045) substantially compared to the No-Build Condition. This is because all of the through trains will use the two main line tracks that will be grade separated from East Hazelton Avenue and only connecting trains transferring between the UP corridor and BNSF corridor will need to use the one remaining at-grade track.

Since the estimated future train volumes at this single East Hazelton Avenue connection track are projected to be substantially lower than existing train volumes crossing East Hazelton Avenue today, wait times for emergency vehicles along this route would also thereby be reduced. Therefore, no revisions to the EA were made in response to this comment.

L-1-73

The City states that they would like to see access to the railroad ROW from East Church Street and/or East Lafayette Street from both the east and west sides.

Access points are planned to maintenance roads along both sides of the new railroad corridor at East Lafayette Street, East Scotts Avenue, and East Hazelton Avenue as part of the Project. Therefore, no revisions to the EA were made in response to this comment.

L-1-74

The City states that streets that will be acknowledged with dead-end cul-de-sacs shall meet City standards for turnaround radius design for fire apparatus.

No cul-de-sacs are proposed for street closures. Please refer to response to Comment L-1-55. Therefore, no revisions to the EA were made in response to this comment.

L-1-75

The City states that any dead-end streets or roads being modified require fire access gates, and that these gates should be automated and functional with the use of their radio frequency.

Automated gates with interoperability function for City of Stockton Fire and Emergency Services will be considered in the implementation of gated access points to railroad corridor maintenance roads if determined necessary and feasible during the final design phase. Therefore, no revisions to the EA were made in response to this comment.

L-1-76

The City states that additional fire hydrants may be required for this Project pending street closures and new infrastructure obstructions may affect existing fire hydrant locations.

The Project design team will evaluate fire and life safety (F&LS) requirements and recommend new fire hydrant locations as necessary to meet F&LS requirements during final design. New hydrant locations will be coordinated with the City of Stockton Fire Department and CalWater during the final design phase. Therefore, no revisions to the EA were made in response to this comment.

L-1-77

The City states that locations along the grade separation areas of the Project will need to be evaluated for ladder truck positioning, and areas of concern will require fire access roads installed parallel with the railway. In addition, the City indicates that ladder positioning should be less than 16-feet in width with ladder truck use, only, or 26-feet in width if there is a need for the road to accommodate both ladder trucks and fire engines.

Please refer to response to Comment L-1-76. Proposed maintenance roads along the railroad corridor are currently shown as 20-feet wide, in case those become necessary for ladder truck access. It is not anticipated that both fire trucks and ladder trucks will be required to address emergency services in these areas, based on the access roads that have been designed in coordination with the City. However, in the event roadway design is refined during final design, the appropriate widths for sufficient fire truck and ladder truck access will be incorporated. Therefore, no revisions to the EA were made in response to this comment.

L-1-78

The City states that the Project will require placement of access staircases in strategic areas along the grade separation.

Staircases are not necessary for emergency egress and pose a security risk. F&LS evaluation will be finalized during the final design phase, and the Project Team will coordinate with City of Stockton Fire and Emergency Service providers for any egress and access needs. Therefore, no revisions to the EA were made in response to this comment.

L-1-79

The City states that during fueling of equipment during construction, the fire department will require a permit for any above ground storage tank storing fuel of more than 60 gallons.

This requirement is included in Table 1.6-1, *Required Permits, Reviews, and Approvals*, in Chapter 1, *Project Description* in the Draft EA. Therefore, no revisions to the EA were made in response to this comment.

L-1-80

The city states that wastewater and stormwater utilities should be identified if they will be replaced or protected in place in the EA.

The Final EA has been revised to refer the reader to the *Utilities Appendix*, Appendix E, of the EA. As discussed under the wastewater and stormwater subsection in Section 3.6, *Hydrology, Floodplains, and Water Quality*, of the EA, utilities conflict exhibits were generated and provided in Appendix E of the EA for public circulation. The exhibits identify all potential conflicts. As identified in BMP UTL-3, the Project proponent, SJRRC, will coordinate with utility providers, including the City of Stockton, during final design to address utility relocation impacts. Therefore, no revisions to the EA were made in response to this comment.

L-1-81

The City requests that a specific reference to Cal Water should be made in a discussion on Page 3.6-3 of the Draft EA.

The Final EA has been revised to state, "City or Cal Water easement" as the water lines discussed in Section 3.6.2 of the Final EA include both City and Cal Water utilities.

L-1-82

The City states that there is a reference to a drainage report in Section 3.10, *Hydrology, Floodplains, and Water Quality*, of the EA, that should be modified to state "Stormwater Quality Control Plan," instead. Further, the City indicates that BMP HYD-5 should also be updated.

The reference to the preparation of a Drainage Report has not been removed in Section 3.10, as it is required for the Project. The information from the Drainage Report will be utilized to prepare the Project Specific Stormwater Quality Control Plan.

However, for clarity, BMP HYD-5 has been revised to state that the Drainage Report prepared will be utilized to prepare the Project specific Stormwater Quality Control Plan, which will conform with the requirements of the City of Stockton and County of San Joaquin Stormwater Quality Control Criteria Plan (August 2020).

L-1-83

The City states the permanent closure at East Lafayette Street at-grade is a concern for police emergency response times.

Please refer to response to comment L-1-72. Therefore, no revisions to the EA were made in response to this comment.

L-1-84

The City states that the closure of East Lafayette and East Church Streets will add to heavier traffic congestion on the Crosstown Freeway and East Hazelton Avenue, causing more frequent traffic related incidents.

As discussed in Section 3.7, *Traffic, Transportation, Pedestrian, and Bicycle Facilities*, and the *Traffic Study* in Appendix F of the EA, the impacts to adjacent roadways as a result of traffic diversion were analyzed based on the planned permanent closures of East Lafayette and East Church Streets. As discussed in Chapter 3.7 in the EA, the Project Future Year (2045) Condition traffic volumes were analyzed based on the redistribution of the No Action Future Year (2045) Condition traffic volumes for East Lafayette Street and East Church Street to adjacent roadways, as well as to SR 4 (Crosstown Freeway). Based on that analysis, all intersections affected by the Future Year (2045) Condition traffic redistribution of East Lafayette Street and East Church Street would operate at an acceptable LOS after traffic is redistributed and little to no vehicles will divert to SR 4 (Crosstown Freeway). Therefore, no revisions to the EA were made in response to this comment.

L-1-85

The City states that they would like to see East Hazelton Avenue be free flowing for traffic.

Currently, any main track or connecting track trains crossing East Hazelton Avenue create vehicle and bicycle/pedestrian delays at the roadway crossing. With the proposed main track grade separation at East Hazelton Avenue, future train-created delays are likely to be 30 to 40 percent less than the existing condition. Therefore, no revisions to the EA were made in response to this comment.

L-1-86

The City states that with any street closures, there is a high concern of homeless encampments forming at dead end of streets, which will cause an increase of police response type calls and a rise of citizen complaints.

SJRRRC acknowledges the City's comment regarding their high concern of homeless encampments forming at the dead-end streets, and the potential increase of police response type calls and a rise of citizen complaints as a result. SJRRRC will continue to work with the City during final design, to find potential solutions to address these concerns. Therefore, no revisions to the EA were made in response to this comment.

L-1-87

The City states that east and west flow of traffic and safety along MLK Boulevard must be a high priority for the Project.

No safety issues have been identified along MLK Boulevard during preliminary design of the Project. However, SJRRC understands that the flow of traffic and safety is imperative for the City. Therefore, SJRRC will continue to coordinate with the City during final design, to address infrastructure improvements that are independent of the proposed project. In addition, as referenced in the EA, BMP TRA-2 (Construction Transportation Plan), a CTP will be prepared in coordination with the City and RTD for review and approval during final design. This CTP will address traffic flow or safety issues that may arise during final design refinements, to ensure safe and efficient travel through the Project Study Area. Therefore, no revisions to the EA were made in response to this comment.

Q.4.2 L-2. SAN JOAQUIN COUNTY

Environmental Health Department

L-2

Subject: Stockton Diamond Project SU0014852 (2688)

The San Joaquin County Environmental Health Department (EHD) has the following comments for consideration:

1. Any geotechnical drilling shall be conducted under permit and inspection by The Environmental Health Department (San Joaquin County Development Title, Section 9-1115.3 and 9-1115.6).

L-2-1

If you have any questions, please contact Michael Suszycki, (209) 598-7001 msuszycki@sjgov.org.

Jeff Wong, REHS
Lead Senior REHS

L-2-1

The City states that any geotechnical drilling shall be conducted under permit and inspected by the Environmental Health Department, as directed under the San Joaquin County Development Title, Section 9-1115.3 and 9-1115.6.

The permit requirements and required inspections under the Joaquin County Development Title, Sections 9-1115.3 and 9-1115.6 has been added to Table 1.6-1, Required Permits, Reviews, and Approvals, in Chapter 1, *Project Description* of the Final EA.

CC-1-1

The commenter's suggestions are acknowledged by the Project team, with the understanding that UP has the ultimate approval on structure type and features of those structures, including any aesthetic or features proposed as part of the retaining wall design option, if selected during final design. No revisions to the EA were made in response to this comment.

CC-1-2

The commenter states that the Project is located in an area that has historically been disenfranchised and requested that this history be honored and represented. It is acknowledged that the Project is located within predominately minority and low-income EJ populations.

As discussed in Section 3.5, *Environmental Justice*, the Project's goal is to improve regional passenger travel efficiency by reducing conflicting train movements in the Project Study Area. Additionally, the Project would provide an overall beneficial effect on the community, specifically to EJ populations, that would include improvements to transportation access to employment, recreational, shopping, educational, and community resources; safety enhancement at roadway-rail grade crossings; as well as improvement in air quality through the reduction of idling trains and vehicles. By providing these improvements to the predominantly EJ communities in the Project Study Area, the Project will assist in improving conditions for historically disenfranchised populations.

Please refer to the extensive targeted stakeholder outreach conducted as part of the Project EIR under Stakeholder Outreach, in Section 3.5, *Environmental Justice*, and the similar comprehensive targeted public outreach efforts detailed in Chapter 4, *Public Input and Agency Coordination*, as part of the EA. During the EIR and EA efforts, the Project team made extensive efforts to reach EJ communities, as part of the Project's Communications Plan. The Project team understands that EJ populations should be continually represented throughout Project phases and will continue to conduct targeted outreach efforts during final design and construction phases. Therefore, no revisions to the EA were made in response to this comment.

CC-1-3

The commenter asks that unsheltered residents in the area be treated with respect. As discussed in Section 3.2, *Community Effects and Growth*, in the Draft EA, even though transient populations are not currently located within the UP ROW of the Mormon Slough where construction activities would occur, they occupy areas outside the UP ROW adjacent to the Mormon Slough. Transient populations are not anticipated to be directly affected during construction activities and would not require relocation.

However, in the event that these transient populations trespass and occupy areas within the UP ROW, they would be temporarily relocated with the incorporation of a Best Management Practice, BMP COM-1 (Outreach and Engagement Plan), which involves SJRRC working with local human services agencies to identify options and assist with transitions prior to the start of and during

construction activities. The Outreach and Engagement Plan will be guided by the Communication Plan's goals and objectives to identify target audiences, risk(s), and strategies with SJRRC and SJJPA as partnering agencies. This specifically includes the affected transient populations. Therefore, no revisions to the EA were made in response to this comment.

CC-2-1

The commenter identifies beneficial impacts of the Project, specifically, improved air quality and traffic flows.

The commenter's support for the Project has been documented as part of the public record and was considered in the decision-making process. Therefore, no revisions to the EA were made in response to this comment.

CC-2-2

The commenter asks that the Project give the area a proper facelift, create a culturally inspired landscape, and provide an opportunity to add more greenery and upgraded community parks and gardens.

As discussed in Section 3.8, *Visual Quality and Aesthetics*, the Project would provide an overall improvement to the long-term visual quality in the Project Study Area. Further, the construction of the flyover structure would enhance the design coherence of the Project corridor by eliminating, or screening from view, industrial land uses, such as salvage yards, that are usually considered by residential neighbors to be undesirable. The incorporation of BMP AES-2 (Coordinate Design Elements to Reduce Visual Impacts), and BMP AES-3 (Street Planning) identified in Table 3.8-1, of the EA, will ensure that additional visual interest with cultural or natural elements will be added to improve the visual quality in Project Study Area. BMP AES-2 requires SJRRC to ensure that all infrastructure within the corridor owned by UP and all materials and aesthetic features will be reviewed and approved by UP during final design. Additionally, the detailed design of the elements in the Project corridor and the selection of the flyover's specific materials and forms will be coordinated with UP to further reduce visual effects and further enhance existing visual quality.

BMP AES-3 requires SJRRC to coordinate with the City and UP on the incorporation of trees along the west side of South Union Street for the viaduct and retaining wall design options.

In addition, as discussed in Section 3.13, *Air Quality*, the Project will incorporate BMP AQ-4 (Vegetative Barriers and Urban Greening), which will evaluate the feasibility of incorporating vegetative barriers and urban greening to potentially reduce air pollution exposure on sensitive receptors in the Project Study Area. Therefore, no revisions to the EA were made in response to this comment.

CC-2-3

The commenter identifies beneficial impacts of the Project, specifically improved air quality and community impacts.

The commenter's support for the Project has been documented as part of the public record and was considered in the decision-making process. Therefore, no revisions to the EA were made in response to this comment.

Community improvements are a plus for this area. My concerns would be ~~your~~ the environment, the addition of parks is a plus, the addition of street lighting (sabr would be a plus), complying with noise ordinance during and after construction. I believe this project is positive, nonetheless with all the homework done on behalf of stockton Diamond, I truly want to emphasize that community involvement is a must, and the whole community area shall have outreach and their thoughts be kept in mind. This project will last close to 3 years, and that takes a toll on the community. Outreach strategies and communication is a must. Clean up is also an important factor and shall be considered to maintain healthy environments and communities. Please be considerate of these communities and I give a positive approval for this project.

CC-4-1

The commenter's support for the Project's community improvements, such as the addition of parks and street lighting in the Project area are noted.

The Project will grade separate an existing transportation facility and as discussed in Section 3.2, *Community Effects and Growth*, of the EA, the Project would not induce growth that would indirectly lead to the need for additional recreational resources, such as additional parks. The Project would not have any long-term effects on recreational resources within and adjacent to the Project Study Area.

Additionally, as discussed in Section 3.8, *Visual Quality and Aesthetics*, a lighting plan (identified as BMP VIS-1) will be developed. The commenter's suggestion of solar lighting options is noted.

Further, as discussed in Section 3.14, *Noise and Ground-borne Vibration*, of the EA, during construction, any noise or ground-borne vibration will be minimized with the incorporation of BMP NV-1 (Noise Control Plan) and NV-2 (Vibration Control Plan), which will both be developed in coordination with the City of Stockton and be in compliance with City of Stockton's standards. Additionally, no adverse long-term noise effects would result after the completion of Project construction with the implementation of mitigation Measure MM NV-1 (Reductions for Severe Noise Impacts), which will require interior noise abatement at the 12 residences identified with significant noise impacts. Thus, the Project will comply with local noise ordinances after construction. Therefore, no revisions to the EA were made in response to this comment.

CC-4-2

The commenter's support for the Project has been documented as part of the public record and was considered in the decision making.

Regarding the commenter's statement that community involvement is a must, and the whole community area should have outreach is recognized by the Project team. As part of the Project, there has been extensive targeted stakeholder outreach conducted as part of the Project EIR (under Stakeholder Outreach, in Section 3.5, *Environmental Justice*), and as part of the EA (in Chapter 4, *Public Input and Agency Coordination*). During the EIR and EA efforts, the Project team made extensive efforts to reach EJ communities, as part of the Project's Communications Plan. The Project team understands that EJ populations should be continually represented throughout Project phases and will continue to conduct targeted outreach efforts during final design and construction phases.

Regarding the commenter's concern regarding clean-up after Project construction, all areas utilized for construction will be properly cleaned and any construction debris disposed off-site. All areas used temporarily for construction will be returned to its existing condition. Therefore, no revisions to the EA were made in response to this comment.

Excited about the improvements to our ET communities. We will keep ourselves informed to the updates to pass along the information to our community members.

Suggestions: solar road lights on the vehicle / pedestrian underpass lights that aren't easily vandalized. Incorporate greenery: vegetative barriers for air & noise pollution; ART from local artists as mural projects in all pedestrian pathways to incorporate local community ownership and pride to help eliminate graffiti - work with local schools, SUSO, STOE, Delta College. In addition work with sustainability office UNP - BUN in from community - key

CC-5-1

The commenter's support for the Project has been documented as part of the public record and was considered in the decision-making process.

No revisions to the EA were made in response to this comment.

CC-5-2

The commenter's suggestions to include solar lighting and lighting that would not be easily vandalized on the vehicle/pedestrian underpass are noted. A lighting plan will be developed during final design that will consider different types of light fixtures and these types of lighting options will be considered during final design.

The commenter's suggestion to incorporate greenery and vegetative barriers for noise pollution have been considered by the Project team. As discussed in Section 3.13, *Air Quality*, the Project will incorporate BMP AQ-4 (Vegetative Barriers and Urban Greening), which will incorporate vegetative barriers and urban greening. During final design the Project team will evaluate the feasibility of incorporating vegetative barriers and urban greening to potentially reduce air pollution exposure on sensitive receptors in the Project Study Area. Based on the findings of Section 3.14, *Noise and Ground-borne Vibration*, of the EA, there would be no short-term or long-term adverse noise impacts with the incorporation of BMPs and mitigation. Further, the Project will consider potential aesthetic treatments dependent on the type of flyover structure and local road bridges selected during final design.

The commenter's suggestions that art from local artists as mural projects be incorporated to foster local community ownership and pride, as well as incorporate efforts to prevent graffiti have been considered by the Project team. As discussed in Section 3.8, *Visual Quality and Aesthetics*, the incorporation of BMP AES-2 (Coordinate Design Elements to Reduce Visual Impacts), will ensure that additional visual interest with cultural or natural elements will be added to improve the visual quality in Project Study Area. BMP AES-2 requires SJRRC to ensure that all infrastructure within the corridor owned by UP and all materials and aesthetic features will be reviewed and approved by UP during final design. Additionally, the detail design of the elements in the Project corridor and the selection of the flyover's specific materials and forms will be coordinated with UP to further reduce visual effects and further enhance existing visual quality. If the retaining wall design option is selected during final design, SJRRC will coordinate with UP on the best approach to reduce graffiti and vandalism of the retaining wall structure. Additionally, the incorporation BMP AES-3 requires SJRRC to coordinate with the City and UP on the incorporation of trees along the west side of South Union Street for the viaduct and retaining wall design options, which will assist in incorporating greenery in the Project Study Area.

The commenter's request to include coordination with local schools has been noted and will be further evaluated by the Project team during final design. Therefore, no revisions to the EA were made in response to this comment.

After reviewing the Project Overview (Stockton Diamond) I believe that the benefits will be Tremendous. The Environmental long Term effects, air Quality, Traffic & Transportation, & Visual Quality will be everlasting. The Benefits of this Project will have impact immediately. The Trains will be able to Pass freely and it will Clean up the land, along with the area as well. I Support & Agree 100% with the Proposed Project & as a Citizen who was born & raised in Stockton I am really excited about the Potential outcome when Completed!

DRAFT ENVIRONMENTAL ASSESSMENT

STOCKTON DIAMOND GRADE SEPARATION PROJECT

PUBLIC OPEN HOUSE **PM-1**

April 6, 2022

(The following comments were made before the
Certified Shorthand Reporter at 4:39 p.m.)

MR. BRIDGES: I am Damon Bridges. I am the
bishop of Restoration for Life Ministries at
1234 East Anderson Street right there on the corner of
Anderson and Airport. In fact, our church takes up the
whole block there on Anderson from Airport to Pilgrim.

There is some interesting things that we have
noticed with the proposed construction of the railroad
tracks.

I don't want to have openings where people can
get in and build tent cities, because that's what we
have problems with behind our church. They build their
tents. They build these large contraptions. They even
drive campers down in the slough area, so you don't want
to have an opening where someone can pull their campers
in, or put a tent up, or dig a hole and begin to call it
a restroom, because those have been built out there
also.

You don't want to have it where it becomes a

1 potential -- what's the word -- where they do their
2 drugs, where they perform sexual activities. There is
3 everything that takes place over in that area when there
4 is openings, holes.

PM-1-2

5 So this is a great idea with the construction
6 of the tracks, but you just want to make sure that you
7 close off any areas that are open where people can pull
8 in, camp out, set fires.

PM-1-3

9 I noticed one of the areas that was wide open.
10 It could be a potential hazard where people can come in
11 and set fires and begin to weaken the train structure,
12 begin to weaken the structure of the tracks with fires.

PM-1-4

13 So it's just something you want to keep in
14 mind and be on the lookout for. Okay?

15 Any questions you have for me?

16 Thank you so much and keep up the good work.

17 (Off the record at 4:42 p.m.)

18 (The meeting/open house adjourned at 5:57
19 p.m.)

EsquireSolutions.com

PM-1-1

The commenter states his name and relative location to the Project.

This comment has been acknowledged and has been documented as part of the public record. No revisions to the EA were made in response to this comment.

PM-1-2

The commenter's concerns regarding openings where people can access and build tent cities are acknowledged by the Project team. All areas within the UP ROW will be fenced off. The Project will not create any open entry access points for people to legally access.

Additionally, as discussed in Section 3.2, *Community Effects and Growth*, in the EA, even though transient populations are not currently located within the UP ROW of the Mormon Slough where construction activities would occur; they occupy areas outside the UP ROW adjacent to the Mormon Slough. In the event these transient populations trespass and occupy areas within the UP ROW, they would be temporarily relocated with the incorporation of BMP COM-1 (Outreach and Engagement Plan). Implementation of the Outreach and Engagement Plan will also assist in long-term relocation efforts for any transients that trespass in UP ROW.

PM-1-3

The commenter's concerns regarding openings where people can access is acknowledged.

Please refer to the response to comment PM-1-2. No open entry access points will be available with the implementation of the Project as all areas within the UP ROW will be fenced off. If transients do trespass in areas within the UP ROW, they will be relocated outside these areas consistent with BMP COM-1 (Outreach and Engagement Plan) in Section 3.2, *Community Effects and Growth*, of the EA. Therefore, no revisions to the EA were made in response to this comment.

PM-1-4

The commenter's concerns about open access points where fires could be started close to the proximity of the railroad tracks is acknowledged.

Please refer to the response to comment PM-1-2. Currently, there are no open access points within the UP ROW. Additionally, no open entry access points will be available with the implementation of the Project as all areas will be fenced off within the UP ROW after completion of construction; and thus, access to start any fires would not occur. If transients access areas within the UP ROW, they will be relocated outside these areas consistent with BMP COM-1 (Outreach and Engagement Plan) in Section 3.2, *Community Effects and Growth*, of the EA. Therefore, no revisions to the EA were made in response to this comment.

PM-1-5

The commenter states if the court reporter has any questions for him. He also voices support of the Project team.

This comment has been acknowledged and has been documented as part of the public record. No revisions to the EA were made in response to this comment.

PC-1-1

PC-1-1

The comment is an inquiry regarding San Joaquin Regional Rail Program (SJRRP) and neighboring passenger train facilities. The commenter's interest in low-income travel incentives is noted and is documented as part of the public record.

As discussed in Chapter 1, *Project Description*, of the EA, implementation of the Project would reduce wait times for vehicles, trucks, and emergency vehicles, as well as provide an overall benefit by reducing freight congestion in the area and improving the overall quality of commute times for passengers utilizing the existing transit routes.

The commenter's support for the Project has also been documented as part of the public record. No revisions to the EA were made in response to this comment.

Re: Stockton Diamond Grade Separation Project EA

Dear Ms. Mortensen:

The Train Riders Association of California ("TRAC") is a statewide rail advocacy organization that has worked since 1984 to improve passenger rail service in California. We offer a comment on the Stockton Diamond Grade Separation Project Draft Environmental Assessment (EA).

On multiple occasions, TRAC has suggested that the *San Joaquin* be co-located with ACE service between Stockton and Merced for now,¹ and between Merced and Newark Junction, once an Altamont Corridor Vision Project is completed. The Stockton Diamond FEIR (p. 1-16) makes it clear that the *San Joaquin* will remain where it is for the foreseeable future.

In our 10/3/20 Scoping Comments, we urged reserving a footprint for a transfer facility between the two services at a new station on the Diamond project site. We believe that passengers will need the flexibility to transfer, due to the division of trips between Bay Area-bound and Sacramento-bound trains (itself the result of not using the train-splitting strategy we recommended).

We were unable to find anything in the EA in response to that request. In our view, that makes the Related Projects/Cumulative Effects analysis incomplete.

Thank you for considering these comments.

Sincerely yours,

/s/ DAVID SCHONBRUNN

David Schonbrunn, President

PC-6-1

PC-6-2

PC-6-3

¹ This would be consistent with the way that the Valley Rail ROW will be shared by the two services between Stockton and Natomas.

TRAC, active since 1984, is dedicated to a vision of fast, frequent, convenient and clean passenger rail service for California. We promote European-style transportation options through increased public awareness and legislative action.

PC-6-1

The commenter indicates that on multiple occasions, Train Riders Association for California (TRAC), has suggested that the San Joaquins service be co-located with ACE service between Stockton and Merced for now, and then between Merced and Newark Junction once an Altamont Corridor Vision Project is completed.

San Joaquins will continue to run on the BNSF line for the foreseeable future between Stockton and Merced. However, the Project will not preclude future shared use of the corridor. As referenced in Chapter 1, Project Description, the effects of additional service implemented as part of the Valley Rail program will be studied in a separate environmental document as increases in future services will be more accurately evaluated as each planned improvement is implemented as part of the SJRRC/SJPPA Valley Rail Program.

Additionally, the SJPPA 2022 Business Plan states that SJPPA will work with SJRRC and the Tri-Valley – San Joaquin Valley Regional Rail Authority on future use of a shared universal corridor over the Altamont Pass with ACE, San Joaquins, and Valley Link. No revisions to the EA were made in response to this comment.

PC-6-2

The commenter asks that a footprint be reserved for a transfer facility between the San Joaquins and ACE services at a new station in the Project Study Area.

Please refer to response to comment PC-6-1. TRAC's requests can be further evaluated when the co-location project undergoes the environmental review and design process. No revisions to the EA were made in response to this comment.

PC-6-3

The commenter states that they were unable to find a response to their request regarding the co-location of the two rail lines, and as such, suggests that the cumulative analysis in the Draft EA is incomplete.

Section 3.16, *Cumulative Effects*, in the EA evaluates projects within the Cumulative Effects RSA that are current and reasonably foreseeable planned or programmed future projects that affect the same general geographic area—the rail transportation corridor in the downtown Stockton area—and consist of major transportation and infrastructure projects. No revisions to the EA were made in response to this comment.

Q.7.9 PC-9. UNION PACIFIC RAILROAD

BUILDING AMERICA®

PC-9

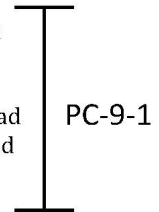

April 27, 2022

VIA EMAIL: info@stocktondiamond.com

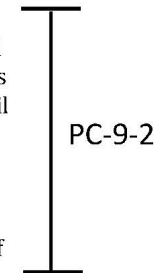

Stockton Diamond Grade Separation Project
c/o Stockton Diamond Project
2379 Gateway Oaks Drive, Ste. 200
Sacramento, CA 95833

To Whom It May Concern:

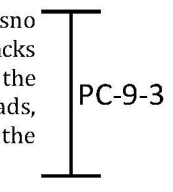

Union Pacific Railroad Company (UPRR) submits these comments in response to the San Joaquin Regional Rail Commission (SJRRRC) and California High Speed Rail Authority's (CHSRA) Draft Environmental Assessment: Stockton Diamond Grade Separation Project (Project). SJRRRC/CHSRA propose to construct a grade separation of two principal railroad lines at the Stockton Diamond in Stockton, CA. UPRR has a direct interest in the proposed project because it owns and operates a significant portion of the rail corridor noted throughout the DEA.

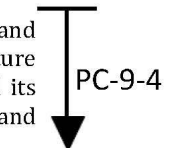

UPRR owns and operates a common carrier freight railroad network in the western two thirds of the United States, including the State of California. Specifically, UPRR owns and operates rail main lines connecting the San Francisco Bay Area to Sacramento and points east and north, and to Los Angeles and points east and southeast. UPRR is the largest rail carrier in California in terms of both mileage and train operations. UPRR also has a multitude of public private partnerships across the state, including active and planned projects with various state agencies and passenger rail partners. UPRR's network in California is vital to the economic health of the state and the nation as whole, and its rail service to California customers is crucial to the current and future success and growth of those customers.

The Project identified in the DEA seeks to grade separate the diamond where UPRR's Fresno Subdivision crosses BNSF's Stockton Subdivision by shifting and/or elevating UPRR's tracks between approximately Weber Ave and E 4th St to create a flyover. Introduction of the flyover also requires reconfiguring existing connections between the two railroads, modifying the access from UPRR's tracks to the ACE Cabral Station, and reconfiguring the north end of UPRR's Stockton Yard to maintain existing switching capabilities.

UPRR has been engaged in discussions with SJRRRC in order to ensure that the safety and efficiency of the UPRR system, including UPRR's ability to serve current and future customers, its ability to access and fully utilize existing switching yard facilities, and its ability to host reliable passenger services would be preserved during the planning and

<p>UNION PACIFIC RAILROAD 1400 Douglas Street, Stop 1120 Omaha, Nebraska 68179</p>	<p>Jeff Sheldon General Director Network Development</p>	<p>P 402-544-0674 E jdsheldo@up.com</p>
---	---	--

2

construction and upon the completion of the proposed grade separation project. UPRR has also submitted formal comments in response to both the SJRRC ACEforward DEIR (subsequently withdrawn by Agency) and the SJRRC ACE Extension DEIR.

While SJRRC and its consultants have to date been responsive to UPRR review and comments of the project scope and design, UP encourages SJRRC to continue engaging with both UP and the City of Stockton with respect to crossing closures, modifications, and reconfigurations that will support the Project's ability to achieve its stated goals safely and effectively.

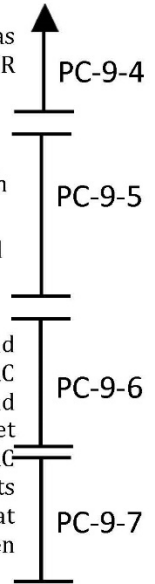

Considering the magnitude of potential impacts to UPRR facilities, operations, current and future customer access, and to passenger train performance, it is imperative that SJRRC continue working with UPRR to develop an alignment that meets UPRR safety and engineering guidelines and addresses the concerns identified in this letter or that have yet to be identified. UPRR looks forward to continuing good-faith discussions with SJRRC regarding the proposed project. UPRR reserves the right to comment on any modified drafts of the DEA and on the final EA when it is presented in the future. UPRR likewise notes that construction of the improvements will require execution of definitive agreements between the parties.

Thank you for considering our comments.

Sincerely,

Jeff Sheldon
General Director Network Development

cc: Mark Bristol, Union Pacific
Peggy Harris, Union Pacific
Adrian Guerrero, Union Pacific

PC-9-1

UP has communicated their direct interest in the Project because of the rail lines they own and operate within the Project Study Area.

UP has been added to the distribution list found in Appendix O, of the Final EA. This comment has been acknowledged and recorded as a part of the public record.

PC-9-2

UP has identified their interest in rail projects throughout California and partnerships.

The comment is not specific to the contents of the EA and no further response is required. As such, no revisions to the EA were made in response to this comment.

PC-9-3

UP provides a summary of the Project location.

This comment has been acknowledged and documented as part of the public record. No revisions to the EA were made in response to this comment.

PC-9-4

UP summarizes their ongoing coordination with the Project proponent, SJRRC, as well as their previous comments on the Draft EIR prepared for the Project.

This comment is acknowledged and has been documented as a part of the public record. No revisions to the EA were made in response to this comment.

PC-9-5

UP encourages SJRRC to continue engaging with both UP and the City of Stockton with respect to crossing closures, modifications, and reconfigurations that will support the Project's ability to achieve its stated goals safely and effectively.

SJRRC acknowledges UP's encouragement to continue engaging with the City and UP through the final design phase. SJRRC will continue coordination efforts with UP through the final design phase, to address UP's operational and safety concerns. No revisions to the EA were made in response to this comment.

PC-9-6

UP states that it is imperative that SJRRC continue to work with UP to develop an alignment that meets safety and engineering guidelines.

SJRRC acknowledges that the Project must maintain UP's current flexibility to access the ACE Cabral Station track from either of the Fresno Subdivision mainline tracks immediately south of the station. Based on design reviews held to date with UP, the alignment is set and meets UP safety and

engineering guidelines. SJRRC will continue to coordination efforts with UP and address any of UP's operational and safety concerns, should they arise. No revisions to the EA were made in response to this comment.

PC-9-7

UP states their continued interest in the Project and continuing good-faith discussions with SJRRC on the Project. UP states that they will require definitive agreements between the two parties prior to construction as well as their right to provide additional comments on the document.

This comment is acknowledged and has been recorded as a part of the public record. No revisions to the EA were made in response to this comment.

Q.7.10 PC-10. COURTNEY WOOD

PC-10

From: [Courtney Wood](#)
To: info@stocktondiamond.com
Subject: Diamond Grade Separation Feedback
Date: Tuesday, April 26, 2022 12:57:29 PM

Hello!

I am just typing in a comment on the Diamond Grade separation project. It looks like a great project for our area. Please keep in mind/mitigate any environmental impact to the French Camp community - there are citizens living there and sometimes I feel like they are not engaged/surveyed as much as incorporated areas of the county.

PC-10-1

Best,
Courtney L. Wood, MBA

PC-10-1

The commenter's support for the Project has been documented as part of the public record. The commenter's preference for the Project was considered in the decision-making process.

The French Camp Community is located over 3 miles away from the Project Study Area. The Project team has selected Alternative 2 as the Preferred Alternative, and the selection of this alternative would not result in any environmental effects to citizens living in the French Camp community. However, given the commenter's request, the Project team will engage the community for future public outreach efforts for this Project. No revisions to the EA were made in response to this comment.

Appendix R Environmental Commitments Record (ECR)

This page is intentionally blank.

R.1 Purpose of the Environmental Commitments Record

In order to be sure that all of the environmental best management practices (BMP) and mitigation measures (MM) identified in this environmental assessment (EA) are executed at the appropriate times, the following commitments will be implemented. During project design, BMPs and/or mitigation measures will be incorporated into the Project's final plans, specifications, and cost estimates, as appropriate. All permits will be obtained prior to implementation of the Project. During construction, environmental, construction, and engineering staff will ensure that the commitments contained in this Environmental Commitments Record (ECR) are fulfilled. Following construction and appropriate phases of Project delivery, long-term mitigation maintenance and monitoring will take place, as applicable. As the following ECR is a living document, some fields (columns) have not been completed, and will be filled out as each of the measures is implemented during the appropriate phase.

A full list of BMPs is provided in Table R-1, and a full list of MMs is provided in Table R-2.

This page is intentionally blank.

Date of ECR: July 2022

 DEA/FEA
 Final Design
 Construction

ENVIRONMENTAL COMMITMENT RECORD (ECR) Stockton Diamond Grade Separation Project

Table R-1. Best Management Practices

Best Management Practice (BMP)	Responsible for Development and/or Implementation of Measure	Timing/Phase	Action(s) Taken to Implement Measure/if checked No, add Explanation here	Final Design Task Completed	Construction Task Completed	Environmental Compliance	
				Date / Initials	Date / Initials	YES	NO
Community Impacts and Growth							
BMP COM-1	Outreach and Engagement Plan. SJRRC will actively coordinate with the City, County, and local stakeholder groups before and during Project construction to prepare and implement an Outreach and Engagement Plan to address the homeless encampments that are present within the Mormon Slough area. The Outreach and Engagement Plan will include input on goals and strategies from local stakeholder groups, as well as established goals and policies of the County's Community Response to Homelessness Strategic Plan. The Outreach and Engagement Plan will focus on a targeted proactive response for temporary and permanent relocation assistance for transient populations affected by the Project.	SJRRC	Before and During Project Construction.				
Utilities and Emergency Services							
BMP UTL-1	Notify Stakeholders of Utility Service Interruptions. During final design and prior to construction, SJRRC will ensure compliance with Section 4216 of the California Government Code, that requires Project proponents to notify and inform relevant stakeholders prior to construction, thereby reducing the adverse impacts associated with temporary disruptions in utility services. SJRRC will coordinate with all utility providers during final design and construction planning phases to develop a Utility Relocation Plan (URP) to minimize service disruption. The URP will also include efforts to communicate and inform utility service customers of potential planned service interruptions.	SJRRC	During Final Design and Prior to Construction				
BMP UTL-2	Minimize Utility and Service System Disruptions. During final design, SJRRC will ensure that utility disruptions and service system inconveniences are avoided, where possible, and will consider design opportunities to avoid permanent impacts to existing utility infrastructure, where practical.	SJRRC	During Final Design				
BMP UTL-3	Utility Avoidance Coordination. SJRRC will coordinate with City of Stockton (City) and other utility providers during final design to address utility relocation impacts. The following methods will be implemented to avoid permanent impacts to utilities and access to existing or future planned utilities:	SJRRC	During Final Design				

Best Management Practice (BMP)	Responsible for Development and/or Implementation of Measure	Timing/Phase	Action(s) Taken to Implement Measure/if checked No, add Explanation here	Final Design Task Completed	Construction Task Completed	Environmental Compliance	
				Date / Initials	Date / Initials	YES	NO
<ul style="list-style-type: none"> Protect in Place. SJRRC will evaluate protect in place options to maintain the utility in its current location. These options include evaluation of load above the utility and reinforcement options, to be approved by the utility provider. Bridge columns and other bridge-related subsurface work will be designed in coordination with the utility provider affected to avoid impacting the utility. Accurate horizontal and vertical location of the utility will be gathered to support the avoidance and protection design. Access. SJRRC will work with the utility provider during the final design phase to prepare a design that maintains provider access to the utility for inspection and maintenance, as well as to not preclude future potential replacement of the utility. Underground Service Alert. Prior to grading activities, SJRRC will require the design/build contractor to notify Underground Service Alert (USA) at least 2 days prior to excavation by calling 811 to require that all utility owners within the Project disturbance limits identify the locations of underground transmission lines and other utility facilities 							
Traffic and Transportation – Pedestrian and Bicycle Facilities							
BMP TRA-1	Protection of Public Roadways during Construction. Prior to construction, SJRRC will ensure that the contractor will provide a photographic survey documenting the condition of the public roadways along truck routes providing access to the Project site to restore such routes utilized by the Project during construction to their previous condition.	SJRRC	Prior to Construction.				
BMP TRA-2	Construction Transportation Plan. Prior to construction, SJRRC will ensure that the contractor will prepare a detailed Construction Transportation Plan (CTP) for the purpose of minimizing the effect of construction and construction traffic on adjoining and nearby roadways in close consultation with the local jurisdiction having authority over the site. The development of the CTP will include coordination and collaboration with the San Joaquin Regional Transit District (RTD).	SJRRC	Prior to Construction.				
BMP TRA-3	Off-Street Parking for Construction-Related Vehicles. During construction, SJRRC will ensure that the contractor will identify adequate off-street parking for all construction-related vehicles throughout the construction period to minimize effects on public on-street parking areas.	SJRRC	During Construction.				
BMP TRA-4	Maintenance of Pedestrian Access. Prior to construction, SJRRC will ensure that the contractor will prepare a specific CMP to address maintenance of pedestrian access during the construction period.	SJRRC	Prior to Construction.				
BMP TRA-5	Maintenance of Bicycle Access. Prior to construction, SJRRC will ensure that the contractor would prepare a specific CMP to address maintenance of bicycle access during the construction period.	SJRRC	Prior to Construction.				
BMP TRA-6	Protection of Freight and Passenger Rail During Construction. During construction, SJRRC will ensure that the contractor will repair any	SJRRC	During Construction.				

Best Management Practice (BMP)	Responsible for Development and/or Implementation of Measure	Timing/Phase	Action(s) Taken to Implement Measure/if checked No, add Explanation here	Final Design Task Completed	Construction Task Completed	Environmental Compliance	
				Date / Initials	Date / Initials	YES	NO
<p>structural damage to freight or public railways that may occur during the construction period and return any damaged sections to their original structural condition.</p> <p>BMP TRA-7 Transportation Management Plan. During final design, SJRRC will ensure that a Project TMP will be drafted, approved, and filed with the City of Stockton Engineering and Transportation Department, or other agency with jurisdiction over the road, prior to any road closures. SJRRC, will also coordinate and collaborate regularly with the RTD during final design to coordinate elements of the TMP. The plan would include alternative routing plans and methods and details for early public outreach.</p>	SJRRC	During Final Design.					
<p>BMP TRA-8 Road Closure Formalization Process. During final design, SJRRC will ensure that all Project road closures will be formalized as part of CPUC GO 88B diagnostic review process. The CPUC GO 88B diagnostic review process will include the evaluation of circulation for all modes of travel in coordination with the City of Stockton, CPUC, UP, and Caltrans, as well as evaluating potential permanent effects related to access for pedestrians, bicycles, automobiles, and trucks.</p>	SJRRC	During Final Design.					
Visual and Aesthetics							
<p>BMP AES-1 Lighting Plan. During final design, SJRRC will ensure that a lighting plan will be developed that will select temporary and permanent lighting fixtures to minimize glare on adjacent properties and into the night sky. As defined in the City's Municipal Code, permanent lighting fixtures will be selected to ensure that the light beam is controlled and not directed across a property line or upward into the sky. Lighting will be shielded with non-glare hoods or reflectors and focused within the Project ROW. The lighting plan will be reviewed and approved by the City of Stockton prior to construction to ensure compliance with the City's Municipal Code and General Plan.</p>	SJRRC	During Final Design.					
<p>BMP AES-2 Coordinate Design Elements to Reduce Visual Effects. During final design, SJRRC will ensure that all infrastructure within the corridor owned by UP and all materials and aesthetic features will be reviewed and approved by UP. The detail design of the elements in the Project corridor and the selection of the flyover's specific materials and forms will be rigorously coordinated to reduce visual effects and enhance existing visual quality.</p> <p>For retaining wall options, this would include but not be limited to the wall type (cast-in-place, mechanically stabilized earth, or other types), the materials used in wall construction (concrete, block, stone, or metal), and the architectural treatment of its façade (dimensions, jointing, colors, textures).</p> <p>For the viaduct option, the bridge type, proportions for the openings, and design of piers would be coordinated, especially when located adjacent to a retaining wall or embankment structure, to achieve design coherence.</p>	SJRRC	During Final Design.					

Best Management Practice (BMP)	Responsible for Development and/or Implementation of Measure	Timing/Phase	Action(s) Taken to Implement Measure/if checked No, add Explanation here	Final Design Task Completed	Construction Task Completed	Environmental Compliance	
				Date / Initials	Date / Initials	YES	NO
<p>For the embankment option, seed mixes will be selected to provide vigorous growth and seasonal variety. Coordination regarding potential sculpting of the embankments to be responsive to the public's interest in visual quality would be incorporated.</p> <p>For any of the design options, the type and placement of fencing, railings, and lighting to provide safety and security would be carefully considered and incorporated into the Project during the design phase in coordination with UP.</p> <p>BMP AES-3 Street Tree Planting. During final design, SJRRC will ensure coordination with the City of Stockton on the incorporation of trees along the west side of South Union Street for the viaduct and retaining wall design options. The incorporation of trees would improve the visual quality of the flyover structure. SJRRC will coordinate with the City of Stockton and UP on the locations and types of plantings along the street to provide the visual screening of the viaduct or retaining wall structures.</p>	SJRRC	During Final Design.					
Cultural Resources							
<p>BMP CUL-1 Archaeological and Tribal Monitoring. Prior to issuance of grading permits, SJRRC shall retain an archaeological monitor as well as Native American monitors from the North Valley Yokuts Tribe and The Confederated Villages of Lisjan. The archaeological monitor, working under the direct supervision of a qualified archeologist, shall be present for Project earth-moving activities that occur within undisturbed, original ground in the Project Area. Earth moving activities include, but are not limited to, excavation, trenching, grading, and drilling. One Native American monitor from the North Valley Yokuts Tribe and one Native American monitor from The Confederated Villages of Lisjan shall also be requested to be on-site during Project earth-moving activities that occur within undisturbed, original ground in the Project Area. Attendance is ultimately at the discretion of the tribes.</p> <p>Areas identified for archaeological and Native American monitoring will be further refined in consultation with interested Native American tribes. All archaeological monitors shall be familiar with the types of historical and prehistoric resources that could be encountered within the Project Area.</p> <p>The qualified archaeologist shall have the ability to recommend, with written and photographic justification, the termination of monitoring efforts to SJRRC, and should SJRRC and the Native American monitors concur with this assessment, then monitoring shall cease.</p> <p>If an inadvertent discovery of archaeological materials is made during project-related construction activities, the qualified archaeologist shall immediately be notified regarding the discovery and shall follow the process laid out under 36 CFR 800.13. If prehistoric or potential tribal cultural resources are identified, the Native American monitors shall also immediately be notified. The archaeological monitor shall have the</p>	SJRRC	Prior to Issuance of a Grading Permit.					

Best Management Practice (BMP)	Responsible for Development and/or Implementation of Measure	Timing/Phase	Action(s) Taken to Implement Measure/if checked No, add Explanation here	Final Design Task Completed	Construction Task Completed	Environmental Compliance	
				Date / Initials	Date / Initials	YES	NO
<p>authority to halt ground disturbing activities within 50 feet of the resource(s) and an Environmentally Sensitive Area physical demarcation shall be established.</p> <p>The qualified archaeologist, in consultation with SJRRC and Native American monitors—should the find be prehistoric or a potential tribal cultural resource—it shall determine whether the resource is potentially significant under Section 106 of NHPA. Next, CHSRA shall determine actions that SJRCC can take to resolve adverse effects and notify SHPO and interested tribes within 48 hours of the discovery. If avoidance is not feasible, the qualified archaeologist, in consultation with SJRRC, shall prepare and implement a detailed treatment plan. Treatment for most archaeological resources would consist of, but would not be limited to, in-field documentation, archival research, subsurface testing, and excavation.</p> <p>No work will continue within the 50-foot buffer until the qualified archaeologist, and SJRRC, along with the Native American monitors—should the find be prehistoric or a tribal cultural resource—agree to appropriate treatment.</p>							
<p>BMP CUL-2 Worker Environmental Awareness Protection Training. Prior to initiating earth-moving construction activity, a qualified archaeologist, meeting the Secretary of the Interior’s Standards for professional archaeology, shall ensure that a Worker Environmental Awareness Protection (WEAP) training, presented by a qualified archaeologist and with participation requested by Native American representative(s), is provided to all construction and managerial personnel involved with the Project. The WEAP training shall provide an overview of cultural (prehistoric and historic) and tribal cultural resources and outline regulatory requirements for the protection of cultural resources. The WEAP training can be in the form of a video or PowerPoint presentation. Printed literature (handouts) can accompany the training and can also be given to new workers and contractors to avoid the necessity of continuous training over the course of the Project.</p>	SJRRRC	Prior to Construction					
<p>BMP CUL-3 Archaeological and Tribal Monitor. Prior to issuance of grading permits, SJRRC shall retain an archaeological monitor. The archaeological monitor, working under the direct supervision of the qualified archeologist, shall be present for all ground-disturbing activities that occur in native soil within the archaeological APE. All archaeological monitors shall be familiar with the types of historical and prehistoric resources that could be encountered within the APE. Ground disturbing activities include, but are not limited to, brush clearance, grubbing, excavation, trenching, grading, and drilling. A sufficient number of archaeological monitors shall be present each workday to ensure that simultaneously occurring ground disturbing activities receive thorough levels of monitoring coverage. The qualified archaeologist shall have the ability to recommend, with written and photographic justification, the termination of monitoring efforts to</p>	SJRRRC	Prior to Issuance of a Grading Permit.					

Best Management Practice (BMP)	Responsible for Development and/or Implementation of Measure	Timing/Phase	Action(s) Taken to Implement Measure/if checked No, add Explanation here	Final Design Task Completed	Construction Task Completed	Environmental Compliance	
				Date / Initials	Date / Initials	YES	NO
<p>SJRRRC, and should SJRRRC and the Native American participants concur with this assessment, then monitoring shall cease.</p> <p>If an inadvertent discovery of archaeological materials is made during Project-related construction activities, the archaeological monitor shall have the authority to halt ground disturbing activities within 50 feet of the resources and an Environmentally Sensitive Area physical demarcation shall be constructed. The qualified archaeologist shall be notified regarding the discovery. If prehistoric or potential tribal cultural resources are identified, the interested Native American participants shall be notified.</p> <p>The qualified archaeologist, in consultation with SJRRRC (and Native American participants should the find be prehistoric), shall determine whether the resource is potentially significant as per Section 106 (that is, whether it is an historical resource, a unique archaeological resource). If avoidance is not feasible, a qualified archaeologist, in consultation with SJRRRC, shall prepare and implement a detailed treatment plan. Treatment of unique archaeological resources shall follow the applicable requirements of PRC Section 21083.2. Treatment for most resources would consist of, but would not be limited to, in-field documentation, archival research, subsurface testing, and excavation.</p> <p>No work will continue within the 50-foot buffer until the qualified archaeologist, and Lead Agencies (along with the Native American participants should the find be prehistoric) agree to appropriate treatment.</p> <p>One Native American monitor from the North Valley Yokuts Tribe and one Native American monitor from The Confederated Villages of Lisjan shall be requested to be on-site during all ground disturbing activities that occur in native soil and attendance is at the discretion of the tribes.</p>							
<p>BMP CUL-4 Inadvertent Discovery of Human Remains During Construction, and in the event of the inadvertent discovery of human remains, SJRRRC will ensure that their designated contractor shall immediately notify the county coroner and SJRRRC. If the county coroner determines the remains are Native American in origin, the Coroner shall contact the Native American Heritage Commission in accordance with Health and Safety Code Section 7050.5 subdivision c, and Public Resources Code Section 5097.98 (as amended by AB 2641). The Native American Heritage Commission shall designate a Most Likely Descendent for the remains per Public Resources Code 5097.98. Per Public Resources Code 5097.98, the landowner shall ensure that the immediate vicinity, according to generally accepted cultural or archaeological standards or practices, where the Native American human remains are located, is not damaged or disturbed by further development activity until the landowner has discussed and conferred with the most likely descendent regarding their recommendations, if applicable. If the remains are determined to be neither of forensic value to the Coroner, nor of Native American origin,</p>	SJRRRC	During Construction (in the event of inadvertent discovery of human remains).					

Best Management Practice (BMP)	Responsible for Development and/or Implementation of Measure	Timing/Phase	Action(s) Taken to Implement Measure/if checked No, add Explanation here	Final Design Task Completed	Construction Task Completed	Environmental Compliance	
				Date / Initials	Date / Initials	YES	NO
provisions of the California Health and Safety Code (7100 37 et seq.) directing identification of the next-of-kin will apply.							
Hydrology, Floodplains, and Water Quality							
BMP HYD-1	Stormwater Management and Treatment Plan. Prior to construction, SJRRC will ensure that the contractor prepares a Project specific stormwater management and treatment plan, and all aspects of the Stormwater Management and Treatment Plan are implemented during construction activities.	SJRRC	Prior to Construction.				
BMP HYD-2	Flood Protection. Prior to construction, SJRRC will ensure that the contractor prepares and implements a flood protection plan for the Project.	SJRRC	Prior to Construction.				
BMP HYD-3	Construction Stormwater Pollution Prevention Plan. Prior to construction (that is, any ground-disturbing activities), SJRRC will ensure that the contractor complies with SWRCB CGP, which requires the preparation and implementation of a SWPPP. The construction SWPPP will propose BMPs to minimize potential short-term increases in sediment transport caused by construction, including erosion control requirements, stormwater management, and channel dewatering for affected stream crossings.	SJRRC	Prior to Construction.				
BMP HYD-4	Industrial Stormwater Pollution Prevention Plan. Prior to construction of any facility classified as an industrial facility, SJRRC will ensure that the contractor will comply with existing water quality regulations. The stormwater general permit requires preparation of a SWPPP and a monitoring plan for industrial facilities that discharge stormwater from the site, including vehicle maintenance facilities associated with transportation operations. The permit includes performance standards for pollution control.	SJRRC	Prior to Construction.				
BMP HYD-5	Drainage Report. SJRRC will ensure that a Project-specific Drainage Report will be developed in coordination with the City of Stockton during final design. The Drainage Report will be prepared consistent with standards set by the City of Stockton. In addition, the Drainage Report will be utilized to prepare a Project-specific Stormwater Quality Control Plan that conforms with the requirements of the City of Stockton and County of San Joaquin Stormwater Quality Control Criteria Plan (August 2020).	SJRRC	During Final Design.				
Geology, Soils, Seismicity, Topography, and Paleontology							
BMP GEO-1	Geologic Hazards. Prior to construction, SJRRC will ensure that the contractor shall prepare a Construction Management Plan addressing how the contractor will address geologic constraints and minimize or avoid impacts to geologic hazards during construction. The plan will be submitted to SJRRC for review and approval. At minimum, the plan will address unstable soils and water and wind erosion.	SJRRC	Prior to Construction.				

Best Management Practice (BMP)	Responsible for Development and/or Implementation of Measure	Timing/Phase	Action(s) Taken to Implement Measure/if checked No, add Explanation here	Final Design Task Completed	Construction Task Completed	Environmental Compliance	
				Date / Initials	Date / Initials	YES	NO
BMP GEO-2 Geology and Soils. Prior to construction, SJRRC will ensure that the contractor will issue a technical memorandum documenting the ways in which the following guidelines and standards have been incorporated into facility design and construction: <ul style="list-style-type: none"> 2015 AASHTO Load and Resistance Factor Bridge Design Specifications and the 2015 AASHTO Guide Specifications for Load and Resistance Factor Seismic Bridge Design, or their most recent versions. 	SJRRC	Prior to Construction.					
BMP GEO-3 Implement Geotechnical Recommendations. During final design, SJRRC will ensure that a project specific Geotechnical Design Report will be prepared, which will include final geotechnical recommendations for ground improvement options and foundation, embankment, and retaining wall design for the Project.	SJRRC	During Final Design.					
BMP GEO-4 Preparation and Implementation of a Paleontological Resources Management Plan. Due to the potential for adverse effects to paleontological resources in the Project subsurface, a Paleontological Resources Management Plan (PRMP) will be prepared during final design. SJRRC will ensure that the PRMP will include provisions for paleontological monitoring (e.g., periodic spot checks) during excavations to check for the presence of the early Holocene- to late Pleistocene-age Modesto Formation, and the implementation of full-time monitoring if the early Holocene- to late Pleistocene-age Modesto Formation is observed. In the event unanticipated paleontological resources are discovered during Project related activities, SJRRC or their designated contractor will ensure that work in the immediate vicinity of the discovery is halted until it can be evaluated by a qualified paleontologist.	SJRRC	During Final Design					
Hazardous Waste and Materials							
BMP HAZ-1 Prepare a Construction Hazardous Materials Management Plan (HMMP). Prior to construction, SJRRC will ensure that an HMMP be prepared, which will outline provisions for safe storage, containment, and disposal of chemicals and hazardous materials, contaminated soils, and contaminated groundwater used or exposed during construction, including the proper locations for disposal. The HMMP shall be prepared to address the Project Study Area, and include, but not be limited to, the following: <ul style="list-style-type: none"> A description of hazardous materials and hazardous wastes used (29 CFR 1910.1200) A description of handling, transport, treatment, and disposal procedures, as relevant for each hazardous material or hazardous waste (29 CFR 1910.120) Preparedness, prevention, contingency, and emergency procedures, including emergency contact information (29 CFR 1910.38) <ul style="list-style-type: none"> A description of personnel training including, but not limited to: (1) recognition of existing or potential hazards resulting from accidental spills or other releases; (2) implementation of 	SJRRC	Prior to Construction.					

Best Management Practice (BMP)	Responsible for Development and/or Implementation of Measure	Timing/Phase	Action(s) Taken to Implement Measure/if checked No, add Explanation here	Final Design Task Completed	Construction Task Completed	Environmental Compliance	
				Date / Initials	Date / Initials	YES	NO
<p>evacuation, notification, and other emergency response procedures; (3) management, awareness, and handling of hazardous materials and hazardous wastes, as required by their level of responsibility (29 CFR 1910)</p> <ul style="list-style-type: none"> • Instructions on keeping Safety Data Sheets on site for each on-site hazardous chemical (29 CFR 1910.1200) • Identification of the locations of hazardous material storage areas, including temporary storage areas, which shall be equipped with secondary containment sufficient in size to contain the volume of the largest container or tank (29 CFR 1910.120) 							
BMP HAZ-2 Property Acquisition Phase I and Phase II Environmental Site Assessments. Prior to or during the right-of-way acquisition phase, SJRRC will ensure that Phase I Environmental Site Assessments (ESA) would be conducted in accordance with standard ASTM methodologies to characterize each parcel. The determination of parcels that require a Phase II ESA (for example, soil, groundwater, soil vapor subsurface investigations) would be informed by a Phase I ESA and may require coordination with state and local agency officials.	SJRRC	Prior to and/or During ROW Acquisition.					
BMP HAZ-3 Prepare a General Construction Soil Management Plan. Prior to construction, SJRRC will ensure that a General Construction Soil Management Plan be prepared, which will include general provisions for how soils will be managed within the Project Study Area for the duration of construction. General soil management controls to be implemented by the contractor, and the following topics, shall be addressed within the Soil Management Plan: <ul style="list-style-type: none"> • General worker health and safety procedures • Dust control • Management of soil stockpiles • Traffic control • Stormwater erosion control using BMPs 	SJRRC	Prior to Construction.					
BMP HAZ-4 Prepare Parcel-Specific Soil Management Plans and Health and Safety Plans (HASPs). Prior to construction, SJRRC will ensure that parcel-specific Soil Management Plans be prepared for known contaminated sites and LUST-adjudicated sites for submittal and approval by DTSC. The plans shall include specific hazards and provisions for how soils will be managed for known contaminated sites and LUST-adjudicated sites. The nature and extent of contamination varies widely across the Project Study Area, and the parcel-specific Soil Management Plan shall provide parcel-specific requirements addressing the following: <ul style="list-style-type: none"> • Soil disposal protocols • Protocols governing the discovery of unknown contaminants • Soil management on properties within the Project Study Area <p>Prior to construction on individual properties with LUSTs or known contaminants, a parcel-specific HASP shall also be prepared for submittal</p>	SJRRC	Prior to Construction.					

Best Management Practice (BMP)	Responsible for Development and/or Implementation of Measure	Timing/Phase	Action(s) Taken to Implement Measure/if checked No, add Explanation here	Final Design Task Completed	Construction Task Completed	Environmental Compliance	
				Date / Initials	Date / Initials	YES	NO
<p>and approval by DTSC. The HASP shall be prepared to meet OSHA requirements, Title 29 of the CFR 1910.120 and CCR Title 8, Section 5192, and all applicable federal, state, and local regulations and agency ordinances related to the proposed management, transport, and disposal of contaminated media during implementation of work and field activities. The HASP shall be signed and sealed by a Certified Industrial Hygienist, who is licensed by the American Board of Industrial Hygiene. In addition to general construction soil management plan provisions, the following parcel-specific HASP provisions shall also be implemented:</p> <ul style="list-style-type: none"> • Training requirements for site workers who may be handling contaminated material • Type of appropriate personal protective equipment required • Mitigation and monitoring measures that are protective of site worker and public health and safety <p>Prior to construction, SJRRC shall coordinate proposed soil management measures and reporting activities with stakeholders and regulatory agencies with jurisdiction in order to establish an appropriate monitoring and reporting program that meets all federal, state, and local laws for the Project and each of the contaminated sites.</p>							
<p>BMP HAZ-5 Prepare Project Construction Health and Safety Plan. Prior to construction, SJRRC will ensure the development of a Health and Safety Plan (HASP) for the overall Project to guide all construction activities. A Certified Industrial Hygienist will review this plan, based on evaluations of construction activities, the potential hazards identified, and any future assessment prepared for the Project. This HASP will contain specific procedures for encountering expected and unexpected contaminants. It will prescribe safe work practices, contaminant monitoring, personal protective equipment, emergency response procedures, and safety training requirements to protect construction workers and third parties. The plan will meet the requirements of 29 CFR 1910 and 1926, and all other applicable federal, state, and local regulations and requirements. The HASP will be prepared before the start of construction.</p>	SJRRC	Prior to Construction					
<p>BMP HAZ-6 LUST Sites and Coordination with DTSC. Prior to construction on properties with a LUST, SJRRC will ensure that coordination be required with DTSC regarding any plans specified, construction activities, and/or public outreach activities needed to verify that construction activities on properties with LUSTs would be managed in a manner protective of public health and the environment.</p>	SJRRC	Prior to Construction.					
<p>BMP HAZ-7 Halt Construction Work if Potentially Hazardous Materials/Abandoned Oil Wells are Encountered. During construction, SJRRC will ensure that contractors will follow all applicable local, state, and federal regulations regarding discovery, notification, response, disposal, and remediation for hazardous materials and/or abandoned oil wells encountered during the construction process. Construction work</p>	SJRRC	During Construction.					

Best Management Practice (BMP)	Responsible for Development and/or Implementation of Measure	Timing/Phase	Action(s) Taken to Implement Measure/if checked No, add Explanation here	Final Design Task Completed	Construction Task Completed	Environmental Compliance	
				Date / Initials	Date / Initials	YES	NO
<p>shall halt in the event of the discovery of unidentified underground storage tanks (UST), unexpected contamination, or hazardous waste or materials to allow UST decommissioning, field screening, material testing, mitigation, and contaminant management. If an unexpected release of hazardous substances is found in reportable quantities, the National Response Center must be notified by calling 1-800-424-8802, and cleanup must be coordinated with environmental agencies.</p>							
BMP HAZ-8 Pre-Demolition Investigation. Prior to the demolition of any structures constructed prior to the 1970s, SJRRC will ensure that a survey be conducted for the presence of hazardous building materials, such as ACMs, LBPs, and other materials falling under the Universal Waste requirements. The results of this survey shall be submitted to SJRRC and applicable stakeholders, as deemed appropriate by SJRRC. If any hazardous building materials are discovered, prior to demolition of any structures, a plan for proper removal shall be prepared in accordance with applicable OSHA and San Joaquin County Environmental Health Department requirements. The contractor performing the work shall be required to implement the removal plan. If asbestos-related work is required, the contractor or their subcontractor shall be required to possess a California Contractor License (Asbestos Certification). Prior to any demolition activities, the contractor shall be required to secure the site and ensure utilities are disconnected.	SJRRC	Prior to Demolition of Any Structures.					
BMP HAZ-9 Limit Use of Extremely Hazardous Materials Near Schools During Construction. During construction, SJRRC will ensure that the contractor shall not handle an extremely hazardous substance (as defined in California Public Resources Code Section 21151.4) or a mixture containing extremely hazardous substances in a quantity equal to or greater than the state threshold quantity specified pursuant to subdivision (j) of Section 25532 of the Health and Safety Code within 0.25 mile of a school. The contractor would be required to monitor all use of extremely hazardous substances.	SJRRC	During Construction					
Air Quality							
BMP AQ-1 Compliance with EPA's Tier 4 Exhaust Emission Standards. During construction, SJRRC will ensure that all off-road diesel-powered construction equipment greater than 50 horsepower shall comply with EPA's Tier 4 Final exhaust emission standards (40 CFR Part 1039). In addition, if not already supplied with a factory equipped diesel particulate filter, all construction equipment shall be outfitted with Best Available Control Technology devices certified by CARB. Any emissions control device used by the contractor shall achieve emissions reductions that are no less than what could be achieved by a Level 3 diesel emissions control strategy for a similarly sized engine as defined by CARB regulations.	SJRRC	During Construction.					
BMP AQ-2 Fugitive Dust. Prior to issuance of a grading or building permit, SJRRC shall submit the dust control plan to SJVAPCD for review and approval	SJRRC	Prior to Issuance of Grading Permits.					

Best Management Practice (BMP)	Responsible for Development and/or Implementation of Measure	Timing/Phase	Action(s) Taken to Implement Measure/if checked No, add Explanation here	Final Design Task Completed	Construction Task Completed	Environmental Compliance	
				Date / Initials	Date / Initials	YES	NO
<p>and shall provide the plan to the County to demonstrate compliance with SJVAPCD Regulation VIII (Fugitive PM10 Prohibition). The plan shall address construction-related dust as required by SJVAPCD.</p> <p>BMP AQ-3 Compliance with Stockton Community Emissions Reduction Program. During final design, SJRRC will review the Stockton Community Emissions Reduction Program (CERP) and incorporate emission reduction strategies into the Project, as feasible. The emissions reduction strategies in the Stockton CERP will include, but will not be limited to, enhancing community participation in land use processes, the deployment of zero and near-zero emission Heavy-Heavy Duty (HHD) trucks, HHD truck rerouting analyses, reducing HHD truck idling, and incorporating vegetative barriers and urban greening.</p>	SJRRC	During Final Design.					
<p>BMP AQ-4 Vegetative Barriers and Urban Greening. During final design, SJRRC will evaluate the feasibility of incorporating vegetative barriers and urban greening as a measure to potentially reduce air pollution exposure on sensitive receptors in the Project Study Area. Examples of vegetative barriers will include, but are not limited to, trees, bushes, shrubs, or a mix of these types of vegetation.</p>	SJRRC	During Final Design.					
Noise and Ground Borne Vibration							
<p>BMP NV-1 Noise Control Plan. Prior to construction, SJRRC will ensure that a noise control plan be prepared that will incorporate, at a minimum, the following best practices into the construction scope of work and specifications to reduce the effects of temporary construction-related noise on nearby noise-sensitive receptors. The Noise Control Plan will be developed in coordination with the City of Stockton in compliance with City standards. Components of the Noise Control Plan will include, but not be limited to, the following:</p> <ul style="list-style-type: none"> • Install temporary construction site sound barriers near noise sources. • Use moveable sound barriers at the source of the construction activity. • Avoid the use of impact pile drivers at night and, where possible, near noise-sensitive areas or use quieter alternatives (for example, drilled piles) where geological conditions permit. • Locate stationary construction equipment as far as possible from noise-sensitive sites. • Re-route construction-related truck traffic along roadways that will cause the least disturbance to residents. • Use low-noise emission equipment. • Implement noise-deadening measures for truck loading and operations. • Line or cover storage bins, conveyors, and chutes with sound-deadening material. • Use acoustic enclosures, shields, or shrouds for equipment and facilities. 	SJRRC	Prior to Construction.					

Best Management Practice (BMP)	Responsible for Development and/or Implementation of Measure	Timing/Phase	Action(s) Taken to Implement Measure/if checked No, add Explanation here	Final Design Task Completed	Construction Task Completed	Environmental Compliance	
				Date / Initials	Date / Initials	YES	NO
<ul style="list-style-type: none"> Use high-grade engine exhaust silencers and engine-casing sound insulation. Minimize the use of generators to power equipment. Limit use of public address systems. Grade surface irregularities on construction sites. Monitor and maintain equipment to meet noise limits. Implement noise monitoring during construction to ensure noise limits are met. Maintain active coordination with the City to identify potential options to retrofit residences closest to the construction with noise reduction window technology. Establish an active community liaison program to keep residents informed about construction and to provide a procedure for addressing complaints. 							
BMP NV-2 Vibration Control Plan. Prior to construction, SJRRC will ensure that a vibration control plan is prepared and will incorporate, at a minimum, the following best practices into the construction scope of work and specifications to reduce the effects of temporary construction-related vibration on nearby vibration-sensitive land uses will be prepared and implemented. <ul style="list-style-type: none"> Avoid the use of impact pile drivers where possible near vibration-sensitive areas or use alternative construction methods (for example, drilled piles) where geological conditions permit. Avoid vibratory compacting/rolling in close proximity to structures. Require vibration monitoring during vibration-intensive activities. In the event building damage occurs due to construction, repairs would be made, or compensation would be provided by SJRRC.	SJRRC	Prior to Construction.					
Biological Resources							
BMP BIO-1 Biological Monitor and Environmental Awareness Training. If deemed necessary, SJRRC will ensure that a qualified biologist(s) will monitor activities that could affect special-status species and/or sensitive biological resources within the BSA. The amount and duration of monitoring will depend on the activity and will be determined by the qualified biologist. The duties of the qualified biologist shall comply with all agency conditions outlined in Project-related permits, but could include activities such as clearance surveys, flagging or fencing off environmentally sensitive areas for avoidance, and construction monitoring. The biological monitor will conduct preconstruction clearance surveys for special status species prior to the start of Project activities and implement all biological resources avoidance and minimization measures and applicable SJMSCP Incidental ITMMs. In addition, a qualified biologist shall be retained to conduct mandatory contractor/worker awareness training for construction personnel. The awareness training will be	SJRRC	During Construction (if deemed necessary by Project biologist)					

Best Management Practice (BMP)	Responsible for Development and/or Implementation of Measure	Timing/Phase	Action(s) Taken to Implement Measure/if checked No, add Explanation here	Final Design Task Completed	Construction Task Completed	Environmental Compliance	
				Date / Initials	Date / Initials	YES	NO
<p>provided to all construction personnel to brief them on the identified location of sensitive biological resources, including how to identify species (visual and auditory) most likely to be present, the need to avoid adverse effects on biological resources (for example, plants, wildlife, and jurisdictional waters), and to brief them on the penalties for not complying with biological mitigation requirements. If new construction personnel are added to the Project, SJRRC, will ensure that the mandatory training be conducted by the contractor prior to starting work on the Project.</p> <p>BMP BIO-2 Migratory Bird and Raptor Surveys and Nest Avoidance. Prior to and during construction, SJRRC will ensure that if vegetation clearing and/or construction activities are scheduled to occur during the migratory bird nesting season (February 1 to September 15), then pre-construction surveys to identify active migratory bird and/or raptor nests will be conducted by a qualified biologist no more than 7 days prior to construction initiation. If active nest sites are identified in the survey area, a no-disturbance buffer will be established for all active nest or burrow sites prior to commencement of any Project-related activities. The size of the no-disturbance buffer will vary and will be determined by a qualified biologist based on the species, activities near the nest, and topographic and other visual barriers, or as otherwise required through the SJMSCP (as described in SJMSCP ITMM 5.2.4.17, 5.2.4.18, and 5.2.4.19). A qualified biologist will monitor any active nest until the nest is deemed inactive and the no disturbance buffer can be removed. The amount and duration of the monitoring will be determined by a qualified biologist and will depend on the same factors described above when determining the size of the no-disturbance buffer.</p>	SJRRC	Prior to and During Construction					
<p>BMP BIO-3 Construction BMPs at Mormon Slough. During final design, SJRRC will ensure that construction best management practices will be employed on-site to prevent erosion or runoff of loose soil and dust. Methods will include the use of appropriate measures to intercept and capture sediment prior to entering aquatic resources, as well as erosion control measures along the perimeter of disturbance areas to prevent the displacement of fill material. All best management practices shall be in place prior to initiation of Project-related activities and shall remain until activities are completed. All erosion control methods will be maintained until all onsite soils are stabilized.</p>	SJRRC	During Final Design					
<p>BMP BIO-4 Environmentally Sensitive Area Fencing at Mormon Slough. Prior to and during construction, SJRRC will ensure that work areas will be reduced to the smallest practicable footprint throughout the duration of construction activities. Prior to any ground-disturbing activity, SJRRC will ensure that staging areas for construction equipment be stored in areas that minimize adverse effects on sensitive biological resources, including aquatic resources. Staging areas (including any temporary material storage areas) will be located in areas that will be occupied by permanent facilities, where practicable. Equipment staging areas will be identified on</p>	SJRRC	Prior to and During Construction					

Best Management Practice (BMP)	Responsible for Development and/or Implementation of Measure	Timing/Phase	Action(s) Taken to Implement Measure/if checked No, add Explanation here	Final Design Task Completed	Construction Task Completed	Environmental Compliance	
				Date / Initials	Date / Initials	YES	NO
<p>final project construction plans. SJRRC, will ensure to flag and mark access routes to restrict vehicle traffic within the Project footprint to established roads, construction areas and other designated areas.</p> <p>BMP BIO-5 Restoration of Temporarily Affected Areas. During construction, SJRRC will ensure that all exposed and/or disturbed areas resulting from Project-related activities will be returned to its original contour and grade, and restored using locally native grass and forb seeds, plugs, or a mix of the two. Areas shall be seeded with species appropriate to their topographical and hydrological character. Seeded areas shall be covered with broadcast straw and/or jute netted, where appropriate.</p>	SJRRC	During Construction					
<p>BMP BIO-6 Vehicle Access and Speed Limits. During construction, SJRRC will ensure that all vehicle traffic associated with Project-related activities will be confined to established roads, staging areas, and parking areas. Vehicle speeds will not exceed 15 miles per hour on access roads with no posted speed limit to avoid collisions with special-status species or habitats. Additionally, maintenance or refueling of vehicles or equipment must occur in designated areas and/or a secondary containment, located away from aquatic resources.</p>	SJRRC	During Construction					
<p>BMP BIO-7 Storage and Disposal of Excavated Materials. During ground-disturbing activities, SJRRC may temporarily store excavated materials produced by construction activities in areas at or near construction sites within the Project footprint. Where practicable, SJRRC, will return excavated soil to its original location to be used as backfill. Any excavated waste materials unsuitable for treatment and reuse would be disposed at an off-site location, in conformance with applicable state and federal laws. Stockpiled, disassembled, and hazardous construction material should be stored at least 100 feet from aquatic resources, where possible.</p>	SJRRC	During Construction					
<p>BMP BIO-8 Prevention of Invasive Species During Construction. Prior to and during construction, SJRRC will ensure that all construction equipment be cleaned when entering work areas within or adjacent to Environmentally Sensitive Areas, and the Project Study Area be inspected for the presence of invasive weeds prior to and during construction to detect introduction or spread. The use of eradication strategies and the incorporation of recommended measures, as needed, to avoid the inadvertent spread of invasive weeds in association with the Project will also be incorporated during construction activities.</p>	SJRRC	Prior to and During Construction					

Table R-2. Mitigation Measures

Mitigation Measure (MM)	Responsible for Development and/or Implementation of Measure	Timing/Phase	Action(s) Taken to Implement Measure/if checked No, add Explanation here	Final Design Task Completed	Construction Task Completed	Environmental Compliance	
				Date / Initials	Date / Initials	YES	NO
Land Use and Planning							
MM LU-1	General Plan Amendment. During final design and prior to construction, SJRRC will coordinate with the City of Stockton to ensure that the City of Stockton's General Plan is amended to reflect the land use designations consistent with what has been identified by the Project	SJRRC	During Final Design.				
Relocations and Real Property Acquisition							
MM RLC-1	Relocation Assistance. During final design, SJRRC will ensure that the loss of private industrial property be mitigated by payment of fair market compensation and provision of relocation assistance in accordance with the Uniform Relocation Assistance and Real Property Acquisition Policies Act. For these non-residential displacements, the following would be provided to business operators: <ul style="list-style-type: none"> • Relocation advisory services • Minimum 90 days written notice to vacate prior to requiring possession • Reimbursement for moving and reestablishment expenses 	SJRRC	During Final Design.				
MM RLC-2	Property Ownership and Agreement Coordination Efforts. During final design SJRRC will ensure coordination with the City and UP to determine appropriate property ownership and establish agreements prior to the ROW acquisition process. Options to address property ownership may include, but not be limited to: <ul style="list-style-type: none"> • Continuing City ownership and maintenance of the street corridors with permanent easements required for the railroad corridor; or • SJRRC and/or railroad company ownership and maintenance of the properties within the railroad corridor with either SJRRC or private ownership of adjacent remnant parcels. Public Utility easements would be necessary for this option. 	SJRRC	During Final Design.				
Noise and Ground Borne Vibration							
MM NV-1	Reductions for Severe Noise Effects. Prior to construction, SJRRC will ensure that sound insulation improvements will be installed in the residential properties that would be exposed to severe noise impacts. The goal of these improvements is to reduce the interior noise levels to below the 45 dBA Ldn noise threshold set by the U.S. Department of Housing and Urban Development. In addition to the façade improvements a form of fresh air exchange must be maintained. The air exchange can be achieved by installing an air conditioning unit for the residence. Sound insulation is normally only used on older dwellings with single-paned windows or in buildings with double-paned windows that are no longer effective because of leakage. Sound insulation testing would be conducted to determine the appropriate measures to improve the outdoor to indoor sound level reduction, such as improved windows, doors or vents.	SJRRC	Prior to Construction.				

Mitigation Measure (MM)	Responsible for Development and/or Implementation of Measure	Timing/Phase	Action(s) Taken to Implement Measure/if checked No, add Explanation here	Final Design Task Completed	Construction Task Completed	Environmental Compliance	
				Date / Initials	Date / Initials	YES	NO
Biological Resources							
MM BIO-1	Compliance with SJMSCP. Prior to and during construction, SJRRC will ensure compliance of the Project with all applicable standards and regulations set forth in the SJMSCP, as well as all applicable Incidental Take Avoidance Measures identified within the SJMSCP.	SJRRC	Prior to and During Construction.				
MM BIO-2	National Oceanic and Atmospheric Administration Consultation. Prior to the finalizing the EA, SJRRC will implement all commitments and avoidance and minimization measures identified in the National Marine Fisheries Service Endangered Species Act Section 7(a)(2) Concurrence Letter and Magnuson-Stevens Fishery Conservation and Management Act Essential Fish Habitat Response issued for the Project on May 17, 2021 (Appendix M). SJRRC will ensure that consultation with the NOAA Fisheries Service for Project effects on designated Critical Habitat for Central Valley steelhead and EFH for Chinook Salmon are finalized and any findings and/or determinations incorporated. SJRRC will implement a crossing type for the structure spanning the Mormon Slough that will retain a natural substrate stream channel bottom as part of this consultation. In addition, SJRRC will avoid the use of rip-rap to armor the channel at this location.	SJRRC	Prior to the Finalizing of the EA.				
MM BIO-3	Mitigation for Aquatic Resources. During final design, SJRRC will ensure that temporary Project impacts effects on aquatic resources associated with the Mormon Slough will be restored in-place and permanent Project effects on aquatic resources to the Mormon Slough will be mitigated at a minimum 1:1 ratio. Mitigation can include on-site restoration, in-lieu fee payment, or purchase of mitigation credits at an agency-approved mitigation bank.	SJRRC	During Final Design.				
MM BIO-4	Compliance with Permitted Mitigation Measures. Prior to construction, SJRRC will obtain all required permits and authorizations for Project impacts effects to on the Mormon Slough, which may include the preparation and submittal of the following applications: <ul style="list-style-type: none"> • Pre-Construction Notification to USACE to use a Nationwide Permit for any Project impacts to Waters of the US subject to Section 404 of the federal Clean Water Act. • Water Quality Certification Application to Central Valley RWQCB for any Project impacts to Waters of the U.S. subject to Section 401 of the federal Clean Water Act. • Streambed Alteration Agreement Notification to CDFW 	SJRRC	Prior to Construction.				
MM BIO-5	Preparation of Formal Jurisdictional Delineation. During final design, SJRRC will ensure that a formal field-delineation of aquatic resources the Project, to be verified by the regulatory agencies, will be conducted in order to confirm the exact extent of jurisdictional resources impacted by the Project.	SJRRC	During Final Design.
